Eleven years is not so very long a space of time, yet it was long enough to have made many lasting friendships both in and out of business and the severance of business relations with our many customers is not done without many regrets.

We trust that in the years to come good fortune will favor you all.

Yours truly,

The Tofield Farmers' Supply Co.

TOFIELD UNITED SUNDAY SCHOOL HOLDS ANNUAL RALLY DAY SERVICE

Sunday morning last was the occasion of the annual Rally Day Service of the United Sunday School. Each year at this date the scholars are promoted and rewarded for their attendance and behavior for the year. Some twenty-four scholars received the gold pins, wreaths and bars.

The programme was an interesting one. Mrs. Firth gave a word picture entitled "The boy who was a good Sheperd." Mrs. Lerbekmo told about two men in New York City who were real "followers of Christ." Miss Cooper followed with a sketch of the life and work of Mary Slesson, missionary to Calabar, Africa.

All were followed with keen interest by the scholars and adults alike, and it is to be deplored that the attendance was so small for such an occasion in the community life of Tofield.

Visitors always welcome at 11 a. m. Sunday.

U. F. W. A. NOTES

The regular meeting was held at the home of Mrs. Booth, eighteen members were present.

Mrs. Lee read the health bulletin for September also an interesting little booklet on prevention and care of infantile paralysis.

There was a round table talk on altering patterns and some valuable hints were given. Mesdames Ball Williams, Gray, Munro, Johnston and Cookson served lunch.

The next meeting will be on Oct 16 at the home of Mrs. Ball. The roll call to be answered with favorite or helpful verse. Mrs. McGinitie will give a paper on "How to keep the boys on the farm." Mesdames Geo. and Jas. Francis, Dodds, McAllister, W. Lee and Bowick will serve tea.

If any member has not left their contribution for the box to be packed for "Sunshine" will they kindly do so by Saturday Oct. 5th.

MEET MR. EVERETT RUFF AT THE VARIETY ON TUESDAY

All the mystifying tricks of the magicians trade will be presented at the Variety Theatre on Tuesday evening next. Mr. Ruff comes to Tofield from numerous successful appearances in the larger centres and those desiring an evening's entertainment out of the ordinary will be well pleased next Tuesday.

Young folk, old folk and those in between will be amazed and delighted at his presentation and will have fun, entertainment and education for the very moderate admission charge.

OLD-FASHIONED TYPE GIRL STILL POPULAR

An old fashioned girl with all of the old fashioned virtues steals hearts away. She is Mary Brian, the hazel-eyed little girl from Texas, who has the feminine lead in Paramount's "Partners in Crime," the Walace Beery and Raymond Hatton melo-dramatic comedy, which will be shown at the Variety on Saturday.

Mary Brian is old fashioned if it be old fashioned in these roaring times of flappers and sirens to be quiet, sweet, modest and womanly, as well as uncommonly beautiful. To be sure she does not wear hoop skirts or a bustle. Nor do her skirts trail the floor and conceal her shapely ankles and calves.

To those extreme modernists who insist that the jazz girl is alone attractive to men, a trip to the Variety Theatre to see "Partners in Crime" is recommended. Having seen Miss Brian, as well as a thrilling picture, they will have looked upon the type of girl that women want for a daughter and men want for a wife.

BAILIFF'S SALE

Under and by virtue of a warrant to sieze, given by Minnie Arona Wood et al to the Sheriff, Edmonton Judicial District and to me directed against the goods and chattels of Edward Siebel named in the said warrant, I have siezed the following goods, namely

1 dining room suite, 2 beds, 1 cot, 1 kitchen table, 6 kitchen chairs, 1 kitchen cabinet, 1 large arm chair Which I shall expose for sale on Saturday the 12th day of October, 1929, at the corner of Main Street, and Third avenue, Tofield, Alta., at the hour of two p.m.

Dated August 19th, 1929.

JOHN RAE, Sheriff.
N. S. SMITH, Bailiff.

A Little Bully Is She?

Well, then, bring the car into us. Maybe not much wrong with it—just needs a little expert care. The cost is slight, but the satisfaction is great.

For comfort convenience and SAFETY all cars should be checked over occasionally. Do it now.

Important Public Notice

WE take pleasure in announcing that we have been successful in securing the franchise in this territory for "ROYAL YORK", tailored to-measure clothes.

This new line of tailored to-measure suits and overcoats is made by Canada's oldest clothing house to meet the increasing demand for a high grade garment at $27.50.

At this price we believe we offer the public a dollar for dollar value never before reached.

We can guarantee that the finest of woollen fabrics in the newest and most popular colors constitute the materials used in making of "ROYAL YORK" suits and overcoats. Only the best of workmanship will be found in their construction.

We invite you to come to our store and inspect the new "ROYAL YORK" models and samples.

Also the C.N.R. promises good service. The C.P.R. service is good. We have orders for several carloads of poultry from the States at good prices.

Ship by October 25th for Thanksgiving. Good prices for good poultry. Don't send any turkeys under 11 pounds and fat. Will publish prices later.

No. 1206 Douglas Street, VICTORIA, B.C.

LOCAL AND PERSONAL

Mrs. McKerston of Edmonton is visiting her daughter Mrs. Abbott.

Miss Mamie Wood visited here over Sunday, also Miss Ardis Wood.

Mrs. McCaulley, Mrs. Innis, and Mrs. E. W. Rogers motored to Lamont on Tuesday to visit Mrs. Kieth McIntosh and baby.

Mr. Archie Evenson spent the week end at the Jubb home.

Mr. and Mrs. Christopher of Calgary spent a few days at the Carr home.

Mrs. McLaughlin and Mrs. Calvert motored to Edmonton one day last week.

Miss Neva Wood spent Thursday in the city.

Mr. Stevenson of Nebraska is visiting his sister Mrs. Jacobs sr.

Mrs. Stevenson left for Fall City Nebraska on Thursday morning after spending a couple of months with her daughter Mrs. Burchard.

The Eastern Star held a farewell party for Dr. and Mrs. McClurg at the Abbott home on Tuesday evening.

A pleasant birthday party was held in honor of Mrs. C. M. Coombes last [illegible], when a number of her friends gathered at her home. Mrs. Coombes was the recipient of a handsome rocking chair.

Mr. A. M. Matheson M.L.A. will be in Tofield on October 17th and will address a meeting in the Town Hall under the auspices of the U.F.A. at 8.00 p.m. Subject "Economics." A cordial invitation is extended to all who wish to attend.

AMISK CREEK

The Ladies' Aid will hold a Lutefisk dinner and sale of fancy work at the church on October 16th (not the 17th as announced last week) but Friday of next week. The dinner will be served at twelve o'clock and the sale will follow immediately after. Everyone is welcome.

[illegible] Berg left on Wednesday to commence school at the [illegible] College in Camrose. She is taking a business course this year.

Mrs. E. A. Moen, and Mrs. Louise Olson from Shonts and her niece Miss T. Berg, and Mrs. Flaaten held a quilting bee at Mrs. P. C. Moen's on Friday of last week.

Mr. and Mrs. E. A. Moen and family were guests at the J. Jacobson [illegible] north of Tofield last Sunday.

Tora Haugen left last week for Camrose where she is attending school this winter, taking grade ten.

Mrs. R. O. Berg and children were dinner guests at the E. Pearson home last Sunday.

The Young People's meeting at the church last Sunday evening was very well attended. Election for committee was held. Hilmar Moen was elected president and Lillian Patterson secretary treasurer, Alice Haugen, vice-president.

Mr. and Mrs. J. Nilson visited at the Mrs. J. Earren home in Bardo last Sunday.

Mike Johnson from Viking was a visitor at the A. Patterson home on Sunday.

Mr. and Mrs. N. Sand and daughter from Edmonton, Hogan Lund from Viking and Arthur Haugen were visitors at the P. O. Flaaten home last Sunday.

Mr. A. Erickson and Mr. and Mrs. O. C. Blackburn motored to Edmonton last Monday.

Mr. L. Olson and Miss Berg were visitors at the P. O. Flaaten home on Saturday.

LINDBROOK

Messers Glenn, Lindgren and Sullivan shipped a carload of sheep from here this week. The livestock pool also taking some hogs and cattle the [illegible].

The store truck also continues to haul stock to the city, so it looks as if the farmers are giving their forage supplies the once over and acting accordingly.

Mr. Leslie Rogers shipped a car of wheat from here this week. Lucky fellow Leslie to have so much on a year like this.

Mr. Ernest Johnson of the firm of Henry Birks and Sons, Jewellers, Edmonton, came down for a shooting trip with his friend, Mr. L. Hooper whilst here they stayed with Mr. L. Hooper's parents on their farm here.

Miss A. Spende and Harder [illegible] of Lindbrook and Westlake Schools respectively spent the week end in Edmonton.

We regret that we have no Ladies' [illegible] to report this week, whats wrong? Surely now that the crop season is over etc. etc., there's time for them now; as for trying to induce the menfolk to indulge in a stag smoker it seems hopeless. Come on some one start something even if its a murder, robbery, or suicide, anything to us something to write about.

LAKE SHORE

Mr. and Mrs. E. Jones were visitors in the district over the week end.

Rally day was observed on Sunday at the school house. A large number were present and the school was filled to capacity. Sunday School will be held at two o'clock next Sunday and church service at three o'clock.

The Misses Pearl and Edna Gray visited at the home of their sister Mrs. Lester Noland on Sunday.

Mrs. Tom Schultz of Deville visited with relatives here on Saturday.

Mr. and Mrs. Eaton were visitors at the J. H. Johnston home on Sunday of last week.

HALLOWE'EN PARTY NOV. 1ST.

The Ladies Aid are holding a Hallowe'en party in the new school house on Friday evening Nov. 1st. Everybody invited.

FURNITURE SALE TO BE HELD ON SATURDAY

On Saturday October 12th Tofield will witness one of its largest furniture sales for some time, when the effects of E. Siebel will be sold and the household effects of Dr. McClurg. There will also be a community sale.

Here is your chance to get some real good furniture.

T. O. Ball will be the auctioneer for the sales.

Mr. R. O. Berg and B. Ness motored to the Lamont district last Monday to see if he could obtain potatoes.

Mr. E. A. Moen and G. Flaaten are shipping hogs to the Pool, today, Tuesday. Mr. Carlisle is around with his big truck to take them into Tofield, so it is very handy for the farmers.

Mr. and Mrs. J. Nilson, Mrs. R. O. Berg and Alice and Arnold visited at the P. O. Flaaten home last Monday and helped to finish a quilt for the Ladies' Aid.

Mrs. Margaret Hislop temperance speaker will speak at our school house next Sunday, Oct. 13th. Everybody welcome so let's have a full house.

Miss Viola Lee spent a few days in the city last week.

Miss Martha Soma underwent an operation for appendicitis at the St Mary Hospital in Camrose last Saturday. The reports are very satisfactory.

Mr. and Mrs. Geo. Lawson and son Martin, Mr. and Mrs. Roy Lee visited at the Harold Smith home in Camrose on Sunday.

Mr. James Ratigan while motoring through from Edmonton to Calgary stopped off on Saturday and visited his sister, Mrs. J. H. Ingram.

Mrs. L. Wildman, Misses Mildred Purcell, Lillian Carlisle and Messrs Jason Henderson and Angus Mitchell motored to Camrose Sunday. Mrs. Wildman remained at the hospital.

Mr. and Mrs. C. Coombes and family and Mrs. E. McMullen motored over to the Bram home near Bawlf on Sunday and spent the day visiting returning home in the evening.

Miss Lillian Carlisle is assisting Mrs. Emmar Eide of Bardo with her house work.

Mrs. W. A. Mitchell spent Monday and Tuesday in Camrose, staying with her sister Mrs. Wildman.

Mr. and Mrs. Herman Lawson motored to Camrose on Tuesday, they were accompanied by Miss Inez Soma.

Mr. and Mrs. Barnes are hauling lumber and sand preparing to build an addition on Mr. Hull's house, where they will reside to help care for Mrs. Barnes, parents of Mr. and Mrs. Hull.

Mrs. Lillie Wildman was operated on for gall stones at the St. Mary's Hospital in Camrose Monday. She is recovering favorably.

Some fifteen friends of Stanley Sears pleasantly surprised him on Tuesday evening, to help him celebrate his sixteenth birthday. Whist games and music, followed by the cutting of the birthday cake and other refreshments rounded out a jolly evening.

Several of the farmers are taking their wheat to Mundare to grind into flour. Among those who have gone are: Martin Hagen, Mr. Johansen, A. Kindley, M. Erickson, Emil Rude and Monrad Finseth. Reports are that they are very well satisfied with the flour.

Miss Ida Austmo and Bennie Finseth of Ryley visited with Mrs. Alice Finseth on Monday.

KINGMAN

A. C. Soma motored to Edmonton on Monday.

D. M. Thompson was a business visitor in Camrose on Tuesday.

Mrs. Setterlund of Daysland is visiting with her daughter Mrs. A. Asp.

Mrs. Ed Thompson and daughter Ida motored to Edmonton on Monday, returning on Tuesday.

Mr. and Mrs. A. Wideman and family left on Friday for Michigan where they will make their home.

A number of Kingmanites were the guests of Mr. and Mrs. Henry Bray of Bittern Lake on Saturday evening.

Tom Sutton and Harry Erickson spent the week end in Edmonton.

Mr. and Mrs. T. Welsh entertained a number of young people at their home on Saturday evening and an enjoyable time was had by all.

Mr. and Mrs. John Ness of Edmonton were the guests of Mr. and Mrs. T. Horte on Sunday.

Mr. and Mrs. T. Welsh and family motored to Edmonton on Sunday.

Mr. and Mrs. W. McIntosh visited with Mr. and Mrs. T. Horte on Sunday evening.

Mr. Gimley of Edmonton spent the week end with Mr. and Mrs. W. Hartchen.

Mr. and Mrs. W. Jardie were the guests of Mr. and Mrs. W. McPhedran on Sunday.

Mr. R. Mosier motored to Kingman from Daysland on Sunday.

BARDO

The Bardo U. F. W. A. held an interesting meeting in the basement of the Church on Friday afternoon. Mayor Hughes of Vegreville, was present and gave an interesting lecture on Poultry. A delicious lunch was served at the close of meeting.

Edward Steen, Mrs. Steen and Mrs. Clara Jevening were Edmonton visitors on Saturday.

Miss Betsy Ness of the University of Alberta visited her home over the week end.

Miss Anna Jevning of Edmonton, visited her home here on Sunday.

Miss Hannah Jensen returned from Edmonton where she has been for some time on Friday.

The Hagen family, visited with Mr. and Mrs. Nilson of Ryley on Sunday.

Mr. and Mrs. Stronstad of Ryley, Mr. and Mrs. Selmer Johnson and Mr. and Mrs. Kindley were dinner guests at the Iver Moen home on Sunday.

Mr. and Mrs. E. Rude and family visited at the Jacobson home on Sunday.

Mrs. Emma Eide visited at the Rude's over the week end.

The Bardo Ladies' Aid will hold their annual dinner and sale at the Bardo church on Thursday, October 24th.

THE YOUNG PEOPLE'S CORNER

The Young Peoples' Society held their regular meeting in the basement of the church on Monday evening.

The president, Marion Cooper, was in the chair.

The meeting opened with the singing of a hymn, followed by a devotional talk given by Norman Scott. The secretary then read the minutes and these were adopted.

A letter was read from Mr. Beckman of the U. of A. stating that the only dates open for his lecture were October 24 and 25th. It was decided to have him down as early in November as possible. The members ember as possible.

The members were assigned to their respective groups under the conveners, Stella Clement, Thelma Noland and Jack Cookson.

A hike was suggested for the next meeting, but this was left in the hands of A group under Jack Cookson.

The annual conference of young people (i.e. Junior C.G.I.T., Senior C.G.I.T., Trail Rangers, Tuxis and Young Peoples' Society) was the next topic of discussion. This conference was held at Viking last year and was a decided success. It is now Tofield's turn and to make this possible the homes would have to take one or more delegates and entertain them from Friday evening to Monday morning. This question was discussed and Lela Clement and Horace McHeffey were appointed to see the other clubs and find out how many of the members could entertain delegates from other towns for this period. This part of the business was then left over to the next meeting. Those who are willing to take one or more delegates will please communicate with the above committee.

The practical part of the meeting was, taken up by Stella Clement Thelma Noland, Marion Cooper, Bert Swift and Jack Cookson, who all told Roman legends. These proved to be educational, entertaining and humorous.

At the close of the meeting the dues for October were paid.

The executive committee did not meet and plan the program for the remaining two months in the first quarter, but will do so in the coming week, and as soon as it is ready will have it published.

Now, a word to the wise, for the members. These meetings are billed to start at eight o'clock. This does not mean fifteen or twenty minutes after, so lets all be on time next monday.

STUBBLE TREATMENT FOR OATS

(Experimental Farms Note)

Whether to fall plough spring plough, or cultivate wheat stubble before seeding as a preparation for oats is a question often uppermost in the minds of grain growers. Many growers have worked out this problem to their own satisfaction and are convinced that a certain method best suits their particular conditions.

At the Dominion Experimental Scott, these methods have been tested for 14 years. The lowest yield has been obtained following fall ploughing. Three bushels more have been obtained by spring cultivation and the highest average yield of 50 bus. per acre has been obtained by spring ploughing. Invariably the spring ploughed land gives a much cleaner crop and this fact has undoubtably influenced the yield. Ploughing was four inches deep in both cases. The soil was a silty clay loam. The most common weeds were the Pigweed and Wild Buckwheat. It should also be remembered that these conditions are associated with an average precipitation of approximately 13.25 inches.

These results do not necessarily apply to conditions which materially differ from those already stated. Where the soil and climate differs it would be wise to draw definite conclusions from the above, and it would be preferable to consult your nearest Experimental Farm.

HEALTH SERVICE Of The CANADIAN MEDICAL ASSOCIATION

THE HEART

The heart is the most important organ which acts as a pump and thus keeps the blood moving throughout the body. Any unusual condition of one part or organ of the human body may result in the upset of other organs, such as the heart, with perhaps some permanent damage.

Pain in the region of the heart does not always mean heart disease. It may be due to some heart condition, but it is much more frequently caused by some condition of the stomach, such as improper digestion of food. Usually the first symptom of the heart's being below par is shortness of breath on slight exertion.

In old age, it is not unusual to find that the heart is not doing its work as well as it did. This part of the general wearing out of the tissues, and means that life must be so regulated that neither at work nor at play is the heart given more to do than it can accomplish without exhaustion. Persons, young or old, who have a weakened or damaged heart, can live long lives of usefulness, providing they avoid doing such things, as heavy lifting, which throw a sudden strain on the heart. They must also avoid those activities which cause shortness of breath or pain, always stopping immediately to rest when symptoms appear. Exercise in the form of work or play which does not cause symptoms is usually of benefit.

The most common cause of heart disease in young people is infection. The germ which settle down in diseased tonsils, adenoids and teeth very often travel around the body. They may, and very frequently do, attack the heart. The heart may also suffer from the germs and the poisons produced by the germs in such diseases diphtheria, scarlet fever and influenza. Damage to the heart is comparatively common result of acute rheumatism. Syphilis is also an infection which is very liable to attack the heart and blood vessels. The removal of infected parts, such as diseased tonsils and the avoidance of infection are the basis of the prevention of heart disease.

Questions, concerning Health, addressed to the Canadian Medical Association, 184 College St. Toronto, will be answered personally by a letter.

MODERATELY ACTIVE HAY DEMAND

(Market Examiner, Oct. 3rd.)

Country point buyers are finding the hay demand moderately active, but they are having a difficult time, in most cases, to get supplies delivered, although some of them report that they are getting all they need. Those who only receive occasional loads, report that their difficulty in getting baled supplies, for the farmers are harvesting and doing fall ploughing, with the result that the hay shipments are held back. The quality of the stacks offered is [illegible] especially in the southern and central parts of the province. There appears to be a large quantity of hay on hand in the stacks on many farms, but the trouble is to get it baled, for it cannot be shipped by the carload when it is loose.

Prices are slightly higher this week. Upland is reported as bringing $12 @ $12.50 this [illegible], as compared with $11 @ $12 last week. Timothy is up $1.00 per ton, being now $19 per ton in place of $18.

At the Calgary hay market, [illegible] deliveries are made by the wagon [illegible] are said to be very slow in opening up. It is expected that another week or so will probably see a change in this condition. The offerings are of very good quality, and an excellent demand is passing so that deliveries clean up readily. Prices are steady at $15 @ $16 per ton.

Feed oats are meeting a good demand while the quality is very good in fact it is better than was anticipated. Deliveries are rather light, but they are expected to show more life shortly. This year's crop is said to be grading out very well, although in some cases the yields are not quite as heavy as in former years. Prices are steady at 55c @ 60c.

Greenfeed has not commenced to move yet, but more than likely will do so by the middle of the month. The few samples which has shown up have been very good.

Alfalfa is moving now and several lots have been turned over. Farmers with dairy cattle are commencing to make [illegible] about prices. No. 1 first cutting is bringing $18 and No. 1 second cutting $20, at country points.

Calgary city—
Upland loose — — $15.00 @ $16.00
Feed oats, Calgary mart ——55 @ 60
Country points —
Upland ———— $12.00 @ 12.50
Timothy, baled ———— $19.00
Alfalfa No. 1, first cutting—$18.00
....No. 2, second cutting ——$20.00

Prepare For the Winter

Quite a number of people say that we will have a very cold winter. Others say a mild one is coming but to play safe prepare for the worst. Lay in as much feed as possible and milk as many cows as possible. Generally speaking cream is highest during the winter months and by delivering your cream to us you get every last cent there is in it. Both the money and the feed will be very welcome around January.

Job Printing

Every business man requires a certain amount of printed matter. Such things as Letterheads, Envelopes, and Statements are as necessary to modern business correspondence as a telephone is to a modern business office. The Mercury Office is equipped to turn out all kinds of job printing. The next time your supply is running low, call us up and a representative will be at your place of business in a short time to receive your instructions and take your order. Prices fair and just.

The Tofield Mercury

WARNING
TO
Motor Car Drivers
CARRY Your Licences

The Vehicles and Highway Traffic Act, 1924, Amendment Act 1929, requires that every person operating a motor vehicle shall secure an operator's or chauffeurs licence and shall at all times while driving carry same. A penalty is provided for failure to produce such licence when demanded by an officer.

It is necessary, owing to the number of motorists who persist in driving without licences, that the police be instructed to require the production of these licences from time to time.

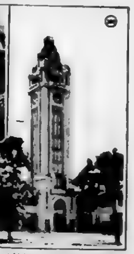
This law has been passed in the interests of safe driving, and the production of a licence is the only proof of ownership of one.

Carry your licence at all times and avoid inconvenience and prosecution.

Application cards may be obtained from any Alberta Police Officer, Clerks of the Court, dealers in motor vehicles, or from the postmaster in any town or village, and when completed should be forwarded to the Motor Vehicle Branch Office at either Calgary, Lethbridge or Medicine Hat, or to the Office of the Deputy Provincial Secretary at Edmonton.

HON. J. E. BROWNLEE, Provincial Secretary. — E. TROWBRIDGE, Deputy Provincial Secretary.

"White Empresses" to Call at Honolulu.



Honolulu, famous for its lovely Hawaiian dancers, its splendid-physiqued swimmers, wreaths of flowers, Waikiki Beach and lordly Diamond Head that flings its crest high in proud greeting or dignified farewell, is now to be added to the westward route of the famous Canadian Pacific liners—the White Empresses that long ago gained for Canada the Blue Ribbon for speed on the Pacific.

Starting December 7th from Victoria and Vancouver the Empress of Canada, which has just returned to service after being equipped with the fastest and most powerful engines on the Pacific, will inaugurate the new service and will call at Honolulu six days later.

Glimpses of some of the features of the "Island Paradise of the Pacific" are shown above, with (left) the giant prow of the 21,500 ton Empress of Canada. Behind the flower-decked maidens may be discerned the stately outlines of Diamond Head, famous in song and story. At the right is the Aloha Tower of the docks, that spells a Hawaiian welcome to the traveller.

Passengers to the Orient by the new Canadian Pacific service will be given the opportunity of staying over for the next ship or of paying a visit during the twelve hours the Empresses remain in Honolulu. Visitors to the Islands who plan to leave Jack Frost behind have many options for their return voyage. Several lines have co-operated with the Canadian company and, after a long lazy winter on the sands of Waikiki Beach, travellers may return to Vancouver by the Canadian Australasian Royal Mail Line direct, or may come back by a Matson Line steamer to Portland, Seattle or San Francisco, or to Los Angeles by the Los Angeles Steamship Company.

If what shone afar so grand
Turn to nothing in thy hand,
On again—the virtue lies
In the struggle, not the prize.
Lord Houghton

THE BEST THINGS OF LIFE

THE EDITORIAL under this heading appearing in this column last week should have been credited to the "New Outlook." The credit line was inadvertantly omitted.

EXIT TOFIELD FARMERS' SUPPLY

ON SATURDAY last the Tofield Farmers' Supply Company, after eleven very successful years, closed its doors. While the company was not a co-operative association, the shares were so widely distributed that a large number of the customers dealing there had an interest in the store. That, under the management of Mr. L. C. Hay, the venture was a complete success is well known and the Mercury tenders to him congratulations on eleven years successful merchandising.

The business will be carried on in a little different manner in future. This time as a co-operative association, under the management of Mr. J. Ferguson, and the Mercury takes this opportunity of wishing the association and Mr. Ferguson complete success in the merchandising realm.

COMPULSORY MARKETING

THE FARMERS in Saskatchewan are deeply concerned over the problem of compulsory pool membership. The proposal is sponsored by Mr. Sapiro, who, it will be remembered was chiefly instrumental in providing the enthusiasm necessary for the commencement of the Alberta Wheat Pool. His idea is, if seventy-five per cent of farmers voluntarily join the pool, the other twenty-five per cent should be compelled to.

When one first hears of this proposal it is with the feeling that it is only an irresponsible statement, even though coming from as brilliant an organizer as Mr. Sapiro. Yet, we understand many take it seriously and there is considerable discussion in Saskatchewan concerning it. Even so, we do not think it will create lasting dissension. The idea of compelling a man to sell the product of his labor where the majority wishes is so utterly to the bad that it is almost impossible to take the idea seriously.

Mr. Sapiro is an expert on co-operative mareting. He had considerable to do in organizing the Alberta Wheat Pool. He has a number of other co-operative ventures to his credit. But unless he desires to wreck his own castles, he had better drop the compulsory membership idea.

FIRE PREVENTION WEEK IN CANADA

THIS WEEK is known as Fire Prevention Week throughout Canada. The disastrous forest fires during the past two months point to the necessity of maintaining this effective form of propaganda. While many of these fires may have been unavoidable it is estimated that eighty per cent of all fires are due to neglect or carelessness.

Statistics prepared in Ottawa show that the annual loss of insurable property by fire in Canada exceeds $30,000,000 and that annually over 300 persons lose their lives as a result of fire. According to the records of the Canadian Joint Fire Prevention Committee of the National Fire Protection Association the cost to the Dominion last year through fire was 314 of her citizens and $102,697,837 in property insurance premiums and protection expenditure. The total value of property destroyed $36,402,006 was an increase of 12.86 per cent over that of the previous year. Defective heating apparatus continued to be the principal cause of conflagrations with the carelessness of smokers, and campers listed as a second cause. Thus it may be demonstrated that the great majority of fires are preventable.

The official proclamation ask that instruction on the subject of fire prevention shall be given by teachers and principal officials in schools and appropriate literature distributed amongst the pupils. The services of Boy Scout leaders are enlisted in order that the troops may be instructed as to the best means of co-operating with municipal fire departments in preventing and extinguishing fires.

FARMERS ADVISED TO SECURE SEED OATS EARLY

One of the most serious effects of the past dry season will be a shortage of good seed oats for next year's crop in some sections of the province. Farmers in these areas are being advised by the Department of Agriculture to lose no time in securing the [illegible] they will require for spring.

There will be little difficulty in supplying this demand from other parts of the province where a heavier yield of the coarse grains was harvested, but it will be necessary to know the requirements of the drier districts at an early date. Already a considerable demand is reported from outside the province and buyers are [illegible] Alberta [illegible].

In order that the Alberta farmers may be assured of their seed supply while grain of good quality is available they are advised to communicate at once with their local elevator agents so that arrangements can be made for any necessary shipments before seeding time.

ABOUT ONE HUNDRED LOADS [illegible]

LOST—STOLEN—C.C.M. Motor Bike, Marson "Pastime" No. B. 1407. Reward. Notify Mercury Office.

BAILIFF'S SALE

Don't buy any car until you have driven Chevrolet

IT'S all very well to listen to So-and-so's opinion of car values, but after all, the person whose opinion counts most is YOURSELF.
It's all very well to sit back and wonder how Chevrolet can produce a really high-class Six . . put a high-compression, valve-in-head engine in it . . employ Fisher Body genius to create and build a series of magnificent bodies for it . . equip it in the most detailed and up-to-the-minute fashion . . and *sell it at the price of a four.*
The unmatched resources of General Motors, backing up Chevrolet's own tremendous facilities, explain all that, of course. But how much more satisfying to test is all out for yourself . . behind the wheel of the new Chevrolet Six.
That is why we urge you . . no matter how many nice things you have *heard or read* about Chevrolet . . to DRIVE CHEVROLET before you buy any car.
If you don't *sell yourself* a Chevrolet, nobody else is going to do it. Please don't feel you are obligating yourself in any way. It's a pleasure for us to place a Chevrolet Six at your disposal.

LOCAL AND PERSONAL

On Saturday evening, Mr. and Mrs. Bell and family left Tofield to reside just west of Edmonton.

The Holy Trinity W. A. will hold a tea and sale of home cooking in the Women's Institute Rooms on Saturday, October 26th. Come one come all and enjoy a good cup of tea. Chicken salad will be served as well as the usual dainties. Watch for posters for further particulars.

Word has been received that Mr. A. E. Allan, recently accountant at the Bank of Montreal at Tofield and more recently of Leduc, has been appointed manager of the Penhold branch of the Bank of Montreal.

Rev. A. A. Adams, who has been visiting with Mrs. F. Webb for some time left on Monday for Edmonton, where he will reside. He is benefited greatly by his visit while in Tofield and all good wishes go to him for entire recovery from his illness.

Keith Scott is visiting with his sister, Mrs. G. Agnew. Keith was in an automobile accident recently and suffered a broken arm.

Owing to the non arrival of the film last week, there was no picture show on Saturday last.

Miss Jean Baptist stayed a few days last week with Miss Mabel Thompson.

Mrs. Bigland's mother, who has been visiting with Mr. and Mrs. Bigland for a week returned to her home at Wetaskiwin.

On Monday last Miss Jean Baptist left for Edmonton where she will enter in training for a nurse at the Royal Alexander Hospital. On Saturday a number of girls gathered at her home to wish the best of luck in her new work. Games and contests passed away a very pleasant afternoon after which a dainty lunch was served by Mrs. Baptist.

Mrs. Haker has her sister from Calgary with her for a short visit.

The furniture auction sale held last Saturday afternoon was very well attended and on the whole good prices were obtained. The sale, which was really three in one, lasted all afternoon and it was near supper time before the last article was offered. This was a Ford truck, all ready to run and the best that could be done was a five dollar bid. It actually sold for ten dollars privately.

LAKE SHORE

Mr. and Mrs. T. A. Jones and family motored to Edmonton on Sunday and spent a day with relatives there.

Mr. and Mrs. Jas. Francis and sons spent Tuesday at the Geo. Francis home.

Mr. and Mrs. J. H. Johnston visited friends in the Bardo district on Sunday.

Miss Edith Riley arrived home last week from Camrose where she has been a nurse-in-training at the St. Mary's hospital.

Friends of T. D. Ferguson will be pleased to hear that his broken leg is progressing favorably and that he expects to be able to get about in a short time.

Mrs. T. A. Jones entertained the Ladies Aid Society on Wednesday.

Mr. and Mrs. R. C. Phillips motored to Edmonton on Friday.

The Lester Noland family visited with Mrs. Nolands parents, Mr. and Mrs. Jas Gray, on Sunday.

Miss Ardis Wood went to Edmonton last week after a short stay at home.

LINDBROOK

The weather continuing fine has produced several effects; one is that the season's work is finished off (what there is of it) the other is that it is ideal weather for bush fires and what with the high winds these fires are a menace to the country side, so far we hear of no damage from the same around here only several good hay sloughs spoilt, but we do hear of some heroic fights against these fires.

Mr. B. E. Clarke and family moved from here to Manville, Alberta last Saturday. Mr. H. Low of the Lindbrook store took their furniture and effects down to Manville by truck, whilst they motored down.

Mr. and Miss Cameron, of McLaughlin, Alberta called in here on their way to the city last week to visit their friend Miss A. Sproule, teacher here. They returned on Friday and took her back with them to Edmonton for the week end.

We hear that our old friend Mr Thomas Cookson has invested in an automobile. It ought to mobile, Tom' but sometimes they don't so looks as if your vocabulary will be increased in the future. Say it in French, Tom, when you get "fache" with it; still apart from this congratulations and the best of luck, probably see you once now, eh?

Mr. Barrow shipped a few head of stock to Edmonton by truck last week.

We hear that Mr. J. Wadecroft cannot stand farming without the "woolies" so has purchased the nucleus of a flock from Mr. W. Glenn.

ONE CENT SALE POPULAR

The one cent sale, inaugurated by the United Drug Co. some years ago, has become very popular throughout North America. These sales are conducted solely by the arrangement with the parent company, which accounts for the splendid values given. The method of the sale is that articles sell for the regular price with another at one cent. Thus one procures two dollar articles for $1.01.

A. A. Beirnes is having a one cent sale on Thursday, Friday and Saturday, October 31st and November 1st and 2nd. Keep the date in mind.

BARDO

Martin Haaven left for the Peace River district on Thursday. He will visit there for some time.

Miss Lilian Carlisle, of Ketchamoot, is assisting Mrs. R. Eide with her housework.

Miss Nora Bruce, of Salt Lake, is assisting Mrs. G. Hendrickson with her housework.

Several Bardo people attended the first service held in the new Trondhjem Church on Sunday.

Mr. and Mrs. P. Anderson, Mr. and Mrs. Steen, Mr. and Mrs. G. Hendrickson, Mrs. Clara Jevning and Mabel Jevning were dinner guests at the home of Mr. and Mrs. George Bruce, of Salt Lake on Sunday.

Edward and Alvin Steen, Robert Berreckath, Botner Bjornson and John G. Eide, spent several days of last week in Edmonton.

Mr. and Mrs. E. Rude, Mr. and Mrs. I. Koren, Mrs. Egen and Ingolf Brekan visited with Mr. and Mrs. S. Johnson on Sunday.

Mr. John Stauffer Sr., is quite ill and all his friends wish him a speedy recovery.

The record of performance, among our feathered friends, must go to a March pullet on the V. L. Roth farm. One day last week she was found setting on nineteen eggs. How do they get that way, Mrs. Roth?

NEWS OF OUR NEIGHBORS

KETCHAMOOT

It is with sincere regrets that we have to record the death of Mrs. Ben Wildman whose death occurred at the Camrose hospital, on Wednesday night, October 16th. The passing of Mrs. Wildman is particularly sad as it is only a month or so ago that Mr. Wildman passed away. As we go to press it is too early to make any announcement regarding the funeral.

Fires have been raging west of the district the last two weeks. Some fifty men have been trying to keep them under control. The fire is burning the soil under the ground making it very difficult to put out, in fact all they can do now is to keep it from burning across the fire guard.

A fairly large crowd was present on Sunday, to hear Mrs. M. Hislop, [illegible] speak on temperance which was both instructive and interesting.

Mr. and Mrs. Johnson and daughter, of Lakeshore, Mr. and Mrs. Geo. Lawson and Helen Schultz were Sunday guests of Mr. and Mrs. Herman Lawson.

Mr. T. D. Ferguson, of Lakeshore spent a few days at the J. H. Ingram home the first of the week. He expects the cast off his leg this week.

Mr. and Mrs. Wm Lee and family motored to Edmonton on Thursday for the day, returning home in the evening.

Mr. Martin Lawson spent the week end in Edmonton.

Mr. Geo. Cookson underwent two operations at an Edmonton hospital the first of last week. His condition was very critical for a few days, with his heart, but now it is back to normal again. Mrs. Cookson returned on Monday.

Mr. Chas. Whillans spent a few days in Edmonton last week, having dental work done.

Mr. and Mrs. Albert Sutton have motored to their own home in the Farmington district.

Mrs. Yerex, of Lamont has been visiting some time with her daughter, Mrs. A. Harrison.

Mr. and Mrs. Geo. Shaw of Calgary came on Saturday, Mrs. Shaw remaining at the Joe Sutton home to care for Mrs. Sutton who is very low.

Mrs. Henderson, Mrs. Carlisle, Lillian and Delva Margaret Mitchell, Maud Wildman and Glen Carlisle motored to Camrose on Sunday to visit Mrs. Wildman at the hospital.

Miss Mildred Purcell spent the week end at the home of her parents in Camrose.

Mrs. A. Torrie entertained the members of the W. A. S. and a few friends at her home on Wednesday afternoon of last week. While the crowd present was not large those who were there spent a pleasant afternoon. The annual Thanksgiving [illegible] will be held at the Henry McTurtle [illegible] Friday evening, November [illegible].

KINGMAN

Mr. and Mrs. W. McIntosh recently installed a seven tube Marconi radio purchased from W. Jardie.

Mr. and Mrs. Thor Horte and Mr. and Mrs. E. Erickson visited with Mr. and Mrs. W. Jardie on Tuesday evening.

As the chicken thieves are getting quite bold in this district the farmers would do well to keep their guns in good order in case of an emergency.

Mrs. W. Hartchen, Mrs. Grace, and Mrs. T. Horte visited with Mrs. E. Erickson on Wednesday afternoon.

Mrs. L. Alstad has been visiting with her sister, Mrs. D. M. Thompson, for a few days.

M. Bjorgum and S. M. Haw were business visitors in Edmonton on Friday.

Miss Gladys Pederson spent the week end with Miss Irene Horte.

Mrs. E. Erickson and Mrs. T. Horte visited with Mrs. O. Bray, of Camrose on Friday.

Mr. and Mrs. W. Jardie visited with Mr. and Mrs. A. Climp, of Camrose on Saturday.

Thor Grahn and C. R. Blyckert motored to Tofield on Saturday.

Mr. and Mrs. J. Munson, of Camrose were the guests of Mr. and Mrs. C. R. Blyckert on Sunday.

Visitors at the T. Horte home on Sunday were Mr. and Mrs. C. Running and family, of Camrose, John Ness, Mr. Grant, of Edmonton, Misses Grace McDaniel and Edna Eckland, Messrs Harvy Black, Harry Marshall and Teddy Ecklund of Daysland.

Mr. and Mrs. R. Erickson were the guests of Mr. and Mrs. Carl Larson of Daysland on Sunday.

Mr. and Mrs. Henry Bray, of Bittern Lake were the guests of Mr. and Mrs. Thor Grahn on Sunday.

Mrs. D. M. Thompson and Mrs. L. Alstad visited with Mrs. Erickson on Saturday afternoon.

Mr. and Mrs. O. Thompson and family and Mr. and Mrs. Geo. Welch and daughter visited with Mr. and Mrs. W. McIntosh on Sunday.

L. R. Fleming is progressing favorably after undergoing an operation in St. Mary's Hospital, Camrose.

Don't miss the big Hallowe'en dance in the Kingman Hall, on Friday, October 25. The music will be furnished by the Martin Orchestra of Edmonton.

The Cornhill M.D. held their seventh meeting on Saturday of last week. The minutes of the meeting will be published in our next issue.

THE YOUNG PEOPLE'S CORNER

The weekly meeting of the Young People's Society was held on Monday evening in the basement of the church with president Marion Cooper in the chair. The meeting opened with the singing of a hymn "O Master Let me Walk With Thee." The devotional talk was taken by Horace McHeffey. His scripture was taken from 2nd Corinthians, 5th chapter, 11th to 19th verse.

The business part of the meeting was opened with the reading of the last week's minutes. These were accepted. The president stated that up to the time of the meeting no word had been received from Mr. Bachman of the University of Alberta regarding the date that he would be here to deliver his lecture. But he is expected here early in November and as soon as a definite date is decided upon it will be published. It was discussed whether or not the society should secure some books along religious lines for devotional study. It was moved by Stella Clement and seconded by Horace McHeffey that we should. This was carried. It was left to the Executive committee to select the book. It was discussed whether or not we should renew our subscription to the "Pathfinder." This is a magazine printed in Toronto, from which the Young People's Society may get information regarding different sections of the meeting. It was moved by Lola Clement and seconded by Polly Napier that we renew our subscription. Carried. The next topic for discussion was the securing of some song sheets, these to be used at any social function and at the meetings if desired. It was moved by Bill Worton and seconded by Murray McHeffey that we secure these song sheets. Carried.

The practical part of the program was in the hands of A group with Jack Cookson as convener. Arthur Cookson a member of A group told us of his trip up north by boat. It proved very interesting and was enjoyed by all. After his talk Art passed around his collection of pictures for the members to look at.

The recreational period was next and little did we realize that it was going to bring forth the future "Houdini" in the form of Gordon Jobb. He held the group spellbound with his marvelous mind reading.

The meeting then closed with the usual prayer.

Job Printing

Every business man requires a certain amount of printed matter. Such things as Letterheads, Envelopes, and Statements are as necessary to modern business correspondence as a telephone is to a modern business office. The Mercury Office is equipped to turn out all kinds of job printing. The next time your supply is running low, call us up and a representative will be at your place of business in a short time to receive your instructions and take your order. Prices fair and just.

The Tofield Mercury

ALBERTA WHEAT POOL BROADCAST

The wheat situation in Western Canada is being followed with great interest and with varied emotions by people all over the world. Wheat is the basic food of many millions of people and the chief source of income of millions more. The consumers are interested particularly in cheap bread and the producers in getting a fair return for their labor.

What arouses interest in Canada is the fact that our wheat prices have been above the world's parity and refuse to come down. This situation persists in the face of the fact that Canada is the leading wheat exporting country in the world and even although the western crop is short this year, the Dominion will still have to export possibly two hundred million bushels of wheat.

The present wheat crop in Western Canada has been estimated at from 250,000,000 bushels to 272,000,00 bushels—about half the crop threshed in the Prairie Provinces last year. In the face of this comparatively light crop terminal storage is being over-extended while the surplus wheat is backing up into the country. Railway companies are rationing cars for wheat and lake grain carriers for taking on winter storage.

This situation has been laid at the doors of the Canadian Wheat Pool and the Wheat Pool has accepted the responsibility.

In a statement recently published, E. B. Ramsay, late general manager of the Wheat Pool's central selling agency points out that if the Canadian crop were sold "at present price levels, having due regard to the grade of the crop, this only promises a gross farm income of $290,000,000 or an approximate reduction in the buying power of the West of $170,000,000. The value of last year's crop." Mr. Ramsay calculates, "of which 400,000,000 bushels were inspected, was very close to $470,000,000." Present price fluctuations showed cash wheat at Winnipeg on October 1st selling for \$1.43½, consequently, if Canada's crop this year, on account of its quality and scarcity, is to bring the financial returns anywhere near the \$470,000,000 of last year, the prices now prevailing will have to go considerably higher. Every further drop involves a further reduction of the purchasing power of the West.

If the price of Canadian wheat was reduced there would be no difficulty in making sales and the blockade would be at an end, but are Canadian growers prepared to place their high quality wheat on the bargain counter? The Wheat Pool believes it is poor business to do so.

The European buyers of wheat are showing concern over the Canadian situation but have been steadfastly refusing to come into the market at prevailing levels. News stories are being cabled from Britain telling of huge supplies of grain on hand, of abnormally large crops in France, and of low prices being paid British farmers for their wheat, all calculated to have a bearish effect on the market. It is interesting to note, however, that Hon. J. H. Thomas estimates the wheat supply in Britain only sufficient to cover requirements for six weeks' time.

There has been criticism of the Canadian Wheat Pool's stand by various interests overseas and also in Canada. Steamship companies have been laying up some of their Great Lakes' carriers in winter quarters and some have expressed bitterness over the fact that our grain is not being exported. Railways have been hindered in their operations and pro-Canadian market. It is significant ... ably have not been pleased over the situation. But in spite of criticism the Wheat Pool is maintaining its position that Canadian farmers cannot afford to take lower prices for their wheat.

There are some who point to Western Canada wheat growers as a gang of profiteers, eager to raise the price of bread to the poor workingmen in Europe. Others point to the Pool as being instrumental in disorganizing the shipping and transportation interests and in having workmen put on the unemployed list. These accusations are unfair. Farmers in Western Canada badly need a fair price for their wheat this fall or otherwise there will be hard times. In Western Canada in most districts the crop has been extraordinarily light and even at present prices there is little profit in wheat raising. In many sections of Western Canada there is dire want in farm homes because of frosted grain last year and drouth this year. No one can find fault with these people for desiring to obtain a price for their grain which is not at all exorbitant. Furthermore it should be remembered that the same buyers in Europe who are so eager to obtain cheap wheat now, steadfastly refused to buy last spring when good Canadian wheat could have been purchased at a price not much over \$1.00 a bushel.

Western Canadian farmer raises wheat under great difficulties. The ravages of the climate - frost, hail and drouth - take a tremendous toll of his labor annually. He is the only farmer in the world who grows wheat such a long distance from tidewater and places his dependence to such an extent on the export trade. He has to buy everything he requires in a protected market and sell in the world market. He enters into competition with grain grown under peonage systems and on low-priced land. He is not a heartless profiteer: he seeks a fair reward for his labor. He works hard, uses his capital to produce a greater volume per acre and uses his experience and intelligence with which to create a great marketing agency—The Canadian Wheat Pool. He is deserving of credit rather than blame.

The world wheat situation has been made fairly plain. The forecast made by the United States department of agriculture indicates a serious depreciation in the amount of wheat produced in the world this year as compared to last year. Exclusive of Russia and China, the estimated world production is 3,400,000,000 bushels for the present season or half a billion bushels below the record production of 1928. Part of this reduction is made up by an increase in the world's carryover of 135,000,000 bushels, but demand has been increasing at the rate of 60,000,000 to 70,000,000 bushels annually so that there is a decrease of about 400,000,000 bushels in supply in relation to demand in the last crop year. Then it should not be overlooked that Western Canada is going into the winter after one of the driest autumns on record. This means that the seed bed next spring will lack very necessary moisture and that unusually heavy and frequent rains will be required during the growing season to produce a normal crop. The United States' winter wheat crop has been above the average the past three years and the law of average would indicate that this might not occur this coming winter. Taking everything into consideration it is manifest that there will be a shortage of wheat and that there is no reason for Canadian wheat to decline to the levels fixed by the unbusinesslike marketing systems of other exporting countries. Since July enormous quantities of low-priced wheat have been exported to Europe by the Argentine. Liverpool buyers have not found it necessary to buy Canadian wheat at around \$1.50 when they could buy Argentine wheat at \$1.12.

One of the arguments put up against the Wheat Pool since its organization was that supply and demand governs prices. The Pool has admitted this statement to be true in a broad sense, but there are governing features of vital importance. If the Canadian wheat market has been left to the mercy of the law of supply and demand this fall most of our wheat would be sold before the end of the year at greatly reduced prices and most of the producers would wake up to the fact that their wheat was worth more only after it was out of their hands.

The Wheat Pool action is receiving the endoration of most of the people of Canada. The Winnipeg Free Press, which has always maintained a position of strict neutrality as regards the Wheat Pool and the Grain Trade, came out last Friday and openly commended the Wheat Pool's determined stand in a two-column editorial.

In a special article in The Vancouver Province it is stated that the Grain Trade of Canada has gone through a revolution in its marketing methods. In the old days traders bought and sold each day as rumors developed. The reported near-embargo limitations which the railways put on the grain movement on Tuesday, October 1, had it developed seven years ago, would have driven Canada prices down ten per cent. below world levels and every market in the world would have felt a similar reaction, while foreign buyers would have made hay while the sun of confusion shone. But what actually did happen? The market opened ½ a cent above the previous close and reached a high of 1½ cents above, touched 142½, a low of 1 cent below the previous close and closed ½ cent up. It was a fine showing in the face of the biggest bear news of the year! Winnipeg was never less than ½ cent above Liverpool that day notwithstanding persistent raiding of the market by "bears" intent on buying on breaks which they could not force on the market.

Not a bad showing for the exponents of orderly marketing! It was a situation fraught with danger to the producer, more particularly since an air of suspicion had almost unconsciously developed. Elevators were reaching a capacity load, farmers' deliveries were falling off, steamship lines were idle with their crews off the payrolls, powerful business interests were uneasy, the railways saw their receipts dropping to an alarming extent. It was an ideal situation for a great "bear" market which would see Canadian wheat on the block to ease the screeching wheels of Canada's economic life. Yet nothing happened!

The Canadian Bank of Commerce publicly expresses the opinion that the Wheat Pool is taking a sound stand in its present policy. In its monthly commercial letter the Bank says it is as much the privilege of the farmers and their marketing organizations to refuse to sell on a declining market as it is of the other business interests who bargain for the best possible returns. The bank's statistician is in accord with the Wheat Pool in predicting much reduced world supplies and states that only a remarkable recovery can provide normal supplies from the Southern Hemisphere.

The prosperity of Canada is dependent on the prosperity of Western Canadian farms to a far greater extent than the casual observer can discern. The position of the farmers on the prairies this year is not altogether an enviable one. You read lots of newspaper stories of individual large yields, but what about the small yields? The estimated average wheat yield for Alberta this year is from 10 to 12 bushels an acre so for every 30 bushels an acre yield there must be many a crop yielding less than 10 bushels to the acre. With an average yield of 10 to 12 bushels an acre a fair price is a necessity if actual want is to be avoided.

No one should delude himself that Western Canada farmers are rolling in wealth. Figures recently compiled show that in a survey conducted on 12,000 representative United States' farms the average profit was \$1,334 in the 12 months 1928. The average investment in land was \$15,416. Deducting six per cent interest on the investment shows the farmer a net profit \$434 for a year of labor. I do not know if a similar survey has ever been made for Canada but it is safe to predict that returns would not average much higher. The wheat producer of the Canadian prairies is not a "profiteer" and in fact ranks among the lowest paid of all workers.

FALL PLOUGHING

(Experimental Farms Note)

The result of several years' experiments conducted at the Dominion Experimental Station, Lacombe, indicates that in years with the usual amount of precipitation, fall ploughing will give as high or higher yields of wheat or oats per acre than spring ploughing. In years with more than the average rainfall, fall ploughing gives very heavy crops, while spring ploughing usually gives better returns than fall ploughing in dry seasons, following a very dry autumn.

When the advantages of having the land ready for the drill in the spring are taken into consideration along with the possibility of as high or higher yields per acre, it would seem that farmers living in districts similar to central Alberta would be well advised to do as much fall ploughing as possible.

Sod has been broken at different times during the season. The general practice is to break the sod early in June and work as a fallow throughout the balance of the season. Experimental data indicate that, when everything considered, the most economical returns are produced when sod is ploughed immediately after the hay crop is harvested and the land kept well cultivated during the remainder of the season.

The practice of pasturing sod until late in the fall and then ploughing about the 1st of October has never given very satisfactory results except in the case of brome grass. The fall growth of grass appears to exhaust the moisture supply, thus limiting the yield of the succeeding grain crop. Ploughing brome grass sod in October appears to be justified in spite of the fact that there is the possibility of light yields, as shallow ploughing brome grass sod late in the fall and giving it a thorough disking before freeze-up, appears to be one of the most effective methods of bringing such land under cultivation.

Leonard P. Woodhams, optometrist of Camrose will be at Tofield on Wednesday, October 23rd, when he will be pleased to examine eyes and prescribe glasses for those needing same. He will be at the Royal Alexandra Hotel.

PREPARING TURKEYS FOR MARKET

Turkeys raised in the open during the summer cannot stand close confinement during the fattening period and should therefore not be confined in pens. When properly fed they will take no more exercise than is necessary for good digestion. If closely confined in pens there is a great danger of the birds going off their feed and developing digestive troubles with accompanying loss of flesh. Close confinement is often the cause of heavy mortality during the fattening period.

Turkeys are usually marketed in November or December. Those marketed in November go to the Thanksgiving trade and the December lot are for the Christmas and New Year festivals.

When the time arrives for fattening, the young birds should be started feeding gradually. The proper time to commence is four weeks before they are wanted for table use. Three weeks of this time goes towards conditioning the birds, and the fourth week for killing, shipping and retailing to the consumer. The feed should be composed both of mashes and whole grain. Feed the mashes in the morning and at midday, and the whole grain for the evening meal; and as the former are more easily digested than whole grains, the birds can assimilate quantities of feed when given in that form. The reason for feeding whole grain in the evening is to prevent the birds becoming very hungry before morning, which would surely happen if mash were the evening meal.

The mash is made up of equal parts ground oats, barley meal, cornmeal and wheat bran. Ground buckwheat is also good and can be used instead of ground barley if necessary. Mix the ground grains thoroughly before moistening. Mashes should always be fed in a moist condition with only sufficient water or skim-milk used to make the meal stick together and not enough to make it sticky or sloppy. Feed mash in V shaped troughs, making sure that they are clean, and never give more than the birds will eat readily. Remove any food remaining in the troughs after the birds have become satisfied. Moisten the mash about two hours before feeding to allow it to become thoroughly soaked as this materially aid digestion and prevents many digestive troubles. The same kind of mash can be used for morning and noon feeding. Whole corn is about the best grain for fattening purposes, and should be used for the evening meal. It is high in fattening properties and very palatable. Care must be exercised in feeding corn, however, especially if the weather is not cold. Give the birds only amounts they will clean up nicely before they go to roost. Provide fresh water and grit in abundance.

Turkeys usually thrive best in the open. Even during the fattening period they should be allowed to roost outside. All they require is protection from rain and cold winds. Do not allow the birds to roost in draughty quarters, as in the autumn these lead to cold in the head, which later develops into roup. Where it is impossible to devise a scheme to have the birds roost in the open, a barn floor may be used to good advantage as these quarters can be properly aired each day.

HEALTH SERVICE Of The CANADIAN MEDICAL ASSOCIATION

THE BOTTLE OF MEDICINE

A distinguished English physician has told us that Health is found in a way of life rather than in a bottle of medicine. In supporting this statement, there is no reflection cast upon the value of medicines. There are a few drugs which we might say are worth their weight in gold because of their value in the treament of certain diseases. Their value depends, however, upon their proper use. They must be taken at certain times and in quantities suitable to each case.

The evil that exists and the evil from which a great deal of actual harm results is the taking of medicine, self-ordered, with the idea that the bottle of medicine will cure disease, when what is required is a change in the manner of life. If the diet is faulty, if there is insufficient exercise taken, if the body or mind requires rest, these needs, without which the sufferer feels a lack of health, are not to be overcome by his taking one or more bottles of medicine.

The fundamental problem of health is to secure the proper nutrition of the body. This means that the following must receive attention—food, fresh air and sunlight, exercise and rest and cleanliness. No one of these can be neglected if the health of the body is to be maintained. It is practically useless to think of one without the other. Neglect anyone of them impairs the health of the person who is careless. Neglect in such a case means abuse, and, while it is true that the human body will stand considerable strain, it will not permit of abuse. Neglect of one or more of the laws of health means lack of bodily harmony, or disease of the body. Health or harmony cannot be restored by taking a bottle of medicine, when it is the manner of living which needs to be corrected. Prevention lies in the removal of the cause, which, in such cases, is neglect of the body needs.

Questions, concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

FARMERS ADVISED TO SECURE SEED OATS EARLY

One of the most serious effects of the past dry season will be a shortage of good seed oats for next year's crop in some sections of the province. Farmers in these areas are being advised by the Department of Agriculture to lose no time in securing the seed supply they will require for spring.

Careful Examination with Modern Equipment and Reliable Methods

Tofield Co-operative Store Ltd.

Now Open To The Public

It will take a little time yet to get the different departments in order and we ask that the public bear with us and we will do our best to give you the best by way of service, and also to help you in financing your purshases, this would seem to be out of the ordinary in advertisements. The explanation is that the Board of Management, after a careful study of the economic question, have decided to carry on the Co-op Store on a Strictly Cash basis. We find in dealing with the whole-sale houses that we get larger discounts by paying cash, saving No. 1. Now if we sell for cash, we can buy for cash without borrowing, so we have no interest to pay, saving No. 2. Then we have no charge accounts, saving No. 3. Then we have no loss accounts, saving No. 4. The two last named are heavy charges, any business man will tell you that, and the loss account must be paid by someone; we hear the remark quite often the good pays for the bad, which must be right, because if the merchant can afford to lose the account and stay in business, it means he must have his margin of profit plenty high.

Then bear in mind that the Co-op Store was not organized for profits, but to give a service, but to do business on a safe basis, must allow for a margin of profit. But at the end of each year, the profits are distributed back to the customers who produced them. We think nearly everyone understands this system. The Manager, if asked to do so, will be pleased to give further information, but it is a rule of the store that no canvassing for membership be done in the store. Any person is welcome to trade in the store and share in the profits which will be applied on a share in the store, when he will automatically become a member.

Now, we have gone all over our stock, and find that in some lines we are stocked very heavy, but we found in taking over the Tofield Farmers' Supply that their manager was a shrewd buyer and bought right. Then we got a discount on his cost, so we are in a position to give our customers the benefit of good buying. Any lines we found short we ordered, so we will leave it to you to say when you see our stock, if it is not the most up-to-date stock outside the city.

We have taken the Spillers Flour to handle, and have just put one car in our warehouse. This flour may be new to some of the people, but we can say it is a high grade flour, and the Spiller's are known to be amongst the largest milling companies in the world, and their new mill in Calgary is the most modern on the North American continent. We will send you a circular in the near future showing the qualities of this flour. We are also handling the North West Milling Company's Flour of Edmonton, known as "Apple Blossom." It is a straight flour, and it is used in the city by a lot of people because of its sweetness and wholesomeness, and sells for fifty cents a-sack below patent flours.

We have a car of potatoes ordered and these should arrive around the 18th to 21st, anyone wanting to stock up for winter and take them from the car, we will make the price right. So if you will 'phone in your order, we will give notice when the car arrives.

We will also be unloading a car of APPLES soon and we can give you quite a reduction on any amount taken from car. Just call up Co-op Store and state your requirements—we will do the rest.

Next our supply of winter goods is unlimited—

FELT SHOES, SWEATERS, CAPS, UNDERWEAR, COATS, RUBBERS, BLANKETS FOR BOTH MAN AND BEAST.

Our Stock of LADIES' SHOES is very complete and our lines of LADIES' UNDERWEAR contains many styles and weights.

A GREAT VARIETY OF CHILDRE'S GOODS

TOFIELD CO-OP STORE

J. FERGUSON, Manager

U. F. W. A. NOTES

The regular meeting was held at the home Mrs. Warner on Oct. 10. There were fifteen members present also several visitors. The roll call was answered to a favorite and helpful verse.

The convener of the sick committee reported that flowers had been sent to Mrs. Waldman and Mrs. Soule who are in the hospitals.

Mrs. McGinnitie read a splendid paper on "How to keep Boys on the Farm". It was quite evident that Mrs. McGinnitie knew her subject and the result was an exceptionally helpful and interesting paper. She was given a most hearty vote of thanks. The next meeting will be held on Thursday, October 24th. It is the anniversary of the birth of the local and it was decided that a special programme for the day would be arranged by the members of last years programme committee. These were Mrs. Carlisle, Guy Walker, Geo Francis, A. Dobbs and L. Waldman as Mrs. Waldman is unable to act Mrs. Warner was named to take her place. Mrs. Jas. Francis offered her home for the meeting. Mesdames Barnes, Soars, Baptist, Morton, Burchard and Carlisle were named as lunch committee.

After the business part of the meeting the president presented a handsome linen luncheon set to Mrs. Ball who is leaving the district. Mrs. Ball has been a member of the local since it was formed several years ago and we are sorry to lose her. The best wishes of the members go with her to her new home.

ADDITIONAL LOCALS

Mr. Ball, will however, be in and out of Tofield during the fall and will do some business here.

Mr. Geo. Agnew, who has been with the McLaughlin Hardware for the past twelve years, has severed his connection with this firm and will operate the Imperial Oil agency here. Mr. Harris of ——— is taking his place in the hardware store.

Frank Woods motored to Viking on Wednesday on business.

Mr. Kendall, who is doing carpenter work in the city was home over the week end.

Mr. Ed Hardy, who is Imperial Oil agent at Ryley was home over the week end.

Clifford Lee who is teaching at ——— spent the week end at home.

Miss Loret Ross visited in the city one day last week.

Mrs. F. McClymont had her tonsils removed in Edmonton last week. Miss Annie Booth is relieving.

Mrs. Gray leaves Friday morning for Vancouver where she will attend Lowell's wedding, Saturday, October 26.

Mr. Guy Owens of Viny stopped in town Thursday morning.

The Tofield Cooperative Association are moving the recently purchased stock of the T. F. S. Co. over to their own store this week and will be ready for business in a few days.

Bert Swift, Bert Lovel and Fred McHeffey attended the Oddfellow lodge at Ryley on Monday night.

Geo. B. Bruce has put up a new gasoline stand opposite his store. It was installed by M. C. Hammond and will retail Maple Leaf Gasoline.

T. W. Taylor is commencing to move his stock over to his new store. Construction on this was delayed owing to lack of material.

AMISK CREEK

Remember the sale and Lute Fisk dinner the Ladies Aid will hold in the church next Friday, October 18. Everybody welcome.

The Ladies' Aid held their monthly meeting at Mrs. I. H. Olson's home on Wednesday of last week. The attendance was very good. Many members and visitors were present.

Mathias Eggenheim and his sons Johan, Jacob and Hugo, Strasner and Arvid Brooten left last Monday for Grande Prairie where they are intending to take up homesteads.

Mrs. L. Watt from Edmonton came out Wednesday morning an attended the Ladies' Aid and visited with her relatives here. She returned the same night.

Mr. and Mrs. R. Berg visited at the J. Nilsson home Thursday of last week.

Several from here attended the supper and sale held in the United Church in Ryley last Saturday evening.

Mr. and Mrs. R. O. Berg and family visited at the A. Patterson home on Sunday afternoon.

Mr. J. Annobo motored to Camrose last Saturday to visit his daughter, who is going to high school there.

Several from here attended the Young Peoples' meeting in the Ryley Lutheran Church last Sunday evening.

SURPRIZE PARTY FOR VIRGINIA BALL

On Friday evening a surprize party was held at the home of Mrs. McCauley, in honor of Virginia Ball who was leaving with her parents, to reside in Edmonton. The first part of the evening was taken up in games and later dancing took place. At midnight a delightful lunch was served, and at the close of the lunch Horace McHeffey in a very fitting speech told how her many friends were going to miss her, especially in the Young People's groups in which she was always willing to do her share. He also mentioned the happy times the young people had had at her home in the past and in closing he presented her with a Waterman's pen and pencil as a token of our esteem.

Virginia answered in a few well chosen words and thanked them for the lovely present.

Dancing was then resumed and later the party broke up by singing "She's a Jolly Good Fellow."

A REAL SURPRIZE

A farmer drove into an Eastern small town and purchased a new suit of clothes. He put the parcel in the back of the wagon, but when driving home decided that he would change into them and surprize his wife. Consequently he took off his old clothes and threw them into the river which was near. Then looking for his new suit, he discovered that they had fallen off the back of the wagon.

After the first great discovery, he said "Get up dobbin," we'll surprize the wife anyway."

Here and There

Differences in the price of wheat at Chicago and Winnipeg and retarding of the wheat movement in western Canada is due to the view of Canadian wheat owners that its good quality justifies holding it for higher prices while British and continental buyers believe they can obtain their present requirements from the Argentine and the United States, is the explanation of this condition given out in a statement recently issued over the signatures of E. W. Beatty, chairman and president of the Canadian Pacific Railway and Sir Henry Thornton, president of the Canadian National Railway. Until the present impasse between buyer and seller is adjusted there will be a practical stoppage in the movement of grain with consequent serious effects on gross and net earnings of both the rail and [illegible]

Travelling 300 miles north of Edmonton over the waterways branch of the Northern Alberta Railway to Waterways and Fort McMurray, E. W. Beatty, chairman and president of the Canadian Pacific Railway, accompanied by a number of directors of the railway, inspected the salt wells and tar sand deposits of the region. Experts of the Canadian Pacific and Canadian National Railways are at present examining these deposits which Mr. Beatty said he was satisfied would be a great asset to Alberta.

Delegates from the Canadian Chambers of Commerce who have been travelling extensively in the west of Canada, mainly over Canadian Pacific lines, have through their national committee reiterated their stand in favor of a continuance of assisted immigration of selected British settlers of a desirable type to Canada.

Charles Reid, of the Banff Springs Golf Club, won the Prince of Wales golf trophy, famous and coveted prize of golfdom, from a field of 427 competitors recently. His score was 144 net, his handicap being 17. This is the first time in the history of the competition that the cup has gone to a Banff player, Calgary golfers having taken it to that city on each of the four former competitions.

Canada's reindeer industry takes a big forward step this year with the trek of 3,000 northern animals from Alaska into the Dominion. In November the herd, secured by Canada from the United States herds in Alaska, will begin a trek which will take 18 months and will land the animals in 1931 on the Arctic coast east of the Mackenzie river.

Australians are "fiercely loyal" as far as Empire Trade is concerned, and buy, for example, 96 per cent. of their automobiles from Canadian manufacturers, Sir James Murdoch, member of the Legislative Assembly of New South Wales, told the Vancouver Canadian Club recently. Sir James had just returned from a cross-Canada tour by Canadian Pacific lines and was on his way back to Australia.

Settlers in the Peace River country have a definite uniformity of [illegible] regarding the progress of the country as a whole, said Col. J. S. Dennis, Chief Commissioner of Colonization and Immigration of the Canadian Pacific Railway who has been inspecting the northern part of Alberta over the Northern Alberta Railways. He was astonished at the readiness of the Boards of Trade and individual business men to take a large view even where it might work temporary hardship locally.

A Little Baulky Is She?

Well, then, bring the car into us. Maybe not much wrong with it—just needs a little expert care. The cost is slight, but the satisfaction is great.

For comfort convenience and SAFETY all cars should be checked over occasionally. Do it now.

LOCAL AND PERSONAL

WEDDING

A wedding of local interest took place at St. Joseph's Rectory, Edmonton, on October 24th, when Mr. James (Bud) Hannon and Miss Mabel Wood were united in holy matrimony.

The ceremony was performed by Rev. Father Nolligan of Edmonton. Both contracting parties are well known at Tofield being son and daughter of old time residents here.

Mr. and Mrs. Burchard and Miss Gray visited Edmonton on Thursday.

Miss H. Nomeland visited Edmonton.

Mrs. Gray left on Friday for Vancouver to attend the wedding of her son Lowell.

Mrs. Forestall spent a few days in the city last week end.

Mr. and Mrs. Ben Hobson fo Edmonton visited at the Hobson home on Sunday.

Mrs. Donald Ball and new son of Red Deer are visitors at the Geogline home. Mr. Ball and June returned home on Sunday.

Mrs. Lovell and children returned home from Jarrow where she was the guest of her sister.

Mrs. Innes, Mrs. Rogers, Mrs. Firth and Mrs. McCauley visited Lamont to see Mrs. K. McIntosh who is still in the hospital.

Mr. and Mrs. Carver left on Wednesday of this week for Camrose where they will reside in future. Mr. Carver has opened a grain office there.

The members of the local Eastern Star Lodge held a very successful bridge drive at the lodge hall on Tuesday night.

Mrs. Carver left on Thursday for her new home in Camrose.

A pleasant birthday party was held at the home of Mrs. Harold Hicks on Monday afternoon last, when a number of friends of Mrs. Hicks gathered to help her celebrate her birthday and wish her many happy returnes of the day. A pleasant social time was held during the afternoon and before the friends departed Mrs. Hicks served a delightful lunch.

HOBSON'S BUTCHER SHOP TO RE-OPEN

On another page is the announcement that Hobson's butcher shop will re-open for business early next week. At time of going to press the exact day was not known as there are some details to be attended to which takes time. The shop will however be opened some time during the coming week.

It is almost three months since the Tofield fire when with others, Mr. Hobson was sudenly put out of business. He will occupy the south side of Jebb's store.

The Holy Trinity W.A. will hold a tea and sale of home cooking in the Women's Institute Rooms on Saturday, October 26th. Come one, come all and enjoy a good cup of tea. Chicken salad will be served as well as the usual dainties. Watch for posters for further particulars.

KETCHAMOOT

We regret very much to report this week the death of Mrs. Joe Sutton who passed away at her home on Sunday evening after a lingering illness of several years, but the suffering was borne with great Christian faith and patience. The funeral will take place at the house on Wednesday. Friends of the family extend to them sympathy.

Miss F. Fawcett is spending a few days with her friend Mrs. Henderson.

Mr. F. Sutton and daughter after an extended visit at the Sutton homes, left last week for Vancouver before their return home to Barrie, Ontario.

Mr. A. Schultz was a passenger to Edmonton Thursday returning home Friday and in the mean time had dental work done.

Mr. and Mrs. W. A. Mitchell, Mrs. Peter Lee, Mr. and Mrs. C. Coombes, Mrs. E. McMullen, Mr. and Mrs. J. H. Ingram and Mr and Mrs. G. W. Sears, of Ketchamoot attended the funeral of the late Evelyn Horte at Bardo Sunday. The sincere sympathy of the friends in Ketchamoot is extended to Mr. and Mrs. Horte and family in their sad bereavement.

Misses Sophian and Emily and Braun and friend, Mr. Russel motored over to Hawlf Saturday evening to visit their grandmother, Mrs. E. Mc[illegible]

Miss Selma Nomeland left on Friday for Edmonton where she will assist Mrs. D. H. Mitchell with her house work. Mrs. Mitchell is convalescing from a recent operation.

Mrs. J. Younie and Mrs. Dave Gormby, of Edmonton came down for the funeral of their friend and cousin, the late Mrs. Waldman.

The many friends of Mrs. Davison were glad to hear of her return home after a prolonged stay at an Edmonton hospital, and wish her a speedy recovery.

Miss F. Fawcett spent Thursday in the city returning Friday to attend the funeral of the late Mrs. Waldman.

Born: To Mr. and Mrs. Maurice McGinnitie, Tuesday October 22nd, a son. Congratulations.

NEW FILLING STATION BEING CONSTRUCTED

A business deal of local interest took place this week when the two lots, owned by Mr. Frinski was sold to Mr. Will Stutzman.

These were two of the lots the former Queen's Hotel stood on.

Mr. Stutzman has already commenced the foundation for a filling station to be erected at once. The building will be 20 ft. x 26 feet with a 20 foot front. It will be up-to-date in every particular, even to a rest room for those travelling who desire to rest. The usual services given at city filling stations will be given at this station.

The finish will be of California stucco and will be made very attractive.

Mr. Will Stutzman is well known here having until a few years ago farmed here. He has since travelled extensively in the United States, but has chosen Tofield for his business venture.

CARD OF THANKS

Mrs. Henderson and family wishes to express their sincere thanks and appreciation to the many friends who sent flowers, rendered valuable assistance, and sent expressions of sympathy in their recent sad bereavement.

NEWS OF OUR NEIGHBORS

BARDO

The Bardo Thimble Club held a meeting at the home of Mrs. S. Johnson, of Tofield on Wednesday. It was well attended.

The Bardo Ladies' Aid have been forced to postpone their dinner and sale, till an indefinite date. Further announcements will appear later.

Mr. and Mrs. M. Finseth and family, Mr. and Mrs. E. Rude and family and Clarence Rude were dinner guests at Mr. and Mrs. C. Rude's home on Sunday, the occasion being the honor of Mr. Rude's birthday. Many happy returns of the day, Mr. Rude.

Several ladies from Bardo are attending a meeting in Scandia today (Monday). Mrs. Sundby, president of the Women's Missionary Federation of the Norwegian Lutheran Church will speak.

Mr. and Mrs. Ben Anderson and Mr. and Mrs. B. Eide were Edmonton visitors on Friday.

Mr. and Mrs. Rueben Roth and Mr. Melvin Roth left for Milford Nebraska on Tuesday.

Misses Ester and Alice Ness, who are attending school in Camrose visited their home here over the week end.

Several Bardo People attended the Lutefisk Dinner and Sale at Amisk Creek on Friday.

LINDBROOK

The Lindbrook Store changes hands, Mr. Hicks having disposed of same to Mr. Alan Silverandes of Poe, Alberta, who will take charge probably next week if possible.

Mr. Bates and Mr. Norman Ellis have both lately purchased C. P. R. lands adjoining their respective places at Hastings Lake.

Visitors to Edmonton this week include Mr. and Mrs. A. K. Hicks, Mr. and Mrs. W. Hooper and Mr. and Miss Marden.

Mr. Brown, owner of a place on the Wellington line was in the district looking over a place with a view of buying same and moving here.

A big fire started Tuesday, Oct. 22nd, somewhere near T. Glenn's place. It sure was some fire too, but luckily the combined efforts of a lot of men and also an extensive tract of breaking stopped the fire from travelling.

Andew ———, section man well known to all here through such courtesies as mailing letters, seeing cream cans to the train etc., for the last four years has been transferred to another section.

KINGMAN

T. Grahn motored to Edmonton last Tuesday.

Martha Soma returned from the St. Mary's Hospital of Camrose, on Wednesday after being operated on for appendicitis.

A. Danielson returned from Finland on Friday after a six months trip.

T. Welsh, D. M. Thompson, A. Halseth, and Nels Jardie motored to Buck Lake on Saturday.

Miss Gladys Pederson left for Cold Lake on Saturday to spend two weeks with relatives.

Mr. and Mrs. Carl Larson from Daysland were the guests of Mr. and Mrs. E. Erickson on Sunday.

Mr. and Mrs. C. R. Blychert visited in Water Glen over the week end.

The largest funeral was held on Sunday, October 20th, in the Kingman and Bardo Churches when the beloved daughter, Evelyn, of Mr. and Mrs. T. Horte was laid to rest in the Bardo cemetery. The speakers of the occasion were Rev. Bjelde, Prof. Ronning, and Rev. M. D. Stutzman. The sympathy of the whole district is with Mr. and Mrs. Horte and family in their sad bereavment. Relatives from other points who were present were Mr. and Mrs. Haugen from Vancouver, Mr. and Mrs. Thor Thorsen and family, of Okotoks, Mr. and Mrs. C. Ronning, of Camrose, Mrs. Geo. Qualley, of Hughenden, Mr. and Mrs. J. Ness, of Edmonton. Floral tributes were received from, Mr. and Mrs. Selmer Johnson, Mr. and Mrs. Nomeland, Mr. and Mrs. Olaf Bonsen and family, of Edmonton, Mrs. P. Simonson, Mr. and Mrs. C. Ronning, of Camrose, Darphy Thompson, Mr. and Mrs. Geo. Welsh, Mrs. Ed Thompson and daughter, Ida, Mr. and Mrs. O. Thompson, Mrs. J. Ness, Mrs. Geo. Qualley, Mr. and Mrs. T. Horte and family, Mr. and Mrs. W. McIntosh, Kingman Public and High Schools, Mr. and Mrs. Joe Stauffer, Mr. and Mrs. John Yoder, Mr. and Mrs. C. Rude, Mr. and Mrs. A. Steen, Mr. and Mrs. H. Jensen, Mr. and Mrs. Foshaug, Mr. and Mrs. Hougseth, Mr. and Mrs. P. Lerbekmo, and Mr. and Mrs. E. Erickson and family.

A dance will be held in the Kingman Hall on Friday, October 25th the music being furnished by the Martin Orchestra, of Edmonton. Don't miss it.

HOLY TRINITY CHURCH
(Anglican)
Service at 7:30 p.m.
(Sunday, October 27th, 1929)

THE YOUNG PEOPLE'S CORNER

The Young People's Society held their weekly meeting in the basement of the church with president Marion Cooper in the chair. The meeting opened with the singing of a hymn followed by the devotional talk given by Bill Werton.

The minutes of the last meeting were read and adopted.

The business part of the meeting opened with a discussion upon how to raise funds. It was decided to put on a play some time in January, of which Mr. Rowe has kindly consented to be director.

A letter was read by the secretary stating that Mr. Backman would be here on November 11th if this date was suitable. It was decided to have him on this date but to let him choose his own topic. Mr. Backman is from the University of Alberta and is a wonderful speaker. His lecture will be illustrated with Lantern Slides. This lecture is open to the public and will be held in the body of the church on Monday Nov. 11th at 8 o'clock.

The practical part of the program consisted of talks on "Famous Pictures". This was in charge of B group of which Stella Clement is convener. The talks were given by Annie Booth who spoke about Millet and his pictures, Freeman Hill who spoke on Rosa Bon Heur and her wonderful picture "The Horse Fair", Sid Werton who spoke on Corot the famous artist who did not start his career as an artist until he was of middle age.

The recreational period was in the hands of Stella Clement and a few snappy games were played.

Mr. Rowe who had promised to come over and help us discuss the play now made his appearance and the play was once more discussed.

The meeting closed with the usual prayer.

We are glad to welcome our new members from Bardo and hope they will continue to come to our meetings.

The Executive committee met after the meeting and planned the remaining meetings up to Christmas. They are as follows:

Oct. 28th — Hallowe'en Social in charge of C group.

Nov. 4th — Stunt night in charge of group A.

Nov. 11th — Lecture by Mr. Backman of the University of Alberta in charge of B group.

Nov. 18th — Life stories of Missionaries in charge of C group.

Nov. 25th — A debate in charge of A group.

Dec. 2nd — A skating party if weather permits in charge of B group.

Dec. 9th — Illustrated lecture by Marion Cooper on her trip to Europe.

Dec. 16th — is a surprise by A group.

Prepare For the Winter

Quite a number of people say that we will have a very cold winter. Others say a mild one is coming but to play safe prepare for the worst. Lay in as much feed as possible and milk as many cows as possible. Generally speaking cream is highest during the winter months and by delivering your cream to us you get every last cent there is in it. Both the money and the feed will be very welcome around January.

TOFIELD IS DONE

SOME years ago when the writer was sitting in a Winnipeg office discussing things in general his fellow conversationist said, "But I thought Tofield was done", he meant that as far as enterprise, progress, business, and other things that go towards making a live town, Tofield had gone as fas as it could and would stay stationary or gradually recede. This was five years ago. Certainly Tofield is no Winnipeg or Vancouver, but it was not then, nor is it now—done. A prairie town is kept alive by the country surrounding it. Other places both larger and smaller, may have other means of support. A seaside may have its fisheries and its tourist trade; a mountain town may have its minerals; towns have been built up from the lumbering industry—but a prairie country town reflects the nature of the country surrounding it. The country surrounding Tofield was never more productive of wealth than it is today. Granted that this has been an abnormal year and money is anything but real plentiful, yet five years ago there was only one elevator and now there are four. The butter shipped from Tofield has gradually increased and general business has shown a steady increase.

To make the assertion that Tofield is NOT done doubly strong, one has only to review the events of the past summer. Early in the summer there was a chronic epidemic of mental pessimism—and everybody had it. At no time during twenty years residence in the west have we seen people so generally despondent as they were early last summer. But while conditions did not change for the better as much as one would wish—they did change and towards the end of the summer there was not so much despondency abroad, but anything but optimism prevailed.

Then came the fire, a severe blow to a small town in any year—a staggering blow to Tofield in a year like the present one. There were many doubts expressed as to whether the block would be built up again, and viewing the ruins in their first ghastliness, one had serious doubts as to whether the block would be built up again. But here we are towards the end of October and two handsome stores have already been built on the block and there are very fair indications that two more will be built before real winter sets in. These are good signs and reflect confidence in the districts ability to produce sufficient wealth to warrant the erection of these buildings.

The truth of the matter is, that while the Tofield land remains good; while there are cows to milk and people willing to milk them; while there is an increasing understanding of agriculture and agriculturalists, Tofield will not be "done" but will continue, through many years to come, to adequately combine with the district surrounding it to round out an ideal rural western community.

THE AUTOMOTIVE INDUSTRY

IT seems to have become a popular style of artists when desiring to depict anything old fashioned, character more vital to your personal welfare, but handle and operated by a chugging gasoline motor. The first auto—that piece of mechanism of noise and rattle—but costing, how much, $500.00 or more? As a sidelight on how far the automobile has gone as regards improvements and value for money, contrast the noisy explosive horseless carrto show a couple riding in a motor car guided by a day. Then recall that at Tofield the other day a Ford truck, even though old and much used, was mechanically more perfect than the horseless carriage, and sold for ten dollars.

THE HABITS OF PROMPTNESS

THE HABIT of promptness is one of the highest virtues in life, at least as it affects others in relation to yourself. There may be other qualities of iage of thirty or more years ago with the cars of toin the way you react upon others there is hardly any other virtue which exceeds that of promptness. This applies particularly to the keeping of appointments. How many hours, in the sum total, are wasted by other people's time by the habit of tardiness in some individuals in keeping an appointment? To set an hour and time for meeting, to some people is the most important matter, and rather than break that appointment they would suffer great inconvenience and loss themselves. But to others it is a mere passing thought, and they regard their word so lightly that they even forget the appointment altogether. This is especially true of meetings, public and club, so that absentees and lates are the greatest affliction that affects such gatherings. People who so lightly break an appointment are very lax in their discipline and should take immediate stock of themselves, for it is usually the same people who do it, and upon whom the habit grows and grows.

The same spirit also leads the people to disregard their debts when they are due, or fail to pay an account when it is promised. The losses sustained in the business world by the disregard of time element in the payment of debts is tremendous. Promptness in meeting one's financial obligations is a great test of true character. Laxity here is indicative of grave weakness in the moral fibre. A person who deliberately disregards an obligation, postponing it to suit his own convenience, when he knows he has definitely promised it at such and such a time, is showing a weakness that has many ramifications and crops out in his actions at unexpected places and times.

The test of this attitude lies in little things such as small accounts which so often are contracted, and which are so easily forgotten.

CARE OF A SMALL FLOCK OF SHEEP

Lamb, mutton and wool are in strong demand and prospects are bright for sheep raising at the present time. A few words on the care of a small flock of sheep may be particularly appropriate at this season of the year, as the fall is the best time for the beginner to start in the sheep business.

The inexperienced sheep raiser should begin with grade ewes, the best available, and a pure bred ram. The breed will depend largely on the purchaser's preference, but it should be borne in mind that one breed in a district is desirable from the economic viewpoint. Care should be exercised in selecting ewes to see that they have normal udders and have not "broken mouths." The beginner should plan to start with at least ten ewes, or more if finances are available.

Unless lambs are to be dropped in cold weather, no expense to provide warmth is necessary. A building that is dry, free from draughts and that will keep out rain and snow is desirable. A yard enclosed by woven wire, which is dog and coyote proof, is essential.

Ewes generally come in heat in late fall, the period lasting from one to three days, and recurring at intervals of fourteen to nineteen days. The gestation is around one hundred and forty-five days, so the farmer can largely control his lambing season. Ewes are usually "flushed" before breeding. This consists in bringing ewes on to succulent pasture prior to breeding in order that they may be in good condition and gaining in flesh. This practice helps to secure a large lamb crop. Frequently the pastures are supplemented by grain feeding at this time. Pastures and stubble fields will form the main source of feed for sheep in the late fall. In winter good legume hay, from 3 to 3½ pounds per day, will form the bulk of the ration. Succulent feed in the form of silage or roots should be fed sparingly before lambing time, while towards lambing a small grain ration of half a pound of oat chop per day should be used.

The lambing season is the shepherd's harvest, and the size and quality of the crop largely determine the profits. If date of service is known the early lambing ewes can be penned off from the rest of the flock and given special attention. Well fed ewes seldom have any trouble but an attendant should be on hand to give assistance at parturition if necessary. A common trouble of young lambs is goitre. This can be controlled by feeding ewes iodine in the form of iodized salt, made by dissolving 2 to 4 ounces of potassium iodide in water and pouring over 100 pounds of loose salt and mixing thoroughly. This should be fed for a time before and during pregnancy.

Sheep and lambs require a certain attention, but their management can be learned and understood by anyone who is willing to observe carefully, and think and attend to details as attention is required.

CHEVROLET SIXES
Sold this year
as any other six
at any price
in any year!

No other six-cylinder car has ever earned, in any year, one-third the public acceptance . . one-third the volume of sales . . which have been bestowed upon Chevrolet Six during the nine months since its introduction.

This tremendous public acceptance is due to three outstanding facts. To the fact that Chevrolet offered, for the first time in history, a six at the price of a four . . To the superb standard of quality in Chevrolet's design, material and workmanship. And to the new, greater performance abilities that Chevrolet Six provided.

Chevrolet Six was four years old in experiment, in research, in testing, in proving . . before the first Chevrolet Six was placed in the hands of its owner. And that owner . . like the million and a quarter owners who followed his example . . SOLD HIMSELF on the Chevrolet he bought . . on the road, behind the wheel. Why not let us place a Chevrolet Six at your disposal . . and form your own opinion of its value.

NATIVE-BORN PUPIL ENTITLED TO NAME TRUE NATIONALITY

Teachers will be informed "Canadians" now classed as such

Children in Edmonton schools who believe they are Canadians can call themselves as such as far the Edmonton public school board is concerned, the board declared Tuesday night in dealing with a complaint from the Native Sons of Canada organization that a teacher had told the daughter of one of the members she was not a Canadian, as there is no such nationality.

The trustees passed a resolution stating "that the attention of teachers be drawn to the fact that the census now carries classification known as Canadians."

"The pupils ancestors for several generations (since 1784) have been born in Canada," the letter stated, "and Native Canadians have been contending for some time that native Canadians should be described as Canadians, and we respectfully submit that no teacher should inform a Canadian child that there is no Canadian nationality, and that children enrolled in school and who are born in Canada should be enrolled as Canadians.

"In view of the fact that provisions have recently been made in the dominion census for the registration of "Canadians" as such, we suggest that it should be generally made known among teachers in Edmonton schools and that Canadian children take pride in their Canadian birth and for the most part like to be considered as Canadians.

DEPT. OF PUBLIC HEALTH HAS MISSIONARY IN THE FIELD

(BY EDNA KELLS)

That an ounce of prevention is worth a pound of cure is the gospel which the Home Nursing instructor stresses in the short courses of lectures on home nursing and first aid arranged by the Department of Public Health. Miss Amy Conroy, R. N. who spends the greater part of the year travelling through Alberta on this mission is particularly well qualified for her task, being an "understanding person" as well as an expert nurse.

Throughout her lectures she stresses the importance of preventive measures, of quarantining cases of contagious diseases, of cleanliness, of a pure water supply and plenty of fresh air, and of sanitary toilets. She also teaches the women to make use of the simple home facilities in nursing the sick.

Miss Conroy's itinerary is arranged early in the spring with a view to covering as much ground as possible. A local organization assumes the responsibility of making the necessary arrangements in the place she is to visit. She does the rest. In Magrath, where she was "seen in action," the Women's Bureau, the first organized under the legislation passed last winter, arranged the course. 2011 women and many girls attended Miss Conroy's lectures in 1928. This year they have turned out in larger numbers.

In Magrath, forty women and girls attended the first of four lectures, and that in spite of the fact that harvest was at its height. The lecture had to do with the routine work of the sick, the second with contagious and infectious diseases, the third with first aid, and the fourth and last with maternity work.

Miss Conroy's work is not over when she concludes her lectures each day. At every point she is asked to visit the schools, look over the sanitary arrangements, and make suggestions as to how they may be improved. After the visit she makes an ideal layout and tells the women how they may bring this about. Sometimes the teacher has difficulties which call for outside advice. Certain pupils may be problems beyond her understanding. The nurse visits the home and tactfully endeavors to get at the root of the trouble and remedy it. New Canadians are visited, and welcomed, and given advice that will help them adapt themselves to Canadian conditions. Miss Conroy invariably finds these newcomers appreciative of the little attention.

Sometimes the nurse lends a hand to the local teacher who needs skilled attention for a sick patient unable to have a private nurse. Sometimes she is called upon to give first aid to the injured, or to advise people who are taking treatment from a doctor at a distance, and unable to see him frequently. To every call she responds.

And so Miss Conroy goes the rounds of the province, leaving knowledge and inspiration in her wake, and a memory of skillful hands and a kindly heart. It is little wonder that the nurse and her little grey car about are welcomed wherever they go.

CANADIAN MEDICAL ASSOCIATION
HOW LONG WILL WE LIVE

Statisticians are able to prove to us that, on the average a child born today will likely live ... years of age instead of the 40 years which was the case in the middle of the last century. This has been brought about chiefly by better care of infants, a tremendous reduction in the diarrhoeas of children which used take such a heavy toll of infant life, pure water, safe milk and improved sanitary conditions.

There has not been a corresponding increase in the expectation of life among adults. The expectation of life at 50 years of age is not appreciably greater today than it was during the past century. One interesting point that we learn is that persons who live long ... in general, of long lived families. This does not mean that a member of a long lived family is more likely to recover from an attack of an acute disease, but rather that if he or she does escape from an attack of an acute disease, such as those which destroy life in infancy and early adult years, such a person will be more likely to live to advanced years.

Many people have the idea that health work's sole aim is to prolong life. This is only partially true, because the ideal sought is rather healthier years than more years. Because health and happiness are closely linked together it may be fairly said that the ... of health work is not to prolong life but to make people happier while they live.

We do not know why some families have what we might call greater vitality and live longer than the average. We do not know why Old Parr lived to 152 years. It may be, of course, that many years have been added to his life in the retelling of his story. We do know, however, that, to the adult who desires to increase the expectation of years of health, we can say moderation in all things is essential and above all ... A ... life must be maintained whether it is in work or in play, such as a hobby. Worry must be cast out as it is the thing which wears out the machine.

Questions, concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

KEEN INTEREST IN ONE CENT SALE

Already there has been interest in the One Cent Sale to be put on by A. Beirnes at the Tofield drug store. Most of our readers know the simple method of these sales. You buy one article at the regular price and receive another exactly like it for one cent. The merchandise is the very best procurable, and sales of this nature are only made possible by an arrangement with the parent company who use this method of introducing their goods into the homes of the people. Don't forget the date—be there on the opening day.

OBITUARY

Lillie O. Henderson, second daughter of the late Mr. Henderson and Mrs. Henderson, was born in Tennessee, June 21st, 1890, and died at the St. Mary's hospital, Camrose, on Wednesday evening, October 9th, at the age of 40 years, 3 months, 18 days.

Lillie Henderson came to Canada when a young child and lived with her parents on a farm in the Tofield district until her marriage to Mr. Ben Wildman on August 17th, 1912, when she went to live in the Woodlawn district and there resided until her death.

Mrs. Wildman had been in poor health for some time and it was thought best for her to undergo an operation which was apparently very successful until the tenth day when she suffered a sudden relapse from which she never recovered.

She will be greatly missed as she was of a cheerful disposition and always willing to help at home and for others. She also took a great interest in the community at large and at the time of her death was a member of the United Church, Secretary Treasurer of the Woodlawn school district, member of the U.F.W.A. and had been a member of the M.A.S. for many years and gave both her time and talent to any good cause.

She leaves to mourn her loss, one little daughter, Maud, 8 years old, her husband pre-deceased her two and a half months ago; mother, Mrs. Henderson, one sister, Mrs. W. A. Mitchell, one brother, Jason Henderson, one niece and nephew, besides a host of friends who extend to the family their sincere sympathy.

Funeral service was held at the United Church, Tofield, on Friday, October 11th, conducted by Rev. Thom Gordon. He took for his text the words of St. Paul "To live is loss, but to die is gain." The casket was covered with many beautiful flowers. The body was laid to rest in the Tofield cemetery.

The pall bearers were old time friends, Messrs. Robert and Samuel Sterrit, John McGlintie, John Morton, John Warner, Frank Shupe. These were the same pall bearers selected by Mrs. Wildman for Mr. Wildman.

CITY BOWLING TEAM VISITS TOFIELD

On Wednesday evening Oct. 23rd the Edmonton Journal Bowling team journeyed down to Tofield to play the local team. The games were close and some good bowling was witnessed. The Journal won two games and Tofield won one. In the three games the Journal won by the margin of thirty five pins.

Gerrie was high man for Edmonton with a score of 528.

The Tofield team consisted of Yablonski, Calvert, McLaughlin, Lee, ...kins, Craig and Clutterham.

Following the match the Tofield bowlers entertained the Journal aggregation to an enjoyable duck dinner.

A. B. CLUTTERHAM TO INSTRUCT CADETS

B. Clutterham, ex-service man and Tofield postmaster will instruct the Tofield company of the High School Cadets. The Tofield company of cadets was formed some two or more years ago with A. B. Evenson as instructor. At that time Mr. Evenson was a teacher on the staff of the school.

Mr. Clutterham's military training and his general good nature should enable him to become an ideal instructor for the boys.

NEW GASOLENE STANDS GOING UP

Whatever else happens there is little liklihood of Tofield going short of gasolene. During the past few days three new gas stands have been erected. These are: one for Mr. Bruce, one for Mr. Jobb and one for the McLaughlin Hardware. The McLaughlin Hardware gasolene station will enable motorists to procure a choice of gasolene as the additional tank there will contain ethyl gasolene. These with the addition of the filling station now being erected and those previously in existence should keep Tofielders pretty well supplied with gasolene.

A THRILLING OF THE SOUTH SEAS AT THE VARIETY ON FRIDAY AND SATURDAY

Love under the tropic moon—grim shadows of the money hungry white man—fantastic scenery; farflung, gorgeous, but terrible—a thrilling drama of a dying race.

These factors all contribute to make W. S. Vandyke's production "White Shadows of the South Seas" which will appear at the Variety on Friday and Saturday of this week, a picture that is human, natural and different. The Van Dyke has taken an idea: namely that the white man, wherever they find their way around the world, bring with them a shadow which, when thrown over primitive races, results in disease, destruction and death for the simple savage. On this new but simple theme he has woven a screen drama violent and terrible, but tragically beautiful.

BASKET BALL SERIES PLANNED

On Tuesday evening a number of young boys motored to Ryley to play basket ball in the new hall. This was more of an organization meeting than anything else, though basket ball was played throughout the evening. Though nothing definite was decided, present indications are that there will be a schedule drawn up with teams from Ryley, Holden, Kingman and Tofield participating. The membership fee was fixed at one dollar. There will be another meeting at Ryley next Tuesday. Those who intend making the trip must have membership fee paid up by that time. In case that the schedule does not materialize the fee will be refunded. All games will be played in Ryley and will continue as long as the roads remain open.

Here and There

(330)

"The greatest apple crop in the history of Nova Scotia," is the almost unanimous opinion expressed by prominent fruit growers and Government experts of the province. It is estimated the crop will reach 2,500,000 barrels, at least half a million barrels more than any other crop ever raised in Nova Scotia.

In preparation for the opening of the 1929 big game hunting season in New Brunswick, 25,000 hunting licenses have been sent out from the Department of Lands and Mines to 300 vendors in all parts of the province.

E. W. Beatty, chairman and president of the Canadian Pacific Railway, accompanied by a group of directors of the company, is now on his annual tour of inspection of company's properties and conditions in the west. Resorts, agricultural centres, experimental farms, mines and smelting plants, as well as the system itself was inspected during the tour which started September 5 from Montreal and closes at Winnipeg October 2.

"I am watching with the greatest interest the progress being achieved in the United States where railways are experimenting in the use of aeroplanes as adjuncts to their railway services," said E. W. Beatty, chairman and president of the Canadian Pacific Railway, interviewed at Toronto recently. "There they are using planes by day in certain places and rail travel by night and the experiments are very interesting to me," the president added.

Two first prizes, three seconds, and a third award were won by the Canadian Pacific Railway supply farms championship Holstein herd from Strathmore, Alta., at the 60th annual provincial exhibition at New Westminster recently. This is a follow-up to the Vancouver Show where the herd led all others.

Up to the end of August, says Colonel J. S. Dennis, chief commissioner of the railway's department of colonization and development, the Canadian Pacific brought to Canada 1792 boys for placement in agricultural employment under the distributive schemes of the company. "This is the largest number of British boys brought out to the Dominion by any one organization," says the Colonel.

Back from a month's wanderings along the line of the Dominion Atlantic Railway in Nova Scotia, Miss Juliette Gaultier de la Verendrye, noted folksong artist, stated that she had discovered 300 folksongs that were either quite unknown hitherto or else were interesting variants in melody and tune to similar songs in vogue among the French-Canadian habitants. She will sing some of them at forthcoming concerts.

During the first five months of the year 5,329 homesteads representing 842,240 acres of land were taken out in Alberta, settlement being mainly in the Edmonton, Grande Prairie, Peace River and Prince Albert districts.

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. Mel Hop, on October 26th, a daughter.

Born.—To Mr. and Mrs. N. W. Mollbrandt, on October 23rd, a son.

Born.—To Mr. and Mrs. C. F. Ward at Shoats, on October 25th, a daughter.

A meeting of the Holy Trinity W. A. will meet at the home of Mrs. McCarthy on Wednesday, November 6th, at 2.30 p. m.

The members of the Buttons brige club dropped in at Mildred Scott's on Monday night to say farewell and left a parting gift, as token of her esteem in the club. Both the callers and gift were a pleasant surprise to Mrs. Scott, and after playing a few hands of bridge, lunch was served, and the guests departed at an early hour.

Mr. A. C. Sanborn and Mr. W. D. Schroeder left on Tuesday for a hunting trip in the Athabaska district.

Glenn Woods returned home from the city on Wednesday where he has been doing carpenter work. He was accompanied home by Bill Logan of Edmonton.

Annie Booth, Ethel McClymont, Bert Swift and Freeman Hill motored to the city on Monday night to see the Cleveland Edmonton world Championship basketball game.

Mr. Lamont and Mr. Shorten were business visitors to the city on Monday.

A number of Tofield basketball players journied to Ryley to play basket ball on Tuesday night.

Miss Mary Cherne, Miss Maitland, Clifford Ward, and Jim Yakiboski were in the city on Saturday and attended the Cleveland-Edmonton basketball game.

We apreciate very much the news budget from Ross Creek, but we MUST have the writer's name attached. If the writer will telephone or call on us we will insert news next week under proper date line.

Mrs. Bruce and son Jimmy, were Edmonton visitors on Saturday.

Mr. and Mrs. C. Rowe visited Edmonton on Saturday and attended the world championship basket ball game there.

Mrs. Laurie Scott and baby left on Wednesday for Duluth, Min., where Mr Scott will play professional hockey this winter.

Keith Scott returned to Calgary on Sunday evening after spending two weeks with his sister, Mrs. Geo. Agnew.

Miss Dorothy Hay and Mr. Harold Currie were visitors at the L. C. Hay home on Sunday.

Miss Annie Hobson visited with her parents on Sunday.

Mr. and Mrs. N. S. Smith left for the coast this week. We understand they will make their future home there.

U. F. W. NOTES

The meeting was held at the home of Mrs Jas. Francis. As it was the anniversary of the local the meeting was of a purely social character. It consisted of games, contests etc. The arrangements were in the hands of last years program committee with the addition of Mrs. Warner. A most enjoyable afternoon was spent. Mesdames Morton, Sears, Barnes, Baptist, Burchard and Carlisle served lunch.

The next meeting will be held on November 14th at the home of Mrs. Dodds. The roll call to be answered with a cure for the blues. A paper by Mrs. Peter Lee on ideas for evening entertainments.

Mesdames J. H. Ingram, W. Abernethy, T. R. Murray, G. Walker, Mr. Seale and Bearisto.

Dr. B. W. Richardson, dentist, who recently took over the practice of Dr McClurg, will shortly be moving into an office above Jobb's store.

Mrs. H. Hicks was a visitor to the city last week end.

Horace and Murray McHaffey, Bob Whyte, Bill and Sid Worton attended the world championship basketball game at Edmonton last week.

Robert Hopgood was a visitor to the city last week end.

The Misses Virginia and Norma Ball, of Edmonton visited friends in Tofield over the week end.

Mrs. Burnett is suffering from an attack of the grip.

Mr. Imler, of the North Western Utilities is under the weather.

Mrs. Gray returned home on Tuesday from Vancouver, where she attended the wedding of her son.

There will be a shower for the children's booth in aid of the ladies' aid's bazaar of the United Church, to be held November 5th, afternoon and evening at the home of Mrs. Firth.

Mrs Laurie Scott and Mr F. ...wald were visitors to the city on Saturday.

The Institute room was the scene of an unusual gathering on Tuesday afternoon when between thirty and forty friends of Mrs. Ward gave her a miscellaneous shower, as she is moving into town this week, having spent most of her time in Edmonton since the disastrous fire a few months ago, which destroyed her city home and nearly all the contents. Mrs. Ward was the recipient of many beautiful as well as useful gifts, and graciously thanked those present for their hospitality and kindness at this time and since the fire. Many of the gifts were accompanied by suitable verses, which Mrs. Ward read aloud, and were enjoyed by the listeners. A very tasty lunch was served by those in charge which was thoroughly enjoyed by all. After all the gifts had been opened, the gathering sang "For She's a Jolly Good Fellow."

WEDDING

FRICKELTON - CARLISLE

Chrysanthemums, greenery and bitter-sweet decorated the home of the bride's parents for the impressive wedding ceremony of Miss Barbara Margaret Carlisle daughter of Mr. and Mrs. T. N. Carlisle of Walbert, Nebraska formerly of Tofield, Alberta and Earl Russel Frickelton son of Mr. and Mrs. J. E. Frickelton of Hardisty, Alberta, which was solemnized Saturday evening, October 19 at six o'clock. Rev. R. Frank Shackbuh, of Maywood, Nebraska officiated.

The bride was lovely in a dainty gown of marron glace georgette fashioned on modish princess lines. She carried ophelia roses.

Miss Gertrude Carlisle, of Wellfleet, sister of the bride was bridesmaid and wore a frock of navy blue georgette. She carried a bouquet of American Beauty roses. Mr Bayard B. Carlisle brother of bride, attended the groom.

The bridegroom's gift to the bride was an amethyst necklace; to the bridesmaid a necklace of rose stones and pearls, and to the groomsman a white gold tie pin, pearl set.

A wedding dinner followed the ceremony for the members of the immediate family and a few intimate friends.

On their wedding trip Mr. and Mrs. Frickelton will visit Omaha, St. Paul and Winnipeg, after which they will reside at Wainwright, Alberta, where Mr. Frickelton is a member of the Buffalo Park staff.

NEWS OF OUR NEIGHBORS

LAKESHORE

A very enjoyable farewell party held for Mr and Mrs. Everett Noland on Wednesday evening of last week. Cards were played after which supper was served and a small presentation was made to Mr. and Mrs. Noland as a token of respect and esteem in which they were held in the community. They have moved since to a farm in the Deville district and will be missed by a host of friends in this district.

Mrs. Waterson, of near Camrose spent several days last week visiting her daughter Mrs. Leslie Jones.

Friends of Chris Moss will be sorry to hear that he has made very little improvement in health in the past few weeks and is still confined to his bed.

Mr. Keith McIntosh, of Kamsack, Sask., spent a day or two the first of the week at the T. R. Murray home. He, with Mrs. McIntosh who has been in the Lamont hospital for the past six weeks returned to their home on Monday evening.

Mr and Mrs. T. E. Seale spent a very pleasant week end with Mr and Mrs. Innes of Sedgewick. It will be remembered that Mrs. Innes was before her marriage, Miss Linda Hoyle, resident of Tofield and district for a number of years.

Mr. and Mrs. J. H. Johnson entertained friends from Bardo on Sunday.

Mr. and Mrs. T. A. Jones had as their guests last Sunday, Mr. and Mrs. Wm Roberge and Mr. Jack Cinnamon and son Roy.

We are glad to report that Mrs. Myrtle Seale returned from the hospital a week or so ago. Miss Mabel Maurer is assisting her for a time.

The Rev. Kiewer, of Holden, spent last Sunday at the Henry Tiedeman home.

Mr. and Mrs. R. C. Phillips spent Sunday with the latter's parents, Mr. and Mrs. Plants, of Wood Lawn.

WEDDING
Hanson—Gray

A pretty wedding took place at the First Presbyterian Church, Vancouver, on October 26th, the contracting parties being Mr. Lowel Gray, son of Mr. and Mrs. Gray, of Tofield and Miss Florence Haunson of Nanaimo, B. C. After the ceremony a reception was held at which many friends and relatives were present. The happy couple took the night boat for Seattle where they will spend their honeymoon, after which they will reside at Calgary, Alberta. There were many beautiful and useful gifts.

Mr and Mrs. Harry Rogers have moved their residence to the house recently vacated by Mr. and Mrs. Carter. Their former home was recently purchased from J. W. Thackson by Mr. H. T. Ward.

KINGMAN

Miss Agnes Christenson underwent an operation for appendicitis on Monday in the St. Mary's hospital and is now progressing favorably.

M. G. L. Bergen of Wetaskwin was in Kingman on Wednesday.

Mr and Mrs. Thor Grahn and family visited with Mr. and Mrs. Moore of Hay Lakes on Wednesday evening.

Mrs W. Hartchen, Mrs. Grace and Mrs. E. Erickson were afternoon guests of Mrs. W. McIntosh on Thursday.

W. Wideman and C. Simonson motored to Edmonton with a load of hogs on Thursday.

Mr and Mrs. W. Jardie and Mrs. E. Erickson motored to Edmonton on Friday.

Mr and Mrs. C. Ronning and Miss Irene Horte of Camrose were visitors with Mr. and Mrs. Thor Horte on Friday evening.

Mr. Roy Melvik left for Edmonton on Friday where he will be working for some time.

Messrs Adrean and John Anderson motored to Clyde on Sunday.

Quite a surprise was sprung on Mrs. C. Adamson on Saturday evening when without a word of warning fifty of their friends took possession of their house to celebrate the sixtieth birthday of Mr. Adamson and the fourtieth of Mrs. Adamson. Suitable gifts were presented. Lunch was served and a very enjoyable time was had.

Mr. and Mrs. Joe Munson and family and Miss Helen Blyckert of Camrose were the guests of Mr and Mrs. C. R. Blyckert on Sunday.

Mr. and Mrs. Thor Horte and family and Mr. and Mrs. H. Haugen motored to Edmonton on Sunday.

Mr and Mrs. E. Erickson and son Harry and Mr. and Mrs. W. McIntosh were Sunday guests of Mr. and Mrs. W. Hartchen.

Mr and Mrs. T. Grahn motored to Wetaskwin on Sunday.

TOWN COUNCIL MEETING

The Tofield town council held their regular meeting on Monday night of this week.

Most of the business done was of a routine nature and included the passing of several accounts. The question of the skating rink management was discussed pro and con but nothing definite decided upon. It is fully expected that the rink will be in operation again this year similar to other years.

Bill, of the Hotel says he stole a march on the Hallowe'en jokers. He bought an extra cake of window cleanser to take care of the soap streaks.

THE YOUNG PEOPLE'S CORNER

On Monday evening the young peoples society held their annual Hallowe'en social. This was in charge of C group of which Thelma Noland is convenor.

The social opened with the members being introduced to the spirit world. They were led through "The Devil's Kitchen," "The Human Bone Heap," and other haunts of the spirits.

Briefly we will tell you of the trip we had to take. First they brought us into a dimly lighted room which contained a coffin with a ghostly hand hanging over the edge, we had to crawl over this and next we heard a voice from within call, "If you wish to gain admittance knock once," (we knocked) from within arose an awful wailing and moaning and when it had subsided the voice said we had made the spirits angry. Finally after knocking three times we were brought before a white ghost, hovering over a tombstone upon which was written "Silence". Do not awaken the high, low or medium spirits. From here we were brought to the human bone heap, which we had to walk through, this was surrounded by trees which were dimly lighted and through the trees were ghosts and faces peering at us. As we neared the end we were told of two men who had comitted sucide by hanging themselves and that their ghosts were lurking about to-night. As we rounded a corner we came right upon two forms hanging from the roof, swinging slightly in the semi darkness. The wailing and groans of the spirits were kept up all the way. This ended the visit to the spirit world and we were shown into a room where the other guests had assembled. Hallowe'en hats were presented to all those present and and the games commenced. The unveiling of the tombstones was a new one to most of the crowd. A number of tombstones had been made and the Ancestors of a few of the society members written on them. A verse was read and any relation present had to give a little speech about his ancestor. The verse gave the clue of what kind of person the ancestor was. A number of more games were played and then Stella Clement told a Ghost Story this kept the members on pins and needles all the way through. At midnight a delicious lunch was served to which thirty or thereabouts did full justice. Shortly after the social broke up and every one expressed themselves as having a very enjoyable time.

CHAS. ROBINSON

EDMONTON ENGINEER, FIREMAN KILLED ON C. N. SANGUDO LINE

James Hallet and John Coltherd Meet Death When Locomotive Topples Over Embankment—Engine Was Hauling Work Train

Badly crushed when the engine hauling the work train turned over, two Edmonton railway men were killed just east of Sangudo at 6.30 Monday morning.

The dead are:

James Hallet, C. N. R. engineer, 10174 114st.

John Coltherd, fireman, living at 10622 106 ave.

Both men were married and had families.

Meagre details concerning the tragedy have been received by C. N. R. railway officials as yet. First reports were to the effect that due to a slide of the embankment, the engine with a pile driver turned over at a point a half a mile east of Sangudo. As they were aboard the engine at the time, Engineer Hallet and fireman Coltherd were killed.

An auxiliary train was at once sent out to the scene with instructions of W. R. [illegible] general superintendent of the Alberta district, C. N. R. He left later on for the scene.

Hallet was a well known Edmonton railway engineer. He is survived by a wife and one child. The fireman leaves a wife and three young children.

Prompt action in meeting the situation was taken by officials of the C. N. R. After sending out the auxiliary train with wrecking equipment at 8 o'clock a relief train with J. Kyle, superintendent of motive power and other officials, left the city at 10 o'clock. It was not expected that complete details concerning the tragedy would be available until officials return to the city on Monday afternoon.

Engineer Hallet left the city at 1 o'clock Monday morning on the work train, after having spent the day here. He was around forty years old and came originally from Devonshire, England. Some nine years ago he came from Port Arthur to Edmonton and had since lived here. His parents live in Castor while he has other relatives in the city.

Coltherd had lived in Edmonton for several years having come from the east. While he had been working as a fireman for some time, it is understood that he held fireman's papers. He was around 35 years old.

Officials of the railwaymen's union left on the relief trains on Monday morning for Sangudo to make necessary arrangements concerning the removal of the bodies to this city for interment.

INSPECTION REQUIRED FOR FEED SHIPPED UNDER FREE FREIGHT TARIFF

Every possible precaution will be taken by the Department of Agriculture to prevent the spread of noxious weeds from one section of the province to another under the arrangement recently reached whereby hay, straw and greenfeed and feed oats and barley will be shipped free of freight charges into those districts where additional feed will be required during the coming winter.

Any shipments of this kind, it is announced by Hon. George Hoadley, Minister of Agriculture, must be inspected before being loaded, by an official of the Department, and for this purpose two inspectors have been appointed. In the part of the province south of Red Deer inspection of all such shipments must be made by W. G. Lawrie, 325—21st Ave. West Calgary, and in the northern part of the province inspections will be made by Frank Stevens, whose headquarters are at the Field Crops Branch, Department of Agriculture, Edmonton.

Farmers who contemplate selling hay or feed for shipment under the provisions of the free freight tariff are advised that this hay or feed cannot be loaded until the vendor has secured from one of these inspectors a certificate of its satisfactory freedom from noxious weeds, and any person who proposes to ship feed under the free-freight arrangement would be well advised to communicate with the inspector for his district at the earliest possible date in order that such shipments may not be delayed for lack of inspection.

It may be pointed out that to the area originally outlined in which the free-freight tariff will apply, the following lines have also been included: Irricana to Consort, Nightingale to Norfolk, Grainger to Langdon, Bassano to Dalemead, Gleichen to Langdon and Lomond to Arrowwood.

The regulations as originally drafted applied to baled hay and straw, feed oats, threshed or in the sheaf, and grain screenings. Feed barley has now been added to the list of feeds which may be shipped into the designated area under the arrangement whereby half the cost of such shipments is borne by the railway company, and half by the Alberta Government.

ZERO WEATHER CREATED FOR TESTING CARS

The process of regulating the weather has been attempted on more than one occasion. In Southern California, to the complete mystification of many believers and sceptics alike, rainstorms are said to have been created by two brothers at a stated fee per inch of rainfall. Hurricanes are being blown up at regular intervals in the same section of the country through the medium of the movie-wind machine. In Toronto, miniature cyclones are almost common daily occurrences. There, in one of the experimental laboratories of the University of Toronto, the effect of tremendous wind velocity on airplanes is proved in a "wind tunnel" through wind machines similar to those used for creating movie hurricanes. In New York a leading department store advertises weather made to order for the shoppers within its walls.

Passers-by in the busy and more or less congested area of Detroit are often puzzled, on a hot summer's day when they see heavily clothed men standing about taking the sun bath treatment. Suspicions as to insanity are allayed upon learning that the men are General Motors engineers merely enjoying a respite from extreme cold after having worked in self-made "weather" that would do credit to a first class January blizzard in northern climes.

Enclosed for hours in a cold room, Chevrolet engineers study at intimate range the reaction of the new Chevrolet to the temperatures an automobile must withstand in winter whether left over night in an unheated garage or parked for hours alongside the curbing of a street. As part of the test, within a period of three hours the mercury is dropped from zero to 45 degrees below.

The "cast of characters" in the coldroom consists of capable engineers garbed in aviators' suits, even to helmets, patterned after the costumes worn by round-world fliers. This precaution is essential as the temperatures under which they make the tests is comparable to that which fliers are made to undergo at an altitude of 18,000 or 20,000 feet.

The cold room was the first of its kind in the automobile industry and was originated and developed six years ago by General Motors engineers. Through the use of amonia gas, much after the manner in which it is employed in cold storage plants or in establishments devoted to the manufacture of ice, the thermometer reading can be raised or lowered by the engineers within a short space of time.

The use of an electric dynamometer is a part of the programme which follows when a Chevrolet is lowered on an elevator and rolled into the cold room. By means of this machine, which is both dynamo and motor, it is possible to furnish a road torque for the car, when its rear wheels are placed against a set of steel rollers set in the concrete floor of the room. The torque can be made to parallel the resistance the car would encounter when driven outdoors on the highway in the same temperature. To add to the severity of the test, a blast of air is directed against the radiator, to simulate the wind resistance which the car would have to conquer on traveling in the [illegible]

Experiments in the cold room are made singly with individual units of the car—the manifold, the universal joint, the action of the rear axle in low temperature, the performance of the fan, the carburetor, starter, and so on. Likewise, the engineers are able to make a detailed study of how the motor itself reacts to the frigid temperature, and what effect 45 degrees below zero has on the lubricants and on the gasoline that are in the machine. Any car, in order to meet a thorough test, must remain in the cold room for five days.

It is no easy road that the new Chevrolet travels at the hands of sub-zero weather created by earnest but unfeeling General Motors engineers. However, this rigid test, together with the ones employed summer and winter on the General Motors proving grounds, has contributed toward making the new Chevrolet as nearly a perfect product as automotive science can produce.

TAG DAYS AND CAMPAIGNS

The public have and will always be asked to support campaigns either by subscription or tag days. All of these are worthy in the extreme and of necessity in our public life. There is one, however, which overshadows all those in our national life.

Armistice Day will soon be upon us, which is a day imprinted in the minds of all of us, not as being one of "national" importance but of "world wide" importance. The extent to which this day when it occurred was lauded by people of every nationality cannot be measured, and the relief to the pent up suffering of relatives anxiously concerned about the welfare of their own, will never be forgotten.

We owe Canada's 60,000 men who gave their lives in solemn tribute as Canadians and we should all bring this to our attention once per year. November 11th is the day for this observance when the young nation of Canada will display its remembrance by wearing a Poppy.

Every Canadian or citizen in this glorious land of ours is asked to Wear the Poppy which is emblematic of that tribute.

The Canadian Government is employing our disabled men to make these poppies in order to provide a means of employment for them, and the time they spend occupies their attention and helps relieve their suffering for a little while. Each poppy bears the Veteraft stamp.

The Legion throughout Canada under the leadership of General Sir Arthur Currie G. C. M. C., K. C. B., is appealing to all citizens to remember the day.

Is there a citizen who will refrain from paying this respect to our dead soldiers? Her Excellency, Lady Willingdon is Patroness in Chief for all Canada. Other countries are observing this day in this manner,—let Canadians be Canadians by showing they will not take second place to any country in the world in this observance.

The mayor of every town in Alberta where no branch of the Legion exists has been made aware of this Campaign with a request to form a Central Committee to operate.

Any town who require Poppies for this occasion can get them from the Department by getting in touch with the Provincial Secretary of the Canadian Legion at Calgary.

A GOLDEN MILESTONE

The announcement that the British and Foreign Bible Society has just issued its Popular Report for the current year will be welcomed by all those who have had the opportunity of reading from year to year, in story form, the report of the work of the Society. There is perhaps no other record of the kind in the world which presents in such a fascinating way a survey of Christian missionary enterprise, or gives with greater insight the religious condition of the work in such brief and attractive form.

This year the report is entitled "Another Milestone", —and this is a very appropriate title as 1929 marks its 125 anniversary—and around the idea of the "Golden Milestone" erected in the Forum at Rome centuries ago, from which all distances in the Roman Empire were measured, the Editor, Rev. R. W. Smith, centres the story of the Society's activities in translations, in circulation, and in the development and progress of the past 25 years. The chapter titles speak for themselves "A backward glance o'er travelled roads"; "Along the road"; "Meeting the mileage". It is surely an achievement to have issued 397 million portions of the Bible in 125 years; to have been responsible for its translation in 618 different tongues, and to have circulated it by means of Churches and Missionary Societies, Bible Houses and Colporteurs, over practically the known world. 1929 was the "Golden Milestone" for the issue for that year was over 11 millions, the highest in the history of the Society, and the gifts received were the greatest on record.

But what the report emphasizes most is the need of the Word of God for travellers over life's dusty and difficult ways, and it contains an invitation to all who are interested in the moral and spiritual good of the world, to become what the ancient Romans called "keepers of the road", to meet its mileage cost and to help the Society build the great moral and spiritual roads along which the feet of humanity must tread in order to reach the divine goal.

We cannot commend too highly the attractive form in which the book is issued, and we cannot help giving a word of appreciation to its present Editor, who has availed himself of literary references ancient and modern, and has in popular form given us a stirring story of the growth of a great Society, of its achievements in the past, and of its hopes and aims for the future.

Prepare For the Winter

Quite a number of people say that we will have a very cold winter. Others say a mild one is coming but to play safe prepare for the worst. Lay in as much feed as possible and milk as many cows as possible. Generally speaking cream is highest during the winter months and by delivering your cream to us you get every last cent there is in it. Both the money and the feed will be very welcome around January.

Every business man requires a certain amount of printed matter. Such things as Letterheads, Envelopes, and Statements are as necessary to modern business correspondence as a telephone is to a modern business office. The Mercury Office is equipped to turn out all kinds of job printing. The next time your supply is running low, call us up and a representative will be at your place of business in a short time to receive your instructions and take your order. Prices fair and just.

The Tofield Mercury

Prize Fight Opera Premiere

When the English Music and Folk Dance Festival is held at the Royal York Hotel, Toronto, from November 13 to 16, the spot light will be turned on the first performance on this continent on November 15 of "Hugh the Drover", opera by Dr. Ralph Vaughan Williams, one of the greatest of modern composers. Written around early 19th century scenes in an English village, the costumes are picturesque and the setting is peculiarly suited to the folkmoot which inspired the composer. The unique feature of the opera is the great prize fight between the hero and the villain, the stakes being the hand of the heroine. This is one of the most realistic scenes ever put on any stage, and is a fight from start to knockout. The cries of the crowd, the [illegible] singing of the [illegible] are [illegible] and as excited as if they were spectators gathered around the ring, in one of the most remarkable curtains ever seen on the theatre. The part of Hugh is to be played by Allan Jones, a brilliant tenor of Welsh extraction, who has been starring in the Deauville Opera and the Opera Comique of Paris. Cut shows grouping of players just before commencement of the fight, with Hugh in the [illegible] stripped for action at left. Inset shows Allan Jones.

THE OIL ELECTRIC ENGINE

NOT SO long since people living on this railway line saw daily a new type of railway locomotive engine. This engine a combination of electricity and oil engines ran daily between Edmonton and Saskatoon. Since that time the development of this type of engine has been proceeding apace until today it has been brought to such perfection that it actually rivals the best steam trains operating between Montreal and Toronto. In a recent run between Toronto and Montreal the new oil electric engine "treaded the heels" of one of the best steam trains of the Canadian National system. When a few years ago, residents of this community daily heard the explosions of the exhaust from the new type of engine and seeing it come in passed all kinds of remarks regarling it, they were actually seeing history in the making. It will of course be many years before the oil electric completely takes the place of steam, if it ever does, but the chief advantage seems to be economy of operation and for reasons of economy, scientists, inventors and engineers will make great efforts. Anyway, if in years to come the steam locomotive is replaced by oil electric, a good many of the residents of this district will be in a position to say, "I saw them things when they first came out".

The spectacular run of the oil electric comes exactly one century behind the first famous locomoitve run by Stephenson. It was on October 6th 1829, that Stephenson started his renowned Rocket down the rails, before a large number of people most of whom were sceptical. It is related that one old lady, when looking at it before it started, emphatically exclaimed, "It will never go" and when it did go, with equal emphasis said, "It will never stop". The hundred years intervening between that day and this, has seen astounding development in transportation.

THE SKATING RINK

AT A recent meeting of the Tofield Town Council there was the usual annual discussion regarding the Tofield Skating Rink. To be candid as far as the town council is concerned, the skating rink is a white elephant, but in order to provide the younger element opportunities for skating, it has been kept open year after year, usually at a loss. Many people believe, that with more attractive surroundings skating would be more popular here among the older people, and also that providing the surroundings are made more attractive there would be sufficient older persons buy tickets to turn a yearly deficit into a yearly surplus. We doubt it. But there is one thing that would greatly increase the sale of adult tickets—either season or single—and that is music. To have a band or orchestra is out of the question, even amplified gramophone music would likely be too expensive.

The only way we can suggest is to dig up an old Edison Concert Phonograph. This may or may not be possible. They have been obsolete for twenty years, yet from our remembrance of them we believe one of them would provide music for the Tofield rink at less cost than anything else. As we remember them they were certainly noisy enough and if there are any left in existence should be procured cheaply.

ALBERTA AND CRIME

THE STORY of a man held up in Edmonton and robbed of a sum of money and also hit over the head with an iron pipe, causes one to wonder if Western Canadian cities will develop the lawlessness generally associated with cities south of the border. There, in the large centres, hold ups and robberies are of fairly frequent occurrence, and one gathers from the newspapers that it is not wise to travel lonely roads with large sums of money upon one's person at night. Of course one must take into consideration the difference in population. Take Chicago with its many murders; there, it is most likely that one half of the city does not know how the other half lives. There a murder or a holdup is of frequent occurrence and what is more important still the perpetrator of the crime very frequently escapes.

Here in Alberta cities, crimes of violence are the exception not the rule and the police generally arrest the criminal. While other agencies have their part in making Alberta a lawful country, the police will have to play a major part. A few crimes going unpunished is prolific seed for more crimes of a similar nature. On the other hand a good stiff sentence to wilful criminals is an efficient safe guard against a further repetition of similar offences.

HEALTH SERVICE Of The CANADIAN MEDICAL ASSOCIATION

"HOW OLD IS ANN"

We do not profess to give an answer as to the number of years which Ann has lived, or the number of birthdays which she has celebrated, because we are quite willing to leave the solution of that problem to the mathematicians, or to those who enjoy struggling with such puzzles. The reason why we refer to Ann's age is because this gives us the opportunity to point out to our readers that there are more ways of determining age than by counting years. By this we mean that the real age of a person is not represented by the number of years passed since his birthday, but rather by the condition of his body at the present time.

The body is frequently likened to a machine or an engine. The body differs from any other machine in that when a part is worn out, it cannot be replaced. The true age of the body is shown by the condition of the various essential parts. If they show signs of wear, then the body is growing old, regardless of the number of birthdays passed. Old age is merely the wearing out of the body machine and health work seeks to prevent a premature old age by protecting the body from needless strains, and by warning against the over-indulgences which are responsible for many of the breaks during the years when fitness should be maintained.

If we were asked to determine Ann's age on this basis, we would want to know the condition of her heart, her arteries, her kidney's, her lungs, and of these, particularly, would be interested in heart, arteries and kidneys, because it is in these organs that the first signs of wear are usually seen. We would then want to know how Ann lives. What does she eat? Does she get sufficient rest and recreation? In other words does she live a hygienic life? Knowing the actual condition of her body and her manner of living, we should know much more about her true age than does the mathematician who solves the problem.

Questions, concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

MOTORCYCLE TANK EXPLODES ON ROAD; DRIVER IS KILLED

Stanley Toller, 20 year old son of Mr and Mrs. William Toller, [illegible] ave. met a tragic death late Sunday afternoon near Naples, Alberta, 12 miles from Barrhead, when the gasoline tank of his motorcycle exploded and he was instantly killed. Other than a brief report received at provincial police headquarters Monday morning no details of the tragedy are available.

No cause has been advanced for the accident which occurred while he was riding the machine proceeding towards Barrhead. An investigation is being conducted into the accident by Dr. Vernon, coroner of Barrhead.

The boy's parents were notified shortly after his death. They are now at the farm of Alex Barbour in the Freedom district where the lad has worked for the past four years. Stanley attended public and high school in the city.

FARM WOMEN TREAT MANY ILLS

The housewife who does her own work must have her hands in water. Hard water and soap in laundry work, dish washing and cleaning are trying. Chapped hands and sore hands are the result. There are many other minor ills that every housewife is called upon occasionally to treat.

In preventing chapped hands, the specialists at South Dakota State College advise that the first thing to do is to neutralize the alkali in the water. When through with the work, wash the hands in vinegar water using one tablespoon of the vinegar to one quart of water. Rub the hands with a cold cream. Mutton tallow is very healing and may be used in place of cold cream. Dry the hands thoroughly.

Frost-bite is another common ailment later in the season. Necessary treatment requires keeping the patient away from the heat. Apply snow or cloths wrung from very cold water until color returns. Rub very gently, otherwise the skin may be injured.

Burns, which often occur in winter, when hot fires are necessary, can be treated as follows: If the skin is not broken, cover the burn with a paste of baking soda. Keep this damp. Bandage lightly. A blister should not be broken. In time the body will absorb it. If necessary to do so, use a sterilized fine sewing needle. Prick the skin from outside the burn and come up into the blister. Use care not to break skin or needle. Burned clothing is cut off the body. Do not remove that on wound. When the skin is broken in a burn, cover the spot with carron oil. Cover with sterilized gauze. Never put cotton batton on a burn.

Dated at the Town of Tofield, in the Province of Alberta, this 28th day of October, A.D., 1929

(Sgd.) B. F. MORDEN

(Sgd.) SILAS A. PEARSON

OBITUARY

Mary Ann, wife of Mr. Joe Sutton was born near Orillia, Ontario, on August 6th 1870 and died at her home near Tofield October 28th 1929, age 59 years 2 months 2weeks.

Mary Shaw came to Tofield, Alberta in June 23 years ago accompanied her sister Mrs. Henry Sutton and family. The same year she was married to Mr. Joe Sutton moving on a farm in the Farmington school district, at that time called "Willow Flats".

Mrs. Sutton was quite a home loving woman with a true Christian character which sustained her in her great affliction and was glad to go when the Lord called her. She leaves to mourn her death her husband, one sister Mrs. H. Sutton, three brothers Mr. [illegible] Shaw of Calgary, Mr. Charley Shaw of Ontario and Tom Shaw of Spokane, U. S. A., three step children, Mrs. Mary Brooke, Mrs. Lottie Burness, of Portland Oregon and Percy Sutton besides a host of other relatives and friends, who send their sincere sympathy. Funeral services were held at the [illegible] on Wednesday, October 23rd conducted by Br. Milo Stutzman and Mr. Simpson, two songs beautifully sung, quartette by the Stutzman family and trio by Mr. and Mrs. Clarence Simminson and Mr. Stutzman. All arrangements for the funeral was made by Mrs. Sutton before her death. Pallbearers were all nephews but one friend, Messrs Fred Albert, Joe, Tom and Jim Sutton and Angus Mitchell. Interment took place at the Tofield cemetery.

Floral tributes were received from, the family, Mr and Mrs. Henry Sutton and family, Mr. and Mrs. Shaw, Mr. and Mrs. Ross, Leonard and Charley Shaw, of Calgary, Mr. and Mrs. Wm Simonson, Mr. and Mrs. Dvobson, Mrs. McMullen, Mrs.W. K. Mitchell, Mrs. Roy Flemings, Mrs. Sturitt and Mrs. H. Lawson.

The Suitsus club had the last play of the month on Wednesday, at the home of Mrs. Farestell. Mrs. Ed. Kallal carried off first prize and Mrs Lerbekmo consolation. A pleasant afternoon was spent and the hostess served a tasty lunch. The next play will be at the home of Mrs. Lerbekmo's next Wednesday at 2.30 as usual.

RICHARD DIX IS STAR POKER PLAYER; WINS AGAINST ODDS

Did you ever pick up a hand of draw poker and stare in disgust at a ten, a Jack of hearts, an ace, a seven and a deuce?

And after deciding once to throw the hand away, finally beat a straight a flush and a full house and win the pot?

It doesn't sound possible, yet that is what happens to Richard Dix in a hilarious sequence of his new Paramount starring picture, "Sporting Goods," which will be shown here on Friday and Saturday next at the Variety Theatre.

You see, Hinkle had a possible straight, a deuce, a six, a seven, an eight and a nine. Morfee and four hearts and a deuce. Thorpe had two aces, two queens and a deuce.

And none of them was any more honest than he had to be. So when Dix got up to answer a phone call and left his hand lying on the table, Hinkle reached over and—

But, really, it's a sequence that is too good to tell. And revealing it wouldn't be playing fair with the Variety Theatre management. At any rate, the episode is said to be the funniest poker sequence ever screened.

WHEAT POOL CONVENTION

A Wheat Pool convention will be held at Tofield on Thursday, November 7th at 2 p. m.

The convention, to whom all grain growers pool or non pool, are invited will be held in the Variety Theatre.

There will be special speakers and the election of officers as well as other business will be attended to.

Bill, at the hotel, claims to have stolen a march on the halowe'n jokers. He bought an extra can of window polish in readiness for the soap streaks.

KETCHAMOOT

The ladies of the M. A. S. will hold their annual Thanksgiving "AT Home", at the Henry McGinitie home next Friday, November 8th, both afternoon and evening. A delicious tea will be served, sale of home cooking, bazaar of fancy, useful and handknit articles, a social time in the evening games, contests, etc. Everybody welcome.

Messrs Ralph Burnes, Charley Coulle, Willie Ingram and Angus Mitchell motored to Edmonton Monday, to attend the Cleveland Knits and Edmonton Grads basket ball game.

Mrs. Chas Whillans surprised her boys Friday evening by inviting in a few of their boy friends to spend the evening with them. A pleasant time was reported by all.

Miss Helen Schultz spent the week end with her little friends the Misses Faye and Lola Wilson of Tofield.

Mr. and Mrs. George Shaw and daughters attended the funeral of their sister and aunt the late Mrs. Joe Sutton on Wednesday of last week.

Miss Viola Lee is clerking in the Co-operative store in Tofield.

A few friends and neighbors from our district pleasantly surprised Mr. and Mrs. Smith, of Tofield Tuesday evening of last week before their departure for Vancouver where they will make their home. Guests were Mr. and Mrs. Geo. Lawson and son Martin, Mr. and Mrs. Wm Lee, Mr. and Mrs. Roy Lee and Mr. and Mrs. Harold Smith of Camrose.

Mrs. C. A. Ingram accompanied the P. O. Moline family to Edmonton Thursday.

Mrs. Lottie Burness, of Portland Oregon came on Wednesday to attend her step mother's funeral(the late Mrs. Sutton) also to visit her father and other relatives.

Mrs. Peter Lee entertained her Sunday school class of little tots to a Hallowe'en party at her home Saturday afternoon. Nineteen were present besides some of their mothers, a jolly time was had by all, and a dainty lunch was served when all the children sat down to one table. The little ladies were Muriel Ray, Betty Lee, Belva Carlisle, Joyce Whillans, Marie and Evelyn Lawson, Maud Wildman and Ester Coombes. Boys, Gordon and Douglas Ray, Donnelly and Harvey McGinitie, Conrad Lee, Neil Whillans, Cambell Gordon, Clifford Appleby, Jimmie McCaven, Martenus Hansen and Lyle Coombes.

AMISK CREEK

Our deepest sympathy is extended to Mrs. Henderson and family in their recent sad bereavement.

At the Ladies' Aid annual sale and dinner held in the church, on the 18, quite a large crowd gathered, and good prices were paid for the fancy work. The money goes to the church.

Ruby Berg and Arnold Haveland who are attending the college in Camrose, motored out to visit Ruby's parents the last part of last week.

A number of Amisk Creek people were present at the funeral held in Bardo of the late Evelyn Horte of Kingman. Our deepest sympathy is extended to the parents and relatives in their sad bereavement.

The Patterson boys motored to the city one day last week, returning the same day.

Mr. and Mrs. Annebo were supper guests at the R. O. Berg home last Sunday evening.

Several from here attended the supper and sale held in the Ryley Luthern Church last Saturday evening.

Mr. and Mrs. A. Patterson, Lillian and Pearl, Mrs. P. C. Moen, Mrs. P. O. Flaaten, Alice Berg and Gunvald Flaaten, motored to Viking and attended the concert held by the Ryley chorus there last Sunday. They visited at the M. Johnson home before returning home.

Mr. and Mrs. I. Annebo motored to Camrose last Sunday to visit their daughter who is attending normal school this year.

Mr. E. A. Moen and children were visitors at the R. O. Berg home on Sunday afternoon.

Mrs P. C. Moen visited with Mrs. P. O. Flaaten on Friday of last week.

Ida Anomo was visiting with Mrs. R. O. Berg last Monday.

Mrs. E. A. Moen visited with Mrs. I. C. Olson on Monday afternoon.

Buy A Poppy

MADE BY VETERANS AND ARE SOLD TO HELP THEM

ARE SOLD ALL OVER THE DOMINION ON OR NEAR ARMISTICE DAY

On Monday next we celebrate Thanksgiving Day,—for two reasons, the first, the whole Dominion offer thanks to the creater for the fruits of the growing season; the second, in company with many nations of the world, Canadians remember with thankful hearts the cessation of the world war eleven years ago.

There have been wars as far back as the human mind can penetrate, but no war at any time was so wide spread, destructive, terrible and awe inspiring as the great war. Millions of men, millions of dollars, were thrown with abandon into the fray, and on Monday we celebrate its close—and victory.

The war claimed many lives, it blasted the hopes of some men and on its mighty tide some other men were swept on to fame and fortune.

But there are a number of men alive today to whom the war was and is a life long tragedy. These are the soldiers in our military hospitals who are unable to follow the ordinary occupations of life. These men, to help themselves, make up each year, thousands of poppies, (emblematic of the poppies of Flanders' fields) which are offered for sale on or near Armistice day, all over Canada.

In Tofield they will be offered for sale on Saturday and we are sure there are no Tofielders who need more than an opportunity to Buy a Poppy.

Rural Municipal Meeting

The eighth regular meeting of the Council, Municipal District of Cornhill, 487, held at the district's office, Tofield, Alberta on Saturday, November the second commencing at the hour of 2.30 p. m.

Carried

Moved by reeve Williams that the next regular meeting commence at 10 a. m. Saturday, December 7th and commencing at 2 p. m. on the same day, Triennial Court of Revision be held. Carried

Moved by councillor Morden that Department of Public Works be requested to cancel road diversion affecting N. W. 5—51—19 West 4th as the regular road allowance has been opened up for traffic. Carried.

Moved by councillor Verge that accounts as shown in accounts payable book, Pages 26 27, lines 1 to 40 and amounting to $2056.10 be paid. Carried

Meeting adjourned at 6 p. m.

TOM MIX WESTERN FOR FRIDAY AND SATURDAY

For this week, Frank has booked one of the ever popular Tom Mix Westerns. Needless to say, Tony is starring with the famous Tom and more than maintaining his reputation as the most famous screen equine.

In the "Son of The Golden West" the story and romance of early west is portrayed with realistic fidelity. Men risk their lives for gold others for preserving the mail and then again others, seeking the easy path to wealth, choose to plunder and steal.

Yes there is the love theme present, and all will await with keen interest the outcome of the love affair of the principals.

The Son of the Golden West is a wholesome, breezy and virile picture and will please Tofield and district citizens who attend.

NEWS OF OUR NEIGHBORS

KETCHAMOOT

The monthly meeting of the M. A. S. will be held next Wednesday, November 13th at 2 p. m., at the home of Mrs. J. H. Ingram. A cordial invitation is extended to all.

Mr. and Mrs. Hosler, of Tofield, Mr and Mrs. Allan Lewis and family of New Sarepta were guests of Mr. and Mrs Frank Shupe a week ago Sunday.

Messrs Henry and Leslie McGinitie, Chester Coombes and Paul McMullen left on Thursday of last week on a hunting trip north of Edson.

Miss Lottie Burness and little daughter left the first of the week for their home at Portland Oregon.

Mr. Frank Ealigan motored down from Edmonton and spent the week end at the home of his sister Mr J. H. Ingram and family.

Mr Geo Cookson was able to return home Saturday from an Edmonton hospital. His health is very encouraging.

Mr. and Mrs D. H. Mitchell came down from Edmonton Wednesday returning home the next day they were accompanied down by Miss Selma Nomeland.

Mr. and Mrs. Archie Brown and son Tomie of Rowlf visited Sunday and Monday with Mrs. Brown's mother, Mrs. E. McMullen.

Mr. Desmont Gladwin who had been working for his brother-in-law, Paul McMullen, left on Thursday of last week for his home at Vancouver.

Mr. and Mrs. Eide and Robert Barrcloth, of Bardo and Miss Martha Sona were guests of the Carlisle family Friday evening.

Mr and Mrs Roy Capling and Mr. and Mrs Leslie Coombes and family, of Ponoka, were guests of Mrs. E. McMullen, Friday noon for dinner. Mrs Coombes and the children remained for a longer visit.

Messrs Lorne and Howard Lee left on Monday on a hunting trip near Athabaska.

Miss Helen Cookson, daughter of Mr. and Mrs. Geo. Cookson underwent an operation for appendicitis at an Edmonton hospital a week ago Sunday. She expects to be able to return home on Wednesday of this week.

Miss Mildred Purcell and pupils put on a jolly Halowe'en party at the school house on Friday night. Miss Purcell went to a lot of work decorating with black cats and witches etc. Miss Ethel Brown and Gene Carlisle took prizes for best costumes. Games and contests were the order of the evening. It being Charley Sears birthday, Miss Annie, of Bardo station presented him with a very pretty birthday cake lighted with fourteen candles. Refreshments were served by the children which brought a happy noisy evening to a close.

Mr. McBeth and Mr. Will Wood former Tofield men are opening a Restaurant in Portland Oregon this week. Their sign reads "Fish and Chips." Mr. McBeth is said to be an expert in cooking fish. They have a good location.

Hildreth Lewis who left Alberta to join his parents at Gresham, Ore., reached there on October 20th.

KINGMAN

Mr and Mrs. Gust Bard spent a couple of days in Edmonton last week.

Mr and Mrs. Karl Skaalen, formerly of Westlock, arrived here on Monday. Mr. Skaalen will take over the Searle Grain Elevator.

A. C. Bome, A. M. Bome and M. Schmitt spent a few days hunting at Buck Lake last week.

W. Christenson and T. Welsh motored to Edson on Thursday.

Mr. Sam Cinnamon returned on Friday from a two months trip to Ontario.

Mr. and Mrs. T. Grahn motored to Edmonton on Friday.

Jacob, Hans and Palmer Bonese motored to Lac La Biche on Monday to look over some homestead land.

Mr. and Mrs. Karl Skaalen visited in Camrose on Sunday.

Mr. and Mrs. John Anderson were the guests of Mr. and Mrs. E. Erickson on Sunday.

Mr. and Mrs. Ronning and family and Miss Irene Horte, of Camrose visited with Mr. and Mrs. T. Horte on Sunday.

Mr. and Mrs. A. Halseth moved to the Hosberg farm on Monday.

A Memorial Service for the late Evelyn Horte was held in the Community Hall Sunday.

Don't miss the masquerade Dance in the Kingman Hall on Friday, November 8th. Prizes will be given for the best costumes.

Mrs. W. Hartchen and Mrs. Grace were the guests of Mr. and Mrs. J. Erickson on Sunday.

BARDO

A very jolly Hallowe'en party was held at Clarence Rude's on Saturday, October 23rd. Upon their arrival the guests were greeted by a ghost and then led into the witches Den, this ordeal being over, everyone seemed to be ready for more fun, and of this there was plenty during the entire evening. A delicious lunch followed by a lively sing song brought the evening to a close.

Mr. and Mrs. Stronstad, Mr. and Mrs. I. Moen and Mr. and Mrs. S. Johnson were dinner guests at the A. Kindley home on Sunday last.

Messrs Stronstad, Kindley, Bonese and Julius Lerbeckmo motored to Lac La Biche last week to seek homesteads. They report a rather unsatisfactory trip.

The Messrs B. Anderson, G. Hendrickson, L. Foshaug, R. Nordhus, B. Bjornson, O. Strand and I. Rosen motored to Buck Lake to hunt on Wednesday.

The Grand Forks and Bardo Schools were scenes of jolly Hallowe'en Parties last Thursday afternoon. Everyone seems to have had a lovely time.

Mr. and Mrs. O. Flatten and Miss Hannah Jensen, of Edmonton, visited at the Hanandal and Jensen homes on Sunday.

Miss Borghild Foshaug and Ivan Foshaug left for Vermillion last Monday. They will attend the Agricultural school there.

THE YOUNG PEOPLE'S CORNER

The weekly meeting of the young peoples society was held in the basement of the church on Monday evening, with president Marion Cooper in the chair.

The meeting opened with the singing of a hymn and the devotional period was taken by Marion Cooper.

The business part of the meeting opened with the president reading a letter from Mr. Corbett, stating that Mr. Backman would rather come at a later date, as Nov. 11th was a holiday. It was decided to try and get Mr. Corbett or Mr Backman on Thursday Nov. 21st or 28th.

The next topic was whether or not we should cancel the meeting of the Young People Society on Monday Nov. 11th on account of it being a holiday. It was decided not to have a meeting next week.

Through some unavoidable delay the play which we ordered, had not arrived. But it will be here for the next meeting and we shall be able to to work on it.

It was stated that the annual convention had been called off on account of not being able to get the girls and boys work board leaders on the dates set. This was not definite however.

The practical part of the meeting was in the hands of A group with Jack Cookson as convener. The program called for a "stunt night" and the A group acted two short but humorous plays which caused much laughter from the audience. (In fact it is rumored that "Nemo" has signed a contract with the Martin Erwin Players.)

The recreational period consisted of a few snappy games led by Bert Swift and Jack Cookson.

The meeting closed with the usual prayer.

Prepare For the Winter

Quite a number of people say that we will have a very cold winter. Others say a mild one is coming but to play safe prepare for the worst. Lay in as much feed as possible and milk as many cows as possible. Generally speaking cream is highest during the winter months and by delivering your cream to us you get every last cent there is in it. Both the money and the feed will be very welcome around January.

Job Printing

Every business man requires a certain amount of printed matter. Such things as Letterheads, Envelopes, and Statements are as necessary to modern business correspondence as a telephone is to a modern business office. The Mercury Office is equipped to turn out all kinds of job printing. The next time your supply is running low, call us up and a representative will be at your place of business in a short time to receive your instructions and take your order. Prices fair and just.

The Tofield Mercury

$100,000; TO EXPAND INTO WELL BUSINESS IN EDMONTON

E. T. Lee, well-known Barrymore is Now President

ADDITIONAL EMPLOYEES

Main Plant and Twelve Connecterns, Factories Included in Deal

In valuing $100,000 to the second big Edmonton dairy deal within a year, the Woodland Dairy, Limited, which was established here 17 years ago, has been purchased by E. T. Lee, and associates. The business, plant buildings and twelve branches at outside points, were bought from R. A. Daly and company, of Toronto, and will be operated under the original name as a separate concern.

Opening of a retail milk depot, more and supplies of Edmonton consumers will result from the deal. The concern has a fourth company will be supplying a pasteurized milk here, two now being in operation while a third plans to start operations as soon as possible.

E. T. Lee, for 16 years was manager of the Woodland Dairy, is president and managing director of the new company. A high official post will be given P. J. Reynolds, who has been manager of the dairy since it was acquired by the Daly company last November.

Expansion to cost $90,000

An expenditure of $90,000 will be made by the new owners on necessary additions to the plant and buildings at the corner of 95th st and 109th ave. Extensive improvements are ordered for immediate delivery and work will be rushed almost as rapidly as possible in order to get the new plant operating within a short time.

The official announcement issued on Friday morning was as follows:

"Woodland Dairy", Limited, which was recently purchased along with the E. D. C. Company, Limited, by Messrs E. L. Daly and company, of Toronto has now been purchased by E. T. Lees and associates and as in future will be operated as a distinctly separate company, both as to owner ship and management.

"Mr. Lees who is successfully managed this company from the time it was incorporated in 1912, wishes to announce to his many friends and customers that he will in future give the affairs of this company his undivided attention and hopes for the continued co- operation of all those interested.

The deal involves the purchase of the main plant in this city, in addition to 12 branch creameries and cream factories. These cheese plants are at Burford, west of Millet, and at Fisher in the Peace River country; Bluffton, Creamview are located at Calmar, west of Leduc, Chipman, Ironside, Egerton, Star Point, Half Prairie, Innisfail, New Sarepta, Ryley and Tofield. The head offices, however, will be in this city.

Staff Remains The Same

No radical changes are contemplated in the personnel of the staff but an announcement of some rearrangements and extensions in the different of new departments will be made shortly.

The staff strength will be increased to 115, compared with an average of 80 for the past six months. It is figured that the annual payroll will amount to $150,000, paid largely to employees who are residents of this city.

Handling of butter and ice cream has been carried on by the firm for several years over an extensive area. Now the new owners will also launch into the retail milk business which will require alterations to the building to provide space for new equipment. Machinery of the most modern type available will be installed, selections having been made by Mr. Lees when he was recently to attend the dairies industries' exposition.

As a result of a recent purchase, the firm will own a site of 208 by 132 feet, most of which is frontage on 109 ave. The buildings now there have a total floor space of 32,500 square feet and this will be augmented by extensions as required later on. Definite plans are now being made for enlarged accommodation to take care of the business.

Delivery Service

An up-to-date milk delivery service will be given, according to company officials. It is the intention to employ only motor milk wagons and truck drivers.

It was in 1912 when he first came to Edmonton from the east that Mr. Lees became interested in the prospects for the Woodland dairy. Along with a group of associates, he bought the business from Hales Bros., who were then located at 97 st. and 109 ave.

In 1913, the business was moved to the new plant erected at 96 st. and 109 ave., where it has been operated ever since. In the interval, improvements and extensions were made as required, while a large business was built up here. The deal completed in November last year resulted in the plant and business being taken over by the Daly company, which had operated it up to the present.

Mr. Lees, whose faith in the prospects of the Dairy business in this city and Northern Alberta has never wavered, is one of the leading dairymen of Canada. For years he was secretary of the Alberta Dairymen's Association and some four years ago was placed on the national dairy council, of which he is vice president. He has also been prominently identified in work of the chamber of commerce, having twice been first vice president and is now a member of the council. He is an active member of the Kiwanis Club.

Well Known Official

For the past ten years, F. J. Reynolds has been with the Woodland Dairy, Limited, where he has won steady advancement. He is looked upon as a very capable executive and is secretary of the Alberta Dairymen's association. He is also an active member of the Gyro Club.

HEALTH SERVICE Of The CANADIAN MEDICAL ASSOCIATION

AIR AND VENTILATION

It has long been known that air can be polluted so as to become unwholesome. For many years, it was thought that this pollution was due to an excess of carbonic acid gas, but it is now understood that in an ordinary occupied room, the amount of this gas is not harmful, nor is there a sufficient reduction of oxygen brought about to account for the effects of bad air.

In the early years of this century, it was proven by experiments that the symptoms caused by living in an unventilated air had to do with called bad air, but with the temperature of the air, its moisture and its stillness. In other words, conditions of the air which do not favour the loss of heat from the body are the conditions which cause the ill-effects of bad air. The body constantly generating heat and if the person is to be comfortable and fit, the surplus heat must be got rid of. The skin is the means for getting rid of excessive body heat. When the body is surrounded by hot, humid, still air, it is difficult or impossible for the skin to eliminate as it should, and, as a result, there is discomfort, and, later, if the condition persists, there will be a headache, shortness of breath, and an increased pulse rate and temperature.

We know, from common experience how much more comfortable we are on the warm day when there is a breeze as compared with the way we feel when the day is hot and still.

To secure comfort and fitness, we should live in an atmosphere of cool air which is in gentle motion, and there is ventilation is to maintain such an atmosphere. This can usually be accomplished in a satisfactory way by having a thermometer in the room and by opening the window. A consideration of the ill health that occurs in winter is due to the lowered efficiency of the body which follows the close and stuffed air conditions in overheated places. The body is cooled up by cool air and upset by over heated still air.

Questions, concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

ABILITY

Ability is not so much the doing of the clever thing at any time, but avoiding doing the wrong thing at the right time.

McALPINE PATTY DISCOVERED

Marooned on a frozen island in the Arctic ocean, eight newly rescued explorers today waited the arrival of ski-fitted seaplanes to carry them south to civilization. After nearly two months of wandering over the ice hummocks of the barrens, Col. D. D. H. McAlpine and his seven mates have another months' delay before they can be carried out of the chill north.

Today the elated explorers rested at Cambridge bay, ice-locked harbor on the south shore of Victoria island, opposite Bathurst inlet. It was for Bathurst inlet that they had set out on September 5th in their two small aeroplanes from Baker Lake, 200 miles west of Hudson bay. Weary but happy, gaunt but healthy, the eight refugees were hobbling up wasted sinews—Col. McAlpine, party leader, had lost forty of his two hundred pounds.

McAlpine Sesquiness Regular Skin

Drawn up on the ice-locked shore of Melbourne island, a gold dot on the north shore of Canada, were the two machines cherished by the McAlpine men on their dash for life. With water pontoons removed useless by the widespread ice-cap of the Arctic, the seaplanes were destined to remain moored on the shore until such time as they could be refitted for a long flight over savage aeroplanes. It was at Melbourne island, according to navy officials, that the word through from the north, that the seaplanes landed, gas-bereft, far out their course. This was Inspector Lechtzier, six weeks ago, before snow and ice cast a still cloak over the top of the world. Since then, the men of the McAlpine rationed their food, walked calmly for reason and finally were picked up by itinerant Eskimos and conveyed to the settlement of Cambridge bay.

Caribou and sea fish, no doubt, were prominent items on the limited menu of the marooned explorers until the friendly natives hurried them by dog team and sled across the ice of Dease strait to Cambridge bay. Guns and fish nets were included in the supplies of the last men and were probably their best means of gaining subsistence when their rations dwindled to nothing, so they must have done at the beginning of October.

[illegible]
(Unavoidably omitted from last weeks issue.)

What do you know about it, the weather has changed and it looks as if we are going to get some rain.

Grace Woods entertained a number of her Rose Creek friends at her home Monday evening. All had an enjoyable time playing games etc. Lunch was served at midnight.

Mr. and Mrs. J. McLachlan and Mrs. Elliot, George and Arthur motored to Prince Albert, Sask., returning a week later.

Everett has been found parking on the side of the road. What's the matter with your lights Everett?

A Chinook supper will be held in the Old Rose Creek School Friday, November 5th. After the supper a short musical program will be held in the new school house. Everybody welcome.

Mr. Banks is sporting a new Nash.

The three church laymen, of Rose Creek, Mr. Bertrand, Willie McLachlan and Ed Bailey are planning on taking in the convention in Edmonton this Friday.

The Children's Corner

THE FAIRIES' THANKSGIVING

A picnic, a picnic, the children all shouted, as they came rushing out of school.

The eventful day came, the teachers had arranged the picnic, for the Thanksgiving holiday. Some farmers lent their wagons and it was a happy crew that packed into them. Away they went all laughing and singing right through the trees, until they came to an open place.

Now children you can all go and play, but be prepared with the way you are ready but come back when you hear the bell ring. Away the children went in groups, but two shy little girls said, "Let us go and look for the Fairies."they skipped along until they came to a ring worn away in the grass. "Thats a Fairy Ring" they said, "the we will hide behind these trees." Presently a beautiful fairy appeared with wings with little bells hanging from it. She waved the wand and a lovely musical sound was heard that charmed the Trees, which brought all kinds of animals to her. "Now said the fairy, I want all you birds and animals to bring your offerings for the Fairies Thanksgiving feast." Away they all went, the little gopher burrowed under the ground and pushed up a great pile of nuts. The spider wove a cloth which the fairy put on the table. The birds came flying down with pretty little green plates which they placed around. Next came the butterflys on their grass wings each with a blue bell cup which they put at each plate. Then came the squirrels with nuts which they cracked and the animals came bringing berries of all kinds.

"Come and the fairy," gruppy-ooh-ooh around and you shall see the Fairies enjoy the feast. She set her silver bells a tinkling and the Beautiful Fairies came trooping in and the Queen fairy ordered them to praise God for providing such lovely food, for all his creatures they replied by singing a very sweet melody and then they partook of the food. When they had finished the feast and the carpets ashed it was the fairy brushed the floor, and they ate the faries dance! This the fairies did to the enjoyment of all the birds and animals and when they had finished they had all disappeared.

The two children jumped up from behind the trees and ran back to the teachers, who said, "Dinner is all ready, where have you been?" The little girls said that they did not mind for they had seen a fairies thanksgiving and had nurtured its meaning. The teacher laughed to them and told them that she had finished they had all disappeared.

The two children jumped up from behind the trees and ran back to the teachers, who said, "Dinner is all ready, where have you been?" The little girls said that they did not mind for they had seen a fairies thanksgiving and had nurtured its meaning. The teacher laughed to them and told them that she had finished they had all been dreaming. The other children came scampering back with bags of nuts, some with flowers and some had bottles with tadpoles in them, but the two little girls thought they had had the happiest day of all. Before dismissing the teacher said that they were to remember that it was a Thanksgiving to God for all his wonderful gifts to them and it was also a day we commemorate the ending of the world's war.

Ramsey MacDonald Goes Home With V.C.'s

Completing his harried Peace mission to the United States, the Rt. Hon. J. Ramsey MacDonald, Prime Minister of Great Britain, sailed from Quebec Friday, October 24th, on the Canadian Pacific liner Duchess of Atholl, which made a special call at the Ancient Capital.

He is shown above on the gangway surrounded by a group of Canadian V.C.'s, who sailed on the same ship as guests of the Canadian Pacific to attend the banquet to be given November 9th, by H.R.H. The Prince of Wales, to the weavers of the revived devonshire.

Although the ship sailed at 7.45 p.m., the embarkation was made in bright artificial daylight created by a powerful "sun arc" which enabled movietone cameramen to make sound pictures of the Premier's departure. V.C.'s in the picture are Captain G. B. Geary and Captain G. W. Mac Donald, of London; Lt.-Col. R. Pearkes, of Nanaimo; Captain H. Hutchinson, and Captain N. Mitchell, of Quebec; Lieut. A. B. N. Fisart, skipper of the Duchess of York, who will also attend the Prince's banquet.

THE TOFIELD MERCURY

A Weekly Newspaper Published at Tofield, Alberta.

W. Worton, Publisher.

OUR FRIEND? THE CROW.

THERE ARE few people who live in the country or even in country towns, but who are fairly well aquainted with the American crow. During the summer he is always seen around the trees and fields, caw, caw, cawing all day long. He is not by any means a favorite, even with those who know little of his habits, and his welcome in the spring is not so much for himself and his mate but because his appearance is a fairly sure sign winter is past and spring is at hand, for he is a canny bird and rarely guesses wrong on the weather.

It would appear from the following article by Jack Miner, Canada's famous bird man that the crows heart is as black as his coat.

Just at the present time, Professor Rowan of the University of Alberta is making some very interesting experiments with crows. He has a number penned in and on Thanksgiving day will liberate them. He is testing out his theories of migration and expects the crows to fly in different directions, some north, some south, according to the treatment of light and dark that he has subjected them to. He is asking sportsmen all over the province to shoot crows on sight and return same to the University. There is even a reward of five dollars for certain of the birds. Much interest is being created over the result of his experiments.

The following is Jack Miner's contribution to the character of the crow.

In the September number of Field and Stream, recognized as the leading "out-of-doors magazine on the continent, there appears a scathing denunciation of the common crow by Canada's famous bird conservationist, Jack Miner. The crow might not have his unlovely characteristics brought into the limelight had not the United States department of agriculture recently asked protection for this bird.

Jack Miner says in part: "Please let me say that I was disgustingly surprised when I read the dispatch from the U. S. A. department of agriculture asking protection for the crow. I am astounded that a governmental department would dig up this old Rip Van Winkle argument and again ask civilized humanity to the lousy, nest robbing, cold-blooded murderous crow. Before I go further, let me say that any man or combination of men that advocates the protection and increase of the crow is a handicap to the enjoyment and betterment of all classes of North American citizens. The statements are founded on over fifty years of personal acquaintance and careful study of the American crow.—As for the grasshoppers and crickets the crow destroys, I say, in the name of common sense, tell the agricultural department to advise the farmers to keep a small flock of turkeys and condense these hoppers into Thanksgiving dinners that sell for fifty cents per pound.——The crow raises his young on a song, insectivorous and game-bird eggs. If he can find them, he will take in one day at least fifty eggs from these small helpless birds and feed them to his four or five young. He will steal baby birds when eggs are not convenient.——It takes hundreds of our lovable and valuable birds to raise one family of crows. If any of these innocent, cheerful creatures were allowed to live, it would do more good than a whole nest of crows.——He is a disgrace to the bird family just the same as a kidnapping murderer is a disgrace to the human family. In 1910 I started planting seedling trees on the 30 acres adjoining my house at Kingston, Ontario. In 1915 desirable birds started nesting, and the crows followed. I began systematic crow control. I could take you this June to at least 300 occupied mourning dove nests on my thirty acres where the crow is outlawed. In other words there are more doves nesting on these thirty acres under my protection than there are on any other 5,000 acres in this country where crows are not controlled. The mourning dove is only one of many species of desirable birds that are taking advantage of this protected spot where no crow comes.——One dove will destroy as high as 10,000 weed seeds in one meal. Let me conclude with this carefully thought out statement: I would far sooner load my gun and let you go back of my house and shoot one hundred pairs of these sweet, clean cooing doves than I would allow one pair of crows to nest here and terrorize the whole loving situation.

THE BILLERS OF SEALS

This month there has come into the Head-Office of the Red Cross Society in Edmonton the annual shipment of Xmas seals to be sold for the benefit of the little crippled children in hospital under the Junior Red Cross in Calgary and Edmonton.

It is a stupendous task getting rid of such a large quantity and would be well nigh impossible were it not for the splendid band of eager young salesmen and saleslades who make it their especial pride and privilege to merchandise those attractive stamps.

When every Red Cross Junior member begins business on a seller of seals he puts himself in touch with a great central office that extends from coast to coast in every province of Canada where there are Juniors working to keep their pledge of service to the sick.

Alberta juniors have long been famous for their remarkable efforts at Christmas time, or rather earlier than that, for it is necessary that seals be sold for parcels and letters that are going on their errands of goodwill across the seas to the Motherland or to other parts of the world. It is an easy matter for reader to decide that in so far as he is able, stand surely all can do this small courtesy by which to encourage the little merchants who are earnestly trying to dispose of packages of seals.

A little imagination helps the purchaser in the pleasant thought that his seal money, though small in itself, is part of a trust and worthy effort made by the children of the province to assist those who are unfortunate to be patients in hospital, and who, thanks to Junior Red Cross, are getting the chance they need to be made well and whole.

CAMROSE TO HAVE NEW WATER SUPPLY

Many towns and cities in the west were lucky enough to be located in close proximity to a river or lake. Camrose had to be contented for many years with wells, and until recently no one gave Stoney Creek serious consideration as an source through which a large water supply might be obtained. As the water supply from the wells gradually became inadequate, the town council cast a keen eye ways and means of augmenting the supply. The result was that the natural channel of Stoney Creek was brought into use and water was obtained from Lyseng's slough. At the time the Calgary Power Company and the town of Camrose made arrangements where by the utilities were taken over by the company, the council was working out a scheme to bring water from Miquelon Lake. The action of the Calgary Power company in doing so has opened up a source of supply that may be termed practically inexhaustable. It is estimated by those closest to the situation that Camrose can command a supply of water sufficient to meet the needs of a city of 50,000 people. The Beaver flip to the north forms the rise of land or watershed in which the series of lakes including Miquelon are located

Mr. Alan Silversides, who recently bought the Lindbrook store, took over [illegible] November 1st and hopes that all old customers will [illegible] their friends.

Mr. and Mrs. [illegible] gave a [illegible] at their home at Lo[illegible] neighbors of the Lindbrook district last Friday week. [illegible] the "old gang" together. Mrs. A. Scott won the first ladies prize while Mrs. Weatherill [illegible] won the booby. The gents first was won by Mr. Sullivan and Mr. J. Westercroft was consoled by his booby.

Last Friday [illegible] party was sprung [illegible] Mrs. J. W[illegible]. Whist was the order of the evening. The first prize for the ladies was won by Miss Margaret Bates, the gents first was won by Mr. Whibley. The boobys were won by Mr. and Mrs. McCaw.

Several of [illegible] local sheep owners [illegible] the ram sale in Edmonton and purchased some new rams to head their flocks.

So far as it is known Hallowe'en night passed quietly in fact there is nothing to report.

Mr. W. Fontaine has built himself a house on his quarter recently acquired from the C. P. R.

Several of our neighbors have been making the annual trip homestead seeking, say what's wrong with the Tofield district? It isn't paradise, but it has a lot of the others beat at that.

Friends of Reggie Glenn well known to us all here will be sorry to hear that he has lost all his hay and a barn by a fire which was raging the district where he has his homestead. This is his first year on the place too, which makes it worse.

LOCAL AND PERSONAL

A number of ladies of the town were [illegible] to a party at Mrs. Wm. Rutledge's [illegible] Thursday of last week, [illegible] taking them out about [illegible] p. m. A [illegible] time was had and a delightful lunch was served.

[illegible] and Winnie Worton went to Edmonton on Thursday to spend the thanksgiving holidays with the Ball girls.

Bill Worton has gone to Burnhead this week on a business trip.

School closed on Wednesday afternoon until Tuesday, the teachers taking in the convention at Edmonton.

Mrs. Jobb moved over to her new residence above the new store on Monday of this week.

Hobson's Meat Market has re-opened for business. Read the specials in the add.

Mr. Frank Ball was in town on Wednesday crying the Wildman sale.

Miss Marion Carter, of Camrose was in Tofield last week end.

Mr. Cookson is progressing favorably after his recent operation.

Mr. and Mrs. Bigland spent a few days last week at Edson.

A Hallowe'en party was held for the pupils at Ingram school last Thursday evening. An enjoyable time was had by all.

TOFIELD HENS HEAVY LAYERS

Mrs. J. W. Cookson, Tofield, has just had returned to her poultry-yard a pen of White Leghorns which she entered a year ago in the federal egg-laying contest, conducted in British Columbia at Agassiz. The pen stood in third place with 2,600 points at the 51st week. For part of the year they led in production. Nine of the birds were registered, a high percentage from a pen of 12 birds.

The pen of Mrs. Cookson has been a consistently good one in the past years and this latest achievement is bringing Alberta stock to the fore in production records. Mrs. Cookson is also an outstanding breeder of bronze turkeys.

W. I. NOTES

The regular meeting of the Women's Institute will be held on Tuesday, Nov. 12. Mrs. Rogers of Fort Saskatchewan will speak at this meeting. All members are asked to be present and to bring a visitor with them.

Any one having winter coats that will fit a girl of twelve and a boy of ten, also any bedding that they care to donate to a family in this district kindly phone 64.

We thank all those who so kindly responded to our last call.

Tofield Co-operative Store Ltd.

Apples! Apples! Apples!

By the time this news item reaches our customers our car of apples will have been unloaded, as at time of writing we are unloading and also selling from car. These apples are exceptionally choice, and a man who made the rounds of Edmonton told us that our prices were lower than Edmonton. How do we do it, never mind come in and let us prove it to you. Several varieties to choose from.

Onions

We also got in a shipment of B. C. Onions and are selling them at a price that never was heard of in Tofield before, one man said, 100 pounds is a lot to buy at one time but at that price we can afford to buy them even if some should spoil before spring.

This may seem the wrong time of the season to say we are making large reductions on winter wear, nevertheless that is what we are doing, on FELT AND LEATHER SHOES, MEN'S WOMEN'S AND CHILDREN'S MEN'S HEAVY SWEATERS, BOYS PULL-OVERS, CAPS, MITTS, UNDERWEAR AND HEAVY COATS

We are unloading new stock every day and need room, and money. When we say a reduction we mean something worth while, not some fifty cent article at forty-nine cents, that kind of old catchy stuff is played out.

Sugar

Some of our customers have asked us to give a price on a hundred pounds of sugar, we did and the answer came back I can beat that at Eatons, yes we know you can but why, because Eaton buys more sugar and sells more sugar than all the rest of the stores put together, and there is only one way to overcome it, and that is for the stores to buy as big a volume as Eaton, that is what Co-op stores are aiming at but they must get the support of its members to help reach the high mark, it can be done, and will be done some time in the near future.

Flour

We are beating catalogue prices on flour we did not know it untill we were asked to give a price on one half ton lots, and the man told us we were beating the catalogue.
GIVE US THE CASH AND BULK ORDERS AND WE CAN COMPETE

LOCAL and PERSONAL

The Independent Order of Oddfellows, Wainwright lodge, recently opened a fine new lodge hall, which will take the place of the one destroyed in the big fire of several months ago. A large number of visiting brethren were present including F. McHaffey and F. Sherlock of Tofield. A number from Ryley also attended.

Mrs. James Seward recently returned from an extended visit with her daughter, Mrs. Bain and Dr. Bain, at Rochester, Min.

A pleasant event took place at the home of Mrs. Geo. Gengloan on Thursday afternoon last, when a shower in honor of Mrs. James (Bud) Hannon was held. There were a large number of Mrs. Hannon's friends present and the gifts were numerous and beautiful. On behalf of those present, Mrs. Leona Webb read an address setting forth the good wishes of her friends, and upon presentation, all present signed it. A delightful lunch was served by the hostess.

Felt hats for fall wear, new styles, newly arrived, $1.50 to $3.00, at Lucille's Beauty Parlor.

Many Tofield young ladies teaching or attending college at other points, visited their homes for the Thanksgiving holidays. Among these were the Misses Thelma and Audrey Jobb, Myrtle Bethel, Ruth McLaughlin and Edna Cambell.

Miss Bertha Lee, who is working in Edmonton, spent the Thanksgiving holidays at home.

Mr. and Mrs. McGugan spent the holidays as guests of Mr. and Mrs. McCauley. Mrs. McGugan was a former teacher here.

Miss Nettie Neal who is working in Edmonton visited her sister, Mrs. Calvert, over Thanksgiving.

Miss Minnie Wood, who is on the Edmonton telephone staff was home for the Thanksgiving holidays.

Miss Laret Ross spent the Thanksgiving holidays in the city.

Mr. Harris of the McLaughlin Hardware staff, spent the week end in Viking.

Messrs Geo. Agnew, L. Abbott, M. C. Hammond, P. Lerbeckmo and A. Williams recently returned from a hunting trip out of Edson. Mr. Williams was successful in bagging a fine moose.

Miss Clara Abbott spent the holidays at home.

Mrs. Hunter and children of Edmonton are visiting at the Abbott home.

Mrs. Hall of Edmonton was a guest of Mrs. E. W. Rogers on Tuesday.

Mr. and Mrs. Swift and family spent the holidays in Calgary with Miss Annie Swift.

Mrs. Noland and daughter, Thelma spent Thursday last in the city.

Mr. and Mrs. Carr attended the Armistice Ball at Edmonton on Monday night.

Mr. R. A. Zerber, watchmaker and jeweller, will open a repair shop upstairs in the Jobb block next Wednesday and Thursday, November 20 and 21. Mr. Zerber will be in Tofield on Wednesday and Thursday of every week thereafter. Expert watch repairing.

A new business venture is commencing to-day (Thursday), when Mrs. J. B. Hyslop, will open a ladies' wear store in the south portion of the Stauffer building (formerly Carver and Hannon). Mrs. Hyslop (nee Miss A. Van Buskirk) has had experience in this line, and is at present showing ladies' hats and dresses, lingerie, hosiery etc.

Jack Harold Lewis is the name of the little son born Tuesday, October 22, at the Bushong nursing home to Mr. and Mrs. Harold Lewis. Six and a half pounds was his weight at birth. The young father is proprietor of Lewis' Reliance Grocery, Gresham. Mrs. Lewis who before her marriage was Miss Mabel Jackson, was a member of the Outlook force for four and a half years. Mr. and Mrs. Clarence Jackson are rejoicing over the arrival of their first grandson, and Mr. and Mrs. LeRoy Lewis over their first grandchild. Mr. Lewis is well known here, being a former Tofield boy.

Messrs T. Rowan, Fosbong, B. Anderson and Geo. Hendrickson recently returned from a big game trip. The party were successful in bagging two fine bull moose.

Bud Cory visited with home folks over the Thanksgiving holidays.

Miss Annie Hobson, who is working in the city, visited at the parental home at Tofield over the week end.

Miss Dorothy Hay spent the holidays at home.

RECEPTION

Honoring her daughter and son-in-law, Mrs. James J. (Bud) Hannon and Mr. Hannon, Mrs. M. Wood held a reception at her home north of Tofield, on Friday evening, November 1st for the immediate relatives and intimate friends. The decoration throughout the rooms was carried out in the rich shades of baby mums and tall tapers to match were also used. The guests were received by Mrs. M. Wood and Miss Neva Wood, who assisted the bride and bridegroom. The bride's table was centred with the handsome three-tier wedding cake. Miss Marion Carter, school friend of the bride, cut the wedding cake. Mrs. Horace Rollins, Miss Polly Napier and Miss Thelma Noland assisted with the serving.

The invited guests included Mr. and Mrs. J. D. Hannon, Mr. Hannon, Sr. Lloyd Wood, George Abernethy, Miss Maggie Wood, Frank Wood, Miss Loretta Ross, R. Skitch, Glenn Wood, Miss Lucile Gray, Miss Thelma Noland and Polly Napier. Out of town guests included Mrs. J. W. Carter of Holden, Mrs. Iva Logan, and Miss Ardis Wood, R.N., of Edmonton, Mrs. Horace Rollins of Viking and Miss Marion Carter of Camrose.

Many beautiful gifts of China, silver and linen were displayed in the dining room.

FRASER — WHILLANS

A quiet wedding took place on Wednesday evening October 23 at the home of Mrs. W. Wallace Laird, 1031 Sixth avenue, New Westminster, daughter of the bride, when Mrs. Ellen Lucinda Whillans became the bride of Mr. Gordon Fraser of Vancouver, Rev. D. M. Perley officiating. The bride was a charming picture in a gown of cocoa chiffon velvet and shadow lace. The rooms were tastefully decorated with ferns, chrysanthemums and autumn foliage. Only the immediate relatives were present and after the ceremony a wedding breakfast was served. Mr. and Mrs. Fraser will make their home at 75 West Eighth avenue, Vancouver.

Mrs. Whillans will be remembered as a resident of Tofield some years ago.

The next time your supply is running low, call us up and a representative will be at your place of business in a short time to receive your instructions and take your order. Prices fair and just.

The Tofield Mercury

CANADIAN MEDICAL ASSOCIATION

HOW TO EAT

We are very often told how to eat and how important it is that our meals consist of a variety of foods. The proper selection of foods is the first item to be considered, and the next is to eat food in the right way after it has been selected. The following suggestions are made to cover the important subject of HOW TO EAT.

Moderation should be practised at all times. It is harmful to overeat, even of the proper foods. Excess does harm; it throws an unreasonable strain on the body and so tends to wear it out early. Premature old age is the common result of neglect of the watchword, "moderation".

Meals should be eaten in a quiet restful manner. Food is not readily digested when the body is tired, or when the individual is worried or angry. A rest before meals is recommended to overcome body fatigue. Arguments or scoldings should never be carried on at meal time. Active exercise should not be taken immediately after eating. Exercise is needed by the body, but so is rest, and one of the times when comparative rest is required by the body is after eating.

The same idea of rest is the reason why meals should be eaten regularly. The number of meals and the hour is a matter of individual preference and custom. When meals are eaten irregularly, or when food is taken between meals, the digestive system is not given the periods of rest which it requires if it is to do its work properly. Eating between meals should be avoided. The person who requires extra nourishment should take it regularly.

Nature has provided means for the mastication of food. Food should be eaten slowly and it should be thoroughly chewed before it is swallowed. It should not be washed down with a drink before it is masticated. There is no objection to the use of beverages in moderation with meals, but they should be taken when the mouth is empty.

Moderation at all times! That is how to eat.!

Questions, concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

THAT DRY WELL

The human body can live without food for six or seven days if there is plenty of water to drink but it will not live three days if deprived of food and water. Water is essential to the proper growth of the body and to its proper functioning. Not just water, but pure water, is a necessity.

We have finished one of the driest seasons for many years. Sloughs and creeks are dry all over the province. Wells are either very low or quite dry. Under these conditions water has to be used from where it can be found, irrespective of whether it is known to be pure or not. Already several cases of typhoid fever have been admitted to city hospitals from country points. Typhoid is a water born disease.

Again when moisture in any quantity does come, the well will fill and much of the water will be surface water,—always dirty and impure. Before using water from an untested source, boil and chlorinate it. Before using the newly filled well water, boil and chlorinate and send a sample to the Health Department to be tested. It is worth it, and costs much less than six weeks in the hospital with typhoid fever or dysentry.

Literature on wells and the chlorination of water may be had free from the Canadian Red Cross Society, 807 Civic Block, Edmonton.

ABILITY

Ability is not so much the doing of the clever thing at any time, but avoiding doing the wrong thing at the right time.

THE MIGRATION OF BIRDS

By Prof. Rowan

Bird migration has interested man for countless centuries. References to it go back to the Old Testament and beyond: poets wax eloquent on the subject: to the sportsman the autumnal migration of wild fowl provides the biggest thrill of the year: to the man in the street the first crow or robin, winging its way northward, often amid snow and blizzard, provides the first welcome indication that king winter is truly abdicating at last. Books written on the subject are veritably legion. There is, in fact a universal interest in the annual passage of the birds and it is an interest that is world-wide, for even in the tropics birds migrate.

Man is fond of speculation and efforts to discover the reasons and mechanism of migration date from very early times. The purpose of this article is not to present a story of these, but to put before its readers a brief account of the latest attempt to solve part of the riddle and to enlist their interest and co-operation. For, as will be seen directly success depends almost entirely on the extent of the assistance forthcoming from outside sources.

The southward migration of birds is generally considered to depend on two things—food shortage and cold stormy weather. These may have played a part in the history of migration, but to-day, as far as most of our species are concerned, they are of no immediate importance. For the vast majority of birds leave us in August (some as early as July), when the summer heat is at its height and the abundance of food has not even yet attained its maximum. This being so, we can assume either (a) that birds can think in the same sense that we can, i.e., that they can calculate the approach of wintry conditions and can deliberately plan to spend the cold months in more pleasant climes or we can assume (b) that there is some internal mechanism (of which the individual may be entirely unaware) that is taking it in good time out of the danger zone. In the first case the bird would be comparable with any human being planning a trip for the winter to California or Florida: in the second it would resemble the gopher which early in September, while the weather is still balmy and bright, gets drowsy and disappears below the surface to sleep for 7 months, quite oblivious of the fact that by doing so he is escaping weather conditions that neither he nor his immediate ancestors have ever experienced, for they have always slept through them. He knows nothing of the fate he is escaping. His long winter sleep is automatic, decreed by fates, not by himself. Everything we know of birds, from the anatomy of their reptile like brain to their daily habits makes it certain that the first assumption cannot be supported. A bird has no powers of human thought. His intelligence is distinctly limited. We may therefore adopt the other assumption, that migration is an automatic act, like the hibernation of the gopher, which the bird carries out mechanically and perhaps unconsciously. To many of my readers such an hypothesis will sound almost blasphemous, but for the sake of argument, let us take this attitude since it is the one that recounted for the inception of the original experiments which have now been carried on for three years.

The junco, or snow bird, was the species used and the experiments were planned in stages. The first of these was to test the popular conception that juncos, which are very late migrants, leave us on account of cold and food shortage. Numerous individuals were trapped in October on their way south and confined temporarily in a capacious aviary where they were provided liberally with food and water, but not with artificial heat. They were retained here till November and then released. Had there been any grounds for the popular belief just referred to, gaining their freedom the birds would surely have hastened to join their brethren hundreds of miles further south, but this they did not do. Of about 180 liberated through three winters in the months of November, December, January and February, not one attempted to migrate. All remained and were subsequently recaptured in the baited traps. Neither food conditions nor the most drastic temperatures were able to awake the now dormant migratory impulse; an extraordinary interesting fact.

Now a bird, like other animals, has in its make-up certain organs that are classed as ductless glands. These produce internal secretions, or hormones, of vital importance to the general machinery of life. Insulin is a familiar example. Shortage of it produces the serious condition known as diabetes. The symptoms can be cured by artificially augmenting the insulin supply to the body by injecting it from outside. During the migratory seasons birds develop certain tissues that produce such an internal secretion, but during the non-migratory periods of summer and winter this tissue is dormant and inactive. It was conjectured that the migratory impulse might be aroused to order if this dormant tissue could be artificially stimulated to activity at the wrong season and the appropriate hormone produced. This was attempted quite simply. Birds go south when the days are most rapidly shortening and they come north when they are most speedily increasing. It was thought that this rapid reduction of their activities in the fall and increase in the spring might provide the key. Accordingly more juncos were trapped and these, housed in a separate aviary, were given artificial light in nightly increasing instalments, the lighting commencing early in October. While the other birds already referred to (the controls) were getting the shortening days normal to autumn, the experimentals were getting days increasing at the same rate as early spring. After six weeks of this treatment the internally secreting tissues characteristic of the migratory periods had reappeared and when the birds developing it were liberated, instead of staying where released like the controls, they departed. The junco, unfortunately, is a very small bird and is protected by the law. We have never had any returned and hence we do not know where they went or if indeed they could be said to have migrated in any strict sense of the word. But they did go while the controls stayed.

It was therefore planned to repeat the experiments on some other species, one known to everybody, large enough to be conspicuous, and not protected by the law, so that people in general might be invited to shoot them and return them to the centre of experimentation, the University of Alberta. By mapping the places at which the birds would be killed an idea of what direction they were taking would be obtained.

Accordingly late in August this year, a few weeks were spent in trapping crows—well suited to the purpose—and about 140 were successfully taken by various means. These are now housed in large flying cages in the river valley in Edmonton. They are in first class condition and are keeping very fit. There are two lots, controls and experimentals. The former are getting no artificial light while the latter are getting lighting at the same rate as did their predecessors, the juncos. They are already showing signs of developing the tissue referred to above and it is hoped to liberate them in the near future. The date provisionally planned, if the birds are then in appropriate condition, is Thanksgiving Day. The main point to be settled is —Where do these birds go when liberated? Do they merely wander or do they actually migrate in some definite direction, say either north or south? There is only one way to determine this and that is to have the birds shot or otherwise retaken by all and sundry kind enough to go after them, to have them returned here for examination, and to map the spots at which they were captured.

In this slight outline only one objective has been mentioned, that the direction taken by the experimental birds when they leave here may be determined. But as a matter of fact, upon this hinge many additional points, but they are highly technical. It might be added, however, that apart from the attempt to produce artificial migration various theoretical aspects of the action of internal secretions are involved, and in view of the importance of these to the practice of medicine, the experiment assumes an interest of far wider proportions than at first appears to be the case.

I should therefore like to ask everyone who has the inclination and a little time to spare to turn out on the appointed day and join in the crow hunt. Crow shooting in November has never before been provided for the residents of Alberta, so it will at least be a novelty.

Shooting to be done on the appointed day, or after, but not before. This is important as the birds require time to travel far enough to indicate their intentions.

If a bird is taken, thrust cotton batting; preferably moistened in alcohol of some sort—anything from methylated spirits to whiskey or brandy will do—down the throat as far as it will go. A pencil does well as a ramrod. Then pack the bird, as soon as it is cool, but not before, in newspaper, followed by thick brown paper and then mail, addressed to the Department of Zoology, University of Alberta. Postage will be refunded. At the same time send a letter (quoting the number of the crow concerned- and stating as precisely as possible where the bird was taken (the place is most important) and when. Include any other information that you think may be relevant or of interest.

If you go out after crows but fail to get any, we should like to hear from you in any case, when you went out, where you went and how much ground you covered and whether you saw any crows or not. Even if you merely stayed around the farm and kept a look out for crows, we should appreciate the information. The extent of the unsuccessful hunting is valuable and essential information.

Every crow is banded. Do not remove the band under any circumstances as each crow has its complete history in an index card file and different groups of crows are involved. Their behaviour is expected to differ.

Five bands will each have a five dollar prize attached to them. Everyone assisting will receive a souvenir of the occasion, if we hear from them.

WINTER MANAGEMENT OF THE DAIRY HERD

(Experimental farms note)

While a good milking strain is the primary factor in winter milk production, suitable feeds and feeding methods are almost as important. In fact, the greatest results cannot be attained from the dairy herd unless the good breeding is backed up by a good feeding. Also, unless a liberal supply of good roughage and a suitable grain mixture is provided, it is useless to expect winter dairying to prove profitable.

Dairymen have long appreciated the value for milk of the succulent pasture grasses which are so abundance in the spring and early summer. To obtain succulence in the winter, or when pasture is not available, crops are made into silage. Silage is one of pastures' best substitutes.

Roots, such as mangles or turnips are also of value as a feed for dairy cattle during the winter months as they are very palatable and add considerable succulency to the ration. A few roots fed with the silage improve a ration considerably.

To obtain best results from the dairy cows in winter a liberal supply of legume roughage should be fed in combination with a succulent feed such as silage or roots. Legume hays are high in crude protein and lime and are therefore of great importance in reducing the amount of expensive protein-rich concentrates needed to provide a properly balanced ration for the dairy cow. When an abundance of alfalfa or sweet clover hay of good quality and silage from oats, corn or sunflowers is supplied, it is not necessary to purchase such feeds as bran and oil cake for ordinary producing cows. The addition of a small quantity of a concentrate rich in protein, like bran or oil cake meal, makes a ration adapted to the heaviest producers of milk. By feeding good legume hay the dairyman is able to reduce his meal ration considerably. Legume hay, silage and a small quantity of ground oats make a good dairy ration.

At the Dominion experimental station, Lacombe, the roughage fed to the dairy cattle during the winter months consists for the most part of oat, corn and sunflower silages, alfalfa and sweet clover hay and oat green feed. Occasionally, roots and western rye grass hay are supplemented to give a little more variety to the ration. Salt is fed regularly and fresh water is available in bowls at all times. An average of fifteen pounds of hay, 45 pounds of ensilage and 10 pounds of roots, when available, are fed each cow per day and she is given one pound of meal for each three and half pounds of milk produced. The meal mixture fed the heavy producing Record of Performance cows consists of 400 pounds oat chop, 200 pounds bran and 150 pounds oil cake cake meal.

The best results cannot be obtained without paying heed to the fact that kindness and comfort are matters of importance in the dairy barn. The cow which is nervous and discontented does not make the best responses to feed and care, while in the barn the cow should have her stall as comfortable as is possible to make it. Keep plenty of good clean straw under her.

Sunlight and fresh air play an important part. Well ventilated stables that provide pure, fresh air and that are comfortably warm are equally as important to insure dairy profits as are feed and care.

LINDBROOK

Mr. A. K. Hicks purchased the farm, stock, implements, feed and auto, from Henry Goubault; three miles north of Lindbrook Station and moved up there this week. Mr. H. "Bunty" Law moved the majority of the stuff by truck and is staying up there with Mr. and Mrs. Hicks. We wish them all good luck in their new venture.

Mr. and Mrs. Henry Goubault and family left last week for Quebec where they are taking up a fine stock and maple sugar farm. La bonne chance Henri.

Don't forget the whist drive at the school on Friday Nov. 15, at 8 p. m. This is for the W. A. Lindbrook branch. Admission 25c. of course some of you will get this after it is over, but this is for the benefit of those who do get their paper earlier and they will please advise their friends.

Mrs. Whibley met with rather a nasty accident the other day. A part of the cream separator fell on her foot cutting it badly, in fact so much that she had to be taken to Tofield for the bleeding to be stopped. We are glad to report that the foot is on the mend and Mrs. Whibley is still hopping around as spry as ever.

Mr. John Lindberg is home again from the west of Edmonton where he has been employed by the C. N. R.

WHEAT POOL CONVENTION

A very well attended meeting was held at the Variety Theatre on Thursday afternoon of last week, it being the annual Wheat Pool Convention of the G—7 district.

Addresses were given by director Geo. Bennett, of Vegreville. Mr. J. Ferguson and Mr. J. P. Watson, which were listened to attentively and much appreciated.

The election of officers was held.

Editors note:—Owing to this meeting being held on Thursday afternoon, the editor could not be present. Also we inadverbantly omitted to telephone the secretary for information until today when he could not be reached. We expect to publish the list of officers and better report of this meeting next week.

EVERYBODY NOW COMFORTABLY SETTLED AGAIN

Since the disasterous fire in August, the business of Tofield has been greatly disorganized. Burned out business men were compelled to take temporary quarters, not always best suited to their requirements.

Now all are settled again, we hope for some long time.

Mr. Taylor is comfortably located in his new store on the same location and Mr. Jobb. is located in his newly built building with Hobson's Meat Market alongside. E. W. and H. E. Rogers are comfortably installed in the south side of the Bruce Block, and Geo. B. Bruce in the north side. The Tofield Co-op is well settled in the former Henwood block. In fact Tofield is once more a compact town again.

DISSOLUTION OF PARTNERSHIP

NOTICE is hereby given that the partnership subsisting between us, the undersigned Benjamin Franklin Morden and Silas A Pearson, carrying on business as Garage proprietors, under the firm name of "The Tofield Garage," in the Town of Tofield, in the Province of Alberta, has this day been dissolved by mutual [illegible]

The business in future will be carried on by the said Benjamin Franklin Morden as "The Tofield Garage," and he will pay and discharge all debts and liabilities, and receive all moneys payable to the said firm.

Dated at the Town of Tofield, in the Province of Alberta, this 30th day of October, A.D., 1929.

(Sgd.) B. F. MORDEN

(Sgd.) SILAS A. PEARSON

CORRECTION

Advertising pays, especially when advertisements appear to be giving meat away instead of selling it. This, Mr. Hobson discovered last week when the Mercury made a bad error in his advertisement. Mr. Hobson as a special, advertised cottage rolls at 25c per pound,(they usually sell for much more) and by error it appeared as 1lc per pound. We regret this occurence and trust Mr. Hobson and our readers were not too greatly inconvenienced.

Hobson's Meat Market is now splendidly located and is rapidly being fitted up as an up-to-date shop. There is now being installed an electric refrigerator large enough to take care of the requirements of the business. With this equipment weather conditions will mean little as regards the preservation of meats as the refrigerator can be made as cold as desired. The window is now filled with gleaming white tile and a portion of the walls will also be tiled shortly. Gas lighting and heating has also been installed.

A RICH COMEDY FOR SATURDAY

For Saturday, Frank has booked a rich comedy. A Beery-Wallace comedy is always welcomed wherever they are booked. Their clean sparkling humor has cured millions of people of the blues and for the very moderate price of admission to the Variety on Friday or Saturday, it will cure yours. Saturday's picture is "We're in the Air Now", and judging from press reports of this picture we expect many of our patrons will be "in the air", or at least light hearted before the program ends. A real good week end laugh is as good as a tonic—it is a tonic, so don't fail to make the week end cheerful by attending this show.

MOVING PICTURE AT CHURCH

Mr. Bachman, of the University of Alberta, gave an interesting exhibition at the Young Peoples meeting on Tuesday. The pictures took the form of a travelogue and portrayed scenes in Europe and elsewhere. Accompanying the pictures was gramophone music suitable to the films being run through the projector.

At the close, Mr. Bachman was accorded a vote of thanks for his kindness in coming down.

Here and There

(418)

A ship of heroes shipped by one of themselves was the unique feature of the sailing of the Duchess of York on a recent trip from Montreal. Six holders of the Victoria Cross, Britain's most coveted and most meritorious of war awards, were on the vessel, which was under the command of Captain Stuart, himself a V.C. They were on their way from Canada to London to take part in the dinner by the Prince of Wales to Victoria Cross men from all parts of the Empire slated to be held November 9. Other V.C.'s travelled on Canadian Pacific liners Minnedosa and Empress of Scotland.

The stage is being rapidly set for one of the outstanding developments in Canada in a decade when the English Folk Dancers and exponents of English folk dancing will hold a festival at the Royal York Hotel, Toronto, November 13-18. A British opera by a British composer of world-wide fame will be produced for the first time on this continent when "Hugh the Drover," by Dr. R. Vaughan Williams, is put on during the festival, and Canada and Canadians will be introduced to a whole new world of art and beauty.

"We are all primarily conscious of the fact that this country, measured by any of the yardsticks by which the prosperity of a nation can be gauged, is a very prosperous country, notwithstanding disturbed stock markets and a rather unusual grain situation, both of which are, we hope, temporary," said E. W. Beatty, chairman and president of the Canadian Pacific Railway, at a dinner given recently in his honour by the St. Catharines Chamber of Commerce.

Robert Home and George Thornton, veterans of many competitions, who teamed up from Manor, Saskatchewan, in the Canadian Pacific Swine Club competition for boys and girls of the province have carried off the silver trophy and will join the teams from the western provinces for a trip to the Royal Winter Fair at Toronto as guests of the railway.

Bituminous sand deposits of the McMurray district and along the Athabasca River will eventually furnish the large quantities of material required for waterproofing and surfacing the gravel roads of the western provinces, is the opinion of Major C. H. Ommanney, director of development for the Canadian Pacific Railway, Montreal.

Colwood Golf Course, where the second annual Empress Hotel midwinter golf tournament will be staged in February next, is one of the finest links on the continent, declared Walter Hagen, British open golf champion, who recently played an exhibition game there. "It is a tricky course that calls for the best in a player and the parklike surroundings are ideal," he [illegible]

He is a resident of Three Rivers, Quebec. These scholarships have been offered [illegible]

GEESE FALL BEFORE

Two guns break after first shots into huge flight

Plank the names of Jim Secord and Elmer Geoglein, farmers in the Beaverhill Lake District, high above that of the legendary Tantalus! When in future generations men wish to describe the most agonizing and infernal of torture, they will say, "suffering the pangs of Geoglein and Secord" rather than the old classic of, "suffering the pangs of Tantalus," that myrthical character who was pinioned prone on a lonely mountain while a vulture picked leisurely at his vitals for a thousand years or so.

With a tally of fifteen Canada geese in one hour and half of shooting, Fred V. Hollands and Frank Kenwood arrived in Edmonton during the week from a hunting trip into the Beaverhill Lake country, east of the city, with a story of what is probably the most successful and at the same time tragical hunts of the present shooting season.

Kenwood and Hollands, along with Elmer Geoglein and Jim Secord, two Beaverhill farmers spotted hundreds of big Canada geese dropping into a stubble field on the evening of November 3rd. Waiting until the geese had fed and left, the four men entered the field armed with spades, crow bars, grubhoes, lanterns and flashlights and began digging shooting pits for the morning flight. It was 4 a. m. Monday morning before the pits were completed, camaflouged to satisfaction and the decoys set out. At 5.30 a.m. the quartet returned and took up their firing positions.

Just as daybreak was coming, three geese came slowly unwind along the field and began to settle among the decoys. Hollands, on the first pit, let the first two birds pass him and picked off the third. Geoglein in the third pit got the second and Jim Secord got the third with a second shot.

Hardly had the three geese dropped when another flock of about 25 came slowly over. Then tragedy descended. In opening his double barrel gun in excitement, Geoglein broke the stock right off. Companions maintain that six inches is missing from the stock where Geoglein bit into it in his rage. The other guns all pumps, began blazing furiously, and then Jim Secord jammed a shell so viciously that despite his frantic efforts he was unable to clear it until the shoot was over. Hollands and Kenwood dropped fifteen geese themselves before the flight stopped.

All of the birds were exceptionally large and in good condition. Eight of them weighed between 13 and 14 pounds apiece. This good condition and fact that the birds fed twice within twelve hours in the same field is taken as an indication that they were about to start on the long flight southward.

Telephones were installed in the residences of Henry Tiedeman sr. and [illegible] week.

A number of young people of this vicinity attended the masquerade dance at Kingman last Friday night.

Horace McIleffey, of Tofield spent the week end at the Philips home.

CARD OF THANKS

I wish to thank all the ladies who sent me those lovely pieces for my [illegible] It will make a very warm quilt when completed.

Mrs. Frank Hull

KETCHAMOOT

Mrs McGowan and Miss M Purcell attended the teachers convention held at Camrose Thursday and Friday.

Miss Mabel Lawson, of Camrose spent the Thanksgiving holidays at the parental home.

Mr Perry Owens, of Holden visited Saturday evening at the Ingram and Sears homes.

Ketchamoot friends of the Haugseth family were sorry to hear of the death of Mrs. Haugseth as she was beloved by all her friends who send deepest sympathy.

The bazaar and tea put on by the members of the M. A. S. at the Henry McGintie home was well patronized, but not as well as former years. So here's hoping for a real Thanksgiving dinner another year. Proceeds for the evening were $70.00.

Mr. Leslie Coombes and children returned to Red Deer, after which they expect to reside at Turner Valley.

Mr. O. Hansen has rented the Wheeler farm for the next year. Mrs. Wheeler will leave the farm in the spring.

Miss Marjorie Lee came home from her school near Wainwright to spend the Thanksgiving holidays.

Messrs John McGintie and son Maurice motored to Edmonton Thursday.

Messrs Lorne and Howard Lee returned home on Saturday from their hunting trip.

Mr and Mrs Campbell and family have moved into the Jason Henderson [illegible] for the winter.

Mr Albert Sears has bought the quarter section of land from Mrs. G. H. Owen, just south of Mr. John Brown.

Miss Mabel Younie, of Edmonton spent the week end visiting her cousins the Misses Margaret Mitchell and Maud Wildman.

The auction sale at the Wildman farm on Wednesday afternoon was well attended and prices on everything was very satisfactory. Mr. Brink, our new auctioneer cried the sale and Mr. Oliver Leterouneau was clerk. Mr. Popple has rented the farm.

Mr. and Mrs. Lancaster, of Lindbrook were Sunday guests of Mr. and Mrs. John Brown.

Miss Doris Contovre, of Edmonton visited a few days at the Geo. Lawson and Whillans homes.

Mrs. Keitha Oliver and lady friend from St. Paul spent the Thanksgiving holidays at the home of Mrs. Oliver's parents, Mr. and Mrs. Peter Lee.

Mr and Mrs. O. Hansen moved the first of the week from the W. A. Mitchell farm to Mr Myers where they will reside for the winter.

KINGMAN

C. A. Lindberg made a business trip to Winnipeg last week.

D. Scramstad, of Edmonton was a business visitor here last week.

Andrew Johnson returned from Okotoks last Tuesday where he has been working for some time.

Howard Simonson, of Edmonton spent Thanksgiving Holidays with relatives.

Messrs O. and T. Graham motored to Sedgewick on Thursday to visit relatives.

Mr. and Mrs. O. Thompson and E. Tollefson motored to Cold Lake on Saturday.

Mr. and Mrs. T. Horte and Mr. and Mrs. H. Haugen spent Thanksgiving with Mr. and Mrs. Geo. Qualley, of Hughenden.

Miss Lily Erickson, of Edmonton and Mr. and Mrs. J. W. Erickson, of Red Deer spent a few days with Mr. and Mrs. E. Erickson.

Mr. and Mrs. W. Jardie visited with Mrs. E. Tollefson on Sunday.

Mr and Mrs. Thor Graham and family were the guests of Mr. and Mrs. W. Moore, of Hay Lakes.

Mr. and Mrs. W. Asp and family motored to Daysland on Monday.

Miss Alice Simonson, of Holden spent a few days at her home here.

Mr. and Mrs. E. Linden and son, of Edmonton, Mr. and Mrs. W. Hartchen and family and Mrs. E. Grace were the guests of Mr. and Mrs. E. Erickson on Sunday.

Messrs H. T. Horte and S. Simonson attended the Teachers' Convention in Camrose on Thursday and Friday.

Mr. and Mrs. D. M. Thompson visited with friends in Rosalind over Thanksgiving.

Miss Irene Horte who attends Normal school in Camrose spent the Thanksgiving holidays at her home here.

Mr. and Mrs. W. Jardie spent Monday afternoon with Mr. and Mrs. E. Erickson.

Mrs. T. J. Rogness spent a few days in Edmonton.

Miss Gladys Horte visited with Miss Myrtle Currie, of Edmonton for a few days.

Mrs. E. Erickson and Mrs. T. Graham motored to Camrose on Saturday.

Mr. and Mrs. E. Erickson visited with Mr. and Mrs. W. McIntosh on Thursday evening.

Mr. and Mrs. T Welsh, Miss Selma Numeland and Mr Julius Lerbeckmo motored to Camrose on Friday.

TURKEY SHOOT POPULAR

Quite a number turned out to the turkey shoot at the Eaton farm on Friday last. Some good shooting was done and nineteen turkeys changed hands, the most of them providing excellent thanksgiving dinners.

Ladies Wear For Every Day
As Well As The Finer Lines

Our stock of Ladies' Wear has now been made complete and includes garments of every description for ladies.
COATS,
DRESSES,
BOOTS AND SHOES,
LINGERIE
HOSIERY
And Many Additional Items That Add To The Charm Of Mi-Lady's Attire.

We have replenished our shelves and have now a line of dry goods, only equalled in the larger cities. When planning to make a dress or other garment, you will find our line complete and prices down to city levels.

NOVEMBER DAYS ARE HERE
and with them cold frosty nights, when the snug warmth of wool blankets is desired. We have a complete range both in size and quality and they are marked to meet competition.

QUALITY COUNTS
A word about quality. We have always been discriminating in our buying so as to turn over to the Tofield public the benefit of our years of experience in the dry goods business. Our prices and values are a matter of record, but we have always kept up a high standard of quality and marked at popular prices. In other words as far as humanly possible we have given in quality, the most for the least. This will be our policy in the future.

LOCAL and PERSONAL

Born—To Mr. and Mrs. Dr. Law, on November 19th, a son.

Mrs. Yakibuski and son Stanley visited Edmonton on Friday last.

Mr and Mrs. L. C. Hay visited Edson last week. We understand Mr Hay will enter business in that town.

Mr. and Mrs. Carter, of Holden were in Tofield on Saturday last. Miss Marion Carter of Camrose joined her parents here and proceeded to Holden with them to stay the week end. We understand Mr. and Mrs. Carter will shortly take up residence in Edmonton.

Everett McLean, who has been working north west of town since midsummer left for Calgary on Wednesday.

Mr. A P Harold has procured a set of new Irish coinage. They are an interesting group, having designs of domestic animals placed on them. These include a horse, bull, pig, dog, rabbit, etc.

Tofields train service changed this week. The new schedule appears elsewhere.

Mr. Hobson and daughter Kathleen visited Edmonton this week and attended one of the Sir Martin Harvey plays there.

Mrs Hyslop opened her new ladies' wear store last week, located in the south half of the Stauffer building.

Mr. and Mrs. Lovell, Mr and Mrs. Ross and Mrs. Forestall attended the Oddfellows whist drive held at Ryley on Tuesday night.

Mr. and Mrs. Sibley spent Monday in the city.

Mrs. Noland and daughter Thelma spent Thursday in Edmonton, Mrs. Noland staying over until Sunday.

Mr. and Mrs. W. Hay and Jean motored to Edmonton on Saturday last.

Mr. Geo. Bissett returned home from Edmonton on Wednesday afternoon. While there he underwent a tonsil operation.

The Ladies' Aid of the United Church will hold their annual bazaar and tea, also sale of home cooking and farm produce, in the Institute rooms on Saturday, November 30th.

Rev Dr. Nelelan, of St. Joseph's Cathedral, Edmonton preached in St. Francis' Church, Tofield, on Sunday last.

Born—To Mr. and Mrs. Joe Brown jr., on November 16th, a son.

Mr. and Mrs. Hannon spent the week in Calgary.

Mrs. H. Rogers and son Max are visiting in the city.

A meeting of the Tofield local U. F. A. will be held in the Tofield Town Hall, on Friday, Nov. 29th at 8 p. m. Mr. McGowan, of Vegreville U. F. A. director will be present and deliver an address, it is expected. Mr. Luchkovitch, M. P. for this constituency will also be present and deliver an address.

The next dance in the Ryley hall will be held on Friday, Nov. 29th with the Martin 7 piece orchestra in attendance. As this will likely be the last time we will be able to depend on Martin's orchestra getting through, we would like to see a large turn out. A good time is assured to all.

The Lakeshore Ladies' Aid Society are holding a chicken supper and bazaar on Friday evening, November 22nd, at the community hall. Admission adults 50c, children 25c.

Dr Richardson wishes to announce that beginning Dec. 1st, he will be in Tofield the second and fourth Wednesday of each month as well as every Thursday and Friday, for professional dental services.

Lindbrook News

The whist drive given by the W. A. of the Holy Trinity Church, (Lindbrook section) last Friday evening was a huge success. The school was packed so much so that some late comers were disappointed. Sixteen tables of whist were played, players moving every fourth hand. The prizes were won by the following, Ladies 1st, Mrs. Smith, Gents 1st, Mr Frank Kortzman; Ladies booby Mrs. Forman; Gents booby, Mr F Wilde. After the game lunch was served by the W. A. ladies and after that a few cakes remaining were auctioned off, "then to home all went very pleased with an evening well spent." (Shakespeare Act IV) The Lindbrook ladies wish to take this opportunity of thanking the friends from Tofield and neighboring districts for their kind attendance and help, before signing off would like to state that despite the low charge for admission, financially it turned out well. $15.80 being the sum realized after all expenses paid. Thank you one and all and don't forget the bazaar in Tofield on Sat Dec. 7th.

Congratulations to Mr. and Mrs. J. H. Brown of Lindbrook on the birth of a baby boy born 16th of November at Tofield. Both mother and baby are doing fine.

We hear that Mr. E. H. Creveling is returning to the U. S. A. Best of luck "Hi" hate to see you go, but hope to see you back.

Mr. Bert McCraw was down from Edmonton this week visiting his parents here. We hear that Bert is becoming quite an aviator, so Lindbrook may boast of its own "ace".

Mr. Leslie Rogers went hunting and was lucky to secure a fine moose also a deer. The hunting region was somewhere west of Edmonton.

What might have been a very bad accident, possibly a fatal one, occurred at Lindbrook corner on Tuesday morning when a chevrolet touring car driven and owned by Mr. Curtiss of Holden turned right over. Mr. Silversides saw the accident happen from the store and rushed out expecting to find a hospital case under the car, but fortunately except for a slight cut on the forehead Mr Curtiss was unhurt. The top of the car was bent and the windshield broke and that about totalled the damage to the car. Mr. Silversides got assistance and between them righted the car and it was able to proceed on its journey.

A car of Clover Bar coal has been unloaded here, some has been sold, but there is still some left, and those in need of coal should get in touch with the Lindbrook store.

INTERESTING SPEAKER FOR NEXT SUNDAY AT THE UNITED CHURCH

Miss Tallman, Recently of China will Deliver Sunday's Address

On Sunday evening next at the usual evening service of the United Church at 7.30 p. m., a message from China will be given. Miss Alma Tallman who has served in China as a missionary nurse will deliver the message which will be of absorbing interest. Miss Tallman by word picture, transfers her listeners to the far-a-way fields of China and her stories of battles against ignorance and disease there will be presented by one who has lived and taken part in the scenes there.

FOR SALE:—ONE SIX burner gas range; one radiant fire; and one radiant fire with fire place furnishings. To be sold very cheap. Apply to L. C. Hay, Tofield Alberta.

Ketchamoot Items

Mr Haythorne secretary of Boy's work for the province of Alberta, in the United Church gave an interesting talk last Sunday on the International Sunday School convention, held at Los Angeles, Cal in 1928.

Miss Tallman R.N., nurse missionary from China will speak at the school Sunday November 24th at the morning services. Do not miss hearing Miss Tallman as it will be encouraging to her and interesting and instructive to you.

Mr and Mrs O Barnes and son have moved down to the home of Mr and Mrs. Frank Hull where they will reside indefinitely.

Messrs. Fred and Albert Sutton, Henry and Leslie McGintie, Paul McMullen and Chester Coombes returned home last week from their hunting trip. Each was successful in bagging a moose and deer.

Miss Agnes Yager is lending a helping hand at the M McGintie home. Mrs. McGintie being on the sick list.

Mr and Mrs. Frank Shupe entertained, Mrs Henderson and Jason, Mr and Mrs. L. Carlisle and daughter to dinner Sunday.

Miss Hazel Sears visited her friend Miss Enid Cory of Tofield over the week end.

Mrs O. Barnes, Mrs. Peter Lee, Mrs. J. H. Ingram and Mrs. G. W. Sears attended the U. F. W. A. meeting at the home of Mrs. Dodds on Thursday of last week.

Mr and Mrs John McGintie, Mr and Mrs. Henry McGintie and sons and Mr and Mrs. Peter Lee were Sunday guests of Mr. and Mrs. Chas Whillans.

Several families shipped stock to Edmonton on Tuesday. Mr. J H Ingram accompanied the car and will remain in the city for a few days.

Mr McDonald and daughter, of Miquelon Lake Jim and Geo. Williams were guests of the Sears family Tuesday evening.

Mrs. J. H. Ingram entertained the M. A. S. at her home on Wednesday afternoon, most of the members were present including several visitors. These were Mrs. Baukndahl, Mrs John Lee, Mrs. T. D. Ferguson, Mrs Roger Ray. A pleasant afternoon was spent.

TOFIELD HOCKEY CLUB HOLD ORGANIZATION MEETING

On Wednesday evening, November 20th, the Tofield Hockey Club held an organization meeting. W. Worton will again manage the team. Harry Bowick was chosen captain. Horace McIleffey was elected secretary treasurer.

The buying of uniforms was then discussed. It was moved by W. B. Worton and seconded by Les Glover that we find out the price of uniforms and if agreeable to the club go ahead and purchase same. The colors chosen: red, white and blue.

The secretary's report was read and adopted.

A hockey practice was called for Saturday afternoon at 2 o'clock. It is hoped by the boys that they will receive the loyal support of all the fans. They are getting right to work in practice on the sloughs and will be in good shape for the first game, when the rink is open.

WHEAT POOL CONVENTION

A meeting of G. 7 sub-district of the Alberta Wheat Pool was held at the Variety Theatre on Thursday, November 7th. There was a good representative gathering of pool members. Sub-district G. 7 extends from Holden on the east to Clover Bar on the west and there were many present who had travelled long distances to be there.

Mr. Bennett who was expected to be present was unable to come and addresses were given by Mr. J. Ferguson, delegate of this district; Mr Watson, field service man of this district and Mr Sellers elevator inspector. All of the addresses dealt with timely subjects and were well received and appreciated.

The officers chosen were: Chairman, E. Seale, Tofield; Secretary, F. R. Hawthorne, Clover Bar.

INTERESTING SPEAKER FOR

The next meeting will be held at Holden in June of next year.

Kingman

Mrs Ed Thompson returned on Monday after spending a month with Mr and Mrs. S. T. Severson of Clyde.

Mr and Mrs. W. Jardie visited with Mr and Mrs. A. Klimp, of Camrose on Thursday afternoon.

Mr and Mrs J Johnson and Mrs Pederson, of Round Hill visited with Mrs. R. Molvik on Wednesday.

Mr and Mrs. S. T. Severson, of Clyde were the guests of Mrs. Ed Thompson for a few days.

Mr E. Erickson and son Harry, visited with Mr. and Mrs J Anderson on Sunday.

Quite a number of young people are enjoying themselves skating on Miquelon lake.

Mr and Mrs. C. R. Blyckert and Mr. and Mrs. C. Johnson and daughter were the guests of Mr. and Mrs T. Horte on Sunday evening.

W. Wideman was a business visitor in Edmonton for the latter part of the week.

Mr and Mrs. A. Asp and family visited with friends in Duhamel on Sunday.

LAKESHORE

Mrs. Lester Noland suffered a sudden and was rushed to Edmonton, where an operation was performed immediately attack of appendicitus Monday is making splendid progress towards recovery.

Henry Tiedeman jr. was so unfortunate as to cut his foot on Friday of last week while brushing. Several stitches had to be taken in the injured member.

Mr. and Mrs. J. H. Johnston and daughters spent Sunday evening at the Phillips home.

Mr and Mrs. Than Noland spent several days at Deville last week visiting their son and daughter there.

Mr and Mrs. Chas Plants and son of Woodlawn visited friends in the district Sunday evening.

Bardo

Mr. Edwin Johnson, of Peace River, is visiting friends and relatives here.

Martin Hagen returned from a visit to Grand Prairie, on Sunday last.

Little Stanley Yoder, son of Mr and Mrs. John Yoder, had the misfortune to break his colar bone, while on his way home from school one day last week.

The same mishap befell Edward Steen, while skating, last Sunday. We hope they will both improve rapidly.

The services of the Y.P.S. at Bardo last Sunday, were both very well attended.

Messrs Nordhus, Anderson, Strand and Bjornson returned from their hunting trip on Friday. They were successful in bagging two moose.

Mr and Mrs Ben Anderson and family, Mr. and Mrs. M Finseth and family, and Mr and Mrs. Jacobson and family were dinner guests at the O Johanson home on Sunday.

Mrs. Finseth, of Ryley is spending several days visiting with her daughter Mrs. Foshaug of Bardo.

OBITUARY

Anne Marie Viken was born in Norway, April 19, 1859. In July, 1880 she was married to Ingebrigt Hougseth of Bardo, Norway. In August, 1902 they came to Canada, settling on a homestead at Bardo, Alberta where they have since resided.

Her death took place at the Camrose hospital, on Friday November 11th. The funeral was held at the Bardo church on Thursday; interment taking place in the Bardo Cemetery.

She leaves to mourn her loss, her husband, one foster son, Ingward, of Grand Prairie, and two sisters in Norway.

Mrs. Hougseth was a kind and hospitable woman, and will be greatly missed by her many friends.

Job Printing

Every business man requires a certain amount of printed matter. Such things as Letterheads, Envelopes, and Statements are as necessary to modern business correspondence as a telephone is to a modern business office. The Mercury Office is equipped to turn out all kinds of job printing. The next time your supply is running low, call us up and a representative will be at your place of business in a short time to receive your instructions and take your order. Prices fair and just.

The Tofield Mercury

Edmonton Baker Received Poisoned Candy

City Police Get New Clue With Which They Hope To Track Down Sender of Deadly Candy—Only Three Lines In Missive

Someone Jealous of Larmer May Have Mailed Letter, Says Chief Shute. Handwriting Expert at Work on Letter and Box

Discovery of a letter, presumably written by a woman, which was contained in the box of poisoned candy received by Cecil Larmer baker at the National System of Baking shop who is now at the Royal Alexandra hospital along with George Johnson, co-worker who also ate one of the chocolates, have given city police a new clue by which they hope to track down the person who sent the box by mail from Toronto.

Both Larmer and Johnson are improving at the hospital although the condition of Johnson is still serious. He has an even chance for recovery, according to Dr. T. H. Prust, attending physician.

The letter, which police obtained Saturday morning, consisted of a single piece of paper and the writing on it was done by hand. There were only three lines to the letter and it was done in pen and ink.

CANDY MADE FOR CHURCH BAZAAR

Police will not divulge the contents of the letter or the signature of the person writing it, but it is reported that the letter said something to the effect that the writer had made some chocolates for a church bazaar and that Larmer was requested to sample them.

The wrapper which the police now have, is of brown paper with a Toronto post mark over the stamps. Larmer's name and address were written on a piece of paper with bond finish and weight, which was pasted on to the wrapper.

Heavily Loaded With Poison

That the chocolates were heavily loaded with strychnine is evident from the analysis made by J. A. Kelso, provincial analyst, Saturday morning.

"We had only one candy which Larmer spat out after tasting and finding it bitter, and the washings from the stomach," Dr Kelso said, "but we found both the chocolate and pregnated with strychnine."

"Can you say how much strychnine was contained in the chocolate Larmer spat out?" Dr. Kelso was asked.

"It is hard to tell at the first taste," Dr Kelso replied, "but this candy was heavily loaded—two grains at least, I would think, though this will take some time to determine definitely."

Since from one half-and three-quarters of a grain of strychnine may be a fatal dose for a man, the candy spat out by Larmer may therefore have contained sufficient of the alkaloid to have poisoned three or four persons.

"How about the stomach washings—what amount of strychnine was present there?" Dr. Kelso was asked.

"It would be impossible for us to say offhand," Dr. Kelso replied. "This will take some time to determine, but the washings were heavily loaded with strychnine undoubtedly."

A casual glance would indicate that the handwriting on the wrapper and in the letter were the same person but Det. H. T. Reynolds handwriting expert at the city police department, is examining them thoroughly.

Keeps Back Information

Chief constable A. G. Shute indicated Saturday morning that absolutely no more information will be given to the public, stating that he desired to get in close touch with Toronto police officials before press wires carried more news of the case to the eastern city.

"There is a possibility that the letter was not written by Larmer's girl in Toronto," Chief Shute stated. "Someone else may have done it due to jealousy. Possibly someone else who was interested in the girl may have wanted to get rid of Larmer. Anyway, we are getting in touch with Toronto and will give them full information, including a description of the wrapper and letter. Photographs of them will be mailed at once."

Chief Shute would not say if the letter was signed with the girl's [illegible]

Edmonton's poison chocolate case mystery deepened Tuesday with a police announcement that the writing on a letter in the poison package which was received by Cecil Larmer, city baker, Friday, is identical with that on the letters which Larmer had received at a prior date from a girl friend in Toronto.

This important discovery projected a new puzzle into the case which is not expected to be cleared up until Toronto Police Officials receive the package wrapper and the letter which was forwarde to them Saturday night by Chief Constable A. G. Shute.

"The letter was in the girl's handwriting, according to examinations but it is my firm belief that the girl did not try to poison her friend but that someone tampered with the chocolates after they left her hands", Chief Shute stated Tuesday.

The chief still steadfastly refuses to divulge the name of the girl but has admitted that she works in Toronto. The box was mailed from this point, according to postmarks on the wrapper.

"We have wired all possible information to Toronto," Chief Shute states, "but their real work can only begin when they receive the exhibits. When they do get started it likely won't be long before they are able to make an arrest".

The Chief states that he is still without word from Toronto police officials.

Both Johnson and Larmer are improving rapidly. The latter is expected to be released from the hospital at any time, while Johnson is sufficiently recovered to walk about.

POULTRY NOW BEING STORED

From Market Examiner Nov. 14

The poultry market is reported this week as being slightly on the slow side, for very few birds have been turned over since trading commenced after the holiday. This situation is more noticeable owing to the good demand which most of the houses met for the Thanksgiving trade.

Most of the birds arriving are in good condition, although a few crates could take on a little more weight. Farmers are being advised to hold back the birds in poor condition and fatten them for the returns of such labor would be considerably better than if no trouble is taken with the shipment.

The bulk of the birds which arrive on the market from now on will no doubt be placed in storage, for outside of a few calls from hotels and restaurants, there is not likely to be much demand. Storage holdings are said to have shown considerable gain lately, for farmers are turning off their boarder hens and young stur, which they do not want to carry over the winter.

A few turkeys were on the market for the Thanksgiving trade, and while there were a number of very good birds, there were also a few which were in very poor condition. It is doubtful if there will be much in this line from now until Christmas.

The following are the prevailing prices:

Poultry, Etc.

Chickens, over 2½ lbs.	14c
Chickens, No 2	10c
Fowl, No. 1, over 4 lbs.	12c
Fowl, under 4 lbs.	10c
Fowl, No. 2	7c

KEEP CALVES FREE OF PNEUMONIA

From the Market Examiner of Nov. 14th

Pneumonia in calves is quite often prevalent on farms at this time of year, according to Dr. G. S. Weaver extension specialist in animal diseases at South Dakota State College. Keep the calves warm and dry and free from draughts, and pneumonia can be prevented, he says.

Calves that are kept in damp quarters or turned out in rough weather may contract pneumonia as a result of exposure, he says.

Pneumonia is an inflammation of the lungs and interferes with the breathing. When the lungs become filled, no air space is left and the calf dies. This condition can be prevented by good care and management.

Good surroundings and good nursing are essential in the treatment of the sick calf. All wet bedding should be removed from the calf pen and dry bedding put in. It may be necessary to blanket the calf to keep away all draughts. In some cases stimulants such as aromatic spirits of ammonia may be given and advice in regard to medicinal treatment can be secured from the veterinarian.

The direct cause of pneumonia is a germ. The indirect cause is exposure. When the animal resistance is lowered by exposure, the ever present germ gets into action setting up an inflammation of the lungs. The animal gets a fever; breathes with difficulty; nostrils are dry and dilated; and is likely to become constipated. The sick animal will stand with the front feet far apart or when lying down will lie on the sternum. Cough may be present.

ALBERTA LOOKS GOOD TO THE CROW

Flocks of Twenty-five Seen Flying Into Northwest

Between 40 and 50 of the 100 or more crows released by Professor William Rowan of the department of Zoology, university of Alberta, just prior to Thanksgiving day, in connection with his experiments on migration, have been recovered, and many others reported seen.

About 30 of the birds liberated came back of their own accord, and are once more in the crow aviary in the river valley, below the high Level bridge.

Sportsmen, farmers and others have shot and returned 14 of the birds, and one of these birds, bearing band No. 440, carrying a prize of five dollars, was shot by E. W. Reynolds of Bremner, on Thanksgiving day.

Theory Confirmed

Of the 30 birds which returned to the aviary, half of them are the "control birds"—that is, birds which were not given artificial light to stimulate the migratory urge. These birds are a partial confirmation of Professor Rowan's theory of the causes of migration.

Of the 14 birds shot and returned, these were sent in from points principally northwest of the city—Riviere Qui Barre, Rochester, Clyde, Morinville. Others came from southeast Camrose, Ohaton and Lougheed, and only one from further south—Red Deer Lake. Only one crow was shot northeast of the city.

In addition, observers have reported flocks of crows in flight towards the northwest, where as many as 25 birds were seen together, but not within shooting range. It is interesting also to note that while flocks of crows were seen heading northwest, only single birds were seen going south-east, this again tending to confirm Professor Rowan's theory.

Mr. Rowan had no definite opinion to offer as yet as he wishes to secure return of as many crows as possible, before attempting an analysis of the results. He admits, however, that the results thus far secured are extremely interesting.

He is marking up on a large map of the province, the locations where birds have been shot, or reported, and different colored pins will indicate which birds are 'control' birds, and which "experimentals"—the latter group being those treated to artificial light, to stimulate the migratory urge.

SHOCK AND FRIGHT KILLS PIONEER

Collapsing when a street car nearly crashed into his motor car at 95th st., and 114 ave. on Saturday, Nov. 2nd, Grant McAlpine, 55, of 11540 94th st. Edmonton, died Friday afternoon at his residence with out regaining consciousness. Extreme fright or shock coupled with high blood pressure which caused him to have a paralytic stroke is given as the cause of death.

Mr. McAlpine was driving with his wife and his car became stalled on the tracks. The street car proceeding at a fast rate of speed, was brought to a stop just before it hit the auto and Mr. McAlpine became greatly excited at the blowing of the air whistle on the tram. He suddenly slumped over on the steering wheel and was unconscious until his death.

Coming to Edmonton in 1904 from Rossland, B.C., where he had been in the mining business, Mr. McAlpine commenced business here as a painting contractor and continued in that work. He had not enjoyed the best of health for the past year, his ailment was not considered serious until two weeks ago.

Mr. McAlpine was born in Vankleek Hill, Ontario and was quite a young man when he first came west, proceeding to Rossland as a pioneer of that mining town.

Although never a candidate for civic honors the deceased business man took an active interest in municipal politics and community affairs. He was recognized as a staunch worker in provincial and federal politics.

Mr. McAlpine is survived by his widow, a son Donald and a daughter Dorothy, who is principal of the Berwyn, Alberta public school. One sister, Mrs. J. Leavitt, Vankleek, Ont. and brothers William of Kingston, Ont. and Leslie of Toronto also survive him.

The funeral will take place Monday afternoon at two o'clock from Connelly and McKinley's funeral home to the Mount Pleasant cemetery where the remains will be interred.

THE CHRISTMAS TREE BUSINESS

The Christmas tree business grows annually. Last year approximately seven million trees were used in North America, about a fifth of which were used in Canada and this year the business promises to be larger than ever.

Buyers from the United States have been busy in Canada since early September and from New Brunswick alone about half a million trees will cross the border to bring Canada's Christmas cheer to as many of our neighbor's homes.

The method of handling Christmas trees varies. Some buyers arrange to have trees cut by the farmers or by men whom they may employ. Contracts are made either on a stumpage basis per piece or bunch or by purchases of an area supporting Christmas tree stock outright, after being cut by the buyer.

The buyer looks for only trees of perfect form and for that reason trees grown on pasture lands are best suited for the purpose. Fir trees and black spruce are preferred. White spruce are not desirable because of an unpleasant odor.

There is no fixed rate for trees. This varies considerably according to the size. Usually they are cut in bundles of one to five, taken to the station after triming for a monetary consideration of between 25 and 35 cents per bunch retailing in the States for fifty cents to $2.00 each. From this it would appear that, as usual, the people pay the piper for the handling of the trees from forest to consumer. In spite of low prices, however, the New Brunswicker considers Christmas tree business good business as it gives him a market for a farm product that would otherwise unsaleable. If left to grow to maturity, these trees would not produce commercial trees for any other industry. A carload of trees contains from 2000 to 2500 trees, varying from five to fifteen feet in lenght with an export value of $200 to $350 per carload.

In United States the Christmas tree industry demands are more and more being met by plantations. The first plantations started nineteen years ago. A great increase has taken place, particularly in the past six years, for example the New York State College of Forestry started twenty-six such plantations in 1926. These contain about 2700 trees to the acre. After 8 to 12 years, about 1200 can be removed for the Christmas market, bringing a price on the stump of 25 to 30 cents each. With the expenses of planting, interest and maintenance this method nets approximately $300 per acre and leaves a well stocked forest plantation behind which in another fifty years will be ready for pulpwood. If clear cut the same stand would yield about $7.50 per acre in eight or twelve years.

From the foregoing it would appear that the forest does not suffer greatly from Christmas tree business. Further, that this business pays and pays rather well for the planter who got in on the ground floor.

Forest fires this year destroyed enough Christmas trees to keep North Americans supplied with trees for centuries to come. With this in mind, why should we deprive the child to feed the fire monster, at this stage of forest management in Canada.

There is then no reason whatever why every family should not have a Christmas tree to gladden the hearts of the little ones. For those who would be more conservative, the practice of using a live tree is recomended. After the festival the tree may adorn the garden and may if desired be used for several successive seasons.

There are, however, some persons still with us, who practice wanton waste and even depredations at Christmas time, and to such a word of caution.

To cut the top of a perfectly good tree and leave the body to rot in the bush is a criminal waste and unworthy of a self-respecting citizen. To take a Christmas tree from private property is plain theft and a question of public morals that should not be tolerated in any community.

Why not select your tree from pasture land or if selecting in the bush choose cedar or balsam fir which are prolific reproducers, the utilization of which would do little harm.

Punishing The Guilty

There was pawky humor—or was it ready wit?—in the remark of a small boy who, coming home one Sunday afternoon with a string of trout, was suddenly confronted by the minister. There was no way of escape; but the boy rose to the occasion. "Minister," he exclaimed, "d'ye see what thae troots got for nabin' worms on Sunday?"

The minister went on his way rejoicing.

SELLING POPPIES

TWO WEEKS ago the Mercury carried a front page article in an endeavor to encourage the sale of Vet-Craft poppies. Inasmuch as for some years past, these touching remembrances of men that are gone and men that are crippled have been sold on streets of Tofield either on Armistice day or a day in close proximity thereto. Just why they were not sold this year, we cannot say, but no doubt some little slip was responsible.

It was a pity however, as no doubt many people would take pleasure in buying one or more of these poppies and moreover the cause is very worthy. We must apologize for our premature writings concerning the sale of these flowers, but we felt sure that there would be some on sale.

WINTER SPORT

THERE IS no doubt about it Western Canadian Winters are long and cold. Some are better than others, but the gophers never fail to hibernate and even insects with as few brains as the mosquito, discreetly hide themselves during the winter season. Even so, humans do not lose heart, but if anything are more lively and more playful during the winter season here, than in the summer season.

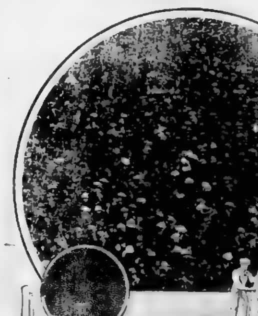
This week we carry news of the curling club and the hockey club both of which depend upon keen cold weather for existence.

Those shivery mortals to the south of us, to whom a snow storm and a sheet of ice creates terror, would be much surprised if they could enter a curling rink during January. Instead of finding everyone crowded around a huge fire, as they no doubt imagine they would find that many people prefer active excercise upon ice at 20 below zero to the comfort of the fireside. And it is not only those burly sons of the north either who venture on the ice. They would find young ladies and ladies who are not so young, following their sport with healthy vigor. Then there is of course the Canadian National game, hockey. The harder it freezes, the more hockey enthusiasts are pleased and it is common for players to be perspiring feely after a game.

Those in the country are not without their "sport". Some of them do curl and others play hockey, but the majority of farmers do not do either of these. Most of them do however, have plenty of enjoyment during the winter months. Each week during the winter one sees in the news columns reports of whist drives held at neighbors homes, several of them, ample evidence that the farming population is not being "crushed" by king Winter, but on the contrary, is getting considerable fun out of life they otherwise might miss if there were no months during which growing things laid dormant. The fact that most of these whist drives entail a journey home of several miles, oftimes in a temperature well below zero, just adds zest to the event to Albertans, but it would be regarded in prospect as any thing but pleasant by those in sunny and warm climes.

It is good to have some pleasure during the winter months. It is even more important than pleasure during the summer months. Unless one takes an interest in things other than oneself, the winter is liable to be of a depressing nature and with the passing of time, characteristics of a stolid nature formed. Furthermore with the passing of centuries, without winter fun, a whole northern people could become stolid and hard to approach. Winter fun is one of the things that helps to keep northern peoples mentally on an even keel.

[illegible] People Converse With Ease In a Small Lead Tube



Imagine the roar of 2,400 voices confined within the walls of one huge room!

What a babel of confusion if the people in that room should try to shout [illegible] Yet, through a lead tube, only 2¾ inches in diameter, 2,400 people may converse [illegible] ease, without confusion and in strict privacy.

This lead tube (illustrated in section above) is the casing of a telephone [illegible] in the Montreal plant of the Northern Electric Company, containing over [illegible] wires, each pair connecting at one end with a telephone instrument and at the other [illegible] central exchange. In the large Canadian cities there are scores of such telephone cables.

PIGS AND PIG PRODUCTS IN THE BRITISH EMPIRE

The 12th report of the Imperial Economic Committee, just issued, deals with pigs and pig products. It emphasizes the great hold obtained on the main bacon market in the United Kingdom by foreign competitors who have concentrated on the production of a standardized type of pig and organized the trade in bacon on a national basis. Taste in pig products varies in different parts of Great Britain, but the report states that

"A general change is in progress in the prevailing taste. ....."A liking for smaller and leaner cuts in place of fat heavy joints was becoming apparent in England in the latter half of the last century. The lean type of bacon and ham, and the small cut of pork, are now firmly established as the predominant requirements throughout the south of England. In the midlands the demand is for a somewhat fatter product, and for sausages, pork pies and 'processed' meats, whilst farther north still fatter products find a ready market."

In spite of these local differences the general preference for the lean type of bacon is growing. Danish farmers and bacon factories have concentrated on supplying this type.

Ninety years ago Great Britain was an exporter of pig meat, but today is dependent on imports for two-thirds of its supply. Nearly half of the total imports, which altogether are valued at 55,000,000 sovereigns a year, consists of bacon from Denmark, in which practically only one type of pig, evolved largely from the large White Yorkshire strain, is maintained. Payments are made on weight and quality grades and all exports are subject to constant and strict inspection. The vast majority of pigs give dead weight carcasses between 132 and 158 lbs., lower prices being paid for carcasses outside this narrow range. Bacon so produced is marked in England as "Danish" and not under factory brands. It is all of the mild cured type and a very regular supply is maintained.

At present the whole of the overseas empire contributes less than one seventh of the total imports of pig products into the United Kingdom. Canada and the Irish Free State are the chief suppliers. Since the Great War, New Zealand has been developing a very useful trade in frozen pork, both for sale as pork and for curing into bacon. The consumption of pig products in the United Kingdom, though below those of Canada and the United States has increased since the war by about 50 per cent in weight and 100 per cent in value, due almost wholly to larger imports of lard, bacon and frozen pork. Foreign countries have received almost the whole benefit of this expansion.

The report emphasizes the necessity for meeting consumers' tastes and maintaining regular supply. It contains a statement by representatives of both the bacon and pork trades of the characters to which the products should conform to meet the main market and of the breeds which yield carcasses of the requisite types. The report points out the great possibilities which exist within the empire. It expresses the definite opinion that these possibilities are unlikely to be realized without organization between the producers and the adoption by them and the curing industry of a joint common policy.

The report advocates that entry into the herd books should be dependent upon commercial performance and not only on show points. It advocates further research into the problems of nutrition generally but states that "from the point of view of the substitution of empire products for those of foreign countries, perhaps the most fruitful line of research lies in the effort to make possible the carriage, without detriment, of mild cured bacon from the southern Dominions."

Preliminary experiments conducted at Cambridge on the freezing and cold storag of bacon are full of promise. They indicate that with certain modifications of present practice the problems of transport of mild cured bacon from the southern Dominions should be possible. The report strongly advocates that those experiments should be continued and developed with a view to testing their results in commercial practice.

In spite of the large size of the import trade into Great Britain, supplies are drawn from comparatively few countries, the chief being Denmark, United States, Sweden and Holland. The trade from the United States consists mainly in lard and hams, and it is possible that countries in the empire producing large crops of maize might compete in that trade. The portions of the empire in which possibilities at present are most promising are Irish Free State, Canada, Australia, New Zealand and South Africa.

Singer: "And for Bonnie Annie Laurie I'd Lay Me Down and Die."

Listener (rising): "Is Miss Laurie in the audience?"

HOW RED CROSS DOLLARS ARE MADE

There is generally a special story attaching to the money that finds its way to the Headquarters of the Red Cross Society. The large donation often has a most interesting history, and represents the united effort for weeks and months, or even the whole year of the faithful and patient Red Cross workers in some sewing group that meets for the purpose of working for the great fall event—the Bazaar.

Office records show many remarkable achievements along this line and the small town, disdained by heedless passerby is often able to put to shame the larger cities, in real service, the type that counts.

Sums are ranging from one hundred dollars up, have been received at headquarters, because several busy women (and who can accomplish so much for other people's needy children as the woman who has her hands full?) have schemed, and planned after a really splendid entertainment, which in its turn followed a truly excellent sale of work.

Gift sales, auctions, all such come to the Red Cross net, when the local committee goes a fishing. Tag days and membership drives that are representative of much toil on the part of self-sacrificing workers, all add their quota to Red Cross funds.

The appeal of the crippled child and other work finds a ready response in most hearts, and poor indeed is that district that cannot do something once a year.

THREE PERSONS PLACED IN JAILS

Mrs. Metro Yelinuk Charged With Murder; Others With Aiding

One man and two women, charged in connection with the death of Metro Yelinuk, Andrew district farmer, are in the Fort Saskatchewan jail today awaiting preliminary hearings to be held at Andrew on Friday, Nov. 22.

Following the verdict of the inquest held at Andrew on Thursday, which found that Yelinuk had been murdered, Mrs. Yelinuk, wife of the deceased farmer, and two neighbors, Mr. and Mrs. George Kopolinsky, were formally charged. The wife faces a charge of murder and one of aiding and abetting the crime was laid against the Kopolinskys.

Mrs. Yelinuk, at the inquest admitted throwing a rock into the well where the body of her husband was discovered by the Alberta Provincial police on Tuesday, and accused Mrs. Kopolinsky of throwing several rocks into the well. After being charged, the accused persons were remanded eight days to appear for preliminary hearing.

SOUTH SIDE OF THE STAUFFER BUILDING

"WOMAN I LOVE" WILL PLEASE CROWD AT LOCAL HOUSE

A sincere romantic interest is superimposed on a cross section of ultra fashionable metropolitan life to provide the plot of the FBO production, "The Woman I Love," one of the most entertaining films of the season which will be shown at Tofield on Friday and Saturday of this week.

As a background for this story of a consuming love amid the hectic smart set of a big city there is a sumptuousness of production that is in keeping with the general high quality of the story.

The F. B. O. Studios apparently spared no expense to fill "The Woman I Love" with sets and furnishings which are commensurate with the intriguing [illegible] — which [illegible] based [illegible] Erma Stormquist story that [illegible] "True Story" magazine [illegible]

Robert Frazer plays the part of a husband who holds allegiance to his wife through a soul-searing [illegible] Margaret Morris portrays the wife. Norman Kerry [illegible] a man of the world who endeavors to win the affection of Miss Morris. The role of the woman [illegible] by Kerry [illegible] by Leota Lorraine. Bert [illegible] appears as a friend of [illegible]

For sheer entertainment, for a love story that will appeal to every type of human being and for genuine novelty of motion picture [illegible], "The Woman I Love" is to be commended as being among the most fascinating films yet shown on the local screens.

SIXTH YEAR MOLAR

There is one tooth which is the most important in securing a properly developed jaw with regular teeth. This tooth is the first permanent molah and is comonly called the sixth year molar. Its popular name is apt to be misleading however, because the tooth may appear earlier or later than the sixth year. It comes in just behind the temporary or baby teeth; indeed, it is often mistaken for one of the baby teeth and, as such, it is neglected, the parent thinking that it will be replaced by a permanent tooth later on.

This important tooth can be easily recognized. In the temporary set there are ten teeth above and ten below, or, in other words, five on each side above and below. If there are more than five, then the sixth tooth which appears is this most important first permanent molar mastication that there should be.

The importance of the tooth as

A clean mouth means healthy teeth and gums. Dental disease is responsible for a great deal of illness and suffering. It is essential that parents and those responsible for children realize that, in order to have [illegible] adult life, an early start must be made. We refer here to this first permanent molar which often appears in the fifth year and which must be preserved if the child is to have sound healthy teeth. This

factor in health is generally known simply means that dental care cannot be postponed, but that it must begin early in life.

Proper diet, cleanliness, regular visits to the dentist are the basis of dental health. If these are begun early and persisted in, satisfactory results will be achieved.

The loss of the first permanent molar means that the jaw will not be properly formed, the other teeth will not be in proper position, and, as a result, there will not be the perfect which must be carefully guarded and preserved because its being the "keystone of the dental arch".

CURLERS BECOMING RESTIVE COLD WEATHER WELCOMED

No longer does the fire, poor season, stock market crash or even Edmonton's poison mystery rank as first in importance among conversational groups in Tofield for the curling season is upon us. Already last year's triumphs and losses, and the triumphs and losses of years before have been reviewed and all the mistakes of previous years are to be corrected and successes added thereto. Curling enthusiasm is real here.

At the Tofield Curling Clubs fall meeting held at Tofield recently there was a good turn out of members. Quite a number of topics came up for discussion and much business was done.

The following are the officers for 1929—30.

Hon. President—C. Gallinger.
President—H. T. Ward.
Vice President—Dr. F. Law.
Secretary—J. W. Chapman.
[illegible] for the forthcoming season [illegible] at $15.00

A new plan of classifying players was explained and decided upon. All first and second rock men are put in their respective groups, and from these groups the skips select their 1st, 2nd and 3rd rock men.

The executive committee is C. Hobson; J. Chapman, J. G. Jobb, A. B. Clutterham, A. Agnew, M. C. Hammond.

Frank Scott was appointed caretaker of the rink. This is his second year of service.

The dates chosen for the big bonspiel were Tuesday, Wednesday and Thursday, January 21st, 22nd and 23rd.

The skips for the forthcoming season are as follows:

Geo. A. Agnew, J. G. Jobb, Geo. McLaughlin, John Lee sr., John Lee jr., W. L. Forman, A. A. Beirnes, J. B. Warner, C. Hobson, C. J. Craig, J. W. Chapman, A. J. H. McCauley, C. H. Rowe, M. C. Hammond.

Line Forms to the Right.

Usher: "How many please?"

Exasperated Patron: "There were five of us but three died."

TOFIELD TRIM RYLEY, BUT LOSE TO HOLDEN

Two basketball games in succession proved to much for the Tofield players, when on Tuesday evening they motored to Ryley to play basketball in the new hall.

The first game was very hotly contested, but towards the end of the game Tofield drew away from their opponents and at the end of the game were ahead by a comfortable margin.

The second game which practically involved the same Tofield players against a fresh Holden team, resulted in a win for Holden. For the first half of the game Tofield held their opponents on even terms, but the strenuous playing and strain began to tell on Tofield and Holden forged ahead for a win.

The trip was made possible through the courtesy of Paul Thompson, Jack Cookson and Art Francis, who supplied cars to take the players.

At a recent meeting held by the Tofield basketball team, the following officers were elected: president, Bert Swift. Secretary, Bill Worton. Transportation committee: Paul Thompson and Glen Wood.

Trainer Mr. Brink.

YOUNG PEOPLE'S SOCIETY HOLD WEEKLY MEETING

On Monday evening last the regular meeting of the Young People's Society was held in the basement of the Church.

Freeman Hill took charge of the devotional period.

The business part of the meeting opened with a request from the church asking us to donate the funds from our play to the church. After some discussion this was carried.

The practical part of the meet was a missionary talk by Mr. Gordon. This proved very interesting and was much appreciated by the members. At this time Mr. Rowe director of our play, made his appearance and the rest of the evening was devoted to reading the play. The first practice will be held on Friday night.

The executive met after the meeting and it was decided to hold a skating party on Monday evening November 25th. The members will all meet at the church at 7.30 sharp.

LADY CURLERS ALSO BECOME ACTIVE

The lady curlers have also felt the urge to play the game again and have already elected their 1929—30 officers and chosen their skips.

The officers and skips elected are as follows:

Hon. President—Mrs. John Lee Jr.
President—Mrs. Clutterham.
1st Vice President—Mrs. Firth
2nd Vice President—Mrs. Smith
Secretary-Treasurer, Mrs. Beirnes.
Executive—Mrs. Lee sr., Mrs. Bruce, Mrs. J. Chapman, Mrs. McCauley.

Winter No Bar to Golf in Canada

Photograph taken February 23, 1929 of the course on which the event is played, with gallery watching players. Lower left—Teeing off, player wearing light clothes [illegible] of climate in February at Victoria. Lower right—E. W. Beatty Challenge Cup with miniature reproductions of the cup for the winners in men and women competitions.

The process of snatching the laurels from the brows of California is going right on in Canada. "Our Lady of the Snows" is belying her name in the mild climate of Vancouver Island, British Columbia.

Announcement has been made recently that the second annual Empress Hotel mid-winter golf tournament at the Colwood course, Victoria, will be held from February 17 to 22 inclusive, a time when the country north of the 49th parallel is popularly supposed to be feet deep in snow. Photographs included in above lay-out will show this popular belief to be a fallacy as far as the Victoria course is concerned.

The [illegible] tournament was played in the Canadian sport [illegible] February under the auspices of the Canadian Pacific Railway and proved a great success. [illegible] fixture is a purely amateur affair [illegible] of course, open to men and women competing in their own sections. The main trophy [illegible] E. W. Beatty challenge cup, at present held by T. L. Swan and Mrs. Hew Paterson of Victoria, although a large list of other prizes is being posted. The competition is open to all Victoria clubs and also to any visitors in that city, and in view of the size of the entry list all links in the vicinity of the city will be pressed into service.

Big Picture Coming To Variety Soon

Oliver Curwood's "The Yellow-Back" To Be Shown by Arrangement With The Tofield Hockey Club and Frank Wood, Manager of Theatre

BIG SERIAL "THE TIGERS SHADOW" TO START

Biggest Moving Picture Week End In Tofield for a [illegible]

FEATURE PICTURE ALL CANADIAN

What promises to be one of the biggest "moving picture weekends" seen in Tofield for a decade will take place on Friday and Saturday, December [illegible] and 14th.

By arrangement made between the Tofield Hockey Club [illegible] be one of the most [illegible] pictures ever shown here presented. It is the "Yellow-Back," the screen adaptation from Oliver Curwood's famous story of the name. Films [illegible] Oliver Curwood's stories are famous all over [illegible] and the "Yellowback" has been played to millions and [illegible] endorsation of theatre goers. All Canadian—thrilling—a real [illegible] picture amid the swaying pines, glistening snows and rushing waters of the north.

The leading parts are played by such screen favorites [illegible] Martin and Lionel Belmore.

The hockey club and Mr. Wood have "spread" themselves in bringing the "Yellowback" to Tofield at this time. The hockey club wanted something they could get behind and boost [illegible] they have found it. [illegible] universally approved by [illegible] fans of the cities, this big Canadian story in picture form should go over big here.

NEW SERIAL TO COMMENCE

In addition to the special feature, there will commence December 13th and 14th a new moving picture serial "The Tigers Shadow" [illegible] comed. Before purchasing this serial, Manager Wood made careful enquiries as to its popularity and all who [illegible] the nth degree; ser[illegible] of surprises, mystery [illegible] alluring. Be sure and see the opening chapters of this "serial" along with "The Yellowback" on Friday and Saturday, December 13th and 14th.

Where Do We Go From Here?

For the past eleven years the Tofield Mercury has been given a fair share of advertising. Certainly, there were some merchants who did not believe in advertising, [illegible] and others did believe in advertising and gave us business. But on the whole, we fared [illegible]

Unfortunately, the [illegible] the cost of advertising and the absorbtion of the [illegible] [illegible] and thus it not a general [illegible]

[illegible] charity appeal, but we [illegible] think that a word or two is not [illegible] American continent that country newspaper publishing is [illegible] a poor business [illegible] and to a large extent it is true. In a field necessarily limited big money in the publishing business is unknown [illegible] upon advertising [illegible] cost of paper, therefore when advertising is withdrawn there is nothing left. This leaves only two courses open to us, one to seek our fortune in some other field or to start

[illegible] any body, the merchants would say "the more the merrier," but it is mentioned because to us it is the [illegible] business with country merchants and are not entirely ignorant of their problems. Also for eleven [illegible] We believe [illegible] believe we will [illegible]

Prepare For the Winter

Quite a number of people say that we will have a very cold winter. Others say a mild one is coming but to play safe prepare for the worst. Lay in as much feed as possible and milk as many cows as possible. Generally speaking cream is highest during the winter months and by delivering your cream to us you get every last cent there is in it. Both the money and the feed will be very welcome around January.

DEEDS OF HEROISM MARK TRAGIC TALE OF TIDAL DISASTER

ST. JOHN'S Nfld., Nov. 22.—Eyewitness descriptions of the devastation wrought by the tidal wave which struck the coast of Burin peninsula after the earthquake last Monday, spurred relief workers today in their efforts to reach the stricken fishing villages.

The list of known dead was placed at 22 in an official report by Revenue Inspector Dee, who took charge of rescue work and arrived here with the first charge of survivors. Unofficial estimates of the dead were placed between 36 and 40.

Fear that the death list may be even larger was increased by the fact that the wave destroyed bridges and damaged roads, cutting of communication with a number of small fishing communities. Provisions, medical supplies, physicians and nurses are being taken to the stricken communities by government steamers.

Priest's Vivid Description

A vivid picture of the sudden devastation that descended upon the coast villages was given by the Rev. Father Miller, Roman Catholic priest at Burin, who arrived here with a delegation to place the plight of the residents before the government.

The speed with which the wave traveled along the coast was so great, he said, that a warning message from a girl telephone operator at Lamaline reached the Burin operator almost simultaneously with the advancing wall of water.

"The sea is coming in," cried the Lamaline operator over the wire, but her warning was cut short as the wave caught the telephone office and carried it out to sea. She barely escaped with her life. The Burin operator was unable to spread the alarm so short was the time before the wave's arrival.

Afterwards it was found that it had gouged a channel four feet deep out of the solid rock and had destroyed the bridge.

Through the darkness dimly could be made out houses afloat. As the wave reached its height some were flung back with succeeding waves two or three times. Then as the waters receded they went out to sea with the speed of a steamer.

Many deeds of heroism occurred within the terrifying 15 minutes.

Too Late To Save Family

One man named Fuge, of Port Au Bras, was a short distance from home. Seeing the incoming flood he rushed to save his family. His path was blocked by a house floating by. As the house passed, he saw his wife and children in it, but it was too late to save them.

In Step-ASide, a house containing ten persons was carried to sea three times. On the last occasion that it returned to shore, the elder members holding the young children leaped and all were saved. Another family also was carried out three times only to be borne back and eventually escape.

SMALLPOX

The following is the personal experience of the writer. A few years ago a sick man was landed from his ship at a busy seaport. He was taken to the home of a relative, and died one week later, not having been seen by a doctor until just before death, when he was diagnosed as small pox. Six weeks later all the members of that household except one died of virulent smallpox. The exception had been vaccinated in infancy, he had a mild attack followed by complete recovery. The disease spread rapidly assuming epidemic form and before it was controlled, over thirty victims died, and without exception they were unvaccinated.

Five cases of smallpox were reported in Edmonton recently, they had been in contact with many people before being isolated. Known contacts were vaccinated but were those others unknown immune to infection?

Every individual has a right to his own opinion on any subject whatsoever, but has he the right to impose that opinion on others or to endanger the health of the community by the practice of that belief?

Vaccination has been proved over and over again to be preventative to smallpox. Let us defend our children from such a loathsome disease and its accompanying disfigurement.

Literature on the prevention of communicable diseases may be had free from the Red Cross Society, 407 Civic Block, Edmonton.

MANY HARDSHIPS ENDURED FOR SAKE OF THEIR RELIGION

(By Harry Hertz in the Edmonton Journal)

TORONTO, Nov. 22.—The Russian Mennonites who are now seeking permission to migrate from Russia to Canada are of a people whose faith has ever driven them forward and back over the surface of the earth. In recent years, with considerable settlements of the Mennonites in the dominion, Canada also has felt the trekking characteristics of these believers in an ancient religion.

Originally the Mennonites had their place of worship in Zurich, where their body had been formed in 1525, taking its name from the Catholic priest Menno Simons, who, however, left his faith during the stormy days of the reformation. The sect's history has ever since been one long struggle against wordliness, insofar as its believers have trusted in discipline rather than in dogma, determined to live simple lives and abstaining from worldly vanities. Mennonites has always been against war and against the use of the oath and the main point of their faith has been a strict adherence to the actual outside worship of Christ. They have believed that man is up against the toughest proposition on record in regard to the forces of evil and that living an ordinary life, careless of sincere and godly worship, he is inevitably swamped. Theirs has been the community spirit and the sense of brotherhood.

A Religious People

Wherever the Mennonites have put up their tents, their homes and their places of worship, the altar has been the central pivot around which everything was believed to revolve. In Canada the number of the Mennonites that have come to settle here from time to time have been estimated in the neighborhood of 25,000, and for the United States the number is said to be about eight times as large.

Unable to live in peace to the extent they wanted, the Mennonites in Germany soon sought outlet in other countries, notably southern Russia, whither a large number emigrated at the time of Catherine the Great. From time to time they have emigrated from this new home of theirs to seek other lands of adoption.

In Canada the Mennonite settlers have generally speaking proved successful farmers and good citizens, growing wealthy toiling on the land. But in instances trouble has been encountered in connection with their refusal to send their children to ordinary schools, maintaining that their own method of education along the old lines were more adequate for the purpose of bringing up their children. There are sixteen branches of the Mennonite church in Canada, but the believers are all fundamentalists in faith and opposed to modern progress when the new habits, practices and changes, to their mind, have errors in them.

Slow to Modernize

In old times in the old lands the Mennonite rule of simplicity and peace brought terrible persecutions upon a believing people, but in the new eras in new countries this same rule has kept its followers safe from such things as the telephone, the automobile and electricity. To use either of these has been a sin in the eyes of the old Mennonite church.

Not till last summer, in fact did the bishop who leads the old Mennonite churches decide, at a conference at Philadelphia, that electricity in business was lawful for his people, and this permission from the ecclesiastical head of the sect bore its first fruit in Ontario when Henry Bowman contracted for installation of hydro on the ancestral farm outside Conestoga in Waterloo county. Here as forbears did for 150 years past, Mennonites have performed their chores by the old-fashioned oil lantern and candle light, despite the fact that in more recent years electricity has passed right by their own front doors.

WEED BOARD APPROVE CHEMICAL WEED KILLERS

At a meeting of the Alberta Advisory Weed Board held in Edmonton recently the following were present:

Mr. H. A. Craig, Chairman, Deputy Minister of Agriculture, Edmonton.
Mr. Geo. Bennett, Manville.
Mr. T. B. Matheson, Department of Interior, Edmonton.
Mr. H. E. G. H. Scholefield, Vice-President U. F. A., Calgary.
Mr. Clyde C. Gillies, R. R. 2, [illegible]
Mr Frank Reed, superintendent, Experimental Station, Lacombe.
Mr. H. W. Bright, Macleod.
Mr. W. J. Stephen, Secretary, Field Crops Commissioner, Edmonton.

A review of the past year's activities of the Board was presented by Mr. W. J. Stephen, and in the discussion which followed plans were laid for the continued work of the Board during 1930.

It was decided that the campaign known as "Weed Week" carried on last season might be put on at the same time as "Better Seed Week" in the spring of 1930. The Board also that a weed inspector's course be held again at the University early in 1930.

The suggestion was adopted that a number of field supervisors be engaged for a period of six weeks commencing early in January next to hold weed meetings throughout the province.

A number of amendments in existing weed legislation were considered and will be passed on to the Government as recommendations from the Board.

A comprehensive report was presented by W. G. Smith who, under the supervision of Mr. W. J. Stephen, has been in charge of an exhaustive series of experiments at various points in the province the past season to determine the effectiveness of a number of the chemical weed killers which have been placed on the market. After hearing this report and as a result of their own experiences along that line, the members of the Board unanimously adopted the following resolution which may be considered the official statement of the Department of Agriculture on this question.

"BE IT RESOLVED that we as members of the Alberta Advisory Weed Board, after reviewing the series of experiments conducted during the past season by the Department of Agriculture, go on record as being of the opinion that certain chemicals which are now on the market in this province have a definite value as a control measure in checking the spread of noxious weeds.

We are further of the opinion that, so far as can be determined by these experiments, those chemicals which contain chlorates as the active principle are more effective than those of which the active principle is one of the sulphates, nitrates or chlorides. We feel that the use of chemicals containing chlorates can be recommended as a control measure on patches perennial weeds where cultivation is difficult, or on patches found on ditch banks, around lakes, on road allowances, and in general on waste places where cultivation is impossible."

The National Research Council of Canada has agreed to undertake the direction of experimental work in connection with the whole matter of Chemical Weed Destroyers. The Department is informed that negotiations are now under way between the National Research Council and various Agricultural Experimental Stations throughout Canada with a view to arranging a comprehensive set of experiments to be conducted by these various stations. The Department has therefore decided to await the result of these experiments and the finding of the Research Council, before pronouncing definitely on the effectiveness of any particular Chemical Weed Killer.

FIREMAN'S LIFE IS HAPPY ONE

MALDEN, Mass., Nov. 23.—Firemen who responded to an alarm of fire for a blaze in the cellar of a small dwelling house here today found themselves knee-deep in beer. A pipe connecting 15 500-gallon tanks of beer had burst, flooding the cellar. Beer enough to fill 45,000 bottles escaped, it was estimated.

The pupil was having trouble with his punctuation and was being called down by his teacher.

"Never mind, sonny," said the visiting school board president, consolingly "They don't amount to much anyway."

"Don't they?" rejoined the teacher, turning to the president. Then calling to one of the pupils to write on the board this sentence: "The president of the board says the teacher is a fool."

"Now", she continued, "put a comma after 'board' and another after 'teacher'."

West of the Great Lakes

THE growth of the Bank of Montreal has closely coincided with the gradual development of Canada from a small colony to a great Dominion.

In the Bank's westward advance to the Pacific Coast, one of the important links in its transcontinental chain of Branches was formed in 1878 at Winnipeg, when the Bank opened its first Branch west of the Great Lakes.

This forward step, taken seven years before railway communication was opened up between Montreal and Winnipeg, made available to the incoming population on the prairies the stabilizing co-operation of a strong, conservative and at the same time energetic financial institution.

Of the Bank's 667 Branches, 14 are in Winnipeg and 188 in the Prairie Provinces.

HEALTH SERVICE of the CANADIAN MEDICAL ASSOCIATION

WHAT DOES YOUR DOCTOR KNOW?

When an individual decides to become a doctor, he or she faces a long course of preparation. The principal requirements is education in subjects embracing the sciences upon which much of medicine is based.

Because of the rapid development of all science during the past years, and in order to improve the training of those to whom human life is to be entrusted, the period of training has been considerably lengthened. When the medical graduate is given a Licence to practice, he or she is qualified to render certain definite services because of the knowledge acquired.

Your doctor knows the structure of the human body and how it functions when it is normal or in a state of health. Those who think of their doctor as one to call when there is sickness in the home, forget that he knows about the well person. It is because of his knowledge of the normal body, and how it can be kept normal, that he is able to provide a service to humanity in keeping people well. It is for this reason that the periodic health of examination of apparently well persons by the family physician is of great value. It is through such examinations that the doctor is able to give to his health clients the benefits of what he knows concerning the maintainence of health and the prevention of disease, consequently, the securing of more years of health.

Your doctor knows the early signs or symptoms of disease just as he knows what occurs in acute disease. He knows how to treat disease early in order to prevent the development of more serious conditions. He knows what the man or woman with weakened organs should and should not do. He knows all this, but unless he is given the chance to use his knowledge in the early stages of disease, he cannot help you.

Because of what your doctor knows you should make full use of his knowledge to help you in keeping well, in the early care of illness as much, if not more, as in serious consequences.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

BURGLARS ENTER STORE AT CHIPMAN

$100 In Cash and Goods Taken by Unknown Robbers

CHIPMAN, Alta., Nov. 22.—The general store of J. Warawaska was entered and robbed on Thursday night. The exact amount of the robbery is not known but over $100 cash, merchandise was taken from the store and safe, the checks being left. Several articles of men's wearing apparel were taken from the store.

The robbers who were probably familiar with the premises made their entry through a rear door, replacing the lock again in almost perfect condition and as there were no visible traces left in the store nothing was missed until Theo Tomaskawsky went to get some money from the safe to make change for a customer some time after 10 a. m.

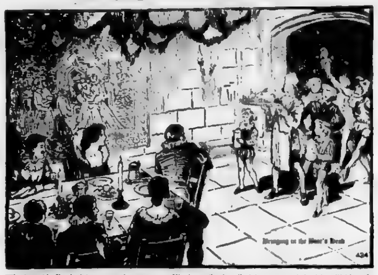
Mr Tomaskawsky who is manager could not state whether the safe had been locked or not as he had left the store early and asked his brother to look after closing up. Constable James has been notified but it is doubtful if the robbers can be traced as there were no clues to work on.

Here and There

[illegible] Canadian Pacific Express Company [illegible] for the sending of gifts by Canadians to friends in Great Britain and Europe is being extended from Christmas and New Year presents to gifts sent at all times of the year. With the present banner apple crop of Canada the fruit can be bought at a reasonable price and its quality is of the highest. If sent over [illegible] before the close of navigation on the St. Lawrence cost will be considerably reduced.

Over 300 officers and men of the 4th Canadian Mounted Rifles first mounted regiment formed in Toronto at the outbreak of the Great War, is holding its first reunion since the war at the Royal York Hotel, Toronto November 29 next. The unit is proud of the fact that it still has in its ranks T. Holmes of Toronto, youngest Victoria Cross holder in Canada, who captured an enemy machine gun nest singlehanded at Passchendaele.

"Bringing in the Boar's Head"



The Yuletide Festival inaugurated last year at Victoria will be repeated on a still more brilliant scale this coming Christmas, according to information from Canadian Pacific Railway headquarters. Those who were at the Empress Hotel last Christmas still remember the thrill that swept through the great hall when the boar's head was brought in, borne aloft on a platter by a chef in Elizabethan costume, preceded by a jester in cap and bells and followed with mediaeval pomp by stewards and minstrels. They still recollect the dragging in of the Yule Log, the wassailers, the exquisite old Nativity Play, the scenes from Dickens, the singing of carols outside the Parliament Buildings, led by the Lieutenant-Governor of the Province in person. They call to mind a week of merriment and good cheer which as some one happily described it, was peopled with rollicking old ghosts of the Christmas past. All these things will be seen again when the Festival starts Sunday December 22 and is continued until December 30.

A fortnight later, with its locale also at the Empress Hotel, there will be held the Sea-Music Festival, January 15-18. Held at Vancouver last January, it will repeat many of the popular features then heard, including "The Order of Good Cheer", incorporating old French sea songs of the time of Champlain; "Bound for the Rio Grande," Frederick William Wallace's Sea-Chantey Ballad Opera. There will also be many new attractions with first-class singers and choirs, the whole under the musical direction of Harold Eustace Key.

Artists in British-Canadian Concerts

Brilliant entertainers are to be heard this fall and winter in a nation-wide chain of musical centres throughout the Dominion, sponsored by the Canadian Pacific Railway. They will appear in a series of six concerts, the outgrowth of the Music Festivals, now internationally known, which have been staged by the Music Department of the railway. Each of these concerts will be given at Toronto, Winnipeg, Regina, Calgary, Vancouver and Victoria with a probability of other cities being added to the list. Among those now taking part in these concerts will be Florence Hood, brilliant Canadian violinist; Mary Frances James, lyric soprano of Montreal, Stanley Maxted, Montreal tenor; Rudolph Plamondon, Canadian-born star of the Paris Opera; and the Hart House Quartette, internationally famous as players of [illegible]

TOFIELD TOWN COUNCIL MET MONDAY NIGHT

A regular meeting of the Tofield town council was held on Monday night in the council chamber.

Mayor Swift occupied the chair. The chief business of the evening was arranging matters for the management of the skating rink.

Councillors Brace and Chapman are the rink committee and it was decided to. Call for tenders for laying the first sheet of ice, tenders to be in by to-day (Friday).

W. Bellamy was engaged as manager of the rink on the same terms as last year, namely $60.00 per month.

Some routine business, passing of accounts etc. was done after which the meeting ajourned.

U. F. A. WINTER PROGRAM

December 12th—

Joint annual meeting of Wheat Pool Local and U. F. W. A. Local with election of officers. Report of annual Wheat Pool Convention by Mr J. Ferguson.

December 26th—

A paper by Mr. G. Abernethy on Increasing farming efficiency through better crop rotation, maintenance soil fertility and weed eradication etc. Leaders of discussion Mr P. Moline and Mr. J. Francis.

January 9th—

Discussion of resolutions to go before annual convention at Calgary and the choosing of two delegates.

January 23rd—

Joint meeting of U. F. A. and U. F. W. A. to hear delegates report of Annual Convention.

February 6th—

A paper on general farm management, most economical size of farm, accounts, motive power etc, by J. Morton with C. W. Piper and A. Haugen, leaders of discussion.

February 20th—

Increasing farm efficiency through the better handling of livestock. A talk by Mr A. Schultz assisted by C. Kallal and J. Warner.

March 6th—

A paper by Mr. J. H. Thompson, on Receiving a better price for farm produce through an enlarged operation of the Pools. Leaders of discussion Mr. A. Bourasio and Mr. J. Ingram.

March 20th—

A paper on the farm labor problem by Mr T. R. Murray, with Mr. W W Hill and Mr G. A. Trent as leaders of discussion.

April 3rd—

A talk by Mr. J. Ferguson on "How to increase the buying power of the farmers dollar through cooperative buying of farm and household needs, by Mr W Lee and Mr J W McMullen.

April 17th—

A talk by Mr. R. W. Pincott assisted by Mr. G. Wood and Mr L. Wood on the topic, "The lowering of interest rates, taxes, insurance and freight rates.

COMMENCING TO FLOOD CURLING RINK

The curling rink will soon be a gathering place for the curlers. This week Mr. Scott commenced to flood and if the weather conditions are suitable it will not be long before it is ready.

BOXING BECOMING POPULAR HERE

Many of the young fellows around town are attending at the club rooms (old Methodist Church) where a boxing club has been formed. There was quite a large number on Wednesday night, some fifty or more being present. Ted Curtis was the organizer of the club, which is at the present meeting with much popularity.

FOR SALE—HOLSTEIN COW, good milker, gentle, young, fresh in February. Phone 91 Tofield.

FOR RENT—THE FORMER P. Haugen house. Immediate possession. Apply the Tofield Garage.

LOCAL and PERSONAL

Will the party who took the table from Mrs. Waldman's home, kindly put same inside Waldman's gate and avoid further trouble as he is known.

Leonard P. Woodhams, optometrist, of Camrose, will again visit Tofield on Wednesday, December 4th. This will be Mr. Woodham's last trip to Tofield this year. After December 4th, he does not expect to again visit Tofield until February, 1930.

The regular monthly meeting of the Holy Trinity W.A. will be held at the home of Mrs. Carey on Wed. Dec. 4th at 2.30 p. m.

Final arrangements will be made for the bazaar to be held in the Institute Rooms on Sat. Dec. 7th.

A press report of the first league hockey game between Duluth and St Paul contains much praise of Laurie Scott, who is playing for Duluth. Laurie beat the St Paul goalie twice in this game. His photo appears and he has evidently made a hit with hockey fans of that city.

Miss Eva Clutterham of the bank staff at Chipman was operated on for appendicitis in the Lamont hospital last week. Latest reports are that she is progressing favorably.

On Monday evening the Young People's Club held a [illegible] at the [illegible]. There were a goodly number present and all had a good time. On their way home they raided the Club Cafe for eats, thereby winding up a pleasant evening.

Mr and Mrs. Sibley are leaving on Saturday for Stettler where they will make their future home. Mr. Redlane will take Mr. Sibley's place at the C. N. R. station.

Dr. Terwillegar of Edmonton was in Tofield visiting friends last week.

Mr Meadows of the local teaching staff is a very modest young man. Quietly and unobtrusively, as far as Tofield is concerned, he "goes and gets married." Well, Well, it is all over now, for on Wednesday night a number of the young folk raided the newly married couple. The party had plenty of fun but the groom did not appear. Welcome to our [illegible] Mr and Mrs. Meadows.

Miss Tallman, of the United Church's Chinese Mission field, gave a splendid address at the United Church Sunday evening. There was a good turn out and her address was much enjoyed.

Mr and Mrs. A. Hosler and son Gerald have left Tofield for the winter. Mrs Hosler has gone to New Sarepta to live with her daughter and Mr. Hosler and Gerald have gone to Portland, U. S. A. where they both have work on a steam [illegible].

COMING EVENTS

Notices of coming events for which a charge is made or goods sold will in future appear under this heading. The rates, when unaccompanied by display advertising are, for the first insertion, 15c per count line, if under 10 lines, over ten lines 10c per line, subsequent insertions 10c per line.

For some years past we have been quite lenient with notices of this kind (in many cases inserting them without charge. We must now place this class of business on a proper basis and charge for all notices. It is easy for patrons to distinguish between advertisements and reading [illegible].

Where there is an admission charge or collection taken or goods sold, the newspaper announcement is an advertisement. Where there is no admission charge or collection taken or goods sold the newspaper announcement is free.

The United Church will hold their annual bazaar on Saturday Nov 30th in the Institute Rooms.

Holy Trinty annual bazaar will be held in the Institute Rooms on Sat. Dec 7th.

There will be a goodly display of plain and fancy sewing, also candy and home cooking. A dainty tea will be served.

The juniors will have a varied assortment of articles for sale.

LOST.— Five Colts, 2 and 3 Years old, comprising two blacks, two bays, white faces and one iron gray. All are branded U inside of circle, on left hip. Reward given for information leading to recovery. L. C. Umphrey, Ryley, Alberta.

Mr. Luchkovitch and Mr. Matheson Greeted by Large Attendance

At a meeting held in the curling rink on Nov. 29th, sponsored by the local U. F. A. Tofield residents had the pleasure of hearing Mr. W. R. McGowan, U. F. A. Director, Mr. Luchkovitch, M.P. and Mr. A. M. Matheson M. L. A. all of the Vegreville constituency, speak.

Mr. McGowan gave an account of his work as director in organizing new Locals and stressed the importance of keeping up the membership. Incidentally he complimented Tofield on having the largest Local in the constituency.

Mr. Luchkovitch, who followed, gave a comprehensive review of the last session at Ottawa dealing in turn with the speech from the throne, the budget and the passing of the amendments to the grain act. The speaker paid a high tribute to the late Mr. Robb. In conclusion Mr Luchkovitch voiced his disapproval of the government's policy of pampering emmigrants.

The concluding speaker Mr. Matheson, dealt briefly with the history of the U. F. A. and told of its many achievements during a short span of years.

The crowd which was the largest for several years to attend a meeting of this nature in Tofield passed a hearty vote of thanks to the speakers. Mr. G. Abernethy presided in the chair.

WEDDING

FERGUSON—BRUHA

A wedding of local interest took place at Edmonton on Nov. 23rd when Mr. Lionel Ferguson and Miss Emma Bruha were united in holy matrimony, the Rev Stone officiating.

The contracting parties are well known locally. Miss Emily Ferguson, sister of the groom, and Mr Ernie Roberge witnessed the ceremony. The happy couple spent a short honey moon in the capital city. They will take up housekeeping on the groom's farm in the spring.

INTERMEDIATE HOCKEY CLUB HOLD SUCCESSFUL WHIST DRIVE

On Wednesday evening Dec 4th the Intermediate hockey held a very successful whist drive. There were fourteen tables and the prizes were won by: Ladies first, Margaret McCauley, Ladies consolation, Mrs. Smaltz. Gent's first prize Mr. J. Thompson, Gent's consolation Max Rogers. Lunch was served at the close of playing.

The boys wish to take this opportunity to thank all those that helped make the whist drive a success. A sum of twenty dollars was realized.

NOTICE

All members of the U. F. A. local and members of the wheat pool are requested to attend the joint annual meeting of the U. F. A. local and the Wheat Pool local to be held in the Town Hall Dec. 12th at 2 p. m. for the purpose of hearing the annual reports of the officers and also to elect officers for the coming year.

Mr. J. Ferguson will be present to give an account of the recent annual Wheat Pool Convention at Calgary.

Meeting to be held in the Town Hall Thursday, Dec. 12th, at 2 p. m. sharp.

TOFIELD AND HOLDEN WINNERS IN BASKETBALL TILT

On Tues. evening two basketball teams motored to Ryley to play basketball. The first team played Ryley and after a see-saw battle emerged on the long end of the 10—14 score.

The second game took place immediately after the first one, the second team met Holden. This was the same kind of game as the first one, first one team would be ahead, and then the other, but at the end Holden was ahead by the score of 20—14.

Both these games were hotly contested and brought out much good basketball.

A pleasant farewell party was held at the home of Mrs. Firth on Thursday evening of last week. The guest of honor was Mrs. Hannan who is leaving for Camrose.

Bert Calvert was a city visitor on Thursday.

Messrs Geo. Agnew and John Warner left for a few days moose hunting this week.

Mr. Mark Ferguson visited Tofield this week. Mark is now located at Athabasca Landing where he has a homestead.

Some of your Christmas gift problems may be solved by a visit to Lucille's Beauty Parlor. There are many articles of fancy work and plain sewing on sale.

Dr. and Mrs. Carmichael of Bawlf visited with Dr. and Mrs. Law over the week end.

The Ladies' Aid of the United Church wishes to thank all those who helped and made their bazaar a success.

The announcement has been made of the forthcoming marriage of Miss Mabel Wilde and Mr. Walter Scott at Victoria, B. C. on the 16th instant. Miss Mabel Wilde will be remembered as "nurse Wilde", a one time resident of this district.

COMING EVENTS

Remember the Holy Trinity Bazaar to be held on Saturday, December 7th, at the Institute rooms. Tea including salad, sale of work, cooking etc.

TOFIELD BOXER WINS IN AMATEUR BOXING TOURNAMENT IN EDMONTON

As in former years the Edmonton Amateur Boxing Association has commenced staging their tournaments during the winter months.

For the first time Tofield has been represented. Mr. Edward Curtiss not only entered but returned victor in his match. He fought in the 147 pound class. His opponent was Louie Birkholtz of New Sarepta. Ted scored a knockout over Birkholtz in the second round. This victory placed him in the final with Frank Marsden of North Edmonton but Marsden withdrew and Curtiss was declared winner of first prize.

Ted has just come out to this country from England and is working for Harry Barden in the blacksmith shop. He intends entering in the next tournament which will take place in two or three weeks time. Best of Luck Ted!

YOUNG PEOPLE'S SOCIETY HOLD WEEKLY MEETING

On Monday evening last, the Young People's Society held their weekly meeting in the basement of the church.

The devotional period was taken by Raymond Martin.

The business part of the meeting was opened by the reading of the minutes. These were adopted.

It was decided to make up a parcel of clothes for the needy families in Tofield all members are requested to bring any clothing that they can spare to the next meeting, so that it can be gone over and sorted out. Any extra clothing will be sent to Sunshine.

The practical period was taken up by Current Events. Some of these created much discussion, especially The Flag Question and the Refusal of the Russian Mennonites to Canada. A vote was taken on whether or not we should have our own flag, the majority voted for our own flag.

The meeting then adjourned and the members proceeded to Mrs. E. Rogers where we enjoyed a pleasant social hour. A number of games and contests were played after which partook of a delicious lunch, served by Mrs Rogers. At the close of this Marion Cooper spoke a word of appreciation, thanking Mrs. Rogers for the enjoyable time she had provided for us. The members then departed in a happy frame of mind.

Lakeshore

Mrs. Lester Noland was able to return from the hospital where she underwent an operation on Saturday. We are pleased to say that she is progressing nicely.

Mr. and Mrs. Irwin Plante visited at the Philips home on Friday of last week.

Mr. and Mrs. Abernethy and son George visited at the Noland home one evening last week.

Mr. Lionel Ferguson and Miss Emma Bruha were quietly married in Edmonton on Saturday Nov. 23rd.

Their many friends wish them a long and happy wedded life.

We are sorry to report that Mrs. J. H. Johnston is indisposed having suffered a heart attack on Monday evening.

Mr. and Mrs. Everett Noland of Deville visited friends in the district on Sunday.

A very enjoyable party was held at the Booth home on Friday evening. About twenty young people were present and the evening was spent with games and contests of various kinds and all report a most enjoyable evening.

Ketchamoot Items

Mr. and Mrs. C. A. Ingram attended the silver wedding of Mr. and Mrs. Patterson of Amisk Creek on Tuesday of last week. Mrs. Ingram, brother and sister, were Mr. and Mrs. Patterson's bridesmaid and best man when they were married. Mr. and Mrs. Ingram fulfilled that office at the Silver Wedding.

Mr. and Mrs. John Lee and family were Sunday guests of Mr and Mrs. C. W. Sears.

Miss Emily McAllister spent the week end at the Carlisle home.

Mr. and Mrs. A. Harrison and family were guests of Mr. and Mrs. Torrance on Sunday.

Mrs. Henderson has been spending the past week in Edmonton under the doctor's care, she is having eye trouble.

The monthly meeting of the M. A. S. will be held at the home of Mrs. A. Harrison next Wednesday, Dec. 11. All are cordially invited to attend.

Dressing poultry has been the order of the day during the past week. The year was exceptionally good for raising turkeys, but not for feeding [illegible] were to light and wheat [illegible] considering what the turkeys [illegible] bringing in return for work and feed.

The school board held a special meeting at the Schultz home Friday afternoon for the purpose of hiring a teacher for the first of the year. Mr. Allison of Edmonton was engaged.

[illegible] young people of the community [illegible] at the Sears home Sunday evening for a song service, those [illegible] were Misses Emily McAllister, [illegible] Carlisle, Mildred Purcell, [illegible] Ingram, Bessie Burrow, Mar[illegible] Soma; The boys [illegible] Earl and Glenn Carlisle, Ralph [illegible] Willie Ingram, Lowe Lee and Robert Barrcloth.

We too noticed the lack of advertisements in the Mercury, but supposed the hand bills were printed at the Mercury Office, they thinking the bills reached the people sooner, but do they? Many do not get theirs until Friday evening and on some routes not until Saturday evening, so these Friday and Saturday sales do not benefit the farmers very much. We suggest the sales be put on for the following week and be published in the Mercury. Surely the town and community would hate to see their local paper go out of business. It pays to advertise, as the school board can testify as over fifty applications were received the results of advertising for a teacher.

Ketchamoot friends of Mr. and Mrs. Lionel Ferguson offers congratulations and best wishes for their future happiness.

Lindbrook News

What with snow flurries, rain, cold snaps and thaws the roads here are very icy, making horse drawn traffic practically nil and making it awkward for autos and pedestrians. One bad smash due to this occurred on the Tofield—Edmonton highway near Mr Appleby's last week, when a truck containing livestock tipped over, one animal being killed.

Mr. and Mrs. A. K. Hicks were visitors to Edmonton last week, also Mr. Alan Silverside.

Mr. and Mrs. Hicks have been having their house on their new place renovated. Mr. R. W. Hooper being in charge of the work.

The Lindbrook section of the Tofield W. A. hope that you will not miss the bazaar, tea and sale of work in the W. I. rooms, Tofield on Saturday Dec. 7th.

The turkey killing is in full swing here and already some have been sold. The prices are very disappointing, in fact so much so that some wonder whether it pays to grow them, still its about on a par with everything else the farmer sells, he never gets what it is worth anyway, still with beef selling in town for what it is, turkeys should be higher than what is being paid for them.

Mr. Jas Hooper left for Edmonton last Sunday on the flyer.

W. I. NOTES

The Tofield Women's Institute are holding their annual meeting in the W. I. rooms, Tues. Dec. 10th, at 3p. m. A full attendance is requested. Members are asked to please bring a twenty-five cent donation for Sunshine.

A good many of Harry Rogers friends are welcoming him back to the old town again after a brief absence in the city. Harry says he is here to stay. He will have the the best wishes of many friends for his continued success.

CAPTAIN DARE, M. C., DIES AT BARRHEAD

With the death of Captain A. C. C. Dare, M. C., at Barrhead on Sunday last, another veteran of the old Royal North West Mounted Police has gone down the last trail.

Captain Dare is widely known and deeply respected among the veteran members of the mounted, the men who rode the Indian trails of Alberta before the days of highways and motor cars.

Oliver Curwood's "Yellow-Back" Promises To Be Popular Attraction

The Yellow Back" a "Big" moving picture production which is coming to the Variety Theatre on Friday and Saturday, December 13th and 14th, promises to be a popular attraction.

If the preliminary sale of tickets is any indication, those who can possibly do so should attend on Friday night as it is possible the crowd may exceed the seating capacity on Saturday.

The tickets were hardly off the press and distributed to the boys, before Horace McIlroy had sold close to forty dollars worth. The other did some selling also. By the kindness of Mr. Wood, the hockey club was able to procure Friday and Saturday night and consequently brought to Tofield one of the best and most expensive pictures available. For your own pleasure and to support the club, don't fail to attend either on Friday or Saturday evenings at 8.30.

Accompanying "The Yellow Back" is the opening chapters of "The Tigers Shadow," a gripping serial, which is coming to the Variety. This is a thrilling film story and you will enjoy every reel.

FARM CHICKENS DRESS TO NINE POUNDS

Belvedere Farmer Markets Over 100 Springers That Average 6¾ Lbs.

One of the finest lots of farm raised and fattened poultry ever seen in Edmonton to the Alberta Poultry Pool by Reuben Geis of Belvedere on Monday. Some of the spring chickens from the Belvedere farm farm weighed as high as ten pounds each live when taken out of the crates. The lot of over 100 birds averaged six and three quarters pounds net when dressed.

Having heard that there were a gain a large flock of fine poultry on the Geis farm again this year and knowing that Mr. Geis has made quite a success of farm fattening of chickens, the Journal representative telephoned the Poultry Pool Tuesday morning to learn when the next shipment from Belvedere could be seen. "Just packing some of them now" was the answer.

Hastening to the plant some of the fine dressed chickens were seen freshly packed and graded, many of them grade "A milk fed. The ... like young turkeys, fine plump ones at that. One case of 12 chicks weighed 80 pounds net.

[illegible] stock that will pay to fatten according to Mr. Geis. There were of the Buff Orpington and Rhode Island Red cross ... cockerels of the latter strain were used with the breeding flock. He raised 600 cockerels for killing and will winter 250 pullets. All were incubator hatched in April and early May. Heavy winter laying ... weight on the Geis farm ... the birds and fertile eggs are desired at the hatchery season.

Open range allowed the birds during the summer but they are continually fed all they want so that there will be no check to their fall development during the growing period. In the fall they are confined in a fattening house 24x16, about 125 ... at a time. They are penfed heavily on milk, middling and corn with other items in the ration for three weeks.

GASOLINE DISTILLED FROM COAL LIKELY TO BENEFIT ALL CANADA

OTTAWA, Dec. 5th: (Special to the Mercury) Research offices here are told of the successful manufacture of fuel substitute for Gasoline in England, which, if it fulfills promises, is likely to prove an important factor in developing the bituminous coal resources of Canada.

This fuel is a product obtained from bituminous coal by distillation process and when used in gas generators is said to produce a gas which in an internal combustion engine provides the motive power as well as petrol.

Tests over a ... period with heavy ... producer ... it is claimed, have proved conclusively that gas made from synthetic charcoal is an economic fuel.

Prepare
For the Winter

Quite a number of people say that we will have a very cold winter. Others say a mild one is coming but to play safe prepare for the worst. Lay in as much feed as possible and milk as many cows as possible. Generally speaking cream is highest during the winter months and by delivering your cream to us you get every last cent there is in it. Both the money and the feed will be very welcome around January.

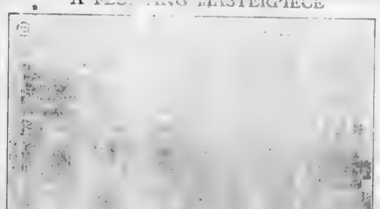
Job Printing

Every business man requires a certain amount of printed matter. Such things as Letterheads, Envelopes, and Statements are as necessary to modern business correspondence as a telephone is to a modern business office. The Mercury Office is equipped to turn out all kinds of job printing. The next time your supply is running low, call us up and a representative will be at your place of business in a short time to receive your instructions and take your order. Prices fair and just.

The Tofield Mercury

A FLOATING MASTERPIECE



A RED CROSS MASQUERADE

One of the most effective ideas for the Annual Red Cross Dance in a little town was the following —

Were the members of the committee who sponsored the Masquerade Dance decided that they would themselves ... nurses and one should be dressed as Florence Nightingale. A large bed sheet was folded into a ... skirt which came right down to the ground. Over this was worn an apron and a three cornered kerchief. A lace cap with long ... streamers completed the lady's attire and in her hand she held a light.

With hair parted in the centre this lady resembled closely one of the well known pictures of Florence Nightingale.

As she moved hither and thither amongst the more modern Red Cross Nurses it was a striking picture of the old and the new woman and the ... and the modern fashion. ... white veils with Red Crosses and short bobbed hair of the girls of today, as well as their knee high skirt had a certain significance in the thought of freedom that has become woman's own.

Florence Nightingale, however, ... a picture of repose and dignity that although quaint, was quite fine in its own way.

The above suggestion is worthy of consideration from any Red Cross ... who wish to do something different at a small expense, and which is yet attractive.

WIT AND WISDOM

No mere man can ever understand why woman will pay five dollars for a pair of stockings that give the impression that she isn't wearing stockings. —Ottawa (Kans.) Journal

We understand from the advertisements that the college lads are at ... passing their cigarette tests ... great success this year. —Arkansas Gazette.

A heathen country is one where the pay role can be transferred without an armored car. —Brooklyn Times.

It is those who have tried it most frequently who are convinced that marriage is a failure. —Louisville ...

Wonder if people will continue getting famous at a rate fast enough to satisfy the testimonial ad. demand. —Marshall Country Banner

Over 17,000 new laws were passed in America last year. There seems to be an ample allowance for breakage. —Glasgow Eastern Standard

California has not as yet been invaded by the Mediterranean fruit fly which is bringing distress to Florida. Is it possible the western oranges have no "insect appeal"? —The New Yorker.

How comforting to reflect that the ... car you have is the wonderful one the ad describes. —Birmingham News.

A girl and a car are much alike. A good paint job conceals the year but the lines tell the story. —San Francisco Chronicle

Wife (studying paper): "The horse I backed is marked with a star darling. What does that mean?"
Husband (studying time table): "Only runs on Saturdays, dear".

WITTICISMS ABOUT WOMEN

Although Lord Dewar is a bachelor, and apparently a confirmed bachelor, he seemingly entertains a high appreciation of the fair sex, judging by the witty sayings he fires off about them from time to time.

Here are a few of the best.

"The road to success is filled with women pushing their husbands along."

"No man is so good but a woman can make him better."

"A golden wedding is when a couple have gone fifty fifty."

According to the press, brokers are opening branch offices in ocean liners. That's a terrible place to have the bottom drop out of anything.

The Chinese minister in London, Dr. Chen, tells amusing stories in pidgin English. One that he is fond of relating concerns a well known ... woman who started to patronize a Chinese laundry recently established in Soho. One day she called in person to lodge a mild complaint, and thinking the owner only knew pidgin English he tried it on him.

"Me no likee my washee bloughtee home Fliday" she said. "Why you know blingee washee Thursday?"

And the suave Chinaman replied: "Madam, I regret it was not convenient".

Bardo

The misses Alice and Esther Nese, spent the week end at their home here returning to Camrose Sunday evening.

Mrs. Agnes Haukedal spent several days last week in Edmonton.

Messrs. Oliver Strand and Bats[illegible] [illegible] left for Vancouver last [illegible].

The members of the Bardo Ladies Aid met at the home of Mrs. P. Anderson on Sunday afternoon to open their mission boxes, quite a sum was realized. Mrs. Anderson served lunch at the close of the meeting.

Mr. Edwin Johnson who has been visiting here the last month, returned to his home in Grande Prairie on Sunday.

Messrs. Kindley, Erickson, Brock[illegible] and Steen journeyed to Armena on Friday, returning with hay on Saturday. As the roads are almost impassable for horses they had a very difficult time.

Kingman

Edwin Tollefson returned on Friday from Cold Lake where he has been working for the last three weeks.

P. R. Anunsky was a business visitor in Edmonton for a couple of days last week.

Ole Bartness returned on Saturday for Pulsbo, Washington D. C. after spending three months in the Kingman district.

Mr. and Mrs. W. Jardie visited with Mr. and Mrs. E. Erickson on Saturday afternoon.

A. C. Soma and E. Schmidt motored to Edmonton with a load of Turkeys on Saturday.

Miss Alice Stromson of Holden, spent the week end at her home here.

Mr. and Mrs. E. Shaalen were the guests of Mr. and Mrs. M. Hele on Sunday.

Mr. and Mrs. D. M. Thompson were the guests of Mr. and Mrs. A. C. Soma on Sunday.

Mr. and Mrs. E. Erickson and family, Mrs. T. Horte and Tom Sutton motored to Edmonton on Monday.

PROTECTION OF TREES FROM MICE AND RABBITS

(Experimental Farms Note)

Every year many fruit trees in Canada are girdled by mice and rabbits. Fortunately, the rabbits do not injure the trees so regularly as the mice but are as general in their [illegible] work as it is very difficult to prevent their ravages. In the case of mice however, if some precaution is taken, it is possible to prevent serious injury.

Two methods are adopted at the Central Experimental Farm, Ottawa, one is to wrap the trunks of the trees with building paper, and the other is to encircle the trunk with a wire protector with a small enough mesh to prevent a mouse going through. In either case, the paper or protector must be put close to the ground as, usually the mice are working close to the ground beneath the snow, and, if there is a place under the protector where they can get in, they will girdle the trunk and possibly ruin the tree. These protectors should be put on as soon as possible now as sometimes the mice begin gnawing the trunks of young trees before winter. Trees up to six inches in diameter should be protected where mice are troublesome. Another plan, when one has neglected to put on protectors before winter, is to tramp down the snow about the tree after the first snowfall, thus preventing the mice from working under the snow near the tree. Another plan, where snow does not come early, is to put cow dung about the tree. This freezes to the ground and prevents the mice getting at the tree. Care should be taken to not have the manure against the trunk of the tree, and it should be spread as soon as it thaws in the spring. If a mouse girdles the trunk of a tree, that is, eats all around it it will die unless bridgegrafting is done early in the spring, and this is usually neglected so that, as a rule, girdled trees die. This is most discouraging, and many farmers have, without doubt, lost their enthusiasm for growing apple trees by having the trees girdled just about the time they should begin to bear. It is important, therefore, to protect the trees in good time. Poisoned grain is sometimes put under inverted troughs in the orchard to kill mice.

Unfortunately, there is no good control for rabbits except hunting with dogs and shooting.

Amisk Creek

Mr. and Mrs. A. Paterson and Lillian, Mr. and Mrs. E. A. Moen and family, Mr and Mrs. R. O. Berg, Mr. and Mrs. I. Aanstad and Magda, Mr. and Mrs. P. O. Flaaten and Gunwald attended Mr. A. Steen's silver wedding celebration held in the Bardo Church on the 24th of November.

An unusual event took place last week, November 30th, when friends and neighbors gathered at the home of Mr. and Mrs. A. Paterson to help them celebrate their silver wedding. About 100 persons were present. Mr. and Mrs. Patterson were escorted to the church where some songs were sung by the audience, and Mrs. McInnis and Mrs. Cranston sang a duet. The bride and groom were presented with some silver and chinaware and many good wishes for years to come. A delicious lunch was served in the church basement.

Mrs. P. O. Flaaten and Gunwald visited at the Ida Aasmo home on Thursday evening last week.

The young people and school children have commenced practising on the Christmas programme.

Mrs. R. O. Berg, Mr. and Mrs. P. O. Flaaten and Gunwald, Mr. A. Erickson and Carl attended the Lutefisk dinner and ladies aid sale held in the Throndhjem Lutheran church last Saturday.

A turkey and goose shoot match was held at P. O. Flaatens last Monday. There were about 25 men and ladies present and seven geese and four turkeys were taken away.

Mr. and Mrs. E. A. Moen were visiting at the A. Haugen home last Sunday.

IN BUSINES 23 YEARS AT TOFIELD

LOCAL and PERSONAL

Miss Eva Clutterham who recently underwent an operation for appendicitis, has been visiting her home during the past week. She will return to Chipman, where she is a member of the bank staff, next Monday.

Mrs. Hobson visited the city this week.

Room two of the public school was closed for two days this week on account of the cold weather.

BEHIND THE BOG

Watch the Pincott-Agnew outfit. It is some feat to defeat "Draw-em" John Lee.

The McLaughlin rink resplendent in new sweaters with Tofield Curling Club emblems took the eye of the gallery.

The Chris Hammond Hobson game went to 12 ends before Hobson nosed out.

Some good curling was witnessed for the first time out.

Ice-maker Frank "DeLuxe" Scott, had the four sheets in perfect shape.

"Bill" Chapman was in his usual position waiting for the odd fone to roll in.

W.I. NOTES

The W.I. met at the home of Mrs Pincott on Tuesday afternoon, December 10th, for the purpose of electing officers for the coming year. Owing to the disagreeable weather, only eight members were present and the election of officers was postponed until the January meeting. Donations of $5c. for local relief work were received, and a motion passed to set aside $150 of the funds for this purpose. The treasurer's report and the librarian's report were given and show substantial balance on hand. Those who braved the blizzard were rewarded by a most delicious lunch served by Mrs. Pincott and Mrs. Carr. Mrs. Pincott had been asked to serve a soup and demonstrated the method of making it, and we were delightfully surprised by a delicious lima bean cream soup.

Kingman

Born:—To Mr and Mrs. Thomas Rogness, on Saturday, December 7, a son. Congratulations.

Charlie Ayre, of Camrose was a business visitor in Kingman on Tuesday.

Mr. and Mrs. T. Horte visited with Mr. and Mrs. C. R. Blyhert on Sunday evening.

Thor Grahn motored to Edmonton on Thursday.

O. Bjorgum and son, Oval, E. Shaalen and Edwin Tollefson attended a council meeting in Tofield on Saturday.

Mr. and Mrs. J. Munson and family were the guests of Mr. and Mrs. C. R. Blyhert on Sunday.

Mr. and Mrs. C. Simonson and Harry Erickson were dinner guests of Mr. and Mrs. T. J. Rogness.

Mr. and Mrs. E. Erickson and daughter Inez, Gladys Horte and Tom Sutton were Edmonton visitors over the week end.

A large number of Kingmanites attended the Maloney lectures in Camrose on Friday and Saturday evenings.

Dr. F. Law of Tofield conducted the vaccination of the pupils of the Kingman high and public schools for small pox on Tuesday.

GETTING READY FOR NEXT SUMMER

The Tofield Creamery Limited are calling for tenders for the putting up and packing of 100 tons of ice. Tenders are to be in by December 21st. See their advertisement for further particulars.

When we are experiencing the extreme weather of the past week, we are apt to forget that at this time preparations and active work must be done to keep next summer's cream sweet and fresh.

COMMUNICATION

Dear Editor:—

In reading your last week's paper I noticed in the Lindbrook news a paragraph refering to turkeys, killing and marketing. Your writer states for beef selling in town for what it is, turkeys should be higher. Surely, Mr. Editor must mean city not town. If he would take the trouble to read my advertisement of both this and last week's issue and then read the advertisement inserted by T. Eaton and Hudson's Bay in the Edmonton Journal or Bulletin, he would find a difference from 5c to 10c per pound between town and city.

It has always been my ambition to operate an up-to-date store with down-to-date prices.

In reference to the price of turkeys this year I certainly admit they are ridiculously low.

Yours truly,
Chas. Hobson

TOFIELD CURLERS ARE SOOPIN' 'ER UP

With the weather man doing his stuff over the week end and all of this week, Manager Frank Scott was able to put the finishing touches to the ice in the curling rink. On Wednesday night the Tofield curling season opened with a bang, when fourteen rinks swung into action. The familiar faces of the old time curlers are still there and many new players are playing the roarin' game.

In former years the season generally started with the president vs. the vice-president, but this was not followed out this year. Instead, a schedule was drawn up with a seven and nine o'clock draw.

It appears that Tofield is in for one of the biggest curling seasons in its history, and with a few more games played the season will be in full swing.

YOUNG PEOPLE'S SOCIETY HOLD WEEKLY MEETING

The Young People's Society held their weekly meeting in the basement of the church on Monday evening last with Marion Cooper in the chair.

The devotional period was taken by Ethel McClymont.

The business part of the program was opened by the reading of last weeks minutes. These were adopted as read.

Some of the members remembered to bring what clothing they could for the needy families in Tofield and some did not, those that forgot were requested to bring what they could next Monday, when it will be sorted over and distributed.

It was discussed and decided upon to also provide some Christmas dinners for the needy. A committee of two, Polly Napier and Honree McHeffey were appointed to find out as near as possible what the needy families require, most also see the other organizations so that we do not clash with their plans.

The practical part of the program was taken by Marion Cooper, who gave us a very interesting talk on her visit to Europe last summer. The [illegible] very interest[illegible] the [illegible] as she br[illegible] about her visits to different countries and different places. Some of these were very humorous. She also had many photographs which were passed around. At the close of this talk the meeting adjourned.

The program for next week is a surprize by A group in charge of Jack Cookson.

Ketchamoot Items

Mrs. J. H. Ingram left on Friday for Calgary where she will visit her father sister and brothers.

Mrs. O. Barnes was hostess to the U. F. W. A. at the Evans Hall home Thursday afternoon.

Mr. and Mrs. Roy Flemings and family were Sunday guests of Mr and Mrs. Herman Lawson.

Mrs. W. K. Mitchell is staying at the Milton Ray home caring for her daughter and new grand daughter.

Mr. Joe Sutton has been making the round with his sawing and chopping outfit.

Miss Laura Bowick, of Tofield was the guest of Miss [illegible] Ingram Friday evening until Saturday.

Mr. and Mrs. John Lee and family, Mr. Lorne Lee were guests of Mr. and Mrs. Roy Lee Sunday.

About forty friends and relatives spent a pleasant evening with Mr. and Mrs. Herman Lawson on Wednesday, the day being their eleventh wedding anniversary.

Mr. and Mrs. Frank Shope made a business trip to Edmonton Wednesday.

Mr. and Mrs. Carlisle were city visitors on Tuesday of last week.

Ralph Barnes and Willie Ingram gave a dance at the Barnes home Friday night for the Ketchamoot and Woodlawn young people.

Lakeshore

Friends of Mrs. Lester Noland will be very sorry to hear that she had to return to the hospital after being home only a week from a recent operation.

Mr. Graham, owner of the farm recently vacated by Everett Noland was in the vicinity on Tuesday. Mr. Graham plans to move on to his farm early in March from Ashmont where he now resides.

Mr. and Mrs. Abernethy were callers at the Guy Walker and R. C. Phillips homes on Friday.

Mrs. Arthur McHeffey is quite seriously ill in an Edmonton hospital. We hope to be able to report improvement soon.

Rev. Klover conducted church services at the Tiedeman home on Sunday.

Teacher and pupils are working in conjunction with the Sunday school to have a Christmas concert in the school house.

ROSS CREEK

Mrs. Alex Ford has been on the sick list for the last few days. She is improving somewhat.

Mr. and Mrs. Steve Koseka visited with Mr. and Mrs. C. Sampson on Wednesday evening.

Miss Grace Woods entertained a number of her friends on Sunday evening to a party. Everyone had an enjoyable time.

Miss G. Woods is visiting in the city for a few days.

Several men from this district have gone north moose hunting. They have been quite successful.

Miss L. Sampson spent the week end visiting her chum Miss May Shertel.

Mr. E. Sagmoen is visiting in Lavoy for a few days.

Mr. William and Mr. Nick Humen held a comedy concert in the Ross Creek Hall on Friday evening. Dialogues and songs were the chief entertainment. The magician, Mr. Nick Humen performed several magic tricks which everyone enjoyed. Dancing started immediately after the concert. Music was supplied by the Lonnie Sauer's orchestra.

A masquerade dance will be held in the Ross Creek Community hall on Friday, December 13th. Everyone come and enjoy yourselves.

Gives Name to Rockies Pass

Recognition of the years of devoted labor by J. Murray Gibbon, general publicity agent of the Canadian Pacific Railway, in popularizing the Canadian Rockies throughout the world, has been given by naming a pass in the mountains after him. Gibbon Pass has hitherto been anonymous and lies between Shadow Lake and the Twin Lakes, below Ball and Storm mountains in the valley of the Bow, midway between Banff and Lake Louise. Not far from travelled routes in the Rockies and located in one of their most picturesque sections, Gibbon Pass was actually discovered by Mr. Gibbon when he was planning the route to be taken by Trail Riders last summer and himself hiked over the trail between the two lakes.

The name was conferred recently by the Geographic Board of Canada in honor of Mr. Gibbon's work as poet, novelist, promoter of musical and folklore festivals and founder of the Order of Trail Riders of the Canadian Rockies which numbers members from all parts of this continent, Europe and Australia and which has done inestimable work in bringing the glories of Canada to the knowledge of the world. Lay-Out shows the Pass, with inset of Mr. Gibbon and, below, close-up of group of Trail Riders.

OVER SEVEN HUNDRED DOLLARS

IN LITTLE BITS

Things Large and Small

There are things that are large and there are things that are small. The Dominion of Canada is large and the town and district of Tofield is small. But the theme of this advertisement is both large and small, it all depending upon the point of view.

Seven Hundred Dollars

is a large sum of money to us—so large in fact that we are suffering from the lack of it. Mr. Henry Ford and Mr. Rockfeller, can perhaps neglect such a sum, but really, we cannot.

Now, Mr. and Mrs. Mercury reader, you personally or individually do not owe us this amount or anything like it, but collectively, Mercury readers do owe us this amount.

In Little Bits

A big debt is sometimes hard to pay, a medium sized one requires some effort but a little one—well now isn't it very often nothing else than pure neglect. Two Dollars, Three Dollars, Four Dollars, Six Dollars, Eight Dollars, Ten Dollars, Twelve Dollars, just an odd one or two over Twelve Dollars. These amounts scattered here, there and everywhere, make up what to us is a considerable sum. Not much to each one individually, a comparitively small item in the years turnover; an amount that with a little determination could be paid; but to us, well you know how it is—we live in hopes.

We're Not So Wealthy Either

Now, we know economic conditions are not so good as they might be. We know dollar bills do not grow on bushes, but here's the point, we're not so wealthy either! Like you, we know what it feels like to need two dollars and only have one, and need ten and only have five. That's one of those feelings that is NOT "grand and glorious." Everybody agreed on that, all right, let's vote; all in favor? Carried unanimously.

How about surprising the Editor

You know some people have been killed by the force of a surprise—sudden shock you know. Now, if all our subscribers in arrears came and paid up before Christmas, it would be a real surprise. The best of them will of course, but none need have any fears that the surprise would prove fatal, as in this respect at least, the editor could stand a lot. How about it Mr. and Mrs. Reader.

Look for Your Notice

This week we are sending out subscription notices to all our subscribers in arrears. Will you kindly take note of them. If you cannot pay all, call in and pay what you can. We'll understand. If you cannot pay any, call in just the same and explain—we'll understand that too.

Well now, this advertisement is plenty long enough. Just one thing more. If your notice is not absolutely correct, we will be pleased to make it so.

Job Printing

Every business man requires a certain amount of printed matter. Such things as Letterheads, Envelopes, and Statements are as necessary to modern business correspondence as a telephone is to a modern business office. The Mercury Office is equipped to turn out all kinds of job printing. The next time your supply is running low, call us up and a representative will be at your place of business in a short time to receive your instructions and take your order. Prices fair and just.

The Tofield Mercury

WHEN IS AN AUTOMOBILE NOT AN AUTOMOBILE?

"Rocket cars and wind-wagons will have to stay in their own classes;"

This was the verdict handed down by the International Sporting Commission following deliberation on the subject of whether a land vehicle propelled by rockets or an air-screw can compete for world automobile records. The ruling was adopted to prevent further disputes.

This type of an automobile which is not really an automobile has been introduced to the world-public in general through intermittent appearances in news-reels and news-pictorial sections.

Although no vehicle of this type has yet attained speeds that approach those of real automobiles, it is said that one will some day.

HEALTH SERVICE of the CANADIAN MEDICAL ASSOCIATION
ADENOIDS

Behind the nose and above the throat there is normally, in every child, adenoid tissue. The adenoid tissue is similar, in many ways, to the tonsils. Adenoids are disease of childhood. Enlargement, or disease, or a combination of both, is responsible for certain abnormal conditions.

Among these abnormal conditions we find obstruction to nasal breathing. Depending upon the extent of the obstruction, the child becomes more or less a mouth breather, and, if this condition persists, the jaw begins to drop, the cheeks become sunken, and the result is the typical adenoid "fishy" face, with its dull expression.

When there is obstruction to nasal breathing, such as results from adenoids, there occurs a deformity of the jaws, and this, in turn, brings about irregular teeth. The jaws of the child are soft and in process of development. It does not require much nasal obstruction to alter them and to cause more or less serious permanent damage.

Infection, when present in the adenoid tissue, is more than likely to spread into the ears and set up inflamation there which may result in loss of hearing, in varying degrees. The reason for this is because of the fact that there is a small tube—the Eustachian tube—which connects the ear with the back of the nose and throat. It is, unfortunately, a simple matter for infection to spread down this tube; hence the frequency of the ear disease as a result of adenoids.

The child with adenoids does not get a fair chance for mental development. He has the same feeling as he would have if he were living in a stuffy, unventilated room, and we know, from common experience, that this suffices to make anyone dull and lazy.

Adenoids, therfore, obstruct natural breathing, tend to deform the jaw, are responsible for ear disease and deafness, and handicap the child in his mental development. There is only one thing to do with adenoids, and that is to remove them.

Questions, concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

NOTES FROM THE ANNUAL MEETING OF THE ALBERTA WHEAT POOL

The past year has been one of marked progress for the Alberta Wheat Pool. The annual reports shows an increase in membership during the year of 5,819. Total membership at October 31st, was 40,918 with 4,625, 300 acres under contract.

The cost of operating the Alberta Wheat Pool during the past year was a little over half a cent a bushel, or a total of $349,068.80. The handlings of wheat totalled 67,444,256 bushels.

The delegates assembled at the annual meeting expressed themselves as opposed to a compulsory pool by an overwhelming vote. A resolution was passed making the objective of the voluntary pool 100 per cent of the grain growers of the province and urging that every effort be made to attain that end.

George McIvor, sales manager of the Canadian Wheat Pool, in his report to the delegates stated that the Pool operations during the past year had undoubtedly prevented market slumps, that the wheat yield in the world for the 1928 crop was a record for all time and British grain merchants were of the opinion that wheat should be selling on the basis of 90 cents at Winnipeg.

Director J. Jesse Strang submitted a report recommending that the Pool do not go into the four milling business. A resolution was carried suggesting that the flour milling committee continue its investigations and that the matter be tabled until the Pool had completed its elevator program.

The feeling of the delegates' meeting was that in view of the short crop this year the Pool should operate as economically as possible but that the efficiency of the organization should not be impaired through false economy. The Alberta Wheat Pool operates at a less expense than the Department of Militia and Defence at Ottawa.

Objection was taken by some of the delegates to the Pool publishing crop reports. Officials of the central organizations stated that the publishing of these reports was not a permanent policy.

All the board of directors of the Alberta Wheat Pool were re-elected and at a subsequent meeting they re-elected Dr. H. W. Wood as chairman for the ensuing year.

The delegates' meeting went on record as favoring continuation of the elevator building program in order to give as far as possible elevator service to the bulk of the membership.

The elevator system during the past year showed excess earnings of $585,473.96. The system handled over 50 million bushels of grain during the past year.

Here and There

Thirteen first prizes in apples, one first in pears and four [illegible] in apples were awarded to Canadian exhibitors at the Imperial Fruit Show recently held at Bingley Hall Birmingham, England. [illegible] of the first prizes were won by Nova Scotia growers, five of [illegible] by Chas. A. Bentley, of Berwick, N. S.

Four hunters from [illegible] State saw 153 moose during the ten days of October they spent hunting in Albert County, New Brunswick, with headquarters at the camps owned and operated by Guide Charles C. Dixon of Alma, according to a report made by R. D. Stowell, of Alden, N. Y., who headed the party, to the New Brunswick Government Bureau of Information and Tourist Travel.

Contract for building a 5,500,000 bushel grain elevator at Prescott, Ontario, on the St. Lawrence has recently been let by the Canadian Government. Its cost will be about $3,100,000 and construction must be completed by August 1, 1930. It is hoped it will be ready before the Welland Canal, built at a cost of $120,000,000 is opened before next year's grain harvest in Western Canada begins.

Official report on employment in Canada states that in October of this year conditions were exceptionally satisfactory. Reports from 7027 employers with staffs totalling 1,069,583 persons, showed employment at 125 based on the average for the calendar year as 100. This is the highest on record for the time of year and compares with 119.8 for October 1, 1928.

World-wide interest is being attracted by the Canadian Pacific plans to include Honolulu as a port of call on westbound voyages of its White Empress fleet, commencing in December. Grant Hall, vice-president of the Railway, stated at Vancouver recently. Though taking these ships a little out of their course to Yokohama, it will still leave them their supremacy as making the fastest run between this continent and the Orient, he added.

Three functions of interest which are expected to attract hundreds of Canadian and American tourists will be staged in Victoria in the next three months. They are the Victoria Music Festival in December, the Sea Song Festival in January, both held at the Empress Hotel and the second annual midwinter golf tournament in February which had so outstanding a success last winter.

The 700 odd inhabitants of Forestburg, Alberta, claim it as one of the busiest communities of Western Canada. In the past two years it has shipped more than 3,500,000 bushels of grain mostly wheat. The [illegible] progressive in its [illegible] sports facilities.

[illegible] of pilchard oil from [illegible] coast of Vancouver Island [illegible] yearly. One vessel [illegible] tons in bulk [illegible] Europe where [illegible] [illegible] Some [illegible] used as a substitute [illegible] pilchard oil in the [illegible] margarine.

CHRISTMAS DAY AND THE OTHER 364
(Canadian National Railways Magazine)

NOW AND then we all need to pull ourselves up sharply and ask ourselves some pointed questions. The thoughtless man—and that means most of us—is apt to get used to things and take the existing order for granted. What was in the beginning is now and ever shall be, world without end. Then something happens, it may be a day or an event, and he is compelled to pause and consider. Our advantages we take for granted; we have always had them and we rarely stop to think of their source, their meaning or their obligation. Our prosperity, national and individual, exists; therefore it is assured; when suddenly something occurs, a tornado hits the markets of the world and our paper fortunes—billions of them—go careening to the four winds of heaven and we are left sadder and, perhaps wiser, brought down to earth with a very decided but but very uncomfortable bang; it is just one day, but that day did it.

Our civilization we take for granted and we seem to have the settled belief that there is in it an enduring principle which means inevitable advance; then suddenly a war comes which hurls us into the darkness of primal passions and we are left "crying out to gods and men to tell us where we are." Our social relationships we take for granted, and what is the main characteristic of these? Too often a state of war, of ruthless competition, of primitive assertiveness, so that Carlyle, with all his physical disability, which may have given a slant to his judgment, may not have been far wrong when he compared it to Egyptian snakes in a basket, each one trying to get his head above that of his fellow. Generalizations are usually too sweeping, but allowing for all this it may be said that this is the spirit which has pervaded store and mart. It is at least so common as to have produced that short sighted maxim—"Business is business"—with its sinister suggestion that the question of right and wrong, fair or unfair, does not matter

Then Christmas quietly obtrudes itself and becomes an interrogation, asking some pertinent questions, or, at least, insinuating some disturbing doubts. Perhaps we were wrong, it suggests. Perhaps peace is better than war, whether waged by guns on the field or paper on the exchange. Perhaps competition is not the life of trade but may be the death of trade. Perhaps there is a competition that is altogether beneficent without ruthlessness, fair and good. Perhaps chasing elusive dollars is not the finest sport in the world and does not furnish that supreme satisfaction that the normal man craves. Perhaps the man with the sharpest wits does not win in the long last but fails dismally, and even the dull witted man with interests besides material ones is the more successful of the two. Perhaps the tortoise of principle wins out over the hare of sinuosity. Perhaps I am not the centre of the cosmos and my interests are not paramount over those of others. Perhaps it may be that I cannot carry on at all and my success would not be possible were it not that a mulitude of others in large places and in small make their contribution to me. Perhaps with all the dazzling adventitious things that come to us there is a shrinkage in those other things that really matter.

Thus, Christmas comes, a new strange day in our busy restless life, an oasis in the desert to those who are choked with the sand of materialism and it tells us of things that age cannot wither and custom stale. It speaks of international relationships and reminds us that sitting on the edge of a volcano is a most uncomfortable as well as a most profitless business, that slaughter of human beings is horrible, savage and insane, and urges some other way of settling disputes between nations. It would throw another light on the relationships and lead us into a world of good-will and co-operation.

It would tell us what we already know but conveniently push back into the recesses of our consciousness and our conscience, that kindliness and consideration and the satisfaction that comes from seeing and making others happy is a beautiful and a normal thing and wistfully bid us strive after the "larger heart, the kindlier hand." It would have us believe that for those who must live together, amity is better than suspicion, and generosity is better than selfishness, and faith better than doubt

Plans, programs, schemes for the betterment of society are numerous. Every other man you meet has an idea which would bring in the millennium, but still the millennium is far away. All our schemes, and plans and programs will never work until the spirit of Christmas is introduced into every phase of life. It is Utopian, of course, but it is Utopia that is at least possible, and it is very, very simple.

CURLING CLUB HELD SUCCESSFUL BRIDGE DRIVE

On Tuesday night, December 10th, the Curling Club held their first bridge drive of the season. Considering the inclement weather there was a good crowd present.

The prizes were won by, ladies' 1st Mrs. Geo. Bissell, ladies' consolation, Mrs. W. Webb, gent's 1st, M. C. Hammond, gent's consolation, Glen Woods. The usual good lunch was served.

Geo. Agnew and John Warner returned on Tuesday from a big game hunting trip near Edson. They were both successful in getting a deer.

Mrs. Dawson of Edmonton spent Monday at the Clutterham home.

Mrs. Hobson visited the city this week.

Mrs. McCauley, Mrs. McLaughlin and Mrs. Calvert visited the city this week.

The W.M.S. of the United Church will meet with Mrs. Swift on Thursday, December 19th, at 3 p.m.

SET OF DISHES TO BE GIVEN AWAY

Hobson's Meat Market will gladden the heart of at least one lady in the new year.

Instead of giving away the usual calendar they are giving away a 96 piece dinner set. For each dollar spent at the store from now until the end of the year the customer will receive a ticket and early in the year the counter part of the ticket will be put in a receptacle and one drawn out, and this number will win the prize.

DANNY DINES On TURKEY—THE EDITOR DIDN'T

There are more turkey shoots than usual this year. The editor having visions of a cheap turkey faced last Saturday's cold wind and walked out to J. Bowick's. He would have got the turkey alright but he missed the bullseye and Pete Lerbekmo didn't. By the way, Pete packs a mean 22 twice he tied with Fred ——— and each time won the tie and the turkey.

The real feature of the shoot, however, was the marksmanship of Danny Dodds. Competing against eleven others including some excellent shooters, Danny scored a win and won his turkey.

NOTICE

The annual meeting of the U.F.A. local and the Wheat Pool local owing to the cold weather was postponed to December 19th. The meeting is to be held in the town hall starting at 2 p.m. sharp.

All members are urged to attend.

GOLDIE JACOBS AND CHARLES KALLAL WIN SCHOLARSHIP AT SCHOOL FAIR

The following is a copy of a letter received by Mr. Bulbeck, principal of the Tofield schools, from the Vermilion School of Agriculture.

(2.) First Alternate Girl for Above, Edith Robinson.
(3.) Second Alternate Girl for Above, Esther Jacobs.
(1). Scholarship Course for Boys.
(1) Charles Kallal, Amisk Creek S.D.
(2) Alternate Boy—Kenneth Gordon.
(3) Second Alternate Boy—Thomas Jacobs.

Winner of prize of books offered by the department of Education—Esther Jacobs.

Diploma for School Work—MacKenzie S.D.

Department of Agriculture Diploma—Tofield School.

Wishing you the compliments of the season.

I am,
Yours very truly,
S. C. HECKBERT.

Holy Trinity W.A. wish to thank their numerous friends and members for their generous donations, kind support and attendance and all who helped in any way to make the bazaar so successful. The results were very gratifying and we take this means of thanking one and all.

The junior C.G.I.T. are holding a silver tea, sale of home cooking and candy in the Institute Rooms on Saturday December 14th, at 2 o'clock. Everybody come and give the girls a boost.

SYNOPSIS OF "THE "YELLOW-BACK"

In love with Elise Loisel of Lace Beauvais, deep in the woods of Northern Canada, Jules Breton, giant trapper and bully, stabs to death a rival for the hand of Elise.

O'Mara, youngest of the mounted police, is ordered to bring in Jules Breton scornfully leaves word for O'Mara that he is to be found at the cabin of Loisel. There he prepares a trap for O'Mara by removing a loose floorboard and covering the opening with a rug. From Elise he extracts a promise that she will join him at Dead Man's Landing if her father, whom she is nursing in his illness, dies.

O'Mara falls into the trap at Loisel's cabin, a terrific fight follows and Elise siding with Jules Breton, strikes him on the head, knocking him senseless. Breton advertises to the woodsmen he has licked "The Yellow-back," a term the woodsmen take up heartily.

The next morning, to aid Breton in his escape Elise sends O'Mara on a false trail. Sending his horse back to the fort, the mountie pursues his enemy on foot.

That night he discovers Breton going into Loisel's cabin. He accuses Elise of harboring the fugitive. The girl's hatred for him is destroyed when she finds that her father has been murdered by Jules and she joins with him for the hunt for the murderer. In their joint pursuit of the criminal they fall in love with each other.

They quarrel when O'Mara refuses to allow her to be placed in danger and she slips away from him to trap Jules. The latter outwits her in her attempt to kill him in revenge for her father's death.

Helpless in Jule's cabin, Elise faces a horrible fate when O'Mara comes to the rescue. After terrible fights in which he hurls Jules henchman, Poleon, into the rapids of the river below and beats the burlytrapper into submission, O'Mara returns to Fort Arthur with his prisoner and bride.

J. D. Hyman was an interested spectator this week.

Some of the curlers do not know what T. C. C. stands for. Ask Mc Laughlin.

Reliable evidence that at least one new comer to the curling ranks takes the game seriously. He was discovered in the early morning hours curling while asleep.

Interest is becoming keen in the Pres. and Vice Pres. Competition.

SCHOOL CHILDREN VACCINATED BY DR. LAW

A meeting of the board of health of the Town of Tofield was held on Monday evening December 9th. There were present, chairman A. A. Beirnes, Dr. F. F. Law, A. J. H. McCauley and E. W. Rogers.

The board dealt with the matter of licensing dairymen and milk vendors, and it was decided that no person should be allowed to operate as a dairyman or milk vendor in the town without first securing a license from the local board of health. This ruling to become operative on December 15th 1929.

Information was given to the board to the effect that there had been several cases of small pox in and around Camrose, and the outbreak had been thought sufficiently serious to have all the school children of Camrose vaccinated. Other school districts as far north as Kingman were also having the children vaccinated.

A resolution was then passed recommending to the Board of Trustees of the Tofield School district that the children of the school be vaccinated against small pox as soon as it would be possible to do so.

The school board approved of the above recommendation.

FOR SALE.— Eight Oxford Ewes and one registered Oxford ram. Apply J. Appleby.

FOR SALE:—ONE SIMPLEX Auto Knitter. In good working order. Price $15.00. Apply W. Lee

ASTRAY—ON THE premises of Mrs. M. A. Woods, 1 and one half miles north of Tofield, one cow and one heifer, cow reddish roan, dehorned; heifer red and white. Owner please take away

Kingman

Mrs. A. C. Sams and daughter left on Monday for a three months visit in St. Louis and other points in U. S.

Ray Hildeth returned home from Edmonton on Tuesday where he has been working for some time.

Erich Erickson has been on the sick list for several weeks.

Mr. and Mrs. T. Herte visited with Mr. and Mrs. E. Erickson on Sunday evening.

Mr. and Mrs. Thor Grahn and family were guests of W. Moore of Hay Lakes.

Mr. and Mrs. T. J. Rognese motored to Camrose on Sunday.

Mr. and Mrs. Chester Ronning and A. Melemes, of Camrose visited with Mr. and Mrs. Thor Herte on Saturday.

Don't miss the dance in the Kingman hall on Friday, Dec. 27th. Edmonton music will be provided.

Mr. and Mrs. S. Philips and family were dinner guests of Mr. and Mrs. W. Hartschen.

Lindbrook News

A very Happy Christmas to all is the wish of Lindbrook folks to all their friends and neighbors of Tofield and district and any absent friends who may happen to see the Mercury in the places in which they now live.

The continued cold snap has kept everyone around at home more or less hence news is scarce.

Re Mr. Chas Hobson's letter re price of beef and turkeys etc. apropos of our remarks on same in this column we wish to state that we are just voicing common talk and the "town" refered to did not mean Tofield or any city or town in particular but really as he remarks turkey meat is as cheap as beef and the words "price in town" did not convey the right impression and certainly meant no reflection on Tofield prices for meat.

Mr. H. E. Low left on last Mondays train on C. N. R. for Montreal where he has been given an appointment on the Imperial Tobacco Co. of Canada. Best of luck from us all, "Bunt" on your new venture. We hear that Mr. Low just missed by a day being in a train accident the No. 2 train of the following day bumping into another down near Montreal, luckily only minor hurts were experienced.

TOWN SUPPORT HOCKEY CLUB VENTURE SPLENDIDLY

Napoleon, on his famous march in to Russia was beaten by the forces of winter. So perhaps there is some consolation for the management of the hockey club, when it is stated that the extremely cold weather prevented many country people from attending the film presentation of "The Yellow-Back" on Friday and Saturday last. It was cold—cold all week and as there appeared to be no sign of a respite in the cold wave, the boys began to feel nervous about coming out on the right side of the ledger. Not since the days when a smart travelling man put on "Micky" here, has ther been so much spent to advertise a single picture in Tofield, but it turned the tide. What appeared early in the week to be a flop developed into a good venture. The hockey boys netted some thirty odd dollars after all expenses had been paid. And most all—everyone as far as we know—who saw the picture were pleased with it.

A new innovation that of a Victrola was tried out at this showing and proved to be highly satisfactory on Friday night. On Saturday night though, owing to leaving the machine in the theatre, the oil became hardened and the spring motor would not work. A hurried warming helped some, but at times the operator was turning the disc with his fingers, and the music was not quite as good as it might have been.

Due to the extremely cold weather, most of those attending were town and nearby residents, and the club thank them heartily for their support. The country people will perhaps have an opportunity of attending some other programme the club presents at some later date.

Ketchamoot Items

With continued cold weather and 'phone out of commission it has been very difficult to gather up a few news items.

Miss Mildred Parrell was the guest of the Wm Lee family Monday evening.

Mrs. J. H. Ingram returned on Monday from her trip to Calgary.

Mrs. L. Carlisle has been a patient in an Edmonton hospital for the past week, but expects to be able to return home this week.

Friends of Mr. Henderson regret to hear of her prolonged stay in Edmonton with eye trouble.

Messrs. Ralph Barnes and Willie Ingram motored to Camrose Monday afternoon.

Mr. Angus Mitchell returned to our district the first of the week he had been working for D. H. Mitchell who has a farm at Cokerhill. Angus is now staying with Jason Henderson.

Mrs. Peter Lee and little grandson Gordon Ray spent a few days in the city last week.

"TRUE HEAVEN" IS NOT A WAR FILM, BUT OF WAR DAYS

Though True Heaven is episodically, a story of the late conflict of nations there is no scene in the picture which brings the character of the play nor the evolution of the story to the battle front.

On that basis "True Heaven" cannot be called a war story in the accepted sense. There are no big guns, no marching regiments, no battles. "True Heaven" is more of the period of the war than of the war itself.

Again "True Heaven" proves more than all else that teeming drama came out of the war. Real human drama far more powerful than is embodied in this story of a young British officer and a mysterious young girl known only as "Judith".

When from the fighting front the youth and girl meet, under strange circumstances the youth falls in love with her only to discover that she is an enemy spy and that his life is in her hands.

The... between love and p... drama the girl has to make a decision and she does. George O'Brien and Lois Moran are co-featured in this human drama with a brilliant supporting cast.

Amisk Creek

News is rather scarce these days everyone apparently keeping to their own firesides.

A recent ladies' aid meeting was held at Mrs. A. Patterson's home. Quite a number were present. Rev. and Mrs. Bjeide, Mrs. T. Anderson, Mrs. P. Kjesnes and Mrs. Donan from Ryley were present. It was decided to get some stockings made for a needy family and to help the Sunshine fund in Edmonton with five dollars of the aid's money. Each family in the aid will donate some clothing if possible.

Miss Ruby Berg who is attending the Lutheran College was home for a few days last week. She was unwell.

Mrs. E. Pearson is visiting in the city for some time.

Mr. and Mrs. Herschberger and children left last week for the United States. They are going to spend Christmas with Mr. Herschberger's parents who reside in Nebraska.

A. Moen and Conrad Patterson motored to the city last Monday, returning the same day.

As this is my last correspondence before Christmas I will take the opportunity each and every one of the Mercury readers, Editor and staff a very merry Christmas and a prosperous new year.

Mr. Zarber, jeweller, who visits Tofield each week will not be here before January 1st and 2nd.

Readers of the Edmonton daily papers will notice, with no small degree of pleasure that F. O. Ball who recently moved from Tofield to Edmonton has already listed some stock sales. He cried a pure-bred percheron horse sale at Edmonton on Friday last.

HOLY TRINITY CHURCH
Sunday, December 22nd
11 a. m. Holy Communion
7 p. m. Evening Service

Note early evening service. There will be a general meeting after. Preacher: Rev. Canon Cornish, of Edmonton.

There will be Midnight Mass held in St. Francis' Roman Catholic Church, Tofield, Christmas Eve. Rev. Fr. Hughes will officiate.

Of plain white linen .... 35 cents or 3 for $1.00

SPATS—
Best quality with dependable Dome Fasteners. Gray, Fawn and Beaver, ... $2.25 and $2.95

E. W. ROGERS

THE SETTLER'S FRIEND

To many a one who crosses the sea to find a home in foreign part there is a great appeal in the Dominion of Canada, with its free life and boundless opportunities. Landing at the ports of St. John or Quebec or Halifax, the stranger has the first taste of the new life with all its new ways and conditions as he disembarks at the busy ports. But there is a welcome awaiting him of which he was not aware. Among the many societies interested in the newcomers and their welfare there stands pre-eminently the Canadian Red Cross Port Nurseries are in full swing througout the year, and many a thousand strangers pass through the friendly rooms fragrant with hot tea and filled with tired families and mothers, fathers, and travel stained children. The Red Cross Nurses have their hands full with many and varied duties. Refreshments first and foremost for the little folk at small tables. Advice to the anxious mothers as to the care and health of an ailing one. Assistance to the worried looking father with much baggage and a perplexed look as he thinks of a week on the train with his large family. Life to the nurse at the Port holds much of the sterner stuff, as she extends to the new Canadians their first words of welcome to this new land. Cards are written bearing the name of each family, and their destination. Alberta has had her fair share of these settlers under one scheme or another. Hence it comes about that many women have written home telling their friends that they got a wonderful reception in Canada from the Red Cross and in describing the various kind services in the Nursery, have called the Society by the fitting name of the "The Settlers Friend". Visits are paid to families by Red Cross workers and in the case of the sickness of the children, steps are taken to see that the necessary care is forthcoming. This further follow-up often results in a life long friendship between the newcomers and their provincial Red Cross and in many cases the friendship shown is returned an hundredfold and thus passed on to others.

HEALTH SERVICE of the CANADIAN MEDICAL ASSOCIATION DRY FEET

There are certain small things which, if neglected, may cause a considerable amount of discomfort; whereas, if attended to, they go far to make for comfort. One of these is the question of keeping the feet dry. If we allow our feet to become wet and then sit for some hours at [illegible] school or at work, the chilling of the feet while the rest of the [illegible] warm, [illegible] for some reason, produces [illegible] cold in the head. In order [illegible] of head colds which are such a nuisance and which, sometimes lead [illegible] trouble, the feet should be kept dry and warm.

[illegible] sensible to buy a pair of rubbers than to spend [illegible] doctor's bills. It is much better to take an extra minute or two to put on a pair of rubbers than to [illegible] day or two in bed as a result of having got the feet wet.

It is not always possible for us to [illegible] feet. Sometimes the rain is unexpected and we are caught unawares. In such cases, shoes and stockings should be changed without delay, and the feet given a brisk rub with a rough towel.

Clothes should be worn according to the thermometer. In winter shoes should have thick soles [illegible] light shoes should be worn under overshoes. If woollen stockings are not [illegible] keep the feet warm, they should be worn. There is a difference in individuals, some require heavier foot clothing than others in order to keep the feet warm. This is something which we must learn from our own experience and by which we must be guided.

Parents will find that they will accomplish something worth while in preventing colds if they make sure that their children's feet are kept dry and warm during the winter season. It requires a little preparation in the way of providing rubbers and overshoes, and, when they are provided, it needs some supervision to see that they are worn, but the effort will be well repaid in greater freedom from this winter nuisance and danger.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

HUGE DEVELOPMENT PROMISED IN THE NORTH

Hon. Charles Stewart, Minister of the Interior, together with engineers of his department, is back in Ottawa after an extended and close examination of the developments in Northern Alberta which may almost at once make that area the scene of the most important exploitations of natural resources in the history of Canada.

If the experiments which he and his staff witnessed conform to the secular evidence, exploitation of the 30,000,000,000 barrel oil field lying in the tar sands of the Fort McMurray district is now economically feasible and big scale production looms up as an immediate certainty.

The tar sand beds, with an estimated volume of more than 500,000,000,000 cubic yards, form the greatest known exposure of oil. Their presence has been known to science for many years but always the problem of extracting the oil from the sand has stood as a barrier to development.

Since the turn of this century scarcely a great oil company but has spent hundreds of thousands of dollars to solve the riddle. Where equipment which would do the job was made its operation was so expensive as to make its employment impossible. When it was cheap enough, it would not do the work.

It now develops that W. P. Hinton, formerly general manager of the Grand Trunk Pacific Railway, in conjunction with a New York engineer has been working on a purely mechanical process of extraction for some years. In October and November many noted engineers were invited to witness the tests of the new process. Hon. Charles Stewart, under whose administration of the oil sand area comes, was one of those who attended.

The stated results were the complete extraction of the oil content in suitable purity for refining and at a cost which permits competition with oil secured from drilled wells.

Mr. Stewart has not issued any statement upon the development but the entire staff of the department of mines is excited over the imminence of what will be—if the claims made are borne out—an outstanding event in the history of Canadian Industry. The field contains high test, and much gasoline equivalent to 100 years world's supply at the present rate of consumption.

POST OFFICE ASKING PUBLIC COOPERATION

The post office department has already issued a plea urging the public to do their Christmas mailing early. They are reminded also to do the mailing the early part of the week, because if the task is left until the latter part it means the bringing in of postal workers on Sundays to keep the vast amount of matter on the move.

The post office is also again attempting to discourage the use of small cards and envelopes in the mails. In the first place there is danger of such mail not reaching its proper destination before Christmas because the cancellation stamp, which is placed on all matter at the post office, oftimes obliterates addresses. Then again there is not sufficient space for direction for forwarding in cases where it is necessary to forward such matter in order to reach their addresses.

Co-operation of manufacturers, dealers and the public generally in the elimination of small sized cards, to the end that the Postal Service may be relieved of the burden of handling them, is desired and should continue to be sought and cultivated. It is suggested that in no case should the card or envelope be smaller than 2¾ by 4 inches a size somewhat larger being preferable.

AUTOMATIC AIRPLANE PILOT PERFECTED

Advantages in commercial and military operations are predicted by the automatic airplane pilot in the shape of gyroscopic stabilizers which will keep the plane at an even keel at all times during straight flying.

One of the great advantages of the device for military purposes is that on a bombing mission the pilot and observers would be free to aim and release the bombs without being concerned with the control of the plane, and the plane would be kept at an even level, improving the aim. It relieves the pilot of much of the hardships of flying and leaves him free for observation and other duties.

The automatic pilot has been in operation and airplane pilots who have seen it declare it is a revolutionary step in the advancement and simplification of aviation.

WILL "REFRIGERATE" FACTORY EMPLOYEES

An era when workers will be kept at the temperature most conducive to health and production—as foodstuffs are now kept safe from fermentation and decay—is just around the corner.

Theatres and great office structures are now successfully "refrigerated" all over the continent. A temperature of 100 degrees outside, is reduced to 70 by refrigeration inside, or to any other figure desired.

Large employers of labor are now experimenting with plans to extend the same principle to factory construction and operation, confident that the comfort and health of their employees will return dividends in better production.

Within a few years the same practice may be extended to the homes. Then it will be unnecessary to search out watering places for respite from sweltering summer. The same principle of refrigeration, of course, will mean more easily heated premises in winter.

HOUSEHOLD DRUDGE IS FAST VANISHING

The emancipation of "mother" proceeds at such a pace that she will soon have to seek outside employment in order to have anything to do.

Commerce statistics show that even the humble carrot is now diced and cooked and sent her ready for warming. The potato is about the only vegetable left for her to tinker with from its natural state. Even then if she wants it in chips or in salad there are countless thousands of stores waiting to serve her.

From soups to deserts she can get a ready cooked meal off the shelves. Even the bread comes sliced. An evidence of how mother is backing out of the kitchen is reflected in the sale of over $20,000,000 worth of prepared mayonnaise dressing in the past year.

What with electrical contrivances, gas stoves and the rest, father would probably be content to wear the petticoats and let mother bring home the wherewithall.

CHRISTMAS ON SPANISH MAIN

Christmas on the Spanish Main will be celebrated this year by passengers on the Canadian Pacific liner, Duchess of Bedford, with English Manor House ceremonies for the first time in the history of the sea. There will be a jester with cap and bells who will fiddle in the barons of beef and boar's head and other mighty dishes that will add to the good cheer while there will be a procession of medievally costumed servitors in the most approved historical manner.

Passengers on the 16-day Christmas and New Year holiday cruise to the West Indies made annually by this vessel will not only be the audience of the first real old-fashioned Christmas celebration in these waters but many of them will also be actors in the function. The Duchess of Bedford will leave New York December 23.

There will, of course, not be forgotten a gigantic Christmas pudding over and around which the weird blue of burning brandy will cast an uncanny radiance. The bowl of wassail preceded by two pursuivants and accompanied by the court jester will go the round of the guests in one of the most popular of old-time Christmas observations.

Among the guests there will be Randolph Crowe, well-known operatic baritone who added to his laurels as "John the Butcher" in Dr Vaughan Williams' "Hugh the Drover", prize fight ballad opera and whose North American premiere was recently given at the English Folk Dance Festival at Toronto. Further, there will be members of the New York Folk Dance Society, while carol singing, "Waits" a Christmas Ball, old English Folk Dances and songs and many other features will make the [illegible] unique.

A FRIENDLY DISCUSSION

ONCE A year, like a good citizen, Mr. W. Abernethy comes to the Mercury office to pay his subscription to the Mercury. It is needless to say he is welcome. The occas-ion almost invariably results in an interesting and somewhat lengthy conversation, in which are discussed many matters embracing politics, religion and economics. There is no limit to subjects, which have included practically any and everything that comes to mind during these conversations. The last "conversational discussion" centred around advertising and to boil it down to a closer application—local advertising. Mr. Abernethy said it was money wasted—worse than that— as advertising encouraged people to spend money when they should not. Actually the friendly discussion simmered down to the question, to put it briefly as possible, whether advertising was helpful or harmful to the general public. The editor of course contended that it was helpful,—Mr. Abernethy could not see it that way.

Perhaps this writing might be stealing a march on our friend, if so, we herewith apologize. At the same time, however, we offer our columns to Mr. Abernethy, should he be sufficiently interested.

Now one of the first points to be settled was, "who pays for advertising." The editor contended it paid for itself, Mr. Abernethy contended the consumer pays all costs on an article. To intelligently and correctly answer this question one must take into consideration many things, and perhaps the most important is whether our present system of advancing civilization is desirable or whether a receding civilization is desirable. Do we wish to go forward or backward. If we decide that our present civilization is too advanced, that radios, gramophones, motor cars, pianos, refrigerators, furniture of the better sort, as well as high grade overalls, boots, work shirts, better houses etc., are all superfluous and harmful then and then only can we say advertising is not a help.

There is no better example that advertising is helpful than the automobile. Literally millions of dollars have been spent on advertising the automobile and yet today one can get a great deal better automobile for one thousand dollars than you could ten or twenty years ago. Part of this is of course due to improvements in manufacture, but improvements in manufacture only came with demand, and advertising created the demand. Volume lowers costs of manufacture of an infinite variety of articles, and as advertising is responsible for creating the demand it must therefore stand that advertising lowers the cost of the article to the consumer, not increase it. Many articles could be quoted that have a continent wide sale, that make people's lives healthier and therefore happier and brighter. These articles have a continent wide sale because people have read over and over again about them in various mediums. There are very few people now-a days who can not without thinking name a half a dozen well known advertised lines off hand. Contrast this with twenty, thirty, forty, fifty years ago. Then soap was just soap. Every buyer was at the mercy of every unscrupulous trader. The grocer mixing sand with sugar was a standard joke —if nothing worse— and when it was freely admitted that there were "tricks to every trade". For that matter, there probably are yet—Utopia has not yet arrived. Even so we feel that general and attractive advertising is all to the general publics good.

The only objection we can find to general advertising is that it makes it very hard for the new manufacturer to break in. For instance if the writer wishes to make a chocolate bar for sale, in order to approach the public he must spend thousands of dollars in advertising. The chocolate bar might be wonderfully good but the general public must be told and told again that it is good, very few of them will try it out for themselves without being told. It is comparitively easy to make out a good case for general advertising done by the manufacturer or producer, and the above is written to attempt to prove that advertising does not increase but actually lower the cost of products.

It is not quite so easy however to present an impregnable argument in favor of local advertising. We do not imagine anyone believes that "printed advertising" contains 100 per cent of selling power —it does not. Consequently, as no two country storekeepers are just alike, the human element enters here. With national advertising one can be reasonably sure that it will be technically correct, as regards the work of the copy writer, typographer and engraver. With country store advertising, this is not always likely to be the case. Many merchants are "too busy" to write an ad. Just think! "too busy" to write a message to several hundred prospective customers, and perhaps paying for the space anyway; the newspaper may let you down on typography and there is no engraving. Therefore, where the human element is such a large factor in the country advertising field, it is not so easy to make out an air tight case in favor of country store advertising. The writer has spoken to many merchants on the subject and none of them hold the same views. Only two men came ont flat footed and said that country newspaper advertising paid them, and if it proves anything both these men have during the past fifteen years made a complete success of country store merchandising, at the same time spending considerable sums in advertising.

Now in the event of space being bought in a local paper, who pays for it? Does the consumer? certainly not. Does the merchant directly? No. Then who does? It pays for itself.

When a farmer has more labor than he can personally accomplish, such as at harvest time, what does he do? He engages help. Who pays for the help,—the help pays for itself or it would not be hired. It pays for itself by the profits from the labor it does! Local store advertising is quite similar. When a local merchant has bought a stock, and has it ready for sale. He can do one of two things. He can keep quiet and wait until someone comes and buys or he can engage help in the form of advertising. If the help is engaged in the right proportion and the store conditions are such as to allow it to do its work, it will pay for itself by the profits from the labor it does just as the help at harvest time pays for itself. It is so simple to us that we are amazed others cannot see it. One may rest assured the T. Eaton Co. will deliver their message; also the R. Simpson Co., and a number of other outside firms. Then why on earth should the local merchant fail to deliver his. If there was a Chinese wall around country towns and all money and wealth created there was distributed there, there would be a good argument perhaps, just to let matters take their course. But the country merchants are in direct competition with some of the biggest merchants in the world; these merchants never cease their song of persuasion, and unless the country merchants are willing to let the mail order houses etc., take the lion's share of the business it will be necessary for them to do some singing also.

Perhaps we have carried this editorial far enough. Some readers may have quit us before they got this far. Be that as it may, we will touch on one more subject and then call it a day. Mr. Abernethy has a pleasant but rather disconcerting manner of conducting a discussion by popping unexpected questions at you. If you say you do not know you are floored at once. If you try to answer on the spur of the moment, you do little more than reveal your ignorance. At least that's how the editor feels. Mr. Abernethy asked, do the business men read the paper? He followed his question with the remark that he had spoken to one business man re something in the paper, only to have him remark he never read the paper. We believe most of them do, though perhaps some of them don't. At least most of them buy and pay for it. We do know however, that the average small town local paper is not taken so seriously as it should be by the rest of the business men in town. The temptation to compare it with the city dailies and weeklies is too great. Of course the Mercury has its faults, it could be better, but even so instead of treating it as something in the nature of a joke, it was mentioned to farmers as something desirable, the business men would not only be doing the paper a good turn, but themselves a better one. The average farmer, we believe, views his home or market town with a considerable degree of interest. Why shouldn't he? This is where he markets his products and spends at least a portion of his money. With the clear vision of one looking from the outside he perceives a flaw somewhere when he hears a business man treat the home town paper lightly. For he argue to himself, if those fellows do not take the paper seriously, why should I?

The ideal situation would be for all business men to speak kindly of their paper, use its columns for advertising, and write an occasional article for it if this was done there would be less outside buying and more home buying and there would be no question as to whether local newspaper advertising paid.

ONE FAMOUS RECIPE EACH WEEK

We have all read Queen Mary is a good cook. But usually we passed that information by and thought of her more as a ruler, a mother of a family and a woman fulfilling social duties.

Since last year, when King George was ill occasional bits of news reached us that the Queen prepared his trays and special dishes for him when he was able to take nourishment. Then we began to realize that the newspaper accounts of Queen Mary always being interested in the kitchen of her home, was true.

Now we have the Queen's recipe for her favorite sponge cake, as given by Evelyn Graham in the Cosmopolitan.

It is

3 eggs (whites beaten separately)
Weight of 3 eggs in powdered sugar (seven eighths cupful)
Weight of two eggs in self raising flour (1 cupful)

Put yokes and beat whites of eggs in basin, sift in sugar and beat up, then sift in the flour. Have ready a cake tin lined with paper. Put in mixture and place in hot oven. If gas is used lower gas immediately cake is in oven and do not look at cake for at least twenty minutes to half an hour. Gas should be very low. Test with skewer and if the latter is clean when taken out, the cake is done.

INFERIORITY COMPLEX IS UNDER DEVELOPED

The inferiority complex is not yet a serious affliction of Fred H Davis, Attorney General of the United States in the Hoover Cabinet.

Writing to Wickersham Commission on Law Observance and Enforcement in the United States Mr Davis modestly says;

"Stop comparing American institutions with those of England. American ingenuity, intelligence, industry and progress along every line is so far ahead of that of the English that we can expect the criminals of this country to be relatively of greater potency than those of England. English court methods and procedure would be as inefficient in Chicago to deal with the situation there as Mussolini attempting to preside as president of the United States."

The peremptory manner in which Mr Davis establishes the superiority of his people accompanies his declaration that the men of today who lives a year, is living the equivalent of five years in activity, travel and association, as compared with a century ago.

TO AGAIN DISCUSS NATIONAL HIGHWAY

The government will be asked at the next session of Parliament to reconsider its policy with regard to aid in highway construction.

Two suggestions were advanced during this year's session. There remain some 800 miles of highway to be built to give Canada a national road from coast to coast. Most of this lies along the shore of Lake Superior and it was asked that the government undertake its construction. The second proposal was that the granting of aid to the Provinces in road building which was inaugurated in 1919 be revived for another five-year period.

The Prime Minister explained the reluctance of the Government to vote "ear marked" money to the provinces —that is money granted for specific work—and neither plan was adopted. Next session the proponents of Federal aid in highway building will renew their plans.

They are following closely the progress plans in the United States for the Federal construction of a whole system of national "express" highways to care for fast traffic and incidentally to play an important role in reducing unemployment.

WIT AND WISDOM

"Why are you standing over there throwing stones at the poor little boy?"

"Because I don't care to get closer, Miss, he has the whooping cough."

Life's darkest moment,—Barbara (Whose first tooth has just dropped out) "Mummy, mummy, quick, I'm coming to pieces". Passing Show [illegible]

Solid Ivory—"Ouch! I bumped my crazy bone."

"Oh, well, comb your hair right and the bump won't show". Royal Arcanum Bulletin.

Next—The little boy was in church for the first time. When the choir appeared, all in white Surplices, he whispered hoarsely, "Oh, see Daddy, they're all going to get their hair cut." Boston Transcript.

Mr Fixit—Forgetful husband, to friend—"I want you to help me. I promised to meet my wife at one o'clock for luncheon and I can't remember where. Would you mind ringing her up at our house and ask her where I am likely to be at that time"—Answers.

No rest for the wicked—She, "The world is full of rascals. This morning the milkman gave me a counterfeit half dollar."

He, "Where is it my dear?

"Oh, I've already got rid of it—luckily the butcher took it." Detroit News.

Depending on a Pal—Douglas had been promoted to position of monitor of his new class and was anxious. "And please God," he prayed that [illegible]ght, "Wake me early in the morning. Shall we say a quarter to eight?"

NO SECOND HAND GOODS

"These are very nice ones, miss," said the clerk, "satin bloomers." "Oh! No," said the sweet young thing "I want some that have not been used before."

[illegible]

Small brother— Say, sis, can I hang up one of your stockings Christmas?

Big Sister—What on earth do you want to hang up one of mine for?

Small brother—So's I can see what's in it without getting out of bed.

[illegible]

Butler—The post, m'lady.

Mrs. Uppish—Ah, Christmas cards, I suppose, Jenkins. Well, look them over, will you? And if you consider any of them too familiar, just destroy them Jenkins.—Punch.

NOT UP-TO-DATE

A travelling salesman found himself in a village hotel dining room when a heavy downpour of rain set in. Addressing the waitress, he remarked: "It looks like the flood".

"Like What?" the girl inquired.

"Like the Flood". You've read of the Flood and how the ark landed on Mount Ararat, haven't you?"

"No sir, I haven't seen a newspaper for three days," confessed the waitress.

Two Boon Companions were on their way homeward from a Christmas Eve Party. They had dined and wined well and were quite jovial. They came to a postal box. "Pardon me, old top," said one, "I mush try thish machine." He dropped a dime in the slot. Then gazing at the city hall clock, said in horrified tones, "Migawd, I've losht twelve poundsh since yesterday.

THERE'S A DIFFERENCE

An Englishman entered a Scotch butcher shop and ordered: "A sheep's head".

So the butcher called down to his assistant in the cellar: Aleck, bring up a sheep's head."

Then the Englishman chimed in: "Iwant an English sheep's head."

So the Scotch butcher shouted down the cellar again: "Aleck," he instructed, "take the brains out of it." Exchange.

PREMATURE

An Irishman lay dying when the odor of cooking assailed his nostrils. Summoning his weeping daughter to his bedside he said: "Nora, darlint, ain't it doughnuts that I smell?"

"Right for ye, father," the girl replied.

"And would ye be asking your mither if I can have one before I die?"

The daughter delivered the message to the mother in the kitchen and brought back this answer:

"Mither says ye cannot have one of them doughnuts; they're for the wake." The Life Astna-laer.

GIFT SUGGESTIONS

For all the Family at Popular Prices

WE HAVE RECENTLY UNPACKED A COMPLETE NEW STOCK OF GIFT ARTICLES FOR MEN, WOMEN AND CHILDREN. MANY LINES NOT ADVERTISED ARE IN TRANSIT AND WILL BE AVAILABLE FOR CHRISTMAS SHOPPING. The Battle of the Giants

TWO VETERAN SKIP CURLERS PLAY THEIR RINKS IN EXCITING GAME

Finals in Ladies' Cup Competition Create Much Interest

Sometime in past ages there were prehistoric men who, quite likely threw stones or rocks as a pastime. You read of them every so often as being discovered, first in Asia, then in Africa, then in America. In the distant future, a million years more or less, men with bulging foreheads and bespectacled eyes will be searching here for evidence of what is now current history. They may by chance come across some curiously shaped stones, which to them, the ancients, played their game of curling with. Then with a determination and thirst for knowledge which only college professors possess, some learned fellow will dig up the records in some museum and he will say to the world, "Yes, the ancients loved their curling game. One of the most famous games was between rinks skipped by men named McLaughlin and Lee. It was the battle of the giants, both being mighty curlers. Lee won by a hairs breath. It was a hard and skillfully fought game."

On Friday the 29 of December, the finals of the ladies cup competition were played at the Tofield curling rink. By way of explanation, we should state that at the beginning of the season, when the rinks were made up, the president and vice president choose sides and an elimination series of games take place. The four G. McLaughlin's rink and John Lee's rink both went through the elimination series without losing a game, each having won eight games each. Therefore when these rinks met for the final game on Friday December 20th, there was much interest in the game and a large number on hand to witness it.

The personality of the skips themselves have much to do with the interest shown. Both McLaughlin and Lee are well known here and elsewhere as skilled curlers, having been playing the game for many years, and in addition each ably knowing he was up against tough opposition, entered the game with grim determination to win. While adhering strictly to the rules of the game, no quarter was given or asked for.

The game itself, was a battle of contrasted energy, steady nerves and skill. Twelve ends were played, first one being in the lead and then the other and they were tied at different times. This was their position at the end of the game and an extra end was played to decide the winner. The final end was played amid shouting from every corner of the rink. Mc-Laughlin surveyed the situation with a cautious, keen eye of experience. Sizing up the situation accurately he decided upon a draw shot. With all eyes in the rink focused upon him, he threw his rock, trying for the button. The rock curved around Lee's guard, went to the button—and on through a few inches. It was a nice shot but travelled a few inches too far. Lee's rink won the Ladies' cup.

The personnel of the rinks were as follows:—Lee Herndon, A. Christenson, Bert Calvert, Geo. McLaughlin, skip. Frank Wood, Oliver Letourneau, L. Abbott, John Lee, skip.

LOCAL AND PERSONAL

Annie Swift and Arthur Bolrun returned to Calgary on Saturday last where they will resume their studies at Mount Royal College. Clarence Gray also entered the same college and left for Calgary at the same time.

Edna Campbell visited at the McCauley home during the last week. She returned to Edmonton on Sunday.

Mrs. Isaac visited Edmonton for a few days this week.

Mr. and Mrs. Coombes were visitors in Edmonton for a week.

Mr. and Mrs. Smith and family spend New Year's day in Edmonton.

The number drawn for Hobson's Mont Marbut dinner pot was 684. Will the person who has the number kindly come in and claim the dinner set as soon as possible.

The school teachers have all returned to their various districts to resume teaching for the winter months.

Mr. Harris of Dalhousie is visiting with his daughter Mrs. Snell for a week or two.

The United Church are holding their annual supper and meeting on Friday evening, in the basement of the church at 6.30 p. m.

The junior boys hockey team journeyed to Holden on Saturday last to play a game of hockey with that town. Tofield lost by the score of 5—1 but from all reports it was a hard fought struggle. Tofield hopes to take their measure in the next game.

Nugent, forwards; Tofield: goal, Jack Wipe; defence, P. Thompson, S. Bowick; forwards, Murray McKelley, Ross Craig, Ray Martin; subs., C. Rowe, Gerald Thompson, Charlie Bilowash.

TOFIELD LOSES TO HOLDEN

6 — 2

On Monday, January 6th, the Holden athletic park chasers invaded Tofield territory and beat the locals in a fast game by a score of 4—1.

The locals put up a good game all the way. With the exception of Bowick, the Tofield goalie, who was brilliant, the Tofield players did not appear to be going as good as in the previous game. Their shooting was not up to par. It should be remembered however, that the Tofield team is still an intermediate team, with three junior subs, who due to their sparingly. On the other hand, Holden was at full senior team strength, two strong forward lines, and an extra defence man. Umpirey of Ryley played good for them. We make no apologies for our defeat, acknowledge it gracefully in fact. We were beaten by a superior team. It was a good fast game. The spectators had plenty of thrills and fun for their money. There were numerous penalties, but the game was not unduly rough. But Hannan refereed the game. As we already have two hockey games written up in this issue, we are omitting period by period story of the game.

TOFIELD JUNIORS TIE WITH CAMROSE

In a hotly contested battle the Tofield juniors and the Camrose juniors battled to a three—three tie. At one stage of the game Tofield led any outstanding players on either team as they all played good hockey. The line-up of the teams are as follows:—

Camrose: goal, Nordbye; defence, (Continued in previous column)

TOFIELD CHRISTMAS CONCERT

The annual Christmas concert was held on Monday, December 23, in the United Church.

The first item was a welcome from the smaller boys. Those were Henry Hicks, Harry Turnamiel, Jimmy Brass, Charlie Worton and Leonard Worton.

The next was a pageant. While the curtain was being lowered the players sang "Sorrell". The curtain rose displaying two gracious angels. The Herald angels came in singing "Holy Night". The three wise men came in next singing and carrying gifts for the baby Jesus. Then there was part of the hymn, "Tell Me the Stories" sung by Mrs. Brink and Mrs. Craig. During the last verse Mrs. Firth who represented the "Prophet" came in and read a quotation from he bible. Then the carol singers entered singing, "Oh Little Town of Bethlehem". The prophet read another quotation of the bible. Then the shepherds entered singing, "While Shepherds Watched Their Flocks by Night." While standing on the stage in a semi circle the group sang, "Hark the Herald Angels Sing", which was followed by another reading from the bible. The guardian angels drew the curtains aside disclosing to view the cradle and Mary and Joseph. There was a silence for a few seconds. The hymn "Away in the Manger" was sung by the group with outstretched arms towards the shrine. Then a hymn, "Angels from their realms of Glory". The first verse was sung by the entire group, the next by the shepherds and the next by the wise men and the last by the group. The prophet turned towards the front and read from the bible. Then followed the audience the group sang Joy to the World.

The next number was put on by the smaller girls. They sang a song with their dollies.

Then a recitation was given by Helen Beerists.

The next was a song, "The Lost Doll", Beryle Brink being the Doll and leading singer. Several other girls were also dolls and sang the chorus of the song.

After this was a small drill by girls and boys called, "Snow Flakes". Each little girl had a parelle to sing.

Then the small boys came on together and gave their part. They sang a song and marched off.

Then some small girls came in and gave a drill called, "The Rose Drill". They had hats and ribbons representing roses.

The next was a play entitled, "Dr. Funny bones Hospital". The scene of this hospital is where the listener learns how to be cheerful. The doctor and the patients decide to play school. The doctor asks questions of Bryleen, which were answered by the players.

This was followed by a recitation by Lois Wilson.

Then came a play called, "Cookies". In this play we all learned to have the true Christmas spirit.

The next was a play entitled, "Put the Cream". This was a humorous dialogue in which Mr. and Mrs. Brown quarrelled over the contents of the pitcher. In the end each kept their own opinion.

The last item was a "goodnight" by Arnold Swift.

The most important occurrence was when Santa Claus came. He came full of jokes and laughter. He distributed candy to the children and left taking his reindeers to get them ready for Christmas Eve

Thanks must be given to the people who helped to make this concert a success.

RURAL COUNCIL MEETING

The December meeting of the county, Municipal District of Carbhal, 427, held at the district's office, Tofield, Alberta.

The Reeve (A. J. Williams) in the chair.

Councillors, Christenson, Morden, Wood and Verge present.

The minutes of the previous meeting were read.

It was unanimously agreed that minutes of the previous regular meeting be adopted as read. Carried.

Moved by councillor Verge that Section 126, of the Municipal District Act be waived, unless in certain cases good and sufficient reason or reasons are given, secretary need not prepare this list.—Carried.

Moved by reeve Williams that preparing of voters list be set aside until it is revealed whether or not same will be required, (M. D. Act 301-(1) especially in view of the fact that cases where the returning officer may be in doubt of, are allowed to vote providing they are prepared to take the necessary oath.—Carried.

Moved by reeve Williams that councillor Wm. Christenson be appointed deputy reeve for the balance of the term.—Carried.

Moved by councillor Christensen that secretary be authorized to have 1929 financial statement printed and mailed to each ratepayer, using the same method as used by him, (secretary) in 1928.

Moved by councillor Morden that Mr. John Morrow be appointed deputy returning officer for Deville district. Poll to be held at Cooking Lake School house. That Mr. W. C. Barnes be appointed deputy returning officer for Nemaiah District, poll to be held at Minnitch school house. Mr. John Dreps be appointed deputy returning officer for Hastings Lake District, poll to be held at Hastings Lake School house. That Mr. Geo. McAllister be appointed deputy returning officer for Lorena Vista District with polling booth to be stationed at the old Lorena Vista school.—Carried.

Moved by councillor Christensen that Mr. C. L. Simonson be appointed deputy returning officer for the Kingman district, poll to be held at the Kingman hall. That Wm. Sears be appointed deputy returning officer for Ketchamont district with polling place at the Ketchamont school house.—Carried.

Moved by councillor Morden that Mr. Wm. Paterson act as returning officer for division five. Polling place to be at the District's office Tofield.—Carried.

Moved by reeve Williams that Mr. J. Pointer act as deputy returning officer at Westlake school for municipal election of 1930 for Westlake school district. That Mr. Pete Holland act as deputy returning officer at Lindbrook school for Lindbrook and Hastings Lake portion of division four. That Albert Wickeberg act as deputy returning officer at Woodlawn School for all 30-29, less north row of section and all of 30-19 less that portion in Lindbrook school district. That Ole Swaze act as deputy returning officer at Swaze's home territory to be all of 49-20-W4M. Carried.

Moved by councillor Morden that the district accept offer made by the Town of Tofield as to their purchasing district's equity in Mr. G. A. Trent's Agreement of sale re his (Mr. Trent) purchase of the Tofield Industrial sub-division under date of June 1st, 1928. The council consider that they have not the funds to spare in purchasing the Towns equity. Agreement to be paid by the Town $548.00. —Carried.

Moved by reeve Williams that division four be given credit for the sum of $45.00 being amount paid in by Mr. Williams for the rent of grader to him (A. J. Williams) when same was being used on Provincial high way. Carried

Motion made by councillor Christensen recovering that Tax Receipt 1125 for the sum of $18.50 to be cancelled and said amount be paid to Steve Phillio, was lost.

Moved by councillor Morden that Mr. A. E. Beattie, located on section 7-51-19-W4 be appointed pound keeper in place of Mr. A. J. Young who has resigned.

Moved by councillor Verge that Mr. H. H. Hull be instructed to remove fence at once, from across street known as Wild Duck Pronade at White Sand Bathing Beach sub-division or he will be prosecuted and the secretary be authorized to take the necessary legal action against Mr Hull if said fence is not removed by the 20 day of December 1929.—Carried.

Moved by councillor Morden that Township Assessor be paid an additional fifty dollars on account of extra work entailed in changing rate of 2nd class pasture land in Township 49-50 21-22, ranges 20 and 21 from an A there to five dollars per acre. —Carried.

Moved by councillor Christensen that secretary be authorized to have 1929 financial statement printed and mailed to each ratepayer, using the same method as used by him, (secretary) in 1928.

Moved by councillor Verge that Mr. John Morrow be appointed deputy returning officer for Deville district. Poll to be held at Cooking Lake School house. That Mr. W. C. Barnes be appointed deputy returning officer for Nemaiah District, poll to be held at Minnitch school house. Mr. John Dreps be appointed deputy returning officer for Hastings Lake District, poll to be held at Hastings Lake School house. That Mr. Geo. McAllister be appointed deputy returning officer for Lorena Vista District with polling booth to be stationed at the old Lorena Vista school.—Carried.

Moved by councillor Christensen that Mr. C. L. Simonson be appointed deputy returning officer for the Kingman district, poll to be held at the Kingman hall. That Wm. Sears be appointed deputy returning officer for Ketchamont district with polling place at the Ketchamont school house.—Carried.

Moved by councillor Morden that Mr. Wm. Paterson act as returning officer for division five. Polling place to be at the District's office Tofield.—Carried.

Moved by reeve Williams that Mr. J. Pointer act as deputy returning officer at Westlake school for municipal election of 1930 for Westlake school district. That Mr. Pete Holland act as deputy returning officer at Lindbrook school for Lindbrook and Hastings Lake portion of division four. That Albert Wickeberg act as deputy returning officer at Woodlawn School for all 30-29, less north row of section and all of 30-19 less that portion in Lindbrook school district. That Ole Swaze act as deputy returning officer at Swaze's home territory to be all of 49-20-W4M. Carried.

Moved by councillor Morden that the district accept offer made by the Town of Tofield as to their purchasing district's equity in Mr. G. A. Trent's Agreement of sale re his (Mr. Trent) purchase of the Tofield Industrial sub-division under date of June 1st, 1928. The council consider that they have not the funds to spare

Crash In Tofield Yards

FREIGHT TRAIN RUNS THROUGH SWITCH AND CRASHES INTO PASSENGER CAR

On Monday, December 29th, an accident that could easily have become one of major proportions, took place in the Tofield railway yards.

The morning south bound train switched an empty passenger car on to the siding and the switch failed to close. About noon a through fast freight came through and taking the switch, crashed into the standing passenger car. It was very fortunate that the freight engine kept to the rails, otherwise loss of life might have resulted. The cow catcher was demolished, and front of the engine damaged while the passenger car was a complete wreck. The freight train was travelling at quite a fast rate when it hit the car with a terrific force.

Two Hockey Encounters

HOCKEY SEASON OPENS AT TOFIELD ON NEW YEAR'S DAY

Two Visiting Teams Here—Camrose and Ryley

The hockey season was opened at Tofield on New Year's Day the intermediate and junior teams both acting as hosts to the visiting players.

The second game between Ryley and Tofield was held at night. This game was billed for 2:00 p. m. and the Tofield management did all in their power to have it commence at that time. Cars for transportation had been definitely promised Ryley players the day before, but at the last moment the arrangements were broken and only by some coming on the train and staying over night was it possible to play. It was unfortunate for Tofield that this had to happen, as we have been disappointed so many times, especially with Edmonton teams, that the public is to be excused if they lack confidence in us. All we can say is that we make our arrangements as carefully and definitely as possible and do not put out advertising on hasty or incomplete arrangements.

For the first game of the season, the teams played fast hockey. The first period opened with a burst of speed round to said season, both teams attempting to set the pace, but being matched by each other. Ryley got the first goal and kept it wood wide. Tofield quickly rimmed and tented Umpirow who turned the disc inside. Rod to end rushes being broken up by opposing defence players then marked the play, when after a scramble behind the Ryley net, Bob Whyte procured the puck and sent it past Umpirow to the netting. Incidentally it was the first goal scored with the new nets. The locals followed this up when A. Worton strchand-ing down sent in a vicious drive which Umpirow saved, the puck bouncing off his pads, only to have W. Worton flash in and get the rebound and send it into the hemp. The goalie had no chance

The second period opened up slow but speeded up as play progressed. After several minutes play in which both goalies had to show their stuff, W. Worton worked his way through and scored. He repeated this a few minutes later, making the score 3—0.

In the third period Ryley never gave up hope and provided the spectators with plenty of action. Bowick in the Tofield goal was tested frequently but turned all shots aside. S. Worton then broke into the scoring by picking up a loose puck and putting it past Umpirow. He followed this up by taking the puck from front of the Ryley net, from an oncoming Ryley player and taking it back through, found the hemp again. Anderson enjoyed the scoring for Ryley by a nice solo effort. Skating away he went down and shooting past before he met the defence, he put the first counter past Bowick. Keesmen then scored on a lucky shot from near centre ice. The puck went out of the goalies vision and dropped nearly into the net. MacQueen for Ryley then scored on a pass from Keesmen, bringing the Ryley score up to three.

The fourth period, they were fifteen minute periods, produced no goals, Ryley threw all they had into the game. Both defence and forwards played up and forced the play. The Tofield goalie saved many a one tickated for the net, and the locals were kept busy clearing. There were no scores made in this period.

All players played well, but the outstanding feature of the game was the work of the Tofield cyclone defence. Glover and Martin while not breaking into the scoring were masters of strength and broke up rush after rush, as well as making many dangerous trips into the opponents territory.

Line U's—Ryley, goal, Umpirow; defence, Anderson, MacQueen; forwards Buttler, Keesmen, Ewers.

Tofield— goal, Bowick; defence, Glover and Martin; forwards, Whyte W. Worton and S. Worton; subs. L. Swinton, E. Martin and F. Thompson.

THE VANISHING PIONEER AT THE VARIETY FOR SATURDAY

Across an endless desert plods a covered wagon train. Anthony Ballard, (Jack Holt) and his son, John, (Tim Holt) lead the thirsty weary caravan. His wife's grave in the desert sands is a milestone in the indomitable progress of the pioneers. With a covered wagon embroidered on a calico apron as their flag, the remnants of that brave band struggle across a ridge to find water.

"Water!" Water they seek—and find. Twenty-five years later, Jack Holt—the son—owns a thriving ranch in Happy Valley, a water created paradise in the desert. Jack loves June Shelby, (Sally Blane) daughter of a cattle rancher.

"Water!" The city of Metropolis needs water. John Murdock, (Willard Powell), a corrupt politician, heads a committee from the city which comes to Happy Valley to secure the water rights by fair means or foul. Sheriff Murdock, (Fred Kohler) a crooked sheriff in the valley, helps him. He is John Murdock's brother.

"Water!" John Ballard heads the ranchers' fight to retain their rights. But a rancher is killed and Ballard is arrested for the murder. He escapes, and the two Murdock brothers by a forged document, turn the ranchers against him. Only June does not doubt him. Eventually Murdock's gang take possession of the irrigation dam, and the ranchers rise up in arms to fight. Ballard returns as the fight rages, and makes John Murdock confess his guilt to the murder and forgery. Murdock is killed as he tries to escape.

(Continued in previous column)

The ranchers have won back their rights, but the well meaning mayor

The Old Year and the New

The old year is dying. It may be dead, passed into the limbo of the unrecallable past, before these words appear in print. A new year dawns, with all its hopes and fears, its possibilities for good or evil, its vista of 365 days of opportunity for each and every individual.

With the passing of the old year it is customary to take a swift backward glance in an endeavor to sum up its achievements, to realize its mistakes, to note those movements and developments which make for progress or point to retrogression, in order that from observation and study of past events we may carry profit into the future.

This old custom is a good one. Whether we are prepared, or not, to accept the extreme doctrine of Evolution, that man descended from the apes, or still adhere to the Bible story of creation, the vast majority of people do believe that God and nature intended that man should grow in stature, in intelligence, in power, that there should be a steady evolution, that progress should be made in the light of past experiences. Nothing in nature stands still; it either grows and improves, or declines and dies.

Viewing the year 1929 in this critical way, and now enjoying the advantages of that hindsight which is so much clearer than foresight, what does the year's events teach us? What lessons can we carry into the new year with profit to ourselves and to the advantage of our country and the world?

Thanks very largely to the onward march of medical science and the untiring patience of the research workers of the world, the old year was not marred by any large epidemics of disease. To a greater extent than ever before people have accepted the doctrine that it is better to remove causes of disease, and to adopt measures of protection against disease, than it is to confine our efforts to the cure of disease after it has made its appearance. As a people we will be wise if we even more systematically and vigorously follow this course throughout 1930. It has been demonstrated with increasing force that an ounce of prevention is worth a pound of cure. And this old adage applies to other evils as well as to disease.

During 1929 Canada witnessed a greater development of its wealth of natural resources and a consequent larger expansion in industrial activity and in its trade and commerce than in any previous twelvemonth in its history. Viewing the Dominion as a complete unit, and notwithstanding local setbacks here and there, the old year was one of prosperity for Canada and its people. That prosperity was developed along sound lines and through the application of sane policies. Our industrial and commercial growth has been the direct outcome of improved methods and by a nationally aggressive policy of reaching out into all parts of the world for markets in which to sell our surplus products. It is a policy that brought business and prosperity to Canada and at the same time benefited the world at large. Canada will do well to continue and enlarge upon the same policy during the new year.

In the wide sphere of world politics and affairs, Canada, as much as any country, has reason for congratulation over the trend of events. The general acceptance by the nations of the Briand-Kellogg pact outlawing war as an instrument of national policy, the highly satisfactory results of the visit of Premier Ramsay MacDonald to the United States and Canada, and the better understanding created between the two great branches of the English-speaking family, the final withdrawal of British troops from Germany, the developing "will to peace" among all peoples everywhere, mark 1929 as a potent year in the cause of permanent peace through the development of international goodwill. A standard has been set for 1930 to follow and place on an even firmer foundation.

In Western Canada, in particular, the old year has been a time of testing for the greatest of our great co-operative enterprises. It has been a year of difficulty and constant anxiety for those to whom the management of that great enterprise is entrusted, as well as to every producer and business interest in this country. Fortunately, as the year closes, all indications point to the wisdom of the decisions arrived at by the Wheat Pool, and to the ultimate success of the policies decided upon. Confidence in the principles of true co-operation should, therefore, be strengthened and carried as an asset on the first page of the 1930 ledger.

Contrasted with the sound business principles, based on the law of supply and demand, adhered to by the Wheat Pool, the old year has surely taught tens of thousands of people a bitter and costly lesson in regard to the evils of stock speculation. Stock values cannot be boosted indefinitely. Over-inflation can only end in one way,—the bursting of the balloon. There is a streak in our human make-up which leads us to gamble, an intense craving for wealth not earned through our own efforts by work, an overwhelming desire to get something for nothing, or next to nothing. It is a fallacy. The happy contented man today is the one who, laughed at by his neighbors as slow and unduly cautious, invested in Government and gilt-edged bonds, and lost not an hour of sleep when speculative stocks tumbled and wiped out the life savings of thousands of less prudent men and women.

Finally, the old year must have impressed on Canadians a renewed realization of the fact that in their community, provincial and national life, as well as in the large sphere of their international intercourse and influence, there must be maintained that spirit of goodwill toward all classes irrespective of varying political views, racial descent, or religious creeds, and a Christian tolerance towards all which alone can promote real and lasting co-operative effort and advance the common interests of all. With some minor exceptions here and there this spirit characterized the Canadian people throughout 1929. May there be no exceptions whatever in 1930, and Canada and the world will be blest thereby.

Would Know Where Canada Stands

Soviet Ambassador To Great Britain Anxious About Relation With [illegible]

One of the first matters the new Soviet ambassador to Britain, M. Sokolnikoff, wishes to discuss, according to the London Daily News, is the relation between the Union of Soviet Socialist Republics and the British Dominions, notably Canada. Apparently Canada is not anxious for any changes at the present time and in this connection the Russians want to know just where they stand.

Both the Daily Mail and Morning Post are carrying on intensive campaigns against the resumption in relations between Britain and Russia, the Mail asserting that the Soviets have no intention of honoring their promises and the Post calling for mass meetings to protest against their attitude towards religion.

First Yank: "Did you hear that the fire department got rid of their efficiency expert?"

Second Yank: "No!"

First Yank: "Well, they did. He put unbreakable glass in all the fire alarm "

PUTNAM'S Corn Extractor is Efficient - Painless

Textbooks In Schools

Matter Is Discussed In British House Of Commons

The important matter of accurate geographical and historical text books in the schools of Britain and the Empire was raised in the British House of Commons. Rt. Hon. Sir Charles Trevelyan, president of the Board of Education, remarked he did not think he could convene a conference of publishers of schoolbooks in England and the Dominions, as suggested from a Canadian source, but he would be glad to use his good offices to bring the publishers into touch with representatives of the various governments.

Sir Charles said he was not entirely satisfied that the geographical and historical text books now in use were thoroughly up-to-date. He hoped the publishers were paying attention to the recent report of the Board of Education's committee dealing with the matter.

Solved Very Real Difficulty

Rotterdam Looked After Animals In Antwerp Zoo During War

During the bombardment of Antwerp, the firing and noise of the shells struck terror into the heart of the animals shut up in the great city Zoo, and, after the city was taken, the difficulty of how to feed the creatures seemed a very real one, when food was short for the people themselves. Then it was that an offer was received from Rotterdam that there would be a welcome given to the animals from the Antwerp Zoo until after the war.

Minard's Liniment for Coughs.

Will Build Huge Airport

One Of the Best Equipped Airports On Continent To Be Erected In Winnipeg

One of the best equipped airports on the continent, with facilities for land and sea 'planes, will be erected in Winnipeg under plans formulated by the special committee of the Industrial Development Board.

Following a meeting of the board and representatives of aircraft companies, J. M. Davidson, secretary of the special committee, announced the plans for the huge airport. Perfectly equipped landing fields will be constructed, Mr. Davidson said, and they will be large enough to take care of the city's requirements for many years to come. Steps are being taken to locate a suitable site for the airport.

NO BETTER MEDICINE FOR LITTLE ONES

Is What Thousands Of Mothers Say Of Baby's Own Tablets

A medicine for the baby or growing child—one that the mother can feel assured is absolutely safe as well as efficient—is found in Baby's Own Tablets. The Tablets are praised by thousands of mothers throughout the country. These mothers have found by actual experience that there is no other medicine for little ones to equal them. Once a mother has used them for her children she will use [illegible] else. Concerning them Mrs. [illegible] Hutt, Tancook Island, N.S., [illegible] "I have [illegible] children, the [illegible] just six months old. I [illegible] Baby's Own Tablets for them for the past 20 years, and can truthfully say that I know of no better medicine for little ones. I always keep a box of the Tablets in the house and would advise all other mothers to do so."

Baby's Own Tablets are sold by all medicine dealers or will be mailed upon receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

Voice Of Marconi Spans Atlantic

Explains Difficulties Of Early Days When Inaugurating Radio From England

The voice of Senator Guglielmo Marconi spanned the Atlantic Ocean recently, just as did the letter "S" 28 years ago on the memorial [illegible] when a radio signal coming from England was heard for the first time in America.

But unlike that early day when only himself was listening, today an entire nation heard him tell of the difficulties overcome in making the first trans-Atlantic signal [illegible] audible. He spoke through an extensive network of broadcast stations linked to the National Broadcasting studios in New York.

The voice of the pioneer radio inventor was brought to the United States by short waves, and a special receiver at Riverhead L.I., was linked by wire to the local studios and in turn to the network.

Dragged Down By Asthma. The man or woman who is continually subject to asthma is unfitted for his or her life's work. Strength departs and energy is taken away until life becomes a dreary existence. And yet this is needless. Dr. J. D. Kellogg's Asthma Remedy has brought a great change to an army of sufferers. It relieves the restricted air tubes and guards against future trouble. Try it.

Two Winter Exhibitions

Western Canada Fox Show and Western Turkey Show To Be Held In Saskatoon

Saskatoon will be the venue of at least two Western Canada shows next year according to reports submitted at a meeting of the directors of the Saskatoon Industrial Exhibition.

The Western Canada Turkey Show will be held at Saskatoon, February 18-21, inclusive, and the Western Canada Fox Show will take place in Saskatoon next November.

Archie Wilson, president of the local fair board, announced that the new winter fair building, being erected at a cost of approximately \$100,000, will be completed in about a month.

The Saskatoon winter fair will be held March 11-14, inclusive.

Use Of Waste Gas

Experiments Under Way In Saskatchewan For Use Of Gas In Connection With Clay Products

Extensive experiments are under way in Saskatchewan in connection with the use of waste gas in the manufacture of clay products. This work will be completed within the next few weeks, when the members of the commission enquiring into the situation will draw up their reports for submission to the Department of the Interior.

The tarpon of Florida can cover eighty miles in an hour.

Wily Dope Ring Smuggling Drugs

Canadian Health Is Menaced By Work Of Fiendish Operators

In a previous article it was pointed out that only during the last hundred years or so, have the most common of the harmful narcotics morphine, cocaine and heroin [illegible] used. And during [illegible] a problem of [illegible] gravity has arisen—the [illegible] habit, a habit that is a constant menace to the health of [illegible] every nation, and which organized and wealthy gangs of unscrupulous scoundrels find it in their interest to foster.

In Ottawa, and throughout the provinces and municipalities, we have well-equipped organizations to combat the drug evil. A brief summary of some of the things that these officers have encountered in their work, will give you an idea of the astounding ingenuity with which drug operators work, and of the immensity of the problem we have on our hands.

The utmost secretiveness surrounds the work of the [illegible] operator. It is seldom that the high-ups are caught, and yet in every transaction for the sale of drugs there is a man behind. Some of them have become millionaires, through this illicit traffic, and they are [illegible] or nearly always, clever enough to make their petty pedlars, who are usually addicts [illegible] will make [illegible] any sacrifice for the sake of an [illegible] supply of the particular drug they crave, "take the fall," which is the [illegible] used in the dope-peddling craft [illegible] to the penitentiary."

When a man is in jail, and has the money necessary to buy drugs, or has earned them through getting additional recruits for the operators, the weirdest means are used of getting drugs to him inside the institution. The police have found drugs concealed in a woman's hair, hidden [illegible] postage stamps on a letter, sewn in neckties or some other part of clothing, in canes, fountain pens or cigarettes. A man has been known to take a hypodermic needle into jail by hiding it in his nostril, or a ten-dollar bill with which to buy narcotics, in his ear, or the drug [illegible] hidden in the [illegible] heel of a shoe. These are deceptions that would not occur to most people but the [illegible] of the drug addict in [illegible] to get what he wants is something to [illegible] description.

Then there is to be [illegible] the cleverness with which the habit is spread. The covert invitation "Come to our snow party," that is given to young boys and girls, means that somebody is getting paid for it. When it is realized that a boy of 24 years of age, a convict in an [illegible] penitentiary, had before he was apprehended, taken about \$20,000 worth of drugs, and had never worked a day or earned a dollar in his life, you have some clue as to how it is done. He had brought [illegible] recruits to the [illegible] able "snow parties" staged by the big operators and had paid his way. His wages were paid in drugs.

Drug pedlars charge their poor depraved victims just what they can. The master minds in the ring gauge the market, and sometimes create a shortage just to get higher prices. It is then that crime becomes rampant, because so great is the distress of the habitue that, although he has no courage except in this one direction, he will do almost anything to get what his system demands. Cocaine frequently brings \$500 an ounce, and the victim usually has to steal this money.

The ports of entry into Canada have to be watched with eagle eyes by the narcotic division of the federal civil service. They recently uncovered a novel scheme at Vancouver, which operators were using to get contraband drugs in here. They had already discovered them in trunks with [illegible] bottoms, dried fish, in false lighting fixtures, which pedlars had fastened to the ceiling of the ship, but now they find that they have to go out to meet the ship, or the drugs will reach shore just the same. The wily drug dealer had been dropping his cargo of drugs overboard, encased in water-tight cans, [illegible] to the cans [illegible] little wooden floats. After the ship had docked, and the officers had finished their search, the operators, in peace, went out and picked up their cans again.

Sometimes the man carrying the profitable drugs will take out the whole wall of his stateroom, the partition being cut where the lower berth joins the wall, he puts his drugs in there, replaces the wall, and goes so far as to make a [illegible] painting job of the [illegible] affair in order to avoid detection.

The activities of the narcotic division have been concentrated recently on breaking a Montreal ring, which has been operating between Montreal and Detroit. They finally succeeded in catching their quarry, "with the goods," and they found when they did that a well regulated traffic of drugs had been carried on for years between these two cities with Pullman porters as the carriers. When the arrest and conviction of this "higher-up" took place, the price of cocaine went up \$45 an ounce over the traffic is controlled by a few might, which gives some idea of how powerful, conscienceless operators.

[illegible] are no limits to [illegible] these people will go in order [illegible] they may pursue their illicit trade. There [illegible] be no limits almost to which Canada should go in order to free herself of a danger that may become a curse.

It is worth almost any amount of [illegible] and patience, and it means that, to prevent one more young Canadian from joining the army of those to whom scientists refer as "the [illegible]" that is to say, the dope [illegible].

Has Praise For Canada

British Visitor Gives Glowing Description Of Canadian Cities To Manchester Audience

A glowing description of the general appearance of Canadian cities was presented to the Manchester Geographical Society by George Ginger. After speaking of his impression of the intense loyalty in the Dominion to the British Crown as the ideal of British unity, Mr. Ginger passed on to discuss the general appearance of such cities as Toronto and Hamilton. Here, he said, was every indication of great prosperity and rapid progress. There were no slum areas, but wide, [illegible] streets, fine trees, large open spaces and parks, and beautiful modern buildings. In the residential districts there were unfenced grass plots level with footpaths in front of all houses, and virtually every house had its verandah, where the people almost lived in the summer time.

There was an absence of any kind of public house or drinking saloon in these cities, which seemed to have a marked effect upon them. No evidence of poverty, vice or distress was to be seen, and the place of the public house seemed to be taken by palatial and comfortable cafes to which whole families went together. There appeared to be no place for men to congregate by themselves, hence most of their spare time was spent with their wives and families.

Each city vied with its neighbors, Mr. Ginger went on, in trying to impress its visitors with its importance in some way or another. It was as though Canada had caught the American boastfulness, but there seemed to him no doubt that Great Britain could learn much from Canada.

For one thing there was a strict control of advertising hoardings. In the city these are artistic, neatly framed, and of reasonable size. Moreover, he had not noticed any spoiling of the countryside by big and aggressive sign boards.

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Exterminator is an excellent medicine to destroy worms.

Mother (teaching son arithmetic): "Now, take the Smith family—there is Mummy, Daddy and the baby. How many does that make?"

Bright Son—"Two and one to carry."

Burwash Has New Theory

Explorer Thinks Franklin Party Tried Twice To Reach Mainland

A new theory which accounts for the fact that the bodies of only [illegible] one-third of the personnel of Franklyn's Arctic expedition aboard the "Terror" and the "Erebus" have been found was broached by Major L. T. Burwash, of the North-West Territories Branch of the Department of the Interior.

Major Burwash, who has just returned to Ottawa from an 18 months' trip through [illegible] Arctic and Arctic regions along the north coast of Canada, thinks the Franklin party made two attempts to [illegible] the mainland from King William [illegible] after being frozen in at Victory Point on the north shore.

From Victory Point the party, numbering at the time 105 men, has been traced down the west coast of King William Island to Starvation Point on the northern tip of Adelaide peninsula. Bodies of about one-third of the personnel have been found along this stretch.

Persian Balm invests every woman with subtle charm. Delicately fragrant. Cooling and healing. Dispels all roughness or chafing. Makes skins delightfully soft-textured. Every woman should use this peerless toilet requisite. Daintiness—beauty—refinement—Persian Balm achieves these in every instance. Softens and whitens the hands. Promotes clear and youthful loveliness. All women who care for additional charm unhesitatingly choose Persian Balm.

Renders Wool Moth Proof

Material Treated With New Discovery Fully Protected, Claims German Dyes Trust

Moth proof wool is the latest find of the German dyes trust. It was noticed that moths eating their way through a carpet carefully avoided certain colors, so chemists started an investigation of the chemical composition of the dyes in question.

The result was the discovery of a colorless substance which renders tissue of any kind impervious to moth attacks.

The expert, Dr. Hermann Stoeller, states that any cloth or other material may be treated with this substance either before or after dyeing. Not only moths, but even destructive tropical insects and beetles find such tissues indigestible.

The Indian cheetah, one of the speediest animals, can travel sixty miles an hour.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, is loved by Grace Farrel, but he doesn't know it. He marries Molly Winton, a ballad singer, and wins fame as a composer of popular songs. When their baby, Junior, is about two years old, Molly elopes with John Perry, Al's best friend. She and Perry take the child Al adores and sail for France. Al, broken by the loss, becomes a derelict, but one night when he revisits Blackie's place, Grace Farrel, now assistant manager, makes him promise that he will stage a comeback. After they plan Al's future, he leaves Grace, promising to return that evening. But as midnight approaches, he has not appeared. Grace is worried.

CHAPTER XXVII.

A few moments later a figure came rapidly around Grace's desk and stood by her side where she was shielded by the screen from the view of the crowd. It was Al—in new clothes, but with the old smile. As she rose his arms went round her and his mouth pressed against her own. It was the first real kiss he had ever given her!

With Al's arms still holding her close, Grace looked up into his face with an expression in which joy and wonder were mingled. She had dreamed of this hundreds of times, but always believed it could not possibly come true. Now that it had come true it seemed almost unreal, because it was so closely [illegible] with those long [illegible]. Yet the arms about her were certainly real and Al's kiss had the thrilling reality that never comes in a dream.

"Dear little Grace," Al whispered. "I've [illegible] thinking of you all day — [illegible] as I left you, standing in the Square, waving to me. I'm late—did you think I wasn't going to show up?"

"I knew you would come," answered Grace softly. "I've always believed in you and I believe in you now more than ever before."

There was a sound on the other side of the nearby door and a waiter entered, on his way to the dining room from the kitchen, just as Al released Grace. But the waiter saw the tell-tale movement and could not hide his astonishment. This little feminine assistant manager had a reputation around Blackie's place for coldness and aloofness.

"Well," said Al, when the waiter had passed on, "I must find Blackie and tell him what you've done for me. I think he'll be astonished at this quick change."

Al glanced down at his new blue serge, double-breasted suit with pardonable pride. Then he struck an attitude, holding his brown fedora in front of him in a burlesque pose, as if he were ready to be photographed. "Look me over, Gracie! How am I?"

"Splendid!"

"Well, if you say so I must be good. I have some new evening clothes, too, but I'm holding them for another night. No use dazzling you too much at first."

Grace laughed easily at his bantering manner, but behind her smile she was studying him closely. He was a little too gay and over-excited, his voice and hand trembled every moment or so.

"The next thing to do is to ask Blackie for a job," he said quickly. "Must have something to do, must get to work soon."

But Grace reached out quickly, took [illegible] "I just want to talk for a few moments. Sit down here beside me, Al," quiet, his hand and pulled him closer. "I can see you're a little nervous and excited. You've had a nerve-wracking day. Don't you think it would be better if you didn't start to work right away? I do. If you'll just relax and rest for a few days you'll [illegible] your bearings better. You and I will go for walks and talk [illegible] over. And on Sunday we might [illegible] in the country."

It was astonishing how [illegible] Al reacted to Grace's soothing tones and suggestions. He nodded slowly as she talked and the gleam in his eyes [illegible] over-excitement faded.

"You're right, Gracie," he agreed. "A man can't let himself go as I've done during all these months and then come back in a few hours just by buying a few clothes. I see what you mean—take the whole thing more slowly."

"Yes, that's right. Did you go to that hotel you pointed out to me from the Square?"

"Yes, I've got a nice room overlooking the Avenue. But if I'm not to talk work to Blackie, what do you want me to do now?"

Grace smiled, again he was the obedient child. "I want you to go home and sleep all night long."

"Now?"

"Yes, now. And I want you to call me at home tomorrow at noon—I'll just be getting up then—and take me to breakfast at the Brevoort."

"But who's going to take you home tonight—I counted on doing that."

Once more the tolerant smile came to Grace's face. "I'll take myself home alone, Al. I've done it a thousand times during these past three years."

"K. O. if you say so," answered Al, "but you know I don't quite like it. I'm afraid something will happen to you; I feel that I [illegible] protecting you—[illegible]."

Grace liked that speech. Self-sufficient though she seemed in contrast to Al, the chief longing of her life was for someone to love and protect her, someone to care where she went and why.

"Well, orders are orders," said Al briskly. "Just a word of greeting to Blackie and then I'm off. I see him across the room now. But I'll come back and say goodnight to you." Al paused. "And—if I do as you say may I have another kiss before I go?"

"I think so. In fact, I'm sure of it."

Grace stole a look round her concealing screen to watch him approaching Blackie. Then she retreated, for her cheeks were crimson from the thrilling sense of his presence. Al had no idea what it cost her to send him home in that business-like fashion. She longed to have him with her every day, every hour, as long as she lived!

. . . . . The days passed easily, gracefully, happily, and Al recovered rapidly. There were Sundays when they went to the country to wander across fields and sit side by side on [illegible] gazing dreamily at the [illegible] tree-tops and the [illegible] autumnal distances. There were nights when they sat hands clasped, on a green bench in Washington Square, planning the [illegible].

Then the time came when Al's nerves were strong enough to permit him to join Blackie's [illegible] show. He decided to do a few songs every evening in blackface, so no one would recognize [illegible] didn't want Broadway to know he was staging a come-back—he wasn't ready for the hectic life and razzle-dazzle glitter of the Street of Lights.

But his style of singing was so individual that he was recognized behind his make-up. Then the news penetrated the up-town section — Al Stone was found! — and his old cronies began to drift down to Blackie's. Marcus came to see him, song publishers made him offers. Again Grace saw the look of intense strain in his eyes; again plans for protection were made. Al made Grace his manager and refused to see anyone on business.

So the days drew on into winter, with Al close to complete recovery and almost ready for Broadway. Marcus wanted him to write some songs and sing in a revue and he had promised to do it.

During this period Grace was conscious of a sense of strain in herself. At first she wondered what caused it, then she decided it was the memory of Molly. Whenever Al mentioned Molly it was in a disinterested tone, but he always spoke of Junior with tender devotion. Grace asked herself these questions over and over again. Where was Molly? Had she obtained her divorce? Wasn't there a chance that she might return and try to win Al back again?

(To Be Continued).

MINARD'S KING OF PAIN LINIMENT

Filming Indian Life

Motion Pictures Will Preserve Usages and Customs Of Aborigines Of the Plains

The chiefs of the Blackfoot Indians near Gleichen, Alberta, approve of the motion pictures which are being taken of their tribe for the National Museum of Canada, according to Mr. J. H. Gooderham, Indian Agent to these Indians, who has written to this effect in a letter just received at the Museum.

The Museum archaeologist visited these Indians for nearly a week in October, 1928, and took some 800 feet of motion picture film but, as the Sun Dance is given only in summer, he could not take that, the most interesting ceremony of any plains Indian tribe. He again visited them for six days in October last, securing [illegible] specimens, but no motion picture film, as his allowance of film for the season had long been [illegible]. The [illegible] invited him to attend a pipe ceremonial but, having no film for the purpose, he went elsewhere to buy specimens for the Museum. The chiefs, according to Mr. Gooderham's letter (dated December 2, 1929), approve of [illegible] Museum taking motion pictures even of the Sun Dance. "Seeing is believing" with the old Indians states Mr. Gooderham, who goes on to state that the Museum postcard showing exhibits in place, which was sent to him to show to the Indians, "will do much to make clear" the Museum work "and the object of the archaeologist's visits." In a few years the old Indians will be dead, and as the young are more interested in wheat crops, threshing, elevators, auto trucks and hail insurance, than in the old dances and rituals, consequently if motion picture records of these are not soon taken the chance will be gone forever.

Visits Interesting Places

Mr. Jenness, Of the Department Of Anthropology, Ottawa, Recounts His Experiences

Diamond Jenness, Chief of the Department of Anthropology, of the National Museum of Canada, who recently returned from the Fourth Pacific Scientific Congress, held in Batavia, Java, where he represented the Canadian Government, gave an announcement of his impressions of that interesting country at the weekly meeting of the Gyro Club, held at the [illegible] Ottawa.

Mr. [illegible] is perhaps best [illegible] for his studies of the [illegible] commenced when he was ethnologist of the Canadian Arctic Expedition from 1913 to 1916. Several reports by him on this subject have been issued by the Canadian Government, and the MacMillan Company has recently brought out his popular book "The People of the Twilight." Before his Arctic experiences, however, Mr. Jenness spent a year among the natives of New Guinea, and published the results of his investigations there through the Oxford University, and the Polynesian Society of New Zealand.

Mr. Jenness has charge of the totem poles at the National Museum, and in 1926 and 1927, it was he who loaned his archaeologist to take charge of the Dominion Government totem pole preservation along the C.N.R. in Skeena Valley, British Columbia.

Ireland Claims Briand

Prime Minister Of France Is Of Irish Descent

Ireland claims a special interest in M. Aristide Briand, now for the tenth time Prime Minister of France, for, though a Breton, born at Nantes, the great statesman is of Irish descent. His great grandfather, Conell Briand, was an Irishman, who settled at Finisterre as overseer of a bleaching factory, and thence his family migrated to Nantes. Conell is said to have claimed descent from the great King Brian Boru.

Saskatoon's Power House Revenues

Power house revenue at Saskatoon for October was \$78,389.15, as against \$70,829.16 for October of last year. Operating costs and fixed charges were respectively \$36,088.76 and \$37,916.50. Had the same rates been in effect this year as last, the revenue would have been much higher.

A minister in a country church in Scotland stopped his sermon to ask a listener who was somewhat deaf: "Are you hearing, John?" "Oh! aye," was the answer, "I am hearing, but to verra little purpose!"

Benjamin Franklin was the first Postmaster-General in the United States. He was appointed for the Colonies in 1775. He received \$1,000 a year in this capacity.

Eat For Health and Enjoyment On Christmas

Appetite, Digestion and Good Health Wait On Following Menus

While Christmas is recognized as a day of feasting and its celebration would not be considered complete without a bountiful repast, the choice of the viands that compose the holiday menu has not always been wise. [illegible] eat well on [illegible] is [illegible], but [illegible] suffer from a bilious [illegible] is not.

[illegible] knowledge of food and combinations we [illegible] a meal which is [illegible] in its content and amount, and satisfying to the most [illegible] compiled by Mary A. Boettiner, well known American dietitian, are two menus that will serve alike health and appetite.

LIBERAL COST MENU

LOW COST MENU

Cream of Celery Soup
Crackers
Mock Duck
Mashed Potato, Gravy
Chopped Cabbage
Whole Wheat Bread, Butter
Carrot and Celery Salad
Tapioca Cream with Apple
Sugar, Coffee, Milk
(Milk for Children).

Lightest Metal In World

Lithium, Formerly Rare, Is Now Produced In Ton Lots

Production by the ton of a metal that floats like cork on water, the latest achievement of U.S. metal manufacturing, was revealed at the New York Electrical Society meeting by Dr. W. C. MacTavish, professor of chemistry at New York University.

The substance is lithium, the world's lightest metal, silvery in color, softer than lead, one half the weight of water, and such a ready mixer with other metals that its uses range from aviation to sweeter-toned bells.

Although recently produced commercially in Europe, lithium still is so rare that chemical catalogues at New York University quote it at \$340 pound.

The achievement is a quantity of production method, completed barely a month ago, making it for about \$15 a pound whole and in ton lots.

The big field of lithium is in alloys, the future of steel-making. It loses its softness when increased with lifting power of helium gas by about 15 per cent. by one of its peculiarities, which is sponge-like absorption of gaseous impurities.

Mr. Poster: Yes, it was a good idea to get a cat to clean out the mice. But why did you pick out a tomcat?

His Wife: Why, I thought a female cat would be afraid of mice.

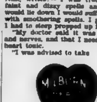
The state department has been instructed by President Hoover to invite all foreign governments to participate in the world's fair, to be held in Chicago in 1933.

Soft corns are difficult to eradicate, but Holloway's Corn Remover will draw them out painlessly.

Madras, in India, is one of the world's flattest cities, its highest point being only 22 feet above sea level.

The sea gets much salt from volcanoes, which discharge hydrochloric acid, one scientist concludes.

FAINT, DIZZY SPELLS
Had To Sleep Propped Up In Bed
Mrs. Norman Bishop, Salisbury, N.B., writes:—"I was troubled with faint and dizzy spells and when I would lie down I would suffer terribly with smothering spells. I got so bad I had to sleep propped up in bed.
"My doctor said it was my heart and nerves, and that I needed a good heart tonic.
"I was advised to take



and I had not taken one box when I could lie down and sleep like a child."
Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Facing Many Dangers

Toronto Professor Going To Abyssinia To Photograph Script Of Old Testament

Jealously guarded by monks for more than 2,000 years, Ethiopic translations of the Old Testament are calling Rev. S. A. B. Mercer from his chair in Oriental Languages and Egyptology at Trinity College, University of Toronto, to brave the dangers of Abyssinia. He will photograph the manuscript and return to the calm of varsity cloisters to use his prints of the ancient writing to enhance the world's knowledge of holy [illegible].

It was in the fourth century B.C. that the Old Testament was translated into Ethiopic, the ancient language of Abyssinia, and no European has ever glimpsed the manuscript, hidden in Coptic monasteries as the monks' most valuable possession.

"I have conceived the notion of preparing a copy of the Coptic scripture from rotogravure of the oldest manuscript I can find," said Professor Mercer today. "While manuscripts of the Old Testament exist in Europe, they are comparatively recent date, and many errors have crept into them. In study of the Old Testament use is now made of practically every language into which it has been translated except Ethiopic."

It is to supply this last link in the scholarship of Biblical history that Professor Mercer will travel without white companions through hundreds of miles of untracked African bush. "It will be terribly hard, of course," he admitted, "but I think it is a work that should be done."

In 1916 the savant was responsible for certain Abyssinian translations which brought him into touch with the Abuna, patriarch of the Abyssinian church. Upon the goodwill then built the adventurer stakes his bid for success in entering the monasteries and on his journey he will be guarded by native soldiery from attacks of hostile savages.

Professor Mercer sailed from New York on December 17, and will enter the second stage of his journey from Marseilles to North Africa on January 24. He carries a specially designed camera.

Simple and Sure. — Dr. Thomas' Eclectric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

Filming Wild Life

Alberta Government Taking Pictures For Educational Purposes

Wild life in the province of Alberta is being illustrated by the Alberta government in about 30,000 feet of film, and the work is not yet complete. Probably the chief interest in the film so far produced in the work, which is for exhibition and educational purposes, are pictures of a nest and eggs of a blue goose.

The pictures are of native birds chiefly, and bird nests, eggs, etc., but there are also illustrating fur farming in Alberta. The work of photographing wild life in the province will be continued next summer, it is understood, the idea being to secure films showing every phase of wild life, birds and animals. The pictures of the blue goose nest and eggs were obtained at Benedick's sanctuary, east of Leduc. The first showing of the film took place recently at the Sprucedale school, Leduc district.

For Benefit Of Pedestrians

England Has Novel Scheme Whereby Pedestrians May Control Traffic At Crossings

From England comes the announcement of a novel scheme to protect the rights of pedestrians in this age of ever-increasing automobile traffic. Electric buttons would be installed on street crossings whereby the lowly man on foot would himself be able to operate the "Stop" and "Go" signals. But not without certain restrictions. When he had halted traffic it would be but one-quarter of a minute before the signal automatically returned to "Go," and it would then be three-quarters of a minute before anyone else could again halt traffic. Thus the pedestrian would be given power to control the road one-quarter of the time.—New York Evening Post.

Mrs. N. (returning from three months' vacation)—Alma, do you think my husband has been [illegible] for me while I was away?

Alma: I hadn't noticed anything until yesterday, when he seemed very gloomy.

Aluminum remained a curiosity of no particular usefulness for almost 30 years after it was first produced.

Good for Toothache—Minard's Liniment.

Little Helps For This Week

"For all that is in the heaven and the earth is Thine."—1 Chronicles xxix. 11.

There shall never be one lost good! What was shall live as before;
The evil is null, is nought, is silence implying sound;
What was good shall be good, with, for evil, so much good more;
On the earth the broken arcs; in heaven the perfect round.
—Robert Browning.

No good that has been truly meant, though in the midst of mistakes, shall, in any upshot of life, be utterly lost. In the end of things the angels shall always come and gather the wheat from among the tares.
—Adeline D. T. Whitney.

[illegible]
—Frederic W. Farrar.

Worms, however generated, are found in the digestive tracts, where they set up disturbances detrimental to the health of the child. There can be no comfort for the little one until the hurtful intruders have been expelled. An excellent preparation for this purpose can be had in Miller's Worm Powders. They will immediately destroy the worms and correct the conditions that were favorable to their existence.

KINGMAN

Mr. and Mrs. Thor Gruhn were dinner guests of W. Moore's, of Ardmore on Christmas day.

Mr. and Mrs. A. Shanden spent Christmas with relatives at Westlash.

Mr. and Mrs. Jack Hardin, of Vegreville and Mr. and Mrs. S. Simonuk and family, of Round Hill were the guests of Mr. and Mrs. P. Rodzosky on the 26th.

Father Rodzosky, of Edmonton is spending the holidays with her parents, Mr. and Mrs. P. Rodzosky.

Mr. and Mrs. A. Asp and family motored to Dapsland on Tuesday, returning on Thursday.

Dinner guests at the O. Thompson home on Wednesday were Mr. and Mrs. W McIntosh, Mr. and Mrs. Geo. Welch, and daughter, and Mr. and Mrs. P. Stanley and family.

Mr. and Mrs. T. Jardin motored to Camrose on Tuesday.

Mrs. A. Asp and daughter, Bernice are visiting with friends in Wetaskiwin for several days.

Mr. and Mrs. Jos Monsen and family, Joshy and Jacob Monsen and Miss Helen Ophert of Camrose were the guests of Mr. and Mrs. C. B. Skjerve for Christmas dinner.

Jacob Bonsen is drilling a well for Mr. Naerland, of Bardo.

Mrs. C. Lindberg visited at Daysvile on Friday

Mrs. Jack Erickson and daughter Connie are visiting with friends in Edmonton over New Years.

Miss Mabel Simonsen, of Coronation is visiting at her home here for a couple of weeks.

Mrs. Roy Mobuh was a Camrose visitor on Saturday

THE U. F. A. MEETS AT HEAD BYE'S HOME

The regular meeting of the Tofield Local of the U. F. A. was held at the home of Mrs. A. Head-Bye on the evening of December 20th. 31 was well attended. Following the usual routine of business the winter programme called for a paper on the subject of "Maintainance of soil Fertility". Mr. George Abernethy who had been appointed to deal with this topic gave a splendid talk in which showed every evidence of thoughtful preparation. He dealt with the history of the soils; showed the origin in the soils that were mentioned in plant food, the continual cropping gradually exhausted these elements and that it is impossible farming The speaker then outlined methods of maintaining and restoring these elements, dealing very fully the varying efforts that different natural processes and cultivation had on the crop yields. On conclusion Mrs. Evanish served an appetizing lunch. A hearty vote of thanks was tendered to Mr. and Mrs. Bennett and to Mr. Abernethy.

LOCAL AND PERSONAL

Mr. Frank Carter visited his parents in Edmonton on New Year's day.

The Tofield Hockey team plays the return game with Holden on Saturday, January 11th.

Mr. E. Lamont was an Edmonton visitor over the week-end.

Mr. and Mrs. Geo. McLaughlin motored to the city on Sunday last.

Miss Hudson of Edmonton, daughter of Mr. and Mrs. Hudson of the Royal Alexander Hotel visited her parents during the Christmas holidays.

By all reports our friend Laurie Scott is becoming a real favorite with the fans and management of the Duluth Hornets. In the Christmas day encounter he scored the winning goal and now his team are leading the league

OLD TIMES PASSES

Mrs. Arthur (Georgina) McKelley, a well known resident of this district passed to her reward in an Edmonton hospital on the days of the old year were drawing to a close.

Mrs. McKelley, leaves a sorrowing husband and one son and one daughter, besides many other relatives.

The funeral was held on Wednesday January 1st, service being held in the United Church, the Rev. Gordon officiating. Interment took place in the Tofield cemetery. The floral offerings were numerous and beautiful.

U. F. W. A. NOTES

The annual meeting of the U. F. W. A. was held at the Municipal building on December 19th. The retiring president, Mrs. Johnson Ferguson, and secretary treasurer Mrs. C. C. Philips each received a vote of thanks for their faithful and valuable services during the past year.

The officers elected for the ensuing year are Mrs. A. M. Scott, president, Mr. J. B. Warner, vice president, and Mrs. M. Seale secretary treasurer. The directors are Mrs. Barnes Mr. Dodds, Mrs. Gray, Mrs. T. E. Seale and Mrs. Bardsard. Sick convener, Mrs. Morton, Mrs. Gray and Mrs. Barnes.

The next meeting will be held at the municipal building on January 8th at 2 p. m. Roll call will be answered by "My first impression of Tofield". Mrs. Bapist will give a paper on "Have we benefited by our Creed"? Also delegates will be chosen for the Annual Convention, which is to be held at Calgary from Jan. 21st to the 29th.

NOTICE

The next meeting of the U. F. A. will be held in Town Hall, weather permitting, at 8 p. m., January 9th. The usual business will be to consider the resolutions that are to go before the annual convention at Calgary and I choose two delegates to represent Tofield at this important gathering.

M. SCOTT

LAKE SIDE

Miss Edith Riley spent the Christmas holiday with her parents.

Miss Myrtle Boland also spent her holidays at the parental home.

A very enjoyable dance was held in the Community Hall on New Year's Eve.

Mr and Mrs. Sherlock entertained a few friends on Friday evening last week in honor of their daughter, Mrs. Charles Bonny who visited them during the Christmas holidays. The guests were Miss Margaret and Arthur Wood, Mrs. Dorothy Walker, Mr. and Mrs. Lovell, Melville and Mrs. Wood and George Abernathy. A very pleasant evening was spent.

Mr. and Mrs. J. B. Warner went to Edmonton on Monday to attend the wedding of Mr. Warner's brother Donelly which took place on Tuesday last.

Mr. and Mrs. Ralph Neal left on Saturday for their home in B. C. after visiting relatives and friends for a week or two.

BEHIND THE HOG

(By A. B. C.)

In an exhibition game on Christmas day, Holden's, "Butchers" pulled down a 7-0 victory over the Tofield last end, against a well known rinking crew.

It is a real treat for the fans to watch the curling, with the doubles game, and the new sliding and paint in the curling rinks.

The final for the ladies' cup between the president's and vice-president's camps, was played between Mrs. Lee and Geo. McLaughlin before a large gallery on December 31. The game was a tie at the 11th end and Lee was on the 12th end, Mac just missed a draw to the button by an eye lash.

12 rousous we had to give Dr. Law for not winning and "I'll tell you why". Harcus brown, but wright, poor scrapping, poor judgment, not enough points, balance alike.

On a scheduled game Mac took revenge on John Lee. Score 8—7.

CARD OF THANKS

Mr. Arthur McKelley extend sincere thanks to the many friends who tended help and expressions of sympathy during his recent and bereavement.

Ladies Bonspiel In Full Swing

The Tofield Ladies' Annual Bonspiel opened with much enthusiasm on Tuesday morning. The weather was ideal and Mr. Scott had the ice in splendid condition for play.

There are seven visiting rinks playing, all from Edmonton, and seven local rinks, making in all fifty-six curlers.

The following ladies from Edmonton skipped rinks: Quesnel, Conn, Terwilliger, Husel, Norquay, Mann and The local ladies skipping rinks are as follows:

Ice, Hammond, Brace, Gray, McCauly, Clutterham, Letourneau and Laughlin.

There are three competitions, viz.; Grand Challenge, The Ash Cup, and The Young Trophy while the Kline Cup is the consolation. There are many beautiful prizes to gw with these trophies which are as follows:

Grand Challenge—1 4 silver cake plates; 2, 4 cups and saucers.

Ash Cup—1, 4 silver cake trays; 2, 4 gyrex casseroles; 3, 4 beautifully decorated teapots; 4, 4 small cakes.

Kline Cup—1, 4 silver bon bon trays; 2, 4 teapots; 3, 4 china dishes; 4, 4 ladlers.

In the morning draw, in the Young Cup Competition, the Edmonton lad, Ian made a complete sweep of the four games played.

On ice 1 Mrs. Quesnel and Mrs. J. Lee or had a very close game, with Mrs. Quesnel having a little edge, by more than one instance Mrs. Lee would have recovering ends piled up and Mrs. Quesnel would get her out with a well placed shot. In the 10 end Mrs. Lee had a chance to win the game up, but she had to much weight her rock sailed right through the house. The final score was 9—5 for Mrs. Quesnel.

On ice 2 Mrs. Norquay trounced Mrs. Letourneau by a score of 12-4 It was Mrs. Norquay's game all the way through and the score is a fair indication of the game.

On ice 3 Mrs. Conn and Mrs. Brace were having a real game. Mrs. Brace led by a comfortable margin until the 7th end, when the score was 7-6 in her favor In the 8th and Mrs. Conn collected a 4 ender and added one more in the 9th end. In the 10 end, big Bessie and Mrs. Conn got the winning counter. Mrs. Brace just missing her shot by inches.

On ice4 Mrs. Terwilliger nosed out Miss Gray by a score of 8-7. The game was rather one sided until the 7th and 8th ends when Miss Gray collected a two and 4 ender. Up to this time Mrs. Terwilliger had collected 5 points. Miss Gray fell one short of tying the game in the 10th end.

In the 12.30 draw of the Young Cup Competition Mrs. McLaughlin had the honor of losing the first Tofield to win a game by defeating Mrs. Mann 11-10. In the 10th end Mrs. McLaughlin counted a single bonne, but Mrs. Mann got the tying counter on an entire end was piped. The most spectacular shot of the game came in this end, Mrs. McLaughlin was lying three bon Mrs. Mann let go a runner and cleared the house. Mrs. Mann and Mrs. McLaughlin won the game with, the last rock, making a draw shot to the button. The game proved to be a large gallery.

On ice 7 Mrs. Hurd and Mrs. Hammond were having a hard fought game. It was a very close game, first one scored a 2 ender and then the other. It was a tie game at the 8th end. At the 9th end Mrs. Hurd gathered in a 2 ender and the best Mrs Hammond could do was to get a single point in the 10th end. The final score being 10-8 in favor of Mrs. Hurd.

On ice 8 Mrs. Muir had a slight edge all through the game and defeated Mrs. McCauley by the score of 9-6.

On ice 4 two Edmonton rinks, skipped by Mrs. Conn and Mrs. Hammond. Mrs. Conn had a slight lead until the 7th end when Mrs. Norquay fell one short of tying it up when she collected a three ender. But Mrs. Conn again drew into the lead when she added 2 in the 8th and 3 in the 9th. Mrs. Norquay gathered 4 in the 10th but she fell two short of a tie game and the score was 11-9 for Mrs. Conn.

In the 2.30 draw there were some thrilling and exciting games played, followed by a large gallery. These games were in the Grand Challenge Competition.

On ice 1 Mrs. Clutterham and Mrs. Lee both Tofield clique met. The was a very close and exciting game. Mrs. Clutterham was one up coming home, she was also laying shot well guarded, when Mrs. Lee with her last rock raised Clutterham's guard setter own rock, laying second shot, and tied the game. In the extra end Mrs. Clutterham collected 3 points and won the game 12-7.

On ice 2 Mrs. Quesnel defeated Mrs. Brace by a score of 11-6. This game was very close, But Mrs. Quesnel finished strong and collected 4 at the 8th end and from here on was never headed.

On ice 3 Mrs. Muir of Edmonton and Mrs. Mann, also of Edmonton to take the sheet end ofthe 10-1 score. Mrs. Muir was strong all the way through and collected two 4 enders.

On ice 4 Mrs. Terwilliger and Mrs. McCauley had to play an extra end before Mrs. McCauley won out by a score of 9-8. Mrs. Terwilliger was one up coming home but Mrs. McCauley scored one in the 10th end and went on to win the 11th end by counting one. Final score 9-8.

In the 4.30 draw the Grand Challenge Competition was resumed.

On ice 1 Mrs. Conn defeated Mrs. Letourneau by the score of 11-6. Mrs. Letourneau got all her points by two 2 enders in the 7th and 9th ends. Mrs. Conn added her points steadily and scored a three ender in the 8th end.

On ice 2 Mrs. Husel led all the way and defeated Miss Gray by the score of 11-8. She got a 2 ender in the 9th end. Mrs. Husel was never headed.

On ice 3 Mrs. Norquay ran away from Mrs. Clutterham by the score of 11-3. Mrs. Norquay had all the way, she got 3 2 enders.

On ice 4 Mrs. Hammond defeated Mrs. McLaughlin by a score of 10-4. Mrs. McLaughlin held her own for 7 ends, then Mrs Hammond gradually drew away from her.

This finished up the curling for Tuesday.

The remainder of the bonspiel draws will be published next week.

UNITED CHURCH HOLDS ANNUAL MEETING

On January 10th the United Church held their annual meeting commencing with a turkey supper. Full justice was done by 84 persons to a hearty meal served by the ladies of the church.

After the congregation there went upstairs to hold the meeting. The reports from the various districts and organizations showed that all were very active, yet the finances of the church are not in a healthy condition. Mr. Low's report showed that the church owed $600 in debt and must behind $225 during 1929. The W. M. S. fund allotment was still $120 short of being met. Of this amount $42 was subscribed by those present. The W. M. S. met their obligation, as did Lebanon, Ketchemseet and the Sunday school. The latter's report indicated that the Sunday school finances were satisfactory. The Y. P. S. are working on a play to be held in February, part of the proceeds of which will be used to liquidate church indebtedness. The part of the play is a good one and it is hoped that everyone will have an opportunity to see it put on.

In closing let me ask you to ask yourselves these questions: Would I care to live in this town if there were no church here? Would I be satisfied to keep my children at home

for their religious education instead of sending them to Sunday school? Am I doing my share to keep He in my church? Remember, we were not placed on earth to be a burden to others but to help them.

Jupiter Pluvius, may have fell down on the job last year, but the asset was a regular visitor on over.

In Tofield and district, the farmers held under 50 visitations, increasing the population by that much.

In nearly all cases during Low was present in our that the new arrival got the right sand off.

There were only four marriages recorded as taking place here, last year, while the deaths numbered 15. In the town itself there were 24 cases of infectious and contagious diseases reported throughout the year.

Born—To Mr. and Mrs. H. Dubonski, of Round Hill, on Jan. 12th, a daughter.

Born—To Mr. and Mrs. Chester Coombes and January 12th, a son.

Born—To Mr. and Mrs. M. Brownlee, January 13th, a son.

Mr. John Craig of Benton, Man. is visiting his son. Mr. C. J. Craig of Tofield.

Mrs. W. L. Foreman received the sad news of the death of her brother Mr. O'Hara, who died in Sydney, Nova Scotia.

Mr. Swift has been visiting Calgary for a few days.

Mr. Mannie Caillouet, mechanic of Swift's garage, left on Tuesday for Calgary where he will attend the Ford service school. He expects to be back on Saturday morning.

Miss Vilma Kirk, was married on Christmas day to Mr. Kent. They were married at MacLeod, Alberta. Miss Kirk is the daughter of Dr. M. Kirk.

The ladies bonspiel is a full swing and fine curling is being witnessed. There are 14 rinks entered from Edmonton and 8 from Tofield.

Miss Mabel Thompson spent several weeks with Mr. and Mrs. Bagnall and family.

Mr. Chow Wing-Oh a former employee of the Club Cafe is at present visiting the cafe. He has been employed in Victoria for the past two years.

Mr. J. D. Hannan was a visitor to Edmonton on Monday.

Dr. Morrison who had a severe attack of the mumps is up and around again.

Mr. Martz who has been visiting his daughter Mrs. Snell, returned to his home at Dalhousie on Friday last.

The editor is sick with an attack of pleurisy.

The Young People's Society held a shaking party at the rink a Monday night. Mr. Frank H—d beat his Bodie—Photograph down and provided music for the shakers. All but shaking the Young People went to the church where they had hot chocolate served to them, after which they went home everybody declaring to have had a most enjoyable time.

The meeting of the United Church Tofield, was held at the Church on Friday night at 8 o'clock and was well attended to be sure there were many present to hear the report of the various departments of the church. The ladies served supper prior to the meeting.

The various Bridge Club resumed its meetings on Wednesday last, after a two weeks stop during the holidays. Mrs. Ash entertained at Carr's and the usual pleasant afternoon was spent, ending with a tasty lunch provided by the hostess. There were no prizes given during December, the membership fees used for this purpose being donated to needy families. An extra dollar was also donated to this fund by a friend who had substituted a number of times for different members. This offering was much appreciated by the needy parents Tofield won, twenty-two points Tofield won, twenty-two points Tofield lost by a score of 21-22.

The personnel of the Tofield rinks were as follows: J. W. Thompson, C. Hobson, J. Chapman, J. Lee, skip; A. E. Calbert, G. Blunt, R. Stitch, Geo. McLaughlin, skip.

Ketchemseet Items

Mr. and Mrs. Beens and girls entertained a large number of Ketchemseet young people to a party New Year's Eve. Games, dancing and cards made amusements for all. At midnight lunch was served enfeteria style. Several hours later all departed and reported a most enjoyable evening.

A pleasant evening was spent at the home of Mr. and Mrs. Herman Lawson when they entertained a number of guests in honor of Miss Mable Lawson New Year's Eve.

The many friends of Post Mortem and family are grieved to hear of the death of Mrs. Paul Mullen at Vancouver, January 2nd.

Mr. and Mrs. A. Healey visited with Mr. and Mrs. Simpo several days last week.

School re-opened Monday after a two week's holiday with Mr. Wm. Allison of Edmonton as the new teacher.

Mrs. Simpson returned to Edmonton Monday evening after spending several days at the home of her daughter Mrs. C. Whitham.

Mrs. G. W. Sears left Monday evening for Victoria, B. C. where she will visit with relatives for two months.

Miss Viola Lee is home again after clerking for several months at the Farmer's Co-operative store.

Miss Mabel Lawson left for Wainwright Saturday where she is teaching.

Mrs. Keithe Oliver also left for her school at St. Paul.

The infant son of Mr. and Mrs. Maurice McBride has been seriously ill for some time. It was taken to the hospital at Edmonton Tuesday We hope that it recovers fully there

Lindbrook News

The annual ratepayers meeting took place at the school here last Friday at 2.30 p. m. Mr. Earl Wil-

The people of Lindbrook were shocked to hear of the death, in her home at Mrs. Paul McMullen and extend their deepest sympathy to Paul and family on this their sad hour. The late Mrs. McMullen was well known and universally liked by all here. The death occurred on Tuesday.

A whist drive was given hot Friday by Mr. and Mrs. Joe Lepine at their home. It was well attended despite of the weather and all thoroughly enjoyed some. Mr. and Mrs. A. Fauvel were first prize winner Mr. W. Pentaire won the gent's booby and Mrs. D. McCw the ladies' booby.

Dr. Law was out here just after Christmas and vaccinated all who wished to be done. This was done at the request of the school board on account of the numerous cases of Cancrose and surrounding districts. Luckily to date no cases have occurred at Lindbrook.

TOFIELD CURLERS WIN 17TH-ITIES CUP AT VIKING

Two new curling rinks journeyed to Viking on Monday to play Viking rinks for the Northwest Utilities cup, donated by McLaughlin and Lee made the trip and played against rinks skipped by McCaley and Slavin respectively. Both games were 14 enders, McLaughlin winning his game and Lee losing his. In total points Tofield won, hunting Viking by a score of 21-20.

The personnel of the Tofield rinks were as follows: J. W. Thompson, C. Hobson, J. Chapman, J. Lee, skip; A. E. Calbert, G. Blunt, R. Stitch, Geo. McLaughlin, skip.

Tofield Coal Co. Buys Dobell Mine

TOFIELD COAL COMPANY ACQUIRES PROPERTY

Negotiations were completed recently whereby the Dobell Coal Mine property just south of town was taken over by purchase by the Tofield Coal Company, with C. Gallinger as manager.

The Dobell coal mine property has been in active operation for many years. It was opened up by and operated under the management of Mr. T. R. Henderson, who now resides in England. During the past few years, the amount of coal shipped has gradually diminished. The mine was in active operation at the time of the sale. The Coal Company's official when asked by the Mercury the amount declined to state a figure.

The Tofield Coal Company, whose property adjoins that of the Dobell Coal Company which they have just purchased, have been in active operation here for many years also. As far back as seventeen years, the company was in operation with C. Gallinger as manager. The Company has maintained or gradually increased its shipments during the years.

The properties lie side by side and the Tofield Coal Company management will take control of the new acquisition. Mr. Lane, we understand, will move to the city. Mr. O'Hara, who has been bookkeeper for the Dobell Coal Company for some time will be retained by the new owners.

TOFIELD BADLY TRIMMED AT HOLDEN

On Saturday, the Tofield puck chasers journeyed to Holden to again meet the Holden aggregation. The Tofielders held their own for the first ten minutes of play and it looked as if it was to be a tight game. However, after ten minutes play Holden scored and they never ceased to put them in until the final bell. The final score was 12 to 1 in Holden's favor. It was not that they were so much better players than ours, but they did play much better hockey. They had combination and stronger both. Holden has blossomed into a real hockey town. There are four fast hockey teams of approximate equal strength and they have plenty of opportunities for practice The council gave the hockey club a donation of one hundred and fifty dollars, and they are well away They hold the Dawson trophy having defeated last years both Edmonton and Viking. There were days when hockey team from Holden were considered "easy pickin's" for Tofield but evidently those days have passed.

The Holden game was clean, there were penalties

LINE UP Tofield, Beetch goal, defence, Martin, Hannan, forward, White, W Worton, S Worton, E Martin

Holden goal, MacPherson, defence, Hurum Black, forwards, Mc-Farlane, Paul Brown, Allan. U. MacPherson.

MIDGET HOCKEY

The Tofield midgets met a team from Holden at the local rink on Friday night. It was a good game but the ice was rough and soft in places.

From the beginning Holden pressed onto the lead and though hard pressed by the locals, maintained it it until the last period, when Tofield after repeated effort succeeded in tying up the count, the score then being 5—5. Both teams tried hard for the winning counter and while Tofield literally bombarded the Holden goalie, he kept his citadel intact, but in one of the end to end rushes, Holden put a neat counter past the Tofield goalie, this one proving to be the winning counter.

Tofield lineup: Cecil Dodds, Defence, R. Martin, W Taylor, forwards J White, W. McCauley, B. Clutterham, Subs. Lee Barnet, J Beeves, A Law, C. Reeve

NEW FILM ARRIVES IN CLEAN CUT RUSH

For Films, comedy-drama of youth, "Prep and Pep," opens at the Variety, next Saturday, January18th.

The production of clean-cut humor was directed by David Butler and features two of the screen's most popular juveniles, David Rollins and Nancy Drexel.

It is a story of Cyril Sneed (David Rollins), a bashful boy with European manners who comes to Calvert Academy where he is expected to live up to the athletic reputation of his famous father, Tiger Sneed.

Unsuspecting, Cyril is led to the slaughter and makes a sorry display of his athletic prowesses. Crushed by determination to win away Tom school. He so stopped to this by the commandant and his daughter Dorothy (Nancy Drexel), the latter in love with Cyril.

How Cyril fights his way to honor in school thletics provides a series of episodes that ends with the rescue of Dorothy in a prairie fire and wins him a niche of honor in the history of the school.

The background of the story is a military academy with hundreds of cadets. Most part of the picture was filmed at Culver Military Academy, in Culver, Ind. Others included in the cast of "Prep and Pep" besides Rollins and Nancy Drexel are Lucien Darrow, E. H Calvert and Frank Albertson.

Kingman

Mr. and Mrs. Henry Bray of Edmonton spent the week-end with Mr. and Mrs. Ross.

Mr and Mrs. E. Erickson and son and Roy Mahrh motored to Edmonton on Sunday.

MR. PINCOTT GIVES INTERESTING TALK

The citizens of Ryley and surrounding district were given a treat on Sunday night, in the Ryley United Church, when Mr R. W. Pincott gave a talk, relative to his seventeen years residence in South Africa, his subject being "The Zulu—his thoughts, words and deeds". Mr. Pincott presented his subject in a very comprehensive manner, bringing out many interesting points which could only be done by one intimately connected with the people of that far distant, and even those who drove many miles to hear him speak were well repaid for the effort. Mrs. Pincott gave a violin solo both before and after the lecture, and Mrs. Mabee gave a piano solo, also a vocal duet with Mrs Bendiksen. Mr. and Mrs Geo. Bloent accompanied Mr. and Mrs. Pincott and all four were cordially entertained at the home of Dr and Mrs. McPherson. It was through the efforts of the latter that Mr. Pincott appeared in Ryley at this time. He is speaking at Holden on Wednesday night.

COMUNICATION

The editor of the Tofield Mercury

In accepting your offer of space in the Tofield Mercury to reply to your article on advertising. I will ask you to publish an extract from, "Principles of Political Economy" by Thomas Nixon Carver, professor of Political Economy in the Harvard University. Advertising occupies an prominent space among the forms in which the art of persuasion is carried to a high state of development in modern times. To what extent advertising is economically justified has been a difficult question and must remain so. Advertising is sometimes educational. The individual sometimes learns from advertising where he can get something which he really wants and has wanted for a long time. Without advertising he might have found difficulty in getting it. This applys, however, mainly to new products that have recently been put upon the market. One scarcely needs an advertisment to tell one of the existence of soap or codfish, or to acquaint one with the fact that such things are to be purchased at stores. In many cases of this kind the only effect on advertising is to persuade the consumer to use one man's product rather than another's. One producer realizes that if he does not advertise, consumers may buy the other man's product. The other man is then compelled to advertise in order to defend himself against the first advertiser, and thus it becomes a race, or contest, to get the consumer's trade, and no addition whatever is made to the national wealth or to the well being of society. It is not improbable that eventually the public will exercise its authority and use its power of compulsion to limit or redirect the advertising business.

Yours truly,

Will Abernethy

Men's Bonspiel Hitting On All Six

The Tofield Annual Bonspiel got away to a flying start here on Tuesday morning, when eight rinks swinging into action in the morning draw. There are five visiting rinks and twelve local rinks in the competitions. The visiting rinks are skipped by, Murray, of Camrose; Graham, of Viking, Walters, of Viking, Rice, of Edmonton, and Winteringham, of Edmonton. The local skips are, McLaughlin, Lee, Agnew, Chapman, Rowe McCauley, Hammond, Warner, Foreman, Jobb, Hobson and Hannan.

With such old bonspielers as McLaughlin and Lee some good curling should be witnessed before the spiel is over.

There are four competitions viz., McCallum Cup (Grand Challenge), Boon Cup, Terwilliger Cup and Pincott Cup. There are many beautiful prizes to go with these trophys and are as follows:—

Grand Challenge— 1st, 4 silver tea sets; 2nd, 4 Hudson Bay Blankets; 3rd, 4 silver Cake Plates; 4th, 4 silver Candle Stick Holders.

Boon Cup— 1st, 4 white sweaters; 2nd, 4 silver casseroles; 3rd, 4 silver candy trays; 4th, 4 silver salt and pepper shakers.

Terwilliger Trophy— 1st, 4 silver pitchers; 2nd, 4 beautiful mirrors; 3rd, 4 broadcloth shirts; 4th, 4 cigarett lighters.

Pincott Cup— 1st, 4 brown sweaters; 2nd, 4 casseroles; 3rd, 4 caps; 4th, 4 salt and pepper shakers and ash trays.

In the morning draw Rowe, of Tofield beat McCauley of Tofield in the Boon competition by the score of 17-4. It was a walkaway for Rowe. He was never in danger of losing. Rowe got two four enders and one three ender.

On ice two, Hannan, of Tofield lost to Murray of Camrose by a score of 9-8. This was a hard fought game. It was tie coming home, Murray laid shot, but Hannan had a good opportunity to win when all he had to do was play dead on his own rock, but he got a roll and Murray got the precious point. This was in the Boon competition.

On ice three, Walters, of Viking defeated Hobson, of Tofield in the Boon competition by a score of 11-6. Both played a steady game with Walters having the edge. There were no big ends.

On ice four, Foreman and Jobb, both of Tofield were having a real match. This was Jobb's game until the 9th end when Foreman got a six ender and led by a score of 9-7. Jobb came right back with 2 three enders. Foreman collected 2 in the 11th end but missed his shot in the 12th end. Jobb won by a score of 13-11. This was in the Boon competition.

On ice one, Graham, of Viking defeated Jobb of Tofield in the Boon competition by the score of 10-9. Jobb led all the way and it looked as if he was going to have an easy win. He was leading 8-4 at the 8th end but Graham would not admit defeat and added steadily to his total and forced the game into an extra end. Graham got the extra point and won the game.

On ice two Chapman, of Tofield [illegible] Rice of [illegible] in the Boon competition by a score of 12-5. Rice [illegible] off good with a 2 ender,but this was short-lived. The score is a fair indication of the game.

On ice three Hammond defeated Agnew in the Boon competition by the score of 15-8. They both collected a four ender. Hammond played a steady game and was never in danger of losing.

On ice four, Lee defeated Warner after a hard fought battle. Lee won the game on his last shot, he needed three to win. Warner layed second shot. Lee wicked Warner's second shot out and layed to count three and win. The final score was 10-9 This was in the Boon competition.

In the 12 o'clock draw Hobson, of [illegible] defeated Murray, of Camrose in the Grand Challenge by the score of 12-7. It was a good game, both rinks curling steady. Hobson got a five ender in the 3rd end. He was never in danger of losing.

On ice two, McLaughlin, of Tofield and Winteringham, of Edmonton had a close battle. The game was in doubt until the last end when McLaughlin got the extra point to win [illegible] home. They both collected 3 enders. This game was in the Boon competition.

On ice three, Warner defeated McCauley in the Grand Challenge by a score of 17-10. It was a walkaway for Warner and he was never in danger of losing.

On ice four, Hannan, of Tofield defeated Walters, of Viking after an extra end in the Grand Challenge by the score of 14-12. Walters had a slight edge up to the 7th end. Then Hannan drew ahead and at the 10 end was ahead 11-8, but Walters scored a four ender to go ahead but Hannan came right back in the 12 end to tie it up and went on to get the extra point in the 13 end.

In the 3:30 draw Agnew, of T[illegible] defeated Rice, of Edmonton in the Grand Challenge by a score of 19-4. Agnew nearly put himself in the hall of fame by collecting a seven ender in the 4th end, one more would have done it. This game was all Agnew.

On ice two, Rowe defeated Lee by a score of 12-7 in the Grand Challenge. Lee was well up until the 5th end, then Rowe took the lead and kept it till the end of the game.

On ice three, Graham, of Viking defeated Foreman, of Tofield by a score of 13-6. This was Graham's game all the way through.

On ice four, Hammond, of Tofield defeated Winteringham, of Edmonton by a score of 10-7. This was a close game with Hammond having a slight edge.

In the 6:30 draw McLaughlin defeated Jobb in the Grand Challenge by a score of 13-7. There were no large ends collected in this game, both rinks were playing a steady game. The score is a fair indication of the game.

On ice two, Hobson defeated Chapman by a score of 15-10. They both collected three enders and curled a steady game.

On ice three, Hannan defeated Agnew to enter into the fours of the Grand Challenge by the score of 12-11. Agnew was one up coming home but Hannan got two to win. It was one of the closest and exciting games of the spiel so far.

On ice four, Graham, of Viking defeated Rowe, of Tofield by the score of 12-6. This was in the Grand Challenge competition and the score is a fair indication of the game. Graham led most of the way.

In the 9:30 draw Hammond defeated Warner in a close game by the score of 12-11. Hammond got two three enders and Warner got a four ender. Both skips made a good shot. Hammond lay shot when Warner with a well timed shot wicked off a guard to the button and lay shot, this was well guarded by a Hammond rock. Hammond then raised his guard on Warner's shot rock and lay shot to win the game.

On ice two, Jobb defeated Rice by the score of 9-6. This was a very close game and a tough one for Rice to lose. There was not much to chose between the two rinks, but Jobb had a slight edge.

On ice three, Murray, of Camrose defeated Rowe by the score of 15-6. This game was all Murray and the score is a fair indication of the game.

On ice four, McLaughlin entered the fours of the Grand Challenge by defeating Hobson by a score of 12-7. At one time Hobson was down 10-0, but he came up to 7 but was unable to get enough to tie or win.

The first day of the Bonspiel was a great success all games were run off smoothly and there was not a hitch anywhere. John Morton is in charge of the draws and he knows how.

On Tuesday the Tofield Annual Bonspiel was resumed with much enthusiasm. The honors so far are evenly divided between the local and visiting rinks.

In the 9.30 draw Lee defeated Walters of Viking 12-5. It was Lee's game all the way through. Lee got a four ender and was never in danger. This was in the Boon competition.

On ice two, Hannan defeated McCauley in the Pincott competition by the score of 10-9. This was as close a game as anyone could wish for. Hannan led up to the 10th end, from here McCauley steadily climbed and tied him in the 12th end when he collected a two ender. Hannan got the winning point in the extra end on his last shot.

In the Boon competition Graham, of Viking got a good start and defeated Chapman of Tofield by the score of 11-7. He was leading 8-0 at the 5th end. Chapman rallied but was unable to overtake Graham's lead. Graham collected 3 in the last end and won by a comfortable margin.

In the Pincott competition Winteringham, of Edmonton defeated Agnew of Tofield by the score of 12-8. Both rinks collected 4 enders. Winteringham had an edge but Agnew gave him a good run.

LOCAL and PERSONAL

On Monday evening the Young People's Society held their regular meeting in the basement of the Church. Marion Cooper took devotional.

The practical part of the meeting was taken by Mrs. R. W. Pincott, who gave a talk on "Music and its Value in the Home". This was very much enjoyed by all those present. On account of the Bonspiel and other activities the usual number were not present.

Mr. Bullock will be the speaker for the next meeting.

The editor is much better but still indisposed. He expects to be back on the job next week.

The teachers went home to Edmonton over the week end.

Mr. Collicutt of Swift and Emery's Garage returned from Calgary on Saturday of last week.

Mr. J. D. Hannad, of Camrose was a business visitor in Tofield this week.

Mr. F. O. Ball of Edmonton was a visitor in Tofield for a few days this week

Ruth McLaughlin visited her home over the week end.

HOLY TRINITY CHURCH
Sunday, January 26th, 1930.
2.30 p. m. Evening Service and Sunday School

Mrs. F. McHeffey and Mrs. H. Lovell spent Tuesday in Ryley in the interests of the Rebekah Lodge, and was entertained at the homes of Dr. McPherson's and E. Cranston's.

TOFIELD CURLERS ARE BANQUET HOSTESSES TO BONSPIEL VISITORS

On Wednesday evening, January 15th the Tofield Ladies Curling Club gave a banquet for the visiting rinks. Mrs. Clutterham was toastmistress and gave the welcoming address. This was responded to by Mrs. Nor Quay, of Edmonton, who said how pleased the Edmonton rinks were to be present and to take part in the bonspiel.

The tables were very prettily decorated in a red and yellow color [illegible]. They were laden with many good things to eat, indicative of much careful preparation and labor on the part of the Tofield members.

This was followed by a solo by Mrs. C. W. Rowe, who sang "Irene Goodnight." She was encored and sang "You." She was accompanied on the piano by Stella Clement. Mrs. Mann of Edmonton then spoke a few words, during which she complimented Frank Scott on the excellent condition of the ice. This was followed by group singing, after which Mrs. McCauley gave a little talk.

Mrs. Brink then sang the solo "When Song is Sweet." She was encored and responded with "The Valley of Laughter." She was accompanied by Stella Clement at the piano.

The banquet then broke up with Edmonton giving three cheers for Tofield and Tofield responding with three cheers. The banquet came as a very pleasant interlude in the three days of curling.

Kingman

Mr and Mrs. E. Erichson and Mr and Mrs T. Horte visited with Mr and Mrs. C. R. Blychert on Monday evening to celebrate Mrs. Blychert's 60th birthday.

Mr. and Mrs. E. Erichson and Mr. and Mrs. T. Horte visited with Mr. and Mrs. McIntosh on Sunday evening.

Mr. and Mrs. P. Stanley and family were guests at the homes of O. and A. Swanson of Hay Lakes a couple of days last week.

P. Rednansky was a business visitor in Edmonton on Tuesday.

Miss Agnes Christenson visited with friends in Camrose for a few days.

Mah Him was a business visitor in Edmonton for a few days.

Mrs. T. Lowry visited with relatives in Banff for a few days.

A number of Kingmanites were Camrose visitors on Saturday.

Mrs. A. Asp and daughter Gertrude, and Mr. and Mrs. T. Welsh and family visited with Mr and Mrs. T. Horte on Friday evening.

"LADIES OF THE MOB" AT THE VARIETY FOR SATURDAY

Synopsis

A murderer is electrocuted. The mother of his little daughter swears vengeance on society.

Under this bitter influence, Yvonne the daughter, grows up. She loves "Red," a young, hardened, successful bank-robber. Knowing he will not go "straight," Yvonne sticks by him to protect him. "Red" robs a bank and Yvonne drives the car in which they get away. Police get a description of Yvonne and start a city wide search. Yvonne and Red are forced to flee.

They fine peace and freedom from pursuit in California, living off the money of the last robbery. Yvonne is blissfully happy—she and Red have been married— and Red is going straight. Yvonne enjoys domestic life.

Red hates the inactivity. He longs fiercely for the "racket." Finally, he goes to "Soft Annie's," a crooks hang-out. Protesting, Yvonne goes with him. At Soft Annie's Red learns that one of crook friends is in jail and he sends him almost all of his money he has left to fight his case.

At "Soft Annie's" he meets Marie an old girl friend of his, who is trying to get him to join thegang in a bank robbery the next night. "Red" draws a gun as a policeman wanders in, only to have Yvonne prevent his shot and get hit herself by the policeman's return bullet. They escape.

The next night Yvonne lies at home, shot in the shoulder, while Red for her sake, fights og his fierce desire to join the mob on the robbery. Police surround the house. Red defies them and starts shooting. Yvonne joins in the defense and, after a terrible gun battle, they escape from the house, bound, as Yvonne thinks for Prison.

"Red" raging and excited, declares he is going to join the mob on the robbery. Yvonne pleads against it, fearing he will shoot and kill and be arrested. Red scorns her and insists.

Loving him infinitely, Yvonne draws her revolver and deliberately shoots him in the shoulder. It is her only way to save him from himself. Handcuffed, hand to hand, they are taken away to prison.

COMMUNICATION

Dear Editor:

Will you be so good as to insert the following: Re Horse left standing by hitching posts in zero weather.

This is cruelty to animals and such action is punishable by law and I wish to warn those responsible that Court Proceedings will take place in any cases found in future. Horses must not be left standing in weather that is below zero.

A. P. Police

BEHIND THE BOG

By A. B. C.

The Bridge Drive was a great success, both socially and financially. The "Noble" nine put on the "eats" and parade much thanks to John Morton for one gallon of cream. They say "Chris" can make the good coffee.

Ketchamoot Items

Mr. Carlisle took a truckload of stock to Edmonton Tuesday of last week.

Born to Mr. and Mrs. Chester Coombs January 15th a son.

Little Joyce Whilliams has the Whooping Cough.

Mrs. P. Lee returned home Saturday after several days in the city.

Mrs. Henderson and son Jason visited at the W. A. Mitchell home on Sunday.

The annual meeting of the M. A. S. was held at the home of Mrs. C. A. Ingram Wednesday of [illegible] week. The officers for the coming year are: President, Mrs. Carlisle. Secretary, Mrs. F. Shupe. The next meeting will be held at the home of Mrs. Carlisle.

Miss Rosie Speks is working at the Chester Coombs home.

The annual meeting of the Ketchamoot School District held Saturday was very poorly attended. Mr. Schultz, Mr. W. A. Mitchell and Mr. G. W. Sears were re-elected for the coming year as trustees and Mr. G. W. Sears was also re-elected as Secretary-Treasurer.

Mrs. Maurice McGinitie was able to bring home her little son on Monday, who has been very ill at the Royal Alexandra Hospital for some time.

The young people of this district met at the home of W. Lee on Sunday evening. The time was spent in singing and visiting and everyone had a pleasant time.

The services on Sunday have been changed to every two weeks at 2 o'clock in the afternoon, for the winter months.

Local Boxer Wins Bout

In the second tournament held by the Canadian Legion in Edmonton Ted Curtis of Tofield again emerged victorious. His opponent was a Riverdale man and from all reports Ted had his work cut out to handle him.

Curtis won his fight on points after a game rally in the third round. At the end of the second round his eyes were partly closed and he had difficulty to see. But in the third round Curtis set after his man with a will and gradually overcame his lead to win. This was one of the fastest and hardest fought bouts on the card. Curtis weighed 143 while his opponent weighed 147 lbs.

The next tournament will be held on February 18th in which Ted has entered. If he wins this bout he will go to Calgary to box.

U. F. W. A.

A meeting of the U. F. W. A. was held at the Municipal building on January 14th.

Mrs. Munro and Mrs. T. E. Seale were appointed delegates to the Annual Convention which is being held at Calgary this week. Mrs. C. Bapist read a very inspiring paper on "Our Creed". She also presented to Mrs. Johnson Ferguson in behalf of the members a beautiful picture in token of our appreciation of her as president. Mrs. Ferguson responded with a few well chosen words of thanks.

Come over to the rink and rest your eyes on Mr. Chapman's Picture Gallery.

This the men's bonspiel week. There are eight visiting rinks and twelve local rinks entered in the competitions. There should be some good curling witnessed before this spiel is over.

Two rinks went to Viking on Monday January 13th. The skips were Mack and Lee, they brought home the Northwestern Utilities Cup after hard fought games. It is at the rink. Look it over because we intend to keep it for awhile.

In a ten end practice game at Viking, McLaughlin was 3 down coming home and all he did was to score 7 to win.

Frank Scott has the four sheets in perfect shape and we should witness some good curling in the Men's spiel.

Lindbrook News

LINDBROOK

Mrs. A. Whibley left last week on a visit to relatives in Vancouver, just in time to escape our last little cold snap.

Mr. Ed Fontaine who is staying with his brother W. Fontaine of this district is suffering from a bad attack of quinsy. Dr. Law having to come out and operate on same. We hope by now that he is O. K. again.

Mr. Logan, of Camrose unloaded a carload of cattle here this week which he intends to feed upon some hay that he has here. Whilst here he will reside in the store "bungalow" which he has rented from Mr. A. Silverside.

The voices of H. M. King George and all the delegates to the Naval Parley in London, England were heard in Lindbrook very clearly last Tuesday morning, at 4 a. m. It was worth while staying up for, it being quite a historical event and luckily very clearly heard. Then at the finish Chelmsford, England was heard signing off.

We are sorry to hear that our editor is down with pleurosy but hope that he is on the war path again by now. This weather is enough to give any person anything bar a warm glow.

Bardo News

The Bardo Ladies' Aid held their annual meeting at the home of Mrs. [illegible] owing officers were elected.

President, Mrs. Jevning; vice president, Mrs. Hendrickson; Secretary, Mrs. Stein; Treasurer, Mrs. Raukedal.

The Bardo U. F. W. A. met at the home of Mrs. Jevning on the afternoon of January 14th, to elect new officers for the coming year. The officers were as follows: President, Mrs. I. Moen; vice president, Mrs. Steen; Sec.-Treas., Mrs. Kindley. Mrs. Mrs. Hendrickson, Mrs. Finseth and Mrs. Jevning as directors. It was decided to hold their meetings the last Wednesday of every month.

Mr. Martin Eide, left for Calgary on Monday. He will act as a delegate for the Bardo U. F. A.A. at the convention there.

Word has just arrived of the death of Mr. John Stauffer sr., on Sunday afternoon. Our sympathy is with the family in their sad bereavement.

Miss Martin visited at her home in Edmonton over the week end.

The numerous friends of Laurie Scott will be pleased to read the following which is what the Jornal sportitorial writer has to say regarding Laurie's present season's success.

Laurie Scott whose hockey playing ability helped as much as George McLaughlin's talent for curling to put Tofield on the map, is having a bang-up season with the Duluth Hornets in the American Association according to the Duluth News Tribune. Scott, you'll remember broke into the big time with the Saskatoon Sheiks, and flanked by the Cook brothers, Bill and Bun, cut quite a figure in the Western Canada league. He went to New York and played with the Rangers and Americans in turn, but for some reason or other did not stick although he looked good enough to make it when he left this part of the country. Scott was farmed to Springfield last season, but was bought outright by Duluth this season—and he's going big.

Rated as one of the best centre ice men in the American Association, the Tofield boy is up with the leading point getters in the loop, and along Duluth's sporting rialto they're asking "Why did they ever let him out of the national league?" Chicago made an offer well over the waiver price for him a short time ago, and got a flat turndown. Herbie Lewis, Calgary product, who was the toast of Duluth for the last few years, left a big gap for Scott to fill, but he seems to be measuring up in fine style, and there are numerous Duluth fans who rat the former Saskatoon Sheik on a par with the flashy Calgarian. As a team player, and a tanker and taker of passes when they do the most good, Scot than no peer in the league, they say, Newsy Lalonde now managing the Ottawa senators, had a hand in developing Scott.

HEALTH SERVICE of the CANADIAN MEDICAL ASSOCIATION

ANAEMIA

A person is anaemic when blood is deficient in quantity or quality. When a considerable amount of blood has been lost through bleeding then there anaemia due to deficiency in corrects itself as the body mechanism makes good the loss. The anaemia due to poor quality generally means that there is not enough red cells in the blood, or that the important substance called haemoglobin found in the red cells are deficient in quantity. The chief function of the red cells is to carry oxygen by means of its haemoglobin to all the tissues of the body. It can be readily understood that any interference with this vital function due to a lack of red cells or of haemoglobin will affect every tissue of the body. This may be expressed in another way by saying that if the tissues of the body are to be kept in a healthy condition it is necessary that the quality of the blood supplying the tissues of the body be maintained.

The quality of the blood is lowered as the result of such general diseases as tuberculosis and cancer. Chronic abnormal conditions of the stomach and other parts of the digestive tract may affect the blood. Without going further into the list of causes it will be evident that the proper treatment of such anaemias is the removal or treatment of the cause of the disturbance. Nothing is to be gained by dosing with so-called blood tonics when what the individual needs is fresh air, sunshine, rest and proper food. A balanced mixed diet supplies the substance necessary for the body to produce a good blood supply. The body cannot do this work if it is suffering from disease and so the treatment of diseased conditions comes first, followed by proper diet and hygienic living.

Pernicious anaemia is one special form of anaemia. It is a disease that has recently been conquered. The use of liver or liver extracts according to the directions of a physician, controls this form of anaemia.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

ONE GOOD RECIPE MAKES A COOK FAMOUS

It is the season of oysters. They have been in season for a few months but this fish seems to be used more often in January and February than other times. Perhaps it is because so many hostesses serve oyster patties when entertaining. It is a popular dish and always one that is enjoyed.

Oysters served in cocktails, fried or in stews are perhaps the most popular for home use. Another recipe that has been tried and found extremely appetizing is scalloped oysters. The recipe follows:—

Place in a baking dish a layer of oysters (which have been washed) and over this spread a layer of bread crumbs. Sprinkle with salt, pepper and bits of butter, alternating the layers until the dish is full and having the crumbs on top well covered with bits of butter. Pour over the whole enough oyster juice or cream to moisten it. Bake in a hot oven 15 or 20 minutes until brown.

CANADIAN AIR MAIL PILOTS PRAISED

Canadian air mail pilots came in for the highest praise from W. J. Irving Glover, second assistant postmaster-general of the United States, who is in Ottawa for the purpose of obtaining closer co-operation between Canadian and American postal services relative to air mail.

Mr. Glover, in praising the Canadian pilots, observed that the picture of the hitherto inaccessible places of the Northwest Territories now being opened up for exploitation and being served with air mail was a stimulating one, and he paid tribute to the enthusiasm of the Canadian officials and the courage of the Canadian pilots as he carried out their duties under extremely adverse conditions. These latter were the silent heroes who injected into their tasks all the elements of bravery that were demanded of airmen during the war.

Mr. Glover conferred with Canadian post office officials with reference to negotiations on foot to link up the proposed new Canadian prairie air mail service with the United States middle west system. The next international development, in the opinion of Mr. Glover, will be an air mail line from Minneapolis and St. Paul to Winnipeg, via Fargo and Grand Forks, North Dakota.

NEW RED CROSS UNIT

Beautiful for situation is the new Junior Red Cross Unit at the University Hospital in Edmonton. As if by magic this fine new building has appeared and where there were but grassy places a few months ago now you see a splendid building on which the sign of the Red Cross proclaims to all the world that the Society is still "carrying on" her great work of caring for the sick and crippled children.

The visitor is greatly impressed with the fine appearance of this new unit from the outside, where wide verandahs will offer to the little patients their best chance of cure in the bright and beautiful sunshine of Alberta "When summer comes." As soon as the good weather blesses the country, the little sick ones like the flowers of the field will blossom forth on the sunny side of these splendid sun-porches, absorbing the health laden air that blows to them over the wide woodlands and broad river.

The wards are large airy and commodiously planned. Boys ward, girls ward and cot ward and nursery. Easy indeed is it for the nurses to give the arms of attention to their cases when all has been so admirably planned with a view to nursing care and to the daily school which is carried on for those of school age. The large and modernly furnished kitchen with its many devices for efficient house-keeping commends itself to the eye of every Quartz Light room make treatments a simple matter.

The ventilating system of the hospital is also the last word and no matter what the temperature outside there is always warm fresh air entering this wonderful little hospital. Bright tints on the walls with a note of color here and there in the stencilled figures, present and attractive appearance. Now beds and cosy cots with tiny little first sizes for babies, are filled with happy Peters and Wendies all getting better in the New Red Cross Unit.

ANDERSON WINS HANDSOME SET OF DISHES

Hobson's Meat Market gave away a handsome dinner service. With every dollars worth of meat Mr. Hobson gave a numbered ticket the counterpart of which he kept. On Saturday, January 4th, all tickets were put in a receptacle, thoroughly shuffled and one drawn out. This proved to be number 454, the other half of which Mr. W. Anderson, five miles north of town, held. Consequently Mr. Anderson may now present Mrs. Anderson with a nice new dinner service.

COLONEL J. S. DENNIS RETIRES

Colonel J. S. Dennis, C.M.G., Chief Commissioner of Colonization and Development, Canadian Pacific Railway, will retire January 1, after 29 years with the company, according to the recent announcement made by E. W. Beatty, chairman and president of the system, and the department will then be divided into the Department of Immigration and Colonization and the Department of Development. J. N. K. Macalister, at present assistant chief commissioner of Colonization and Development, will be chief commissioner of the Department of Immigration and Colonization and Major G. G. Ommanney will be the director of the Department of Development.

Colonel Dennis, or "J.S." as he is known to old-timers, was 73 years old last October, and has had as colorful a career as any man in Canada. He went west in 1872 at the age of 16 on survey work and in 1885 saw service against Louis Riel as commander of the Dominion Land Survey Intelligence Corps which during the rebellion was known as "Dennis' Scouts". Among the outstanding work in which he was engaged was the laying out of irrigation systems later constructed in the Lethbridge region and in the great Bassano Dam irrigation project of the Canadian Pacific Railway, east of Calgary. His unrivalled knowledge of Canadian economic and agrarian development has caused Colonel Dennis' name to be placed among the foremost of Empire builders. Although retiring as active head of the Colonization and Development of the Canadian Pacific Railway system, he will still participate in the future development of the department since he will act in an advisory capacity to the company's directors.

Mr. Macalister has for more than 22 years given close attention to colonization problems. Since 1906 he has been immediately interested in opportunities of development and colonization in the west and entered Canadian Pacific service in 1907. He has done much work in the United States drawing attention to the unparalleled opportunities offered by the Canadian West. He was appointed assistant commissioner of the department in 19[illegible]. His ability in his chosen field was recently recognized by colonization experts from all parts of the continent when they elected him chairman of the immigration committee of the American Railway Development Association.

Major Ommanney joined the Canadian Pacific Railway in 1907. As a qualified civil engineer he had previous to that date done work all over the world. In 1914 he was appointed special engineer to the president, and from 1915 to 1919 was overseas with the Royal Engineers Imperial units. On his return from the war he was appointed to Colonel Dennis' department as development engineer, to bring the natural resources of territories covered by the Canadian Pacific Railway into commercial use. He was appointed Director of Development Branch of the Department of Colonization & Development in January, 1928.

Here and There

DEPTH OF PLOUGHING SUMMER-FALLOW

(Experimental Farms Note)

ATLANTIC, PACIFIC, AIRMAIL SERVICE IS CANADA'S AIM

Here and There

The total value of the principal field crops of Canada for 1929 is estimated at $934,... about $40,000,000 less than in 1928.

Construction of the new steamer for the service between Saint John and Digby on the Bay of Fundy is well advanced and it is hoped to have it in operation by next August, Grant Hall senior vice-president of the Canadian Pacific Railway announced recently on a visit to the New Brunswick city.

Indicating western Canada's importance in the livestock world 20 head of registered Aberdeen Angus cattle from Glencarnock Farm famous breeding establishment operated near Brandon by Hon. J. D. McGregor Lieutenant-Governor of the province recently arrived at Vancouver by Canadian Pacific Railway for shipment to Australia and New Zealand.

Designed to furnish the immense tractive effort of 82,200 pounds, a new locomotive, first of its kind on this continent to be operated on a high steam pressure principle will be immediately placed under construction at the Angus Shops of the Canadian Pacific Railway. It will be one of the most powerful in the world and will supersede the 5900 engine of the railway as the most powerful in the British Empire. Locomotive and tender will weigh 744,000 lbs. or 14,000 lbs. heavier than the 5900 engine and 120,000 lbs. heavier than the 2300 locomotive.

How one $14,000,000 equipment contract given by the Canadian Pacific Railway to the National Steel Car of Hamilton during 1929 resulted in 122 business houses located in four Canadian provinces securing valuable supply orders and how the far flung distribution of the company's contract provided steady work and wages for skilled mechanics and large office staffs over a period of months has been revealed by a study of statistics at the National Steel Car Co. and Canadian Pacific Railway.

J. A. Murphy M.P. of Toronto was a passenger on S.S. Montrose recently from Saint John. As an official of the Amateur Athletic Union of Canada Mr. Murphy is on his way to Great Britain to make arrangements for the British Empire games at Hamilton next August at which every part of the Empire will be represented by brilliant athletes.

What is regarded as one of the largest real estate transactions on record was made recently when the Canadian Government reached agreements with the Provincial Governments of Manitoba and Alberta for the transfer to those provinces of their natural resources. These include large areas of land, forests, water powers, fisheries, mines, oilfields, etc., and represent a value in excess of a billion dollars. The agreement will be ratified by Parliament at its next session early this year.

The Wilder Silver Medal, one of the highest awards made by the American Pomological Society has been given to W. T. Macoun, Dominion Horticulturist, for his work in breeding new varieties in apples and for his contributions to horticulture ... Mr. Macoun has occupied the position of Dominion Horticulturist of the Canadian ... Experimental Farms at Ottawa for the ... years.

Ladies Bonspiel Comes To A Close

On Wednesday morning the ladies bonspiel was resumed with much enthusiasm. The weather was ideal and the ice in excellent condition. The competitions are slowly narrowing down and will soon be in the jewelry.

In the nine o'clock draw, Mrs. Quesnel of Edmonton defeated Mrs. McLaughlin of Tofield in a very close game. Mrs. McLaughlin got a four ender but Mrs. Quesnel who was playing a very steady game, was able to defeat her opponent by the score of of ten to eight. This game was in the Young competition.

On ice four Mrs. Muir of Edmonton and Mrs. Hammond were having a very hotly contested battle. Both were playing a steady game and points were hard to get. The game was tied coming home and Mrs. Hammond was laying shot. Mrs. Muir threw her rock and with a lucky break worked off a guard and lay shot to win the game by a score of 7 to 6. This game was in the Grand Challenge competition.

On ice 2, Mrs. Husel ran away from Mrs. McCauley in the Grand Challenge Competition by the score of 7 to 2. The breaks seemed to be against Mrs. McCauley, when she would have continuing ends formed, Mrs. Husel with a well-timed shot, would lay shot.

In the 12 o'clock draw, Mrs. Quesnel defeated Mrs. Conn, both of Edmonton, by a score of 10 to 3. The score is a fair indication of the game, both rinks playing steady and the result was very much in doubt until the last end.

On ice one, Mrs. Terwillegar defeated Mrs Husel, both of Edmonton, by a score of 14 to 13. They both collected 3 and 4 enders. The game was tied in the eight and ninth end. Mrs. Terwillegar collected 2, but Mrs. Husel came right back in the tenth to count three to tie the game. In the extra end, Mrs. Terwillegar got the extra point after Mrs. Husel missed her last shot by inches. This win put Mrs. Terwillegar in the fours of the Young Competition.

On ice two, the only Tofield rink still in the Grand Challenge or Young Competition, defeated Mrs. Muir of Edmonton by the one-sided score of 14 to 2 to enter in the fours of the Young Competition. It was Mrs. Clutterham's game all the way through.

The finals have been reached in the Grand Challenge. It will be played Mrs Muir and Mrs Muir both of Edmonton.

The fours have been reached in the Young Trophy. Those still in are: Quesnel, Clutterham, Husel and Norquay.

Mrs Muir in the semi-final of the Grand Challenge, defeated Mrs Quesnel by the score of 13 to 3. Mrs Muir got a five ender in the fifth end.

In the other semi-final of the Grand Challenge Mrs. Norquay defeated Mrs. Husel by the score of 11 to 6. Mrs. Norquay was four up coming home. In this, she made a lucky shot when her rock wicked an opposing guard and lay shot. This was a hard fought game until the ninth end.

Mrs Hammond and Mrs. Mann of Edmonton played a very close game in the Kline consolation Competition.

The game featured steady playing and brilliant shots. There were no big ends collected. Mrs. Mann was one up coming home and she got one more at the 10th, the final score being 10 to 8 for Mrs. Mann.

Miss Gray defeated Mrs. McLaughlin in the Kline Competition by the score of 10 to 1. Miss Gray got one four ender. She was never in danger of losing.

On Thursday the final curtain was rung down on the Ladies' Bonspiel. The Grand Challenge was won by Mrs. Muir, of Edmonton, after a close struggle with Mrs. Norquay also of Edmonton. Mrs. Conn of Edmonton won the Young Trophy when she defeated Mrs. Clutterham, of Tofield.

In the 9 o'clock draw Mrs. McCauley defeated Mrs. Bruce by a score of 15-6 in the Kline competition. In the semi-final of the young competition Mrs. Clutterham defeated Mrs. Terrwillegar, of Edmonton, by a score of 10 4.

In the Kline competition Mrs. Lee defeated Mrs. Letourneau by the score of 16 8. In the semi-final of the Grand Challenge, Mrs. Conn defeated Mrs. Quesnel after a hard fought game Mrs Conn collected two four-enders. In the 12.30 o'clock draw Mrs. Lee defeated Mrs. Mann in the semi-final of the Kline competition by the score of 10-7.

Close Game

On ice 2, Mrs Muir defeated Mrs. Norquay in the final of the Grand Challenge. This was a hard fought not decided until the last rock was thrown. The score was a tie coming home 10-10. Mrs. Norquay was laying shot, with one rock still to be thrown by Mrs. Muir. She had to draw into the four foot ring to win and this she did with a wonderful draw shot. The final score was 11-10 in favor of Mrs. Muir.

Mrs Conn defeated Mrs. Clutterham afte ra hard struggle in the final of the Young Trophy. The final score was 11 to 5 in favor of Mrs. Conn.

In the semi-final of the Kline competition Miss Gray defeated Mrs. McCauley by the score of 11-6.

In the 3.30 draw Miss Gray and Mrs. Lee battled it out for the Kline Cup (Consolation) Mrs. Lee defeated Miss Gray by the score of 16-8

In the hard luck game Mrs. Letourneau defeated Mrs. Bruce by the score of 10-9. Mrs. Bruce was one up coming home but Mrs. Letourneau scored a two ender to win the game.

Those who won the prizes in the Grand Challenge are first, Mrs. Muir, of Edmonton, 2nd Mrs. Norquay, of Edmonton; 3rd Mrs. Quesnel of Edmonton; 4th Mrs. Husel, of Edmonton. Those who won prizes in the Conn of Edmonton; 2nd Mrs. Clutterham, of Tofield; 3rd Mrs. Quesnel, of Edmonton; 4th Mrs. Terrwillegar, of Edmonton.

Prize winners in the Kline Competition 1st, Mrs. Lee, of Tofield; 2nd, Miss Gray, of Tofield, 3rd Mrs. Mann of Edmonton; 4th Mrs. McCauley, of Tofield.

Editorial

ELECTRICITY FOR TOFIELD

In one respect at least Tofield has for years been woefully behind the times. We refer to the lack of electric current for domestic and industrial uses. At on time, as many readers will remember the town was partially supplied by M. C. Hammond, but this service was necessarily limited, and only supplied those customers within a definite radius of the power plant. A disastrous fire put an untimely end to this plant and service. Since the fire, and even before it occured, gas has been used here for illumination. While not as convenient as electricity, the gas gives a soft white light and it has the special advantage of geing an exceptionally cheap illuminant. The demand for electrical current comes not so much from the general householder as from a number of the business houses, and industrial concerns. There are a few places in Tofield where electrical current is almost a vital necessity, and these places find it hard to carry on without it.

During the past few years there has been a steady acquisition of small town plants by large public Utility Companies and plants in such nearby towns as Camrose to the south of us and Chipman to the north have been purchased by the Calgary Power Company. Consequently in company with representatives from Ryley, Holden and Viking, Mayor Swift of Tofield called on the company at Calgary recently. The company expressed its willingness to bring power to Tofield and the above mentioned towns providing sufficient customers were to be had.

The Mercury has always been very much interested in electrical power and would very much like to see it come in. We have, however, been quite sceptical as to its coming. Most of the residences in town are piped for gas and use gas for illumination. This piping and buying of lamps has only been done during the past few years, and as the light is reasonably satisfactory and very cheap, we doubted whether any company would find it worth their while to bring hydro power here. Also last year at the request of another party the Mercury wrote the Calgary Power Company re bringing power here, and received no reply. In considering this matter, it is wise to look at it from various angles. We have at Tofield the second and third cheapest power on earth. We refer to coal and natural gas. We are asuming that water power is the cheapest, not forgetting however, that hydro electricity increases in cost of production the furer the consumer is from the source of production. This is due to the capital and upkeep cost of the lines. As we are quite a long way from the water power near Calgary, we offer the opinion that the amount of current Tofield can use can be produced as cheaply from Tofield coal or natural gas as it can be brought in from Camrose or elsewhere. We have been of the opinion for years that the owners of the mines near Tofield missed a good chance, to earn money, before the advent of the M. C. Hammond plant. Before the gas came, they could have lighted the entire town, and few people would have changed from electricity to gas if the current could be sold at competitive prices.

The present understanding is that the Calgary Power Company will charge ten cents per killowat hour for domestic lighting with a two dollar minimum and a dollar and a half service charge. In dollars and cents this means that if one has four fifty watt lamps (the average size) burning for five hours each night for thirty nights it would cost three dollars plus one fifty service charge or four fifty in all. In any event with the minimum set at two dollars one cannot get below three fifty. Compared to this the present price of gas illumination is very low indeed. As regards Tofield the field and and need for domestic electric current is more for appliances than illumination. Such appliances as toasters, motor for washing machines, fans etc., would be quite a convenience to the average householder.

If there is a demand for current at Tofield it would appear to us that the immediate problem is not so much inducing the company to bring power here as to investigate the best means of supplying the town. If there is a market for its product the company will come anyway, and as they ask for a ten year franchise at a given rate with the street lighting contract thrown in for good measure it should be good business to get comparative rates etc. By the way, the street lighting contract is set at $45 for 25 lights per month. We now pay $25 for ten lights. Unit for unit the power company's proposition is the cheapest, but considering the present state of the towns finances can we afford to increase our lighting appropiation? Think it over.

There will be a ratepayers meeting at the Town Hall on Friday night when this matter as well as others will be discussed. All those interested should make it a point to attend. The Mercury regrets that all of its regular representatives will, due to a prior engagement, be in Edmonton. We will however arrange to have the meeting covered.

THE ANNUAL REPORT

In the last issue of the Mercury there appeared the annual financial statement of the town and school district. It is interesting reading and should be read by every ratepayer.

Cash receipts, from one source or another amounted to nearly twenty thousand dollars. This was all spent, however, the cash on hand at the end of the year being within two hundred dollars of the amount of cash on hand at the beginning of the year. Of the receipts, the taxes of course, contribute the most, the sum of seventeen thousand and some odd dollars being raised that way. Other large items include $1802.49 received from agreements of sale, $500 interest on reserve fund, $545 for lots sold, and $388.00 minimum educational tax, which is something akin to the old poll tax.

In the expenditures the two largest items are the debenture payment of $6,569.34 and the school district levy of $7,343.49. The next in line is the secretary's salary and auditor fees of $1785.00, followed in size by $1,302.88 for public works; relief to indigents cost $852.70, street lights $456.77, fire department $345.51 and postage, printing and stationery $278.79. These are the principal items.

There is an asset of over $12,000 in Provincial Savings Certificates. This is a bright ray in a rather depressing assets and liabilities balance sheet. It is real money and is splendid evidence of careful financing. Even so there is a net deficit of $37023.19.

The bug bear is of course the outstanding debenture account. We now owe $95,243.99, which is a tidy sum for a town of 500 population. Just how expensive a business this is can be judged by the item which shows $5762.98 interest paid last year and $806.36 principal. Nearly seven times as much interest as principal. The present council of course are helpless and did as well as a body of men could be expected to do with an aftermath problem of high finance.

It would appear that the program in the future as in the immediate past will necessarily have to be one of economy. There are many things the council could do, which will have to be indefinitely postponed because of the scarcity of funds.

THE BONSPIEL

Both Ladies and gents bonspiels for this year are now past history. It is remarkable to what extent the curling game reached in the past few years. It is not so long since the larger centres were the only ones to put on a bonspiel, but now 'spiels are organized in many towns. A fair idea of the popularity of curling in Tofield may be gathered when one calculates the number of people at the rink each night. There are four sheets of ice and eight men play at once on each sheet. When all rinks are in play and they mostly are, thirty-two players are in action and with two draws a night, sixty-four curlers take the ice. Try and imagine any other kind of attraction at Tofield that would steadily draw that many players nightly.

Then of course there is curling done by the ladies in the afternoon and the ladies are as keen curling enthusiasts as the gentlemen.

As a means of exercise and pleasurable sport between friends it is hard to find a better game than curling.

CURLING OVERDONE?

One often hears it remarked that in Tofield at least, curling is over done. One hears much of this talk around the skating rink. This may because curling and skating as public attractions at Tofield are opposed to each other and at present at least, curling sits on the pinacle of fame while skating and hockey is in the doldrums. We really see no cause for complaint. While it is true the actual games are, generally speaking, sparsely attended other ventures of the different hockey clubs have been quite well patronised. It is not so much good will that is lacking, as active interest. Fair gates at the games would eliminate the necessity of promoting other ventures to provide funds.

The various hockey clubs do get support from some of the curlers, in fact sometimes it would be very hard to carry on were it not for the services of Mr. Clutterham as referee. Unless absolutely pevented from doing so he gives his services and frequently pays money to the club. Geo. Agnew can also be relied on to lend a helping hand and there are others who stop curling long enough to lend a helping hand to the various hockey clubs. May their numbers be increased.

A little official interest in the hockey team would be appreciated. All season long there has been a spirited argument between the Tofield town council and the management of the hockey clubs on two counts. For years the various clubs have been playing with old nets that were worn out when some of the present players were in the cradle. This year new ones had to be purchased and the council was appealed to to buy them. They refused and two of the teams using them, paid for them, the third, the midgets were not asked to contribute. Goal nets are standard equipment and are supplied by practically all rinks charging for the use of the ice. Tofield hockey clubs pay forty per cent of the gate receipts for the use of the ice, and so they claim they are entitled to standard equipment. The other matter is that of compelling hockey players to buy skating tickets. Actually most of them do, but not all. As an active playing member of the hockey team each player is entitled to one or two practices of an hours duration a week. But the town council say no. Their dictum is, either buy a skating ticket or pay 25c. for practice and games. In other words, hockey players are asked to pay 25c. to the council for the privilege of helping to make the council money. Can you beat it? Note that hockey players claim free skating for hockey practices and games only and not for private skating. Of course we fully understand that the rink shows a loss, the deficit last year was $272.05. Even so, there is no reason why parsimonious business like that of the town and hockey clubs should be engaged in. The way to attempt to take the deficit out of the skating rink is to use a little enterprise. At the curling rink Frank Scott keeps everything in tip top shape. The ice is always as good as weather conditions will perfit, he being provided with the best of appliances to make ice. Contrast this with conditions at the skating rink. Last year after the first sheet was laid the ice was flooded only two or three times, this year, so far, it has been flooded twice. Even so rink conditions for the past two years were better than for some years previous and this year is better than last. The caretakers have no real equipment, and no interest whatsoever is taken in the rink affairs until it is time to open it, and then owing toweather conditions it is too late to work to best advantage. A little forethought and planning before freeze up would net the rink owners much more than attempting to force collection from two or three hockey players.

THANK YOU

Some time ago friends of the hockey club joined together and purchased a splendid sweater and donated it to the club. The garment which is pure wool and jumbo knit has been on display at the Co-op store for some time with an explanation ticket upon it. It was suggested at first by the donors that the sweater be given to the highest scorer on the team and was accepted as such. Further consideration of this matter showed that it would not be giving all members of the team equal chance and above all there was a desire to play no favorites. Partly because the team and management greatly appreciated the gift and partly because it was not easy to have a team competition in which all team members had an equal chance, there has been some delay in making a public statement concerning it. Now, however, a decision has been arrived at and the following plan will be put into immediate use. The club is issuing exactly one hundred tickets at 50c each. Each ticket will be good for one chance on the sweater and one admission to a hockey game either adult, student or children. The donors of the sweater wish to remain anonymous.

MONDAY NOMINATION DAY

Next Monday is town council nomination day. For many years past now, the day has passed without much excitement, the necessary councillors being elected by acclamation. Tofield has no cause to complain on the choice of its councilors. While their work is necessarily quiet and unobtrusive it is nevertheless efficient. What difficulties there are to-day for the council to overcome are not of recent origin and on the whole recent councils have made a success of a difficult task. While the principal debt has not been lowered a great deal in the last few years, we notice a ten thousand dollar asset in bonds and saving certificates. Councilorship in Tofiel dis more a matter of influencing a body of men to serve rather than a desire to pose in the spot light of public service. The present council could all be re-elected and the towns interests well served. Of course if there is any new blood who desire to add to the fame of the town, why, a quiet whisper in our ear will perhaps bring about nomination.

There are three councilors whose terms expire this year namely J. Chapman, L. C. Hay and Geo. R. Brace.

The school board also has its nomination meeting on Monday when nominations for three vacancies will no doubt be made. Those whose terms expire are Mr. J. W. Robinson and A. P. Harold. Mrs. Davison has resigned. All three trustees have done splendid work on the board and the return of both Mr. Harold and Mr. Robinson will meet with popular approval. There are no "big issues" at stake. The employing of local teachers is a sleeping subject for the present.

EASY COME — EASY GO

LOOK ELSEWHERE FOR OUR COMING PRIZE CONTEST

Graham Of Viking Wins Grand Challenge

On Tuesday the Tofield annual bonspiel was resumed with much enthusiasm. The honors so far are evenly divided between the local and visiting rinks.

In the 9.30 draw Lee defeated Walters of Viking by the score of 13-5. It was Lee's game all the way through. Lee got a four ender and was never in danger. This was in the Boon Competition.

Hannan defeated McCauley in the Pinerott Competition by the score of 10-9. This was as close a game as anyone could wish for. Hannan led up to the 10th end, from here McCauley steadily climbed and tied him in the 12th end when he collected a two ender. Hannan got the winning point in the extra end on his last shot.

In the Boon competition Graham of Viking got a good start and defeated Chapman by the score of 11-7. He was leading 8-0 at the 5th end. Chapman rallied but could not overtake Graham's lead. Graham collected 3 on the last end and won by a comfortable margin.

In the Pinerott competition Winteringham of Edmonton defeated Agnew by the score of 13-9. Both rinks collected four enders. Winteringham had a slight edge but Agnew gave him a close run.

In the 12.30 draw McLaughlin defeated Hammond in one of the closest games of the spiel. This was followed by a large gallery. It was tie game up to the 6th end, then McLaughlin took the lead till the 9th end when Hammond collected a five ender and went ahead by the score of 8-5. McLaughlin got one in the 10th and two in the 11th, this made it a tie coming home and McLaughlin scored two to win by the score of 10-8. This was in the Boon Competition.

[illegible]

In the 9.30 draw Walters of Viking defeated Foreman by the score of 10-4 in the Pinerott competition. Walters collected a 3 and 4 ender. It was Walters game all the way through.

Lee defeated McLaughlin to enter the final of the Boon trophy by the score of 9-7. These two old rivals as usual attracted a large gallery. This was a very close game. McLaughlin got a 4 ender in the 5th end and Lee got a 3 ender in the 6th. McLaughlin had a good chance to count four in the 9th end but he missed his shot. He counted two more, one in each of the 11 and 12 ends but it was not enough to win.

Murray, of Camrose entered the finals of the Boon competition by defeating Graham, of Viking 14-3. Murray led all the way and at no time was he in danger of losing. He [illegible] a three and four ender.

Rowe defeated Hammond in the Pinerott competition by the score of 14-5. This was a walkaway for Rowe. He collected a four and three ender.

Warner defeated Winteringham of Edmonton by the score of 12-4. This was Warner's game all the way through and he was never in danger.

In the semi-final of the Grand Challenge Hannan defeated Hammond by an overwhelming score.

Lee defeated Chapman by the score of 13-5. This was a much closer game than the score would indicate. Lee went ahead when he made a big end.

Walters of Viking defeated Lee by the score of 13-4. This was always Walter's game and he was never in danger.

In the semi-final of the grand challenge Graham of Viking defeated McLaughlin by the score of 10-5. This was a close game and hard fought.

CAMROSE MIDGETS DEFEAT TOFIELD AND TOFIELD JUNIORS TROUNCE RYLEY

On Friday night last two snappy junior hockey games were played at the rink.

In the first game the Tofield midgets tangled with the Camrose boys. The Camrose boys were victorious by the score of 2-1. This was hard and closely fought struggle, and Tofield with a little more luck with their shooting might have evened the count. The game started at a fast clip which the players kept up during the entire 60 minutes.

The Camrose goalie played a wonderful game and was kicking them out from all angles.

Both teams played real hockey and displayed some combinations that would do justice to older teams.

Referee Clutterham inflicted one [illegible] the game in hand at all times. A return match will be played in the near future.

The Tofield line up is as follows: goal, D. Dodds; defence, R. Martin, W. Taylor; forwards, B. Clutterham, W. McCauley, J. Whyte; subs. L. Burnett, J. Beirnes.

In the second game the Tofield juniors met the Ryley juniors. But Ryley was no match for Tofield won the game 12-1. It was altogether one sided from the spectators point of view but some good hockey was displayed.

Tofield line up is as follows: goal, J. White; defence, R. Bowick, P. Thompson; forwards, M. McHeffey, R. Martin, R. Craig; subs. B. Clutterham, G. Thompson.

ROSS CREEK

Mr. Chas. Sampson has been on the sick list for the past few days but is able to be around again.

Mr. and Mrs. Earl Williams and Mr. and Mrs. Wyman Odiorne and small daughter Doris and Mr. Lewis Williams visited Mr. and Mrs. W. Lauder Wednesday evening.

Miss May Shortel visited Miss L. Sampson on Sunday afternoon.

CAMPBELL — FRY

A quiet but very pretty wedding was solemnized at the home of the Bride's grandparents, Mr. and Mrs. H. Eaton of Lakeshore district, when Miss Nawoda Fry daughter of C. A. Fry, of Tofield became the wife of Mr. William Campbell son of Samuel Campbell, of Lamont.

Rev. Mr. Gordon united them in Holy Matrimony.

They were accompanied by Edith Riley as bridesmaid and Ralph Herndon as best man. The bride wore a beautiful dress of peach taffeta and the bridesmaid one of coral taffeta. After a delicious wedding dinner, a large number of friends gathered in the evening to congratulate the couple and wish them much happiness.

The gifts were useful and well chosen.

Mr. and Mrs. Campbell expect to make their home at Lavoy.

The International Dog Sled Derby at Quebec

Prizes aggregating $4,250 will be among the trophies to be competed for in the International Dog Sled Derby to be held at Quebec City, February 20-22. Teams entering will cover a course of about 40 miles each day making a total of around 121 miles in all. This is the high light in the Quebec Winter Sports season beginning late in December and continuing until March. The event terminates with the Dog Derby Masquerade Ball at the Chateau Frontenac which hostelry is headquarters of the sport season. All the most prominent dog mushers of the continent figure or have figured at one time or another in the Derby and it is generally regarded as the biggest thing of its kind in America. Since 1922 when the contest had its inception, times have been consistently cut down. In that year the course was completed in 15 hours, 26 minutes, but last year Leonard Seppala, hero of the dash to Nome, made it in 11 hours, six minutes, 33 seconds. Lay-out shows Chateau Frontenac [illegible] Goddard, three times winner [illegible] Leonard Seppala, [illegible] record time.

FLYING FISTS, FLASHING GUNS PUNCTUATE EXCITING STORY OF SMUGGLERS AND SWEETHEARTS

[illegible] a startling revelation, the hero, who makes his knuckles of steel open the way to victory for him in the greatest adventure of his life, and his friend, a wistful youngster whose disappearance furnishes the initial thrill.

The leading lady is Nora Lane, the charming actress who formerly played opposite the late Fred Thompson and Adolphe Menjou and Jack Holt, while Farrell MacDonald appears as the lovable and mysterious stranger who happens to be fishing in the vicinity of the varied happenings. David Sharpe is the pal; James Gordon the former sea captain who is father of the girl; Edward Peil, Sr., is the conspiracy leader and Frank Hagney his right hand man.

OBITUARY

John L. Stauffer was born Feb. 27, 1851 in Folgensburg, Alsace, France; died Jan. 19th, 1930, aged 69 years 10 months 23 days. In 1866 he moved with his parents to America, where they made their home in Ill. until 1878 when they moved to Seward County, Nebraska. On December 25th 1882 he was married to Barbara E. Roth of Flanagan, Ill. They resided near Milford, Nebraska until the year 1910 when with their family moved to Tofield, Alberta, where he lived until the time of his death. This man was blessed with 11 children, nine daughters and two sons. He leaves to mourn his departure his companion, six daughters, one daughter in law 28 grand children, two great grand children. All living children were present at the funeral except Emma Stauffer, of Flanagan, Ill. Three daughters, two sons and three grand children preceded him in death, also four brothers and four sisters, he being the last of the family. The cause of his death was nephritis. During his long illness he received many visits from his relatives and friends which he enjoyed very much. Funeral services were conducted by J. K. Lehman, who took as his text, 2 Cor. [illegible] and by Mr. M. D. Stutzman, James 4-14. Interment took place in the cemetery near by the church. The pall bearers were J. E. Stauffer, Ezra Stauffer, J. C. Stauffer, Sam Stauffer, J. B. Stauffer and Will Stauffer. These are his nephews and were chosen by the deceased.

VARIETY THEATRE CONTEST

At the four shows succeeding the last episode of the "Tigers Shadow" on Feb. 15th we will give out duplicate tickets to all adults attending the shows. On Saturday, March 22 the drawing will be made and the three lucky winners will receive valuable and useful prizes.

Intermediate Hockey Team Chalk Up Three Victories

WIN FROM RYLEY HERE—BEAT THE ACMES AT EDMONTON AND SET BACK WETASKIWIN

The Tofield Intermediate Hockey team are happy these days having just completed the most enjoyable and victorious trip of their career.

Prior to the trip, on Wednesday night of last week, the Ryley boys journeyed over for an encounter, from which the Tofielders emerged victorious by a score of 5-1. The Ryley boys gave the locals a hard run and were not by any means easy. Marvin Kjosnes' rushes were always dangerous and Bowick in goal was called on to stop many a hard drive.

The game opened with Tofield adopting a new style of play which was not a success. Consequently for a few moments the Ryley crew had the Tofielders bottled up. As soon as orders could be given the play opened up and the locals more than held their own. The scoring was evenly divided over the whole game and between the forwards. Bob Whyte got one, W. Worton two and S. Worton two. Ryley's goal was scored by Marvin Kjosnes who stickhandled all the way down and shot from close quarters.

The trip to Edmonton and Wetaskiwin was the most pretentious one this team has ever taken. Leaving Tofield on Friday afternoon it met the South Side Acmes at the South Side rink on Friday night. This was a hard fought struggle and was a ding dong affair all the way through. The teams are very well matched and have met two or three times each season for the past three winters.

Hard and fast hockey was played and the meagre crowd was given plenty of thrills for their money.

The game opened up at a fast clip with Tofield setting the pace. The Edmonton sturdy defence, Hefty McGuire and Morris, held firm however, living up to their reputation of steady defence men. On the attack too, they were always dangerous. Glover and Martin Tofield's defence were stopping rush after rush and the shots that did get through to the goalie were turned aside. After about ten minutes play, Bob Whyte on left wing checked an oncoming player, shot quick and scored. Encouraged Tofield speeded up and before many minutes of play S. Worton had scored another. Shortly after this W. Worton was hurt and had to be assisted from the ice. The period ended 2-0 for Tofield.

At the resumption of play Edmonton pressed hard for a goal and McGuire, coming down on a solo effort, shot from outside the defence and scored. Edmonton scored shortly after this and evened the count. From then on it was a see saw until it was four all. Tofield scored twice and Edmonton twice. It was Sid Worton's big night out, for in all he scored four goals, flashing a brand of marksmanship the Edmonton goalie could not fathom. The period ended 3-4 for Tofield.

The last period was fast and furious hockey. With one goal needed to even up the count, Edmonton worked like trojans and changed their forward line frequently. Bowick in goal, however, never let up the good work and Glover and Martin on defence were playing steady hockey. Sid Worton picking up the puck from behind his own net eluded the Edmonton forwards stickhandled by the defence and scored and later the forwards going up three abreast he took a pass from his brother and scored again bringing the visitors score up to six. Edmonton then rallied and beat Bowick with a neat counter, and the game ended 6-4 in favor of the visitors. The ice was perfect, white as snow and as smooth as glass. While the night was not exceptionally cold, the ice was firm, an ideal night for hockey.

On Saturday noon the team entrained for Wetaskiwin where they met the Wetaskiwin intermediates. This team is managed by Mr. McCullough, former principal of the Tofield school, and in addition to playing a hard fast hockey game and winning, the boys were royally entertained by Mr. and Mrs. McCullough. After the game the boys were guests at a dance given by the Wetaskiwin Elks, which lasted until midnight. Shortly after midnight a lunch was provided in another hall where an informal social time was held. Then the entire team were taken to Mr. and Mrs. McCullough's to await the coming of the 5.30 train. The trip to Wetaskiwin was very much enjoyed. We found the boys good sports, the girls charming and the older folk gracious, and what more could we ask.

The game was refereed by Mr. J. W. Somers, who for many years operated a drug store here, and who has a drug store business there. He is an experienced referee and pleased both teams. There were only three penalties, Tofield drawing two and Wetaskiwin one.

The game opened up at a merry pace, and it was not long before both goalies were tested. Tofield had a little the edge in play but the home team were always dangerous. Their skating was fast and the Tofielders, after a hard game the previous night found it all they could do to keep upto them. The scoring was opened by W. Worton when he shot from well outside the defence. This was all the scoring in the first period. In the second period faster hockey was played Wetaskiwin trying hard to even the count. The ice was heavy and both teams were changing their men frequently. Towards the middle of the period, Whyte going up on his wing, stickhandled through the defence and scored. This completed the scoring for this period.

In the third period the fastest hockey was played. Time and time again the Wetaskiwin forwards who were tall fast skaters would come down only to be turned away by the Tofield defence, and when they did get through Bowick was right there. This period was scoreless but furnished the best hockey of the night. The Tofield forwards kept up their attack and the crowd was wildly cheering the whole time.

In the last period (there were four 15 minute periods) the pace began to tell and play slowed up some. Both teams were game and were putting all they had into it. About the middle of the period Wetaskiwin scored on a lone rush and sensing a chance to even the score, put on a burst of speed that livened up the issue. Their hopes were short liver however, for S. Worton taking the puck down eluded the defence and scored, thus making the score 5-1 in favor of Tofield, this being the score at the end of the game.

The boys were highly elated at winning both games and gave three cheers for their opponents, the referee and McCullough.

Those making the trip were as follows: H. Bowick, Les. Glover, Herb Martin, H. McHeffey, Ed. Hill, L. Swinton, Paul Thompson, Bob White, S. Worton, W. R. Worton, W. Worton. All were connected with the team with the exception of Ed Hill, who was the lone supporter.

Tofield Ladies Win Visitors Trophy At Edmonton Spiel

The ladies' curling rink skipped by Mrs. McCauley won the Visitors Trophy at the Edmonton Ladies' Bonspiel. In addition to bringing home a splendid cup, they were recipients of a beautiful silver hot water jug each.

The personel of the rink is as follows:—Mrs. E. Rogers, lead; Mrs. Chapman, second; Mrs. Brace, third; and Mrs. McCauley, skip.

Other rinks from Tofield were also entered in the Edmonton spiel but they were not successful in getting into the jewelry. The personel of the rinks are as follows: Mesdames Hobson, Swift, Beirnes, Clutterham (skip). Mesdames Firth, Miss Gray, Warner, Jobb (skip)

TOFIELD CURLERS PLAY AT RYLEY

A friendly game was played between Tofield and Ryley curlers. Those making the journey were, Dr. Law, A.B.Clutterham, W.Cory and C. Hobson, (skip.)

Two games were played the first going to 18 ends and the second decided by the last rock. Ryley won both games by a very small margin.

McLAUGHLIN RINK WINS GRAND AGGREGATE AND OTHER PRIZES AT CAMROSE

The Tofield rink attending the Camrose Bonspiel were successful in winning the grand aggregate, came second in the wholesalers and retailers competition and third in the grand challenge. They brought back with them as spoils of victory, a wallet, pen and pencil set and smoker stand. The personel of the rink were, Stan Yakibuski, Geo. Bissett, Calvert and Geo. McLaughlin (skip).

NO TOWN ELECTION TO BE HELD

Nomination day passed off quite quietly at Tofield the three councillors and four school trustees being nominated.

For the town council T. W. Taylor was nominated by J. Chapman and A. J. H. McCauley.

J. G. Jobb was nominated by A. A. Beirnes and T. W. Taylor and J. Chapman was nominated by J. W. McMullen and R. W. Pincott.

For the school board, J. W. Robinson was nominated by J. W. McMullen and R. W. Pincott. A. P. Harold was nominated by J. W. Cookson and J. W. Robinson. A. J. Harrison was nominated by E. W. Rogers and W. C. Swift. A. J. H. McCauley was nominated by J. Chapman and J. W. Robinson.

A. P. Harold withdrew his nomination on Tuesday, consequently the other three school board nominees are elected by acclamation. The same applies to the town council. There were three nominees and three councillors were needed.

WHO IS THE TIGER?

Since the serial started at the Variety Theatre some eight weeks ago, there has been very many guesses as to who "the tiger" was. As a mystery picture it has all the theatre goers guessing and many are intensely interested in the unfolding, week by week, of the story. The serial has two more weeks to run and then the secret will be out.

Annual Town Meeting Well Attended

LARGEST NUMBER FOR YEARS

COMING ELECTRICITY WIDELY DISCUSSED

The annual meeting of the town of Tofield was held on Friday of last week and contrary to previous years there was an exceptionally good turn out of citizens.

The electricity question was no doubt responsible for the large attendance, but the crowd were equally interested in all matters pertaining to the town, including of course the financial statement.

Mayor Swift was in the chair and opened the meeting by describing his visit to the power company's office at Calgary. He said that the current could be brought here providing there were sufficient users and they were willing to pay the rate asked for by the company. These rates were divided into three classes, domestic, commercial and industrial. The domestic rate was 10c per kilowatt hour for the first thirty hours, and larger quantities cheaper. There was a service charge of $1.50 per month and a net minimum of $2.00 including service charge. The commercial service rates are 10c per kilowatt hour for the first 100 hours and lower rates for larger quantities. The service charge is $1.50 per month for the first 500 watts of installed capacity, and 40c per month for each additional 250 watts of installed capacity. Industrial rates are 10c for 2 kilowatt hours for first 100 hours and lower rates for larger quantities. Calgary pays 4½c and there is no service charge.

Tom Wallington wished to have minimum explained and this was done.

W. J. Chapman, town secretary-treasurer then read the financial statement and answered a number of questions regarding town finance. Eleven years ago the debt was $165,000 now it is $85,000 or if you take into account the $10,000 in bonds the town has a debt of only $85,000. Some detail questions regarding finance were asked and answered, Tom Wallington showing a healthy interest in these matters.

The meeting then swinging back to the electric light question, Mr. J. Rogers asking whether it would be necessary for contract to be signed by all towns. Mr. Swift answered in the affirmative. It was explained that while the town was compelled to give a ten year franchise, the private user was not called upon to sign a ten year contract.

The cost of gas was much less than the cost of electricity for people in town. It was not expected to supply the individual farmer. Could not install transformers for one man. The company would put in a transformer for a group of farmers who would buy current wholesale.

Mr. Rogers said that in the south of the province they had changed from gas to electricity. W. Chapman expressed his opinion that it would be a long time before it replaced gas here.

Mr. McLaughlin said if times brightened up they could use it.

Mr. Malcolm, of the Royal Alexandra Hotel will welcome it.

The company would send a man to explain after finding out who might take it. The company wish to come in, but we must pay the penalty for being a small town.

It was mentioned that the government might bring it, but even so, the meeting did not wish to wait.

Mr. Hobson suggested appointing a committee to find out who would use it.

Mr. Swift said it was not necessary to appoint a committee. He suggested having a paper and have prospective users come and sign it.

A company representative came and saw gas. Did not bother with it. Company has not plant to take over.

Leeine charged a similar rate and are well pleased.

The Company wants street lighting contract. Will furnish 15 250 watt lamps for $45.00 per month.

The first step is to arrange a franchise, and then electricity might be here by June.

Considerable other discussion took place including matters pertaining to the curling rink, gravelling the roads into town, of the forthcoming nomination and election and other general matters.

On the motion of Mr. Chapman seconded by Mr. Hobson, the meeting adjourned.

IS SPRING HERE?

On Thursday, February 6th the section men saw two gophers, and this is the earliest appearance of the gopher we have record of.

Many people took advantage of the spring weather Sunday and turned out to communion services held at the school. We hope that this fine weather is here to stay awhile.

Mrs. Henry Sutton is visiting Mrs. Shaw in Calgary.

Mrs. T. D. Ferguson visited the J. H. Ingram home over the week-end.

Miss Clement of Tofield visited Mr. and Mrs. Campbell over the week-end.

Mr and Mrs. Carlisle and Selva visited Mr. and Mrs. Campbell Saturday evening.

Mr and Mrs. Leslie McGinitie entertained the Young People of the district at their home Sunday evening. The evening was spent in singing and music from our local orchestra which we will admit is real good. The next meeting will be held at the home of Mr. and Mrs. Soma.

Miss Rosie Spohan is working at the Henry Sutton home during Mrs. Sutton's absence.

Mr Soma returned home last week after spending some time fishing at Buck Lake. The catch was very successful.

There will be a meeting held Saturday Feb. 8th to discuss the question of building a new school at the school. All those interested in this question should attend.

The monthly meeting of the M. A. R. will be held at the home of Mrs. L. Carlisle on Wednesday, Feb.12. Everyone is cordially invited to attend.

Joe Sutton has been sawing wood and chopping grain around the district this week.

Mr and Mrs. J. [illegible] and family were Sunday guests of Mr. and Mrs. John Yoder.

Mr and Mrs. E. Erickson spent Sunday afternoon with Mr and Mrs. W. Jardie.

Mr and Mrs. Thor Grahn and family spent a few days visiting with relatives in May Lake.

Mr. and Mrs. W. McIntosh were Sunday evening guests of Mr. and Mrs. E. Erickson.

A number of young people were entertained at the home of Mr. and Mrs. Chas A. Lindberg on Thursday evening.

Mr. and Mrs. W. Hartchen and family and Mrs. E. Gones visited with Mr. and Mrs. D. Thompson on Sunday.

Bardo News

Mr. Martin Eide returned from the U. F. A. convention at Calgary on Monday evening. On Friday afternoon a U. F. A. meeting was held in the church basement when his report was read. A number of ladies were present to serve lunch, which was the crowning touch to the interesting afternoon.

A delightful party was held at the Steen home on Friday evening in honor of Miss Martin, teacher at Bardo, who left for her home in Edmonton on Saturday. Miss Freeman, of Edmonton will take her place as teacher of the lower room.

Several skating parties have been held on the local rink at V. Roth's during the past weeks. Some very good times have been reported.

Mr. Albert Haukedal, received the sad news of the death of his brother Nordall Haukedal, of New Norway on Sunday. Our sympathy is extended.

The Bible Classes have commenced again, the first class being held on Sunday evening at the home of Mr. and Mrs. Hendrickson.

An error concerning the Bardo Y. P. S. appeared in the last issue. Mr. Ben Anderson was elected as president and Miss Myrtle Rude as vice president.

Kingman

Mr. and Mrs. T. J. Regness and family, Mr. A Danielson and Mr. and Mrs. Ray Melvik and family were the guests of Mr. and Mrs. C. R. Blycher on Monday evening.

Mr. D. Brenmsted, of Edmonton was a business visitor here last Tuesday.

Mr. and Mrs. Thomas Regness visited with Mr. and Mrs. A Haboeth on Tuesday.

Mr Haug of Camrose visited friends here for a few days.

Mrs. O. Thompson returned from Ryley last Wednesday where she has been visiting with her mother, Mrs. Hendrickson for a couple of weeks.

Born—To Mr. and Mrs. P. Johnson January 19th, a son.

Mrs. W. McIntosh, Mrs. T. Horte and Mrs. E. Erickson were visitors with Mrs Ed Thompson on Thursday afternoon.

Mr. Jack Erickson has been on the sick list for some time but is now progressing favorably.

Miss Gladys Horte spent the week end visiting in Camrose.

Mr and Mrs. T. J. Regness and family were dinner guests of Mr. and Mrs. Hans Poulson on Sunday.

LOCAL and PERSONAL

Mr and Mrs. J. E. Brenneman left on Monday for Albany, Oregon, for a months trip to visit home folk.

The Tofield Curling Club mixed bonspiel will commence on Monday, February 17th. In this 'spiel there are two ladies and two gentlemen in each rink.

The curling club are holding a bridge and whist drive in the near future. The following committee were chosen to make preparations and take charge of the event. Messrs Hammond, Hobson, Abbott, Letourneau, Agnew, Clutterham, Dodds, Chapman and Ward.

J. D. Hannan, formerly of Tofield, now of Camrose was in town on Wednesday.

Frank Wood's radio phonograph is providing much pleasure to dancers, theatre goers and skaters. Each Saturday night at the show good music is provided, and an occasional dance pleases the younger folk. At the rink it has already proved its popularity and the skaters are calling for more.

Mrs. Paridis, formerly of Tofield, now of Edmonton, was in town this week.

There will be a hockey game between the Edmonton 10th troop Boy Scouts and the Tofield intermediates on Saturday next at 2:30 p. m. The visiting team is reputed to have fast clever skaters, stickhandlers and shots. A good game should result.

Miss Stella Clement and Miss Marion Cooper were in the city over the week-end.

R. W. Pincott made a business trip to Edmonton this week.

Mr. and Mrs. Bullock visited Fort Saskatchewan over the week-end

Miss Bertha Lee, of Edmonton visited home folk over the week-end.

Margaret McCauley visited Edmonton over the week end, and along with Edna Campbell was a Tofield supporter at the Tofield Edmonton game.

S. Stauffer is attending an International Tractor School, now being held in Edmonton.

HOCKEY BOYS HOLD WHIST DRIVE

A very pleasant whist drive took place at the W. I. rooms on Tuesday night of last week, the event being sponsored by the intermediate hockey team. Miss Enid Cory won ladies' first, a dutch silver tray; Eric Edwards won gentlemen's first, a gent's leather bill fold. The consolations were awarded to, ladies, Miss Kathleen Hobson, a leather change purse; gents, Mr. Eldridge, a leather match holder. After play a nice lunch was served.

SYNOPSIS OF RICHARD DIX IN "EASY COME—EASY GO"

Robert Parker, a firm believer in the theory that honesty is the best policy, loses his job and, while searching for another position, gets his first glimpse of Babs Quayle, but she disappears before he is able to meet her.

Parker's life is saved by Jim Bailey veteran crook, and, in gratitude, Parker agrees to drive Bailey to the Railroad station. Parker does not know that, in the bag carried by Bailey, is $100,000 which Bailey has stolen from the bank of which the girl's father is president.

The two men make the train by a narrow margin and, after pushing Bailey aboard, Parker is tossed on board after him by a couple of section hands. The girl and her father are also on the train, bound for a sanitarium for a rest.

Bailey attaches himself to the banker's party and Parker, who has learned of the stolen money, is forced to go along, hoping to recover the money and return it.

The Tofield Mercury

The Great West Festival at Calgary

Picturesque costumes, pretty girls, clever dancers, marvelous exhibitions of native handicraft will be among the offerings given to the public at the big folkdance, folksong and handicrafts festival scheduled to be held at the Palliser Hotel, Calgary, March 19-22 next. A great [illegible] nations whose people have come over to the Dominion to swell the number of New Canadians in the West will show the treasures of art accumulated during the centuries of their national history and Canadian culture will be given an impetus from the source which has always been the ailment of great art. This Calgary festival is the third of similar ones held at Winnipeg and Regina, and the first two proved so successful and awakened such interest that Premier Brownlee of Alberta asked for their repetition this spring. They are organized by the Canadian Pacific Railway and the coming one is also in co-operation with the Canadian Handicrafts Guild, Alberta Branch. Layout shows, top picture, group of Polish dancers; lower right, Irish Colleen in costume, lower left, Hungarian girl posed against platter of Hungarian make.

SOME FACTORS WHICH INFLUENCE THE HATCH: THE BREEDING STOCK

(Experimental Farms Note)

The factor of primary importance in the determination of the quality of the hatch is the vitality and the condition of the breeding stock. The importance of this factor should not be overlooked. Under present conditions of intensive breeding for egg production the vitality factor is continually being placed as of secondary importance to pedigree. Apart from native vitality of stock the breeders must be handled in such a way as to maintain body condition at its highest peak. It is usually wise to give them a rest prior to the breeding season. At any rate they should not be forced into rapid production before their eggs are needed for incubation purposes. During the past five years on the Experimental Farm System superior hatchability has been obtained from hens than from pullets without exception. Livability of chicks, however, has been approximately equal from both classes. It is suggested that if pullets must be used for breeding purposes they should be early hatched, well matured and vigorous. An added consideration is the fact that culling of pullet hatched stock is usually severe since many of their dams fail to live up to expectations in making a suitable first year egg record, and there is consequently no profit in rearing their progeny.

The proper feeding of breeders [illegible] importance since either the egg or the bird's body will lack any element which is essential to reproduction [illegible] which has not been supplied in the feed. A properly balanced breeding ration should ordinarily contain scratch grain, mash, green feed, grit, shell, charcoal and plenty of fresh water. Experiments over the farm system have shown that certain vitamin supplements improve hatchability. Among these cod liver oil was most efficient and should be contained in the mash at the rate of two per cent by weight prior to and during breeding season. Fresh green feeds should be fed when available and of these cabbage is one of the best. Good quality alfalfa leaf meal makes an excellent substitute for fresh green feed and may be mixed in the mash up to fifteen per cent by weight. Mangles make a good source of succulent feed as a supplement to alfalfa leaf meal. Other feeds of hight fibre content such as oat and barley products and wheat bran should be cut down in amount if present, to reduce fibre when alfalfa meal is fed.

PREPARING SEED GRAIN

(Experimental Farms Note)

The preparation of grain for seed should begin before harvest. While the grain is still standing impurities can be noted which will not be visible in the threshed grain. These impurities can either be rogued out or portions of the field which are clean may be cut and threshed separately. When threshing, the work of cleaning grain may be lessened considerably by saving the best and plumpest grain as it is delivered from the machine. Different portions of the field may give a different quality of grain. The best should be saved for seed. In threshing, care should be taken not to crack the grain or peel the hull from barley or oats as this often causes a loss in percentage germination and damaged kernels are difficult to remove from sound grain by any cleaning apparatus. Before commencing to clean grain for seed, care should be taken to have the mill perfectly free from all seeds. If properly operated, most cleaners will do good work and, if care is taken at threshing time to select the best and cleanest grain, the work of the fanning mill may be lessened and better work may be expected.

Grain saved for seed should be stored in a clean, dry bin which will remain dry. Excess moisture will cause heating and heating may injure the germination.

Wheat, oats, and barley should be treated for smut. This can be done successfully with either formalin or copper carbonate dust. Formalin can be used for any grain while copper carbonate should be used only for wheat, hulless oats, or barley. For the Loose Smut of wheat the hot water treatment is the only one to use. It is desirable to use copper carbonate whenever possible as the treatment can be made at any time before seeding and does not affect the germination. Grain treated with formalin should be sown as soon as possible after being treated as standing after this treatment often causes poor germination.

HEALTH SERVICE
CANADIAN MEDICAL ASSOCIATION
THE BEST FOOD

It is an unfortunate fact that irresponsible persons are so often guilty of making extravagant claims and statements which, upon enquiry prove to be false, that when it is desirable for a responsible body to emphasize some truth, the statements they make in connection are apt to be overlooked by the reader.

All of us have read, on many occasions, that such and such a food is the best. If it were simply claimed that the food was good and desirable, the claim might be regarded as reasonable. There is, however, beyond question, one food which is best for the infant and that is breast milk. The superiority of this natural food is apparently not realized, if we are to judge by the number of infants who are placed on artificial feedings, upon the the slightest excuse, and often upon no excuse at all.

Many infants have been brought up successfully upon artificial feedings, but this does not affect the fact that, comparing the artificially fed with the naturally fed infant, there is more sickness and less health among the babies who have been deprived of their natural food.

This natural food is best. It is more of a composition suitable for the infant. It is readily digested. It is practically sterile, there is no danger of its being contaminated with disease germs. The protective substances against disease which the mother has acquired are passed to the child in her milk, and so the naturally fed baby, during the nursing period, gains a certain protection against the common communicable diseases which are so severe and frequently are fatal when they attack the infant.

The act of nursing is also good for the child in that it develops the jaws in a proper way. There are other advantages which might be mentioned, in fact we may say that there are none but advantages in the natural milk, and therefore, our statement that it is the best food is beyond doubt or question.

To be natural fed is the right of every baby. We agree that every child has a right to a fair chance to develop to the full, physically and mentally. This means that every child must be breast fed, for it is in this way that he gets his fair chance.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

WHY SHOULD BIRTHS BE REGISTERED

There is a law in every province which requires the registration of births, and, as a rule, the partial responsibility for such registration rests upon the parent. Whether or not the parents are held responsible by law, they should see that the provincial requirements are met because for the following reasons, it is in the interest of the new born child that its birth be registered.

It is through the registration of births and deaths that a check is [illegible] The [illegible] of death, the undue prevalence of disease, the results of health work can only be ascertained from such figures. The public health organization depends upon these statistics, and as its efficiency is a matter of importance to each individual, in that protection from disease and the attainment of health depend so largely upon this public service, each citizen should do his part in seeing that the necessary reports as birth registrations are made to the authorities.

If the child's birth is not registered, he may be hampered in adult life because birth certificates are now demanded for

Proof of citizenship in order to have the right to vote, to obtain a passport for travelling outside the country.

Proof of age: this is required by insurance companies before claims can be settled; as evidence of a child's having reached school age, as evidence of age where work certificates are required, or to prove that age when work certificate is required has been passed, to prove age for enlistment in the army, to prove age in connection with marriage.

Establishment of identity and parentage to prove right to an inheritance.

Many more reasons might be given such as age for a motor driver's licence, and age for old age pension, but enough has been mentioned to establish clearly that from the standpoint of both the community and the individual, birth registration should never be neglected. A moral and legal obligation rests upon parents to see that the birth of their child is properly registered.

U. F. W. A. NOTICE

There will be a meeting of the U. F. W. A. at the municipal building on Feb. 18th, at 2 p. m. Roll call will be answered by "Economy in the use of Foods". Mr. Dodds will read a paper on, "Handier kitchens, built in Devices."

NOTICE

The next meeting of the Tofield U. F. A. will be held in the town hall on February 15th, at 2 p. m., weather permitting. Besides other business a talk will be given by Mr. F. W. Morton assisted by Mr. C. W. Piper and Mr A. Haugen on the topic "Farm Management".

Here and There

Canadian Pacific steamer Montcalm recently brought over to Canada two fine stallions belonging to the Prince of Wales "Aldebaran" an Arab and "Craender" a Clyde to go the royal ranch at High River Alberta. The two horses broke their journey at the Toronto Exhibition and later were carried across the Dominion by Canadian Pacific Express. Special accommodation was provided for them on the Minnedosa.

Rt Hon L. C. M. S. Amery secretary for the Dominions in the Baldwin administration fulfilled his wish recently when he climbed Mount Amery 10,940-foot peak in the Rockies to accomplish which he had travelled some six thousand miles by Canadian Pacific Empress of Australia and trains to Lake Louise from England. He fought his way through blizzards and many other hardships to the top of the peak. He was accompanied by a Swiss guide Edward Feuz of Lake Louise.

"Mr Churchill looked very funny working on one of father's threshing machines" said the Hon George Rodney aged ten who with his younger brother John recently travelled to England to take up schooling. Winston Churchill is a cousin of Lord Rodney who operates a ranch at Fort Saskatchewan Alberta.

The fourth game refuge has been established in New Brunswick by the provincial government at Becaguimec consisting of 43 square miles located in Carleton and York counties. This makes a total in all of about 640 square miles of territory set aside in the province as game sanctuaries since 1919.

Hon J. L. Perron, Quebec minister of agriculture has announced the loan of two-thirds of the purchase price of pure-bred sheep without interest charges to Quebec farmers. He aims to place 25,000 pure bred sheep throughout the province to bring in a yearly revenue of [illegible]

A yield of 3,269,996 barrels of apples is expected in Canada this year as compared with 3,235,276 in 1928. Compared with the five-year average of 2,986,310 barrels this is an increase of 30%, making it a bumper crop.

Wheat Market Condition— Wheat Pool Statement

Winnipeg, February 7th.

During the last few days there has been a great deal of comment concerning the Wheat Pool in Canada, our position, the wheat situation, financial matters and the troubles of Canadian stock brokers have been so intermingled under startling newspaper headings that the general public may have a confused idea of the present position of the wheat pool.

In order to make our members in the country fully aware of the facts, we are now giving a summary of our present position with reference to recent action of the Provincial Governments.

As a background, it should be stated that the Canadian Wheat Pool, as an organization acting in the interests of the producers is convinced that prices quoted for wheat at present are below a fair valuation of the wheat and not a just return to the producer, it should be distinctly understood, however, that the Pool is not following a policy of attempting to hold up supplies of wheat. We are still following the same basic marketing policy of previous years, of always offering to sell when there is an actual demand for wheat. While we have not been selling substantial quantities at the present low levels, we have been offering wheat to foreign buyers & domestic mills consistently throughout the present crop season.

A number of factors have entered to cause the present depression of wheat prices notably the huge carry over of last year's wheat the unbridled dumping of Argentine wheat on the European market, and just recently the unstable financial situation resulting from governmental investigations of the brokerage business in Canada. The Wheat Pool has fortunately been in a position to avoid liquidating its wheat upon an unfavorable market. In order to do this and at the same time pay Pool members for this year's crop on the basis of one dollar for No. 1 Northern, we have naturally had to borrow heavily from the banks. The banks have always loaned on the security of our wheat in store. The basis of these loans requires that the value of our wheat security shall always be 15 per cent greater than the amount of money advanced by the banks. We have always maintained this margin of safety and are doing so to-day.

During the past ten days an element of uncertainty and weakness has been introduced into the financial situation in Canada as result of some of the provincial governments seizing the accounts and books of certain stock and grain brokerage firms.

Some of those brokage houses are carrying large speculative grain accounts on behalf of clients, accounts based on margin payments only. The wheat market reflected the disturbing situation in the brokerage business and wheat prices were unable to pull themselves up to better levels. There was a possibility of speculative margin holders of wheat being sold at any minute which would involve the dumping, on an already weak market, of millions of bushels.

To prevent such an unfortunate occurence, the governments of the various provinces considered the release of these accounts from the general seizure, so that the margin accounts of wheat speculators could be negotiated in the customary way. This was done.

At the time the Canadian banks became concerned. They sensed a danger of wheat prices being forced down still lower as a result of the general unrest, and feared that the Wheat Pool margin of 15 per cent might be impaired, accordingly the banks called upon the Pools to take some action to ensure the maintenance of the margin.

If the Pool had been forced to sell large quantities of wheat on the present market, the result would have been disastrous. Prices would have been forced down to a level which would have involved a loss of millions of dollars to the Canadian nation.

It was at this point that the governments of the prairie provinces came into the picture of the Pools and banks. By Premiers Bracken, Anderson and Brownlee letters were addressed to the chairman of the leading banks committee stating that in the event of the Pool's margin becoming impaired the provincial governments stood ready to guarantee this margin.

It is generally admitted that the possibility of wheat prices going to levels which would endanger the Pool's security with the banks is almost inconceivable in view of the world wheat situation.

There is no reason whatsoever for Pool members or the public to feel uneasy about our financing. In a statement issued on Wednesday Geo. McIvor, general sales manager for the Canadian Wheat Pools, emphasized the fact that the provincial governments are not guaranteeing the banks advances to the Pool. These advances or loans are already adequately secured by collateral in the form of wheat equal in value to more than 15 per cent over and above the actual borrowings. The governments are guaranteeing only the margin of 15 per cent which we are still maintaining without assistance.

Commenting on Premier Bracken's statement to the effect that the financial responsibility assumed by the provincial governments is almost negligible, Mr. McIvor pointed out that the Pools had paid their members to date $1.00 per bushel basis No. 1 Northern, Fort William, and that before the governments would be in any way financially involved, all the Pool's wheat would have to be sold at an average price below $1.00 basis No. 1 Northern, Fort William, per bushel, which of course there is not the remotest liklihood of happening.

This summary shows that the Wheat Pools are not financially embarrassed in any sense of the word. Our customary margin with the banks is now being maintained, as it has in the past, solely upon the intrinsic value of our stocks of wheat. However, in addition to our usual security for loans, there is now the assurance of the provincial governments that the chartered banks of Canada need lose no sleep over our 15 per cent excess collateral security.

The world wheat situation is such that we are fully satisfied that our marketing policy is sound and we have every confidence that when the present abnormal conditions are cleared away our actions will result in greatly increased prosperity for Western Canada.

Throughout the whole of this difficult marketing situation which the Pool sales department has had to face the most remarkable feature is undoubtedly the splendid attitude adopted by Pool members throughout the prairies.

The loyalty and faithfulness of the Pool members, the wonderful morale they are displaying and the confidence they show in their organization is a glowing tribute to the fibre and stamina of the Canadian farmers. We thoroughly appreciate this spirit, and it is for that reason that we are making this statement. We wish to take the Wheat Pool membership into our confidence and assure them that the present situation is not one to cause serious worry or doubt as to the outcome.

We are confident that at an early date there will be an actual demand for Canadian wheat, and as soon as this demand will carry with it prices which will pay our farmers a reasonable return, your wheat will be successfully sold, and the purchasing power of Western Canada will be greatly enhanced.

To sum up, then, as Charles Dunning said yesterday, there is no occasion for alarm over the wheat marketing situation. What is needed is careful judgement and cool handling.

That is exactly what your board and sales department are doing—keeping cool.

SKATING CARNIVAL FRIDAY

Tofield annual skating fancy dress carnival will be held on Friday of this week. Prizes are offered for the best costumes.

Mrs. Sears Writes From Victoria

Victoria, B.C.

Editor's Note.—Mercury readers will be interested in reading the following letter from Mrs. G. W. Sears who is at present visiting her brother in Victoria, B.C.

"I am enjoying my trip very much and am keeping fine, have only been indisposed one day. January here was exceptionally cold for Victoria, the flowers were all frozen down, but grass is green and so many green trees which keep green the year around, such as the holly trees and ivy. But wood for the fire place is cheap, all they have to do is to go down to the beach and pick it up, some of it has to be sawed in two, but very good wood as it seems to be soaked in oil. We had a lot of windy days in January, at least the people here thought so, but they amuse me, as they do not know what cold weather is. I enjoyed the trip through the mountains, but most of the way the windows were so frosted over we could not see out, but we saw most of the interesting sights from the observation car, such as the Seven Sisters, Mt. Robson, and Blue River. There was plenty of snow at Jasper, but it was a very pretty place. Mt. Robson was the most wonderful sight, the sun shining on the snow and the foot of it covered with evergreens or Jack Pine. We need never worry about running out of Christmas trees as the mountains are covered with them. Enjoyed the boat ride from Vancouver to Victoria immensely, a distance of 90 miles. The water was calm and there was a beautiful enclosed glass deck to sit on. We passed many islands, they too, were covered with pines and were mostly summer resorts; met nice people on the trip, mostly farmers coming out to spend the winter, and Victoria is a very nice place for that too.

I get out every day to see and hear something interesting. Was down last night to the city temple where Rev. Clem Davies, (relative to the Francis family in Tofield) hold his services, it is a wonderful place and will hold 1500 people, and long before time to open the services the doors had to be locked to keep the people out, besides the regular services, a religious drama was put on written by Rev. Davies and assisted by a theatre troupe.

My brother, P. F. Ingarm, seems to be doing very well, judging by this afternoon. His office is in one of the best locations in the city, over the 15c. cent store and just a few doors from the Prairie Club, where the prairie men spend most of their time.

Yours truly,

MRS. G. W. SEARS

NO MACHINE GUNS OR MURDERS SEEN IN "MR. GANGSTER"

Patrons of the Variety Theatre are going to have a real treat in "Mr. Gangster," which comes on Saturday of this week.

"Mr. Gangster," based on Charles Francis Coe's story, which ran serially in the Saturday Evening Post and has been published in book form was directed by Raoul Walsh, Fox Film ace, along progressive lines.

Believe it or not, there is not a machine gun in the entire pictured story, murder is not committed, there is no enmity between law breakers and police, yet there always is poignant, human drama, thrills, suspense, romance, battles of wits, battles of brawn with no scene that is not as natural as it is logical.

From all of which one can gather that "Mr. Gangster," as a story of the underworld, is refreshingly different; and it is.

Don Terry, juvenile, playing the lead in his first picture, is a real artiste in Walsh's hands, and June Collyer is more beautiful than ever. Anders Randolf, Carol Lombard, Joe Brown, Nigel De Brulier, Arthur Stone, Stella Adams and Burr McIntosh are part of the brilliant supporting cast.

COMMUNITY SALE SOON

F. O. Ball announces that as soon as weather permits and circumstances are favorable he will hold a community sale at Tofield. Watch these columns for date of sale.

TOFIELD DEFEATS EDMONTON IN THRILLING OVERTIME BATTLE

Tofield won their fourth straight game on Saturday last, when they defeated the Edmonton 10th troop Boy Scouts in an exciting game by the score of 4-2.

Tofield played the first period without the services of their regular defenceman, Herb Martin, who was late getting away from work. But Leif Swinton filled the gap satisfactorily until his arrival.

The game started off rather slow but speeded up toward the end of the period and a fast pace was maintained until the end.

Edmonton scored first when an opposing player picked up a loose puck and skated right in top of Bowick in goal and gave him no chance to save. They came right back a few minutes later and scored another after a pretty two man rush. This was all the scoring in this period and the teams went to their dressing rooms with the score 2-0 for Edmonton.

In the sandwich session the play speeded up and after a few minutes of exciting play Tofield scored on a long shot. Edmonton seeing that their lead was being cut down tried hard to score and Tofield played hard for the equalizer. They were finally rewarded when W. Worton shot and placed the rubber disc in the upper right hand corner. The period ended with the teams deadlocked.

In the last period the teams battled tooth and nail for the winning counter, but neither team was able to dent the draperies. This period featured fast rushes and hard checking. At the end of the regulation twenty minute period it was decided to play a ten minute overtime period five minutes each way, there was no score at the end of the first five minutes. After a few exchange rushes Tofield scored on a fast three man rush. Sid Worton took the puck from his own goal line passed to W. Worton who carried the puck to the defense and then passed to R. Whyte who shot and scored the winning counter. Shortly after this W. Worton received a nasty cut in the face when he fell on an opposing players skates. He had to retire for the rest of the game. Sid Worton then scored the fourth goal just before time on a solo effort. This was all the scoring in the overtime period.

The work of the defence was of a high order. With the forwards showing signs of the strenuous week end of the previous week, the defense had a real assignment handed to them. Glover and Martin were as steady as rocks and their rushes were always dangerous. On one occasion Glover missed scoring by a hairs breadth. Bowick as usual came through with a high class job of net minding.

The Tofield team entertained the Edmonton team to a sleigh drive and lunch after the game.

BEHIND THE HOG

BY A. R. C.

On Saturday night two farmer rinks played, one skipped by our old friend Bill Foreman and the other by Bill Billman. Coming home tied up Foreman just failed to draw to the button which was too bad for his side as Billman had one on the button. Foreman's gang are now shouting for revenge. This game was followed by a large gallery.

The mixed spiel starts next week. Think up your alibis.

The game between the "Old Boys" and the "Youngsters?" resulted in a win for the "Old Boys." Score not available.

Saturday night pickup games are all the rage, and some good curling is to be seen at these games.

On Tuesday, February 4th, Mr and Mrs. Jas. Francis again entertained, this time to a party of more elderly friends and neighbors.

Conversation, cards and games kept all pleasantly engaged for a time. This was followed by appetizing and bounteous refreshments.

Each and all departing thought what a pair of really jolly good fellows are Mr. and Mrs. Francis.

The League of Nations serves its high purpose among the big divisions of the world's citizenry. And these gatherings among friends and neighbors in the wee small corners of the earth have a value all their own.

Mixed Bonspiel To Start Monday—92 Curlers

The annual mixed bonspiel of the Tofield curling club will commence on Monday, February 17th. There are a large number of entries and much enjoyment as well as good playing will be witnessed. A list of the rinks engaged follows.

W. Forman, Mrs. Letourneau, W. Bellamy and Mrs. Forman.

Chas. Hobson, Mrs. Hobson, J. Rogers and Mrs. Firth.

Geo. Bissett, Miss Clement, Glen Woods and Mrs. Bissett.

G. McLaughlin, Mrs. McLaughlin, L. Herndon and Ruth McLaughlin.

Mr. Beirnes, Mrs. Beirnes, D. W. Jacobs and Mrs. Malcolm.

Mr. Cory, Mrs. Cory, Bud Cory and Enid Cory.

Geo. Agnew, Mrs. Agnew, Roy Smith and Sid Worton.

M. C. Hammond, Mrs. Hammond, W. W. Hill and Ed Hill.

A. F. Ward, Mrs. Cap Lee, W. C. Billman and Mrs. Billman.

W. Chapman, Mrs. Chapman, H. Hicks and ——————.

J. Warner, Mrs. Warner, Bert Spalstead ——————.

Bud Hannan, Miss Hobson, Mrs. Hannan and Dad Harris.

C. Craig, Mrs. Craig, Mr. Carey, and Miss Clement.

Dr. Simpson, Mrs. Bruce, G. Bruce and T. Nomeland.

Dr. Law, Mrs. Law, W. Webb and Mrs. Morton.

Mr. Jobb, Mrs. Jobb, ———— — Thelma Jobb.

A. E. Calvert, Mrs. Clutterham, A. B. Clutterham and Mrs. Calvert.

A. C. Dodds, Mrs. Dodds, F. Imbermill ——.

Dr. Morrison, Miss Gray, J. Wiltsen and Mrs. Wiltsen.

J. Lee, Mrs. J. Lee, John Chapman and Mrs. Bullock.

A. J. H. McCauley, Mrs. McCauley, A. O. Innis and Mrs. Innis.

Lem Abbott, Mrs. Abbott, O. Letourneau and Mrs. Letourneau.

C. W. Swift, Mrs. Swift, E. Rogers and Mrs. E. Rogers.

VARIETY THEATRE TO COMMENCE INTERESTING COMPETITION

Commencing with this coming Saturday the Variety Theatre is issuing duplicate tickets to all theatre patrons. On Saturday March 22, a draw will be made and the following prizes awarded:

1st—Large Premium Ham

2nd 100 lbs. of flour

3rd Large Shamrock Ham

4th 20 lb. bag of sugar

This is a new innovation and one that promises to be popular with theatre-goers.

KINGMAN

C. F. Sealand spent a few days visiting in Bawlf last week.

Mr. F. Erickson was a business visitor in Camrose on Wednesday.

Visitors at the Welch home on Wednesday afternoon were Mrs. Oscar Thompson, Mrs. T. Horte, Mrs. Ed Thompson and daughter Ida, and Mrs. W. McIntosh.

Mr. H. Sparby visited in Edmonton over the week end.

W. Christenson attended the agricultural course in Camrose.

Mr. and Mrs. W. Jardie visited with Mr. and Mrs. D. M. Thompson on Sunday.

Mr. and Mrs. Roy Melvik and family visited with Mr. and Mrs. A. Johnson on Sunday evening.

Mr. and Mrs. C. R. Blychert were the guests of Mr. and Mrs. Lowry on Sunday.

Mr. and Mrs. E. Erickson were the guests of Mr. and Mrs. J. Anderson over the week end.

Mr. and Mrs. T. J. Rogness, Mr. H. Johnson, Mrs. Nels Johnson and daughter Olga and Mr. and Mrs. T. Rogness were the Sunday guests of Mr. and Mrs. H. Paulson.

Misses Irene Horte and Ina Legren of Camrose visited with Mr. and Mrs. T. Horte over the week end.

LOCAL and PERSONAL

Miss Hazel Preston, of Edmonton spent the weekend with her cousin Eloise.

The W. M. S. of the United Church will meet at the home of Mrs. Wm. Webb on Thursday, February 20th at 3 p.m.

Ruth McLaughlin is home for a few days.

A shower was held for Mrs. Campbell (Saweda Fry) at the home of Winnie Worton. A very pleasant social time was had and the bride received many useful gifts.

As we go to press we hear that McLaughlin has won the North Western Brewery Cup in the Edmonton bonspiel. He has also entered a rink in the MacDonald Brier Competition. The winner of this competition wins the right to represent Alberta in Toronto.

On February 26th "The Arrival of Kitty" will be held in the Variety Theatre under the auspices of the Young People's Society of the United Church. Don't miss it.

The Young People's Society held a skating party on Monday evening last at the rink, after which they journeyed out to Mr. and Mrs. Hills and had a social hour, where a delicious lunch was served by Mrs. Hill.

Mrs. McLaughlin has been visiting in the city for a few days.

On Saturday afternoon at 2.30 p.m. sharp there will be a hockey game held at the Tofield skating rink, between Tofield and Wetaskiwin. The Wetaskiwin team is managed by R. V. McCullough, former High School principal here. These teams met two weeks ago at Wetaskiwin and the play was very even. In a recent talk with McCullough he says, that he has strengthened his team since the last game. This promises to be one of the best games this year and we would like to see a real crowd watch the team in action. Everybody come and cheer.

Quite a number from here attended the International tractor school in Edmonton recently.

Miss Lela Clement visited her home in Edmonton over the week-end.

Miss Minnie Wood, of Edmonton is visiting in town for a few days.

FOR SALE.—MOFFAT GAS range; 2 walnut beds; and other household furniture. Apply to Mrs. Ross, 'phone 76, Tofield.

FOR SALE.—SMALL STACK OF good hay. Also oat straw at $2.00 per load and wheat straw at 50c per load. Apply to T. E. Seale.

BARDO

The ladies' aid met at the home of Mrs. Eggan on Wednesday last. Quite a number of ladies were present. Mrs. Ovidia Breckan acted as hostess.

A very delightful evening was spent at the Foshaug home last Wednesday, when a number of young people gathered there to help Mabel Foshaug celebrate her birthday. Many lively games were played; these were followed by a delicious lunch. The singing of "Auld Lang Syne" and "She's a jolly good fellow," brought the party to a close.

Mr. and Mrs. Albert Haukedal attended the funeral of their brother, Nordell Haukedal of New Norway last Thursday. They returned on Friday.

Mr. Olaf Anderson spent a few days of last week in Edmonton.

The services and Y.P.S. at Bardo, on Sunday, were well attended.

Mrs. Hagen and Martin, Mrs. Jevning and family and Gunvald Nerland were dinner visitors at the Johansen home on Sunday.

VARIETY THEATRE

Who Is The Tiger

SATURDAY IS THE BIG DAY AT THE MOVIES. THREE REASON WHY.

1:—Last episode of the "Tigers Shadow".
2:—Don Ferey starring in "Me Gangster."
3:—First night of big prize contest.

Duplicate tickets will be given out for the next five Saturday night shows. On March 22nd, when we show "SIMBA", the draw will be made and the winners will get their prizes which are listed in another column. Don't miss this contest. Five good shows and a chance for a valuable prize on all adult tickets.

Don't miss Saturday's show so as to get in on the start of this contest. Draw will be made on March 22nd.

Only a Telephone Cord -- but!

What infinite care and preparation were necessary to call it into being. From the far corners of the globe came silk and cotton while the earth yielded up its copper ore. Famous scientists, engineers of renown and workers skilled in their particular operations have all contributed to produce these connecting sinews of modern communication. In the Northern Electric Company's great plant at Montreal the finest copper tinsel is covered with silk and cotton threads then twisted into cords of the necessary size and, passing through the most intricate machinery, is covered with a braided silk covering. All this must be done right, if the humble telephone cord is to carry the nation's conversations through the years.

The Tofield Mercury

Can. Pacific President Declares Faith in Canada; Based on Fine Progress

E. W. Beatty tells delegates to Canadian Industrial Traffic League that "end is not yet" although this railway has spent $386,000,000 in past decade in improvements, new railway facilities, new hotels, new ocean fleets leading to deeper pride and patriotism in the Dominion.

E. W. Beatty

That the Canadian Pacific Railway spent more than $[illegible], [illegible] on capital account in Canada for Canadian services during the past [illegible] years and that "the end is not yet," was stressed by E. W. Beatty, Chairman and President of the Company before the members of the Canadian Industrial Traffic League at their banquet in Montreal recently. With the filling up of this country and the advancement of its commerce, [illegible] will new construction and new territory be required, but vastly enlarged and improved facilities in the older districts will be needed because they will be outgrown by the needs of the [illegible] for which they are provided," he emphasized when pointing his faith in the future of Canada and when urging upon his hearers and upon all other business men a sympathetic regard for our needs and an accurate appreciation of what we have done and are endeavouring to do".

Declaring that the policy of the Canadian Pacific Railway was one of faith in Canada and in intelligent self interest, Mr. Beatty supported his statements with a series of graphic and deeply interesting figures. This policy, he said, has resulted in capital expenditure of more than $386,000,000 during the past decade; improvements and new construction which provided Canada not only with improved railway facilities but with new hotels, new ocean fleets and with a deeper pride and patriotism in the Dominion as witnessed by the nation-wide response to the influence and appeal of the music festivals held in cities from coast to coast, which festivals, he emphasized, made a substantial contribution to the cultural life of the country and to its solidarity as a nation.

Railway problems, Mr. Beatty continued, were no longer the problems of the railway operator, directors and shareholders exclusively. More and more the transportation companies were taking the business [illegible] generally and the public at large into their confidence in order that they could appreciate railway problems and in turn give their intelligent support to the transportation companies. The companies have three functions to perform: to supply adequate service at reasonable cost, sufficient facilities to meet the needs of commerce, and to extend and construct ahead of settlement in order that additional development may take place. These factors, he said, require adequate compensation for the service they render and adequate [illegible] during the [illegible] credit to provide new moneys for new enterprises. It was true that the Canadian Pacific was earning and paying seven per cent on capital stock from railway earnings, but more was required in order to create reserves necessary for annual capital expenditures [illegible] Members of the Canadian Industrial Traffic League would appreciate the fate of a company [illegible] had to borrow everything [illegible].

Conditions in Canada during the latter part of 1929 resulting from the decrease in the western grain crop [illegible] railway [illegible] represented the [illegible] of an extraordinary [illegible] of circumstances. The railways [illegible] faced [illegible] nor had the country suffered from anything approaching a general depression. It was not a condition to give much ground for apprehension and the situation [illegible] was not likely to be repeated in subsequent years.

The Canadian Pacific Railway, Mr. Beatty said, had a peculiarly national significance in that 97 per cent of all its investments in rail, steamship, hotel, telegraphs and [illegible] was in Canada, and [illegible] of its incentive its [illegible] had been dictated by faith in Canada and by intelligent self interest. "I do not know of any combination of factors which tend more towards [illegible] supremacy than a [illegible] national sentiment, a sense of value [illegible] [illegible] that has been [illegible] the undertaking [illegible] questioned and that its [illegible] is adequate, rewarding" [illegible] but declared when [illegible] that the Canadian Pacific was [illegible] these factors.

"Improvements in physical [illegible] construction of new lines and facilities is one way by which a corporation can show its faith and also its leadership" Mr. Beatty continued. "The Canadian Pacific in the past ten years has spent millions of dollars in [illegible] account in connection with [illegible] [illegible]

railway, it has increased the weight of rail and has block-signalled over 1,300 miles, also it has increased its rail mileage by almost 2,[illegible] miles, which a few years ago would have been considered a considerable system in itself. It has built at Vancouver one of the most modern piers in the world for ocean and coastal freight and passenger service. It has completed [illegible] struction [illegible] lining of the Connaught Tunnel in the Selkirk Mountains at a cost of more than eight million dollars. It has paid its share of the cost of the viaduct in Toronto. It has spent millions of dollars in [illegible] modernizing and strengthening bridges and [illegible] conspicuous development through the efforts of Canadian engineers in designing and constructing the largest and most powerful locomotives in the British Empire.

The value of the Canadian Pacific as a good citizen was pointed out by the railway President. For many years, and particularly since the war the Canadian Pacific and many other companies have endeavoured to associate themselves with, and support many community movements and to assist hospitals and educational movements. The rules which applied to individual good citizenship also applied to corporations.

It was a frequent and logical complaint of railways in the United States that they were heavily taxed and that this taxation was almost crippling in its effect. There was no disputing the correctness of that statement insofar as many railways were concerned, but he would willingly assume their taxes if he could be assured of their rates. One railway of Canada, however did not escape heavy taxation. In 1913 the Canadian Pacific's total tax bill was $1,362,000. In 1929 it was $8,[illegible], an increase of 482 per cent. This sum represented taxes at [illegible] of $21,[illegible] per day, $915 per hour, $15.25 per minute or 25½ cents per second. The Company, he emphasized, was making a very substantial contribution to the Government of the country. The daily payroll of the Canadian Pacific was $267,000, its daily disbursement for material and supplies was $[illegible] and its daily tax bill $21,000. These figures indicated the contribution to day by day business and applying the same basis to the total expenditure of all railways in Canada last year developed the fact that the total sum disbursed exceeded $500,000,000, or a little more than $53 for every man, woman and child in the country.

AGRICULTURAL SHORT COURSE
University of Alberta

An agricultural short course will be held at the University of Alberta during the period February 3rd to February 15th, 1930. The course might well be called a Farmers and Homemakers course, as it has now provide the opportunity for the rural women as well as the men to obtain in a short time first hand knowledge of the work going on at the University for the betterment of Alberta Agriculture. This course will be under the direction of the teaching and investigational staff of the Faculty of Agriculture, but will be generally assisted by members from other Departments of the University.

It is felt that there are many farm men and farm women, old and young, who would not feel justified in making the expenditure of time and money required by a regular university course, who would [illegible] welcome the opportunity to make some acquaintance with the provincial institution and its work. This short course is designed for just such people. It is being arranged at a season when the duties of the farm are least pressing, so that as many as possible may be able to take advantage of it. It is believed that those who attend will be able to get a real grasp of the spirit and direction of the University work in Agriculture.

A program has been prepared covering as completely as possible the more important aspects of the work. In conducting the course, the University has two important points in mind: firstly, that the agriculturists of this province may have the opportunity to visit the University and to learn about the experimental work being done and how it applies to practical farming; and secondly, to meet and become acquainted with the staff members. To be personally acquainted with the men who are working for the betterment of agriculture ought to be a help to anyone who is farming. The contact with the farmer, on the other hand gives the technical man the contact with the practical man's viewpoint. Lectures and demonstrations will be given in connection with soils, field and garden crops, common insect and disease pests, livestock, poultry, common diseases of animals and farm machinery. Inspection trips have also been arranged to some places of interest in Edmonton, including the packing plants, the Canadian Government Elevator, and provincial seed cleaning plant.

(Experimental Farms Note.)

The five leading varieties of wheat in Alberta at the present time are Marquis, Reward, Garnet, Red Bobs 222 and Renfrew.

There has always been a tendency to replace an old standard and proven variety such as Marquis with something new. Marquis still continues to be the best variety to grow in districts where it is not subject to injury from early fall frost and rust. Under such conditions farmers should be tardy in replacing it with unproven sorts.

Reward is a new variety of unquestionable merit, and appears to have certain characteristics that make it particularly suitable for central and northern Alberta. It is about one week earlier in maturity than Marquis. It produces a sample of threshed grain which resembles and is equal to Marquis in milling and baking quality. Reward has repeatedly proven its merits as an exhibition wheat. Its straw is strong. Under some conditions, however, Reward will not yield as well as Marquis. This variety will possibly eventually replace other early maturing sorts in Alberta.

Garnet is one or two days earlier in maturity than Reward and under some conditions is a heavier yielder. This variety has not met with favor from the Canadian millers although no complaints have been raised from the overseas trade. It is doubtful if this excellent variety will ever be able to live down the prejudice developed as a result of the discrimination against it by the local milling industry. Where Reward is not available, Garnet is the best variety to replace other early maturing sorts.

Red Bobs 222 is about midway between Garnet and Marquis in maturity. It is a heavy yielder and has strong straw, but when grown under some conditions, lacks quality of threshed grain. This latter factor is the only one that has prevented this sort becoming one of our leading varieties.

Renfrew is a late maturing variety that produces wonderful yields in districts where it will mature. Its late maturity makes it a very risky variety to use in the park belt of Alberta.

CERIAL RUSTS—EARLY HISTORY

(Experimental farms note)

Whether or not "blasting" and "mildew" of crops mentioned in the Bible refer in part to rust may be a matter of doubt, but we know that for several centuries previous to the Christian Era rust was known to the Greeks and Romans as one of their worst pest crops. Their philosophers attributed it to a "burning" caused by the sun heating drops of rain or dew on the plants. When the "burning" was severe, the straw became brittle and black, as if charred by fire. So frequent and destructive was rust that the Greek farmers regularly besought Apollo, or one of their numerous gods, to protect their fields from this blight. The Roman farmers had a special rust god, Robigus, in whose honor they held a solemn festival each spring. At this feast they sacrificed a reddish dog (symbolic of rust) offered appropriate gifts, such as wine and grain, and besought him to spare their precious harvest. According to a Roman legend, rust was a curse sent on farmers because a boy had burned a fox which he caught robbing his father's hen roost.

It seems entirely probable that throughout the Middle ages, rust continued to destroy the crops, but few references to it are extant. Blights and diseases of all kinds were considered as the work of Satan and his agents. The people, in order to protect themselves from such ills, burnt witches and subjected to all sorts of torture those suspected of having the "Evil Eye". In "King Lear" Shakespear makes Edgar talk wildly of the "foul fiend" who "mil dews the white wheat".

It was not until about the middle of the nineteenth century that the real nature of plant diseases began to be understood. Organisms had previously been found associated with diseased conditions, but the general interpretation was that over-nourishment, or some environmental condition, upset the normal physiological processes of the plant, and resulted in a break-down of the tissue. From such disorganized tissues a lower type of life was supposed to arise. In other words, the disease was supposed to produce the organism rather than the organism the disease. About 1860 incontrovertible evidence was procured to show that organisms caused plant diseases, and it is interesting to note that this epoch-making discovery was made in connection with cereal rust.

Ketchamoot Items

Lorne Lee attended the International tractor school held in Edmonton last week.

Mr. Paul McMullen returned home last Tuesday from Calgary where he has been visiting his sister Mrs. C Graves.

The meeting of the ratepayers of Ketchamoot held Saturday was well attended. It was decided to build a new two room school.

Mr. and Mrs. Henry McGinitie entertained a number of their friends to a whist drive Friday evening. Everyone reported having an enjoyable time.

Mr. and Mrs. Soma entertained about forty young people at their home on Sunday evening. At midnight a delicious lunch was served after which all departed for home. Next Sunday they will all meet at the home of Mr. and Mrs. Campbell.

Mr and Mrs. Thompson entertained to a number of friends to a whist drive Monday evening. Those who went from this district were; Mr. and Mrs. Roy Lee, Mr. and Mrs. Henry McGinitie, Mrs. Henderson, Miss Mildred Ingram, Albert Sears, Lorne Lee, Willie Ingram, Martin Lawson. Mrs. Henry McGinitie brought home first ladies prize and Mr. Henry McGinitie won first Gents prize.

With a photo-electric photometer such as the one attached to the telescope at the Dominion Observatory, Ottawa, it is possible to measure the brightness of a star to within one half of one per cent of its value. This instrument is used mainly for following the changes in the brightness of variable stars.

Lakeshore

Mrs. Leslie Jones went to Camrose last week where she will remain for some time the guest of her parents Mr. and Mrs. Waterson.

Mr. George Abernethy spent two or three days in Edmonton last week on business.

Mrs. T. R.Murray and two little sons spent last Monday afternoon with Mrs. George Francis.

The children of Mr. Mrs. Chas. Gray were able to start school again on Monday last after being home since the holidays with the mumps.

Miss Polly Napier of Tofield spent the week end with Mrs. T. R. Murray.

SERVICE

Salvation Army girl (to Scotsman): "Will you give a quarter for the Lord?"

"How auld are ye, Lassie?"

"Eighteen".

"Ah wel, I'm seventy-five. I'll be seein' Him afore you, and I'll hand it to Him myself."

[illegible]

"Jimmy, I wish you'd learn better table manners; you're a regular little pig at the table."

Deep silence on Jimmy's part. So father in order to impress him more, added. "I say, Jimmy, do you know what a pig is?"

"Yes, sir," replied Jimmy meekly, "It's a hog's little boy."

Tofield Lose To Wetaskiwin

HERB MARTIN HURT DURING FIRST FIVE MINUTES OF PLAY

One of the largest crowds in years to attend a hockey game at Tofield watched the local team go down to defeat before Wetaskiwin on Saturday afternoon last.

This game was a return game to the one played at Wetaskiwin two weeks previously, when Tofield won by a score of 3-1.

The Wetaskiwin team was strengthened by the unexpected inclusion of a Calgary senior player who was playing with Wetaskiwin for the first time. This player in a collision with Martin accidently fell on him, after less than five minutes of play, and caused Martin's retirement from the game. The extra strength of the visitors coupled with the weakening of the locals caused by Martin's injury, threw the balance of power to the visitors. The locals were too anxious. They had by far the greater portion of territory play —much more than was good for them —repeatedly crowding the visitors to their own net and behind it. But no score came from this scrimmaging hockey. On occasions the visitors would break away and were able to chalk up five counters before the locals were able to tally. On defence with Glover, Swinton made a good showing, displaying plenty of aggressiveness and hard work, but as can only be expected he lacked the experience of the cool and calculating Herb.

Swinton was ably supported by his side partner, Glover, who turned in an excellent game.

The first period of 15 minutes was scoreless, the locals forcing the play into the visitors territory, with much choppy hockey around the goal mouth. The visitors rushes were, however, dangerous, but their shooting was wide.

The visitor's first score came in the second period. The local manager made an error of judgment by starting a sub, reserving a regular for the latter half of the period. It should be remembered that the local's subs are members of a juvenile team, and while in the course of time they will be equally as good as the regulars, at present, when they are used there is a weakening of the team.

After about three minutes of play in the second period, a Wetaskiwin player bringing up the puck was forced into the corner by the defence, and in a scrimmage just in front and to the side of the goal, the puck was given a backhand flip into the net. The second came from a solo effort of J. Watson's who placed a neat counter past Bowick, and the visitors were two up. This ended the scoring for this period.

The third period opened with the locals distinctly on the attack. Wetaskiwin found it very hard to break away and there was choppy play to the side and behind their net. While the visitors found it hard to break away the locals found harder to score and about the middle of the period Larson on a lone rush shot hard from just outside the defence; [illegible] saved but the puck lodged between his pads and before he could get it out Larson skated in and put Bowick and puck as well into the net. Encouraged by their lead Wetaskiwin speeded up and added two more to their list. Things looked black for the locals and with a shut out staring them in the face and less than five minutes to go they abandoned combination play and relied on individual rushes. The locals first score came from a spectacular rush by W. Worton. Picking the puck from near the local goal he made a straight speedy dash down the ice, jumping over sticks enroute, past the defence and scored. Two minutes later S. Worton [illegible] an oncoming visitor on his own wing took the puck back and scored.

This ended the scoring, the final result being 5-2 for Wetaskiwin.

After the game both teams with a number of guests, about 50 in all sat down to a bountiful supper in the curling rink hall, kindly loaned by the curling clubs for this purpose. Immediately following supper, Mr. McCullough expressed the Wetaskiwin Club's thanks for their cordial reception to which W. Worton sr. suitably replied, adding thanks to the curling clubs for their kindness in allowing the boys to use the hall. A social time and dancing was then indulged in until the train left.

Unfortunately Herb Martin's injury was worse than at first supposed. He skated for a few minutes after falling, but had to retire. He was able to walk around during the game, but with discomfort, and immediately after the game went back to his work at the creamery. He was, however, unable to walk back and the timely arrival of Mr. and Mrs. Hay with their car enabled him to ride. As there was no car road to his home, Mr. and Mrs. Hay very kindly took care of him for the night. His leg became much worse and with much swelling and extreme pain and towards midnight a doctor was called. By means of ice packs the swelling was abated and he was taken to his home the next day. He is now (Wednesday) beginning to get around again. None of the team knew of the extent of his injury until Sunday, and the club is much indebted to Mr. and Mrs. Hay for their kindness in taking such good care of him over night.

Bardo

A quiet wedding was solemnized at the Rude home on the evening of February 11th, when Myrtle Lillian, third daughter of Mr. and Mrs. C. J. Rude of Bardo, became the bride of Per Bjornson, also of Bardo, Rev. Bjelde officiating.

The bride was dressed in a gown of monit blue flat crepe, and carried a bouquet of pink and white carnations. Miss Irene Rude, sister of the bride, acted as bridesmaid and was becomingly dressed in flowered flat crepe.

Gunvald Flotten, cousin of the groom was best man.

After the ceremony a buffet supper was served.

The following guests were present Mr. and Mrs. Emil Rude, Mr. and Mrs. Iver Moen, Mr. and Mrs. Finseth, Mr. A. Moen and Mr. M. Eide.

On Thursday evening a large crowd of friends gathered at the Finseth home to charivari Mr. and Mrs. Bjornson. At the close of the evening the bride and groom were presented with a sum of money and the best wishes of their many friends.

Mr. and Mrs. Bjornson will make their future home in Camrose, where Mr. Bjornson will be engaged in carpenter work.

Our sincere wishes for a happy and successful married life, is extended to the happy couple.

A small party was held at the Kindley home on Wednesday evening in honor of Mr. Kindley's and Mr. Steen's birthdays. An enjoyable evening was spent.

A very jolly evening was spent at the local rink on Friday evening when besides skating there was an added attraction—a weiner roast. A very large crowd was present.

Born—To Mr. and Mrs. Mikel Erickson, on February 15th, a son. Congratulations.

Dinner guests at the Needham home on Sunday were Mr. and Mrs. Jensen, Mr. and Mrs. Hauhedel, Mrs. Jevning and family, Mr. and Mrs. Kindley, Edward Steen, Joe Eide and Olaf Anderson.

There was a very small attendance at the Bible Class at Ben Andersons on Sunday evening. Despite the fact a very interesting evening was spent.

VARIETY THEATRE TO COMMENCE INTERESTING COMPETITION

Commencing with last Saturday the Variety Theatre is issuing duplicate tickets to all theatre patrons. On Saturday, March 22nd, a draw will be made and the following prizes

1st.—Large Premium Ham.
2nd—100 lbs. of flour.
3rd.—Large Shamrock Ham.
4th—20 lb. Bag of Sugar.

This is a new innovation and one that promises to be popular with theatregoers.

The Arrival Of Kitty

YOUNG PEOPLE'S SOCIETY TO PRESENT THREE ACT UPROAROUS PLAY

C. H. Rowe Bringing His Company To High State of Efficiency

What has every promise of being the best evening's entertainment presented from the Variety Theatre stage in many moons, will be offered to the Tofield public on Monday evening next, February 24th.

The Tofield Young People's Society, which is affilitated with the Tofield United Church, will under the direction of Mr. C. H. Rowe, present "The Arrival of Kitty". This is a modern and up-to date three act comedy and is as full of wholesome humor as an egg is full of meat. All those participating are local residents and many weeks of assiduous application and faithful practicing has been done so as to present the play in a first rate snappy manner. There are laughs aplenty and the danger is not that you will laugh too little but that you will laugh too much. However any signs of distress caused by over risibility will be promptly taken care of by the management. The truth is, you will get your money's worth and some to spare. If you miss seeing Miss Noland as Aunt Jane, Bert Swift as the bogus Kitty, Gordon Jobb as Sam the colored porter, to say nothing of the many other features, you will always regret it.

Buy your tickets early, be on time as the curtain raises promptly, and above all, don't miss it.

SYNOPSIS

The scene is laid in a hotel in the Catskill mountains, New York State. The proprietor is away and has left the hotel in charge of Ting, the bell-hop, and Sam, a colored porter.

The first guests to arrive are a party—Winkler, Jane, his sister-in-law and Jane, his niece. Winkler has brought his niece to this place to keep her from the attentions of Bob Baxter, her lover.

Bob, however, trails them and finds Ting a college chum. They scheme to get Jane away from her uncle and prevent him marrying her to Benjamin More, a friend of her dead father. Bob disguises himself as Kitty, a play actress with whom Winkler is infatuated, the arrival of Ben More and subsequently the arrival of the REAL KITTY complicates matters and leads to some extremely comical predicaments.

The whole play is a series of laughable situations. There is a laugh in every entrance and exit of the players. If you've never seen a lover's quarrel, now is your chance to get a few pointers. DON'T MISS IT! FEBRUARY 24th, 1930.

WILLIAM WINKLER	Jack Cookson
BOBBIE BAXTER	Bert Swift
BENJAMIN MORE	Freeman Hill
TING	Willie Worton
AUNT JANE	Thelma Noland
JANE	Stella Clement
SUZETTE	Annie Booth
SAM	Gordon Jobb
KITTY	Marion Cooper

Flash--Date of play pre-dated to Monday, February 24th.

SYNOPSIS OF "SOMETHING ALWAYS HAPPENS"

An American girl, Diana Mallory, in England, is driven to desperation through lack of excitement at the home of her fiance, Roderick, Lord Keswick, only son and heir of the Earl of Rochester. Roderick's father shows her the famous Rochester Ruby, which will be hers after the wedding.

Diana goes on strike and demands some thrills, her first coming when she learns that Chang-Tao, notorious Chinese outlaw, is after the ruby.

Diana and Roderick start for London to put the ruby in a safe deposit vault. The car becomes lost in the rain and Roderick goes to the door of a deserted house to get information as to the right of the road.

When Roderick fails to return, Diana follows him into the house. She encounters doors which open, close and lock themselves. She sees hideous apparitions, eyes flashing in the darkness, black cats, mysterious hands and feet and chairs that move around for no reason at all.

More than half the story is laid in this haunted house. Diana gets the thrills she is looking for, then learns that Roderick has arranged the whole thing for her benefit. When Roderick calls off his apparitions and ghosts, the excitement doesn't stop for Chang-Tao and his gang keep things humming in the same mysterious manner.

There are fights, battles with ghosts and everythings else an imaginative brain can conceive. When the constables arrive and take charge of the bandits, Diana agrees to return to Roderick's country home convinced that she has had enough excitement to last for the rest of her life.

Kingman News

C. O. Pederson was in Edmonton for a few days last week.

Mr and Mrs. T. Horte visited with Mr and Mrs. E. Erickson on Thursday evening

Mrs Chas Johnson, the C. P. R. colonization agent formerly of Wetaskiwin was a business visitor here on Wednesday last.

Andrew Olson had the misfortune of breaking his arm and is now a patient at the St. Mary's Hospital.

Mrs. T. Horte entertained a number of ladies at tea on Thursday afternoon.

Mr. and Mrs. W. Moore, of Hay Lakes spent the week-end with Mr. and Mrs. T. Gruhs.

Oscar Thompson was a business visitor in Cold Lake last week.

Sunday dinner guests at the home of Mr and Mrs T J Rognese were Mr and Mrs H Poulson, Mr and Mrs O Johnson and family, Mr and Mrs. T Rognese, Mrs. T Farmer Mr. and Mrs Nels Johnson and Henry and Olga.

A number of young folks spent Sunday afternoon at Tofield. On the preceding Friday evening a large number of Kingmanites had an enjoyable time skating at Bardo. At mid-night lunch was served.

Mr. and Mrs. J Bones had Sunday dinner with Mr. and Mrs. L. Ergn.

Mrs. P. Radounsky spent the week end visiting in Edmonton.

Mr. and Mrs. Ray Melvik and family were the guests of Mr. and Mrs. T. Welch on Sunday.

The prevailing nice weather for the last few days has made the farmers wonder whether the time is not soon here when another crop will be raised to feed the grain gamblers.

Ketchamoot Items

A quiet wedding was solemnized at the Manse, in Tofield, Tuesday evening, February 11th, when Miss Emily McAllister, of Tofield, eldest daughter of Mr. and Mrs. P. McAllister, of Tofield, was united in marriage to Earl Carlisle, eldest son of Mr. and Mrs. L. Carlisle.

The bride looked charming in a coral georgette dress and was accompanied by Miss Florence Kendall who was dressed in a blue flat crepe while Glen, a brother of the groom acted as best man.

The newly married couple will reside at their farm in West Ketchamoot and the whole district wishes them good wishes and good luck.

Mrs. Henry Sutton returned home last week after visiting for a while with Mrs. Shaw, of Calgary.

The young people of this district all systematically dropped in to visit the newly weds Wednesday evening. Dancing and music was enjoyed by all and at midnight a most delicious lunch was served by the hostess and everyone left for home after spending an enjoyable evening.

A whist drive was held at the home of Mr. and Mrs. Thompson on Tuesday for the older folk.

The monthly meeting of the M. A. S. was held at the home of Mrs. Carlisle and a shower was also held for Mrs. Earl Carlisle who received a number of lovely and useful articles. A delicious lunch was served by Mrs. Carlisle.

Mr. and Mrs. Campbell entertained the young people Sunday evening and all reported a most enjoyable time.

The March meeting of the M. A. S. will be held at the home of Mrs. W. Lee and the date has been changed from th second Wednesday in the month to th first Wednesday of every month. Therefore all are cordially invited to attend the meeting held at Mrs. Lees, March 5.

NOTICE

The Tofield Co-op Credit Society are holding their annual meeting in the Town Hall on Friday, February 28th, at 2.00 p. m. It is important that all members be present and others interested in the Society are invited to attend.

WHIST DRIVE

The U. F. A. wish to announce that they are holding their annual whist drive in the Variety Theatre on March 11th. Further particulars later.

Annual Meeting Of Cornhill M. D.

ELECTIONS TO BE HELD IN FOUR DIVISIONS

Nine Candidates For Office of Councillor Nominated

On Saturday last the annual ratepayers meeting of the Rural Municipal District of Cornhill was held at the Municipal hall, Tofield.

While the attendance was not large considering the number of ratepayers involved, the 30 or more ratepayers present displayed a keen interest in the affairs of the municipality.

Mr. A. J. Williams was elected as chairman and Mr. J. O. A Letourneau was elected secretary of the meeting.

Mr Stanley was present and requested an explanation as to how the school districts were financed. The procedure was explained by Mr. Williams to Mr Stanley's satisfaction.

The financial statement, a copy of which each ratepayer receives, was approved.

Mr Fletcher, of Kingman was present and enlivened the meeting with his remarks.

The district finds itself in a splendid financial condition and are able to carry their normal and usual methods of financing.

At the hour appointed the following nominations were made.

For Division One:—William Christensen, William Lee and Peter Stanley.

For Division Three:—John C. Curlett and D. Robert Swaby.

For Division Four:—John Bailey jr. and Alfred J. Williams.

For Division Five:—W. Chas Merden and William Thompson.

The election for councillors will take place on Monday, February 24

Lindbrook News

The dance given by Mr. Walter Kortzman at the school here last Friday was a jolly and successful affair, everyone enjoyed themselves immensely. The orchestra was Mr. Allan Silversides, accordian; Mr. Prosper Lepine and Mr W Kortzman violin and harmonica. The M. C. was Mr. Herbert jr. This is the first dance for a long time so lets hope its not the last by a long way and we hear that the "younger set" are blossoming out into dancers now; so they need lots of practice, hence let's have more dances.

Mrs. A. Whibley returned last week from her trip to the coast. Mrs. Whibley reports that Mr and Mrs. J Leahy and family are quite well settled and happy in the new home and their poultry business is doing well.

The municipal elections will be held here on Saturday, February 22, at the school here and Weslake school from 9 a. m. till 5 p. m. Nominees being A. Williams and J. Bailey jr.

We hear that all interested in the Alberta Dairy Pool are invited to a meeting on Friday evening, February 28th, at the store here. Mr. Swaby of Ministic, the delegate from this district will be here to answer any questions re the pool.

We have had no news to write lately but don't think we have been emulating the Calgary Eye-openers editor, the late Bob Edwards. No chance times are to hard! Its just this, that no one murders, suicides, elopes or does anything out of the ordinary to write about.

Messrs Hicks and Hooper visited Edmonton on business a week or two ago and met Mr. B E. Clark who is at present residing at Manville; he signified his intention of returning to this district in the near future.

Lambing has started here, but there are to few to state results as a whole.

CHAUTAUQUA DATES ANNOUNCED

Make a special note of the dates that have been planned for the Tofield Chautauqua. July 3, 4, 5, 7, 8, 9.

VARIETY THEATRE

Saturday, February 22nd

Something Always Happens

Starring Esther Ralston and Neil Hamilton. The Variety reader in another column will tell you what kind of a mysterious picture this is with about half the story taken in a haunted house, and believe me its good. Also two comedies to make you laugh.

Next Saturday is also the second night of our big prize contest, so whatever you do—don't miss it, especially with a picture like "Something Always Happens".

Prizes are listed in another column. Draw will be made on March 22, when we show "Simba".

CHAS. ROBINSON

The juvenile hockey team are going to Edmonton to play two games there over the week end.

Word has been received that Gordon Jobb has been transferred to Rumsey, Alberta. Gordon started with the Bank of Montreal here some few years ago as junior later being promoted to teller, which position he now occupies.

Please note that the play, "The Arrival of Kitty" will be presented on Monday, February 24th, instead of Wednesday, February 26th as advertised.

It might have been the advance spring weather—early spring weather is responsible for many things—but a group of teen age girls were looking for thrills on Sunday, and found them. Sunday was warm, so warm in fact that these (?) group of maidens thought it would be great fun to go sleigh riding. Accordingly they borrowed a team and sleigh standing at the hitching post and started off. They neglected however to fasten the outside lines on the bit, leaving them on the hames. This unusual procedure puzzled the horses so they went home for further advice, going home they unceremoniously dumped first one and then the others girls out, the last, making a clean jump of it, just before the sleigh hit the fence. The pole was smashed and some other minor damage done. Seriously though, the girls were fortunate in escaping without injury, and apart from the question of taking other peoples property without permission, it is just looking for trouble for unexperienced drivers to drive strange horses over slushy roads in the spring.

Mr. O'Hara visited the capital city over the week end.

Miss Annie Hobson is visiting with her parents this week, taking part in the mixed bonspiel.

Gerald Hosler returned home this week. He has spent most of the winter in United States.

FOR SALE — REWARD SEED Wheat, Grade No. 1, Certificate No. 70-2086. Grown on breaking. Seed purchased from Herman Trelle. Cleaned and sacked. $2.50 per bushel. Apply to F. C. Nickerson, Tofield, 'phone 97.

MR. AND MRS. ROSS LEAVING TOWN

Mr. and Mrs. Ross are leaving Tofield to-night (Thursday). Mr. Ross who has been manager of the local creamery for the past two years and a resident of Tofield for the past three, has been appointed head butter maker of the Woodland Dairy Company at Edmonton.

Both Mr. and Mrs. Ross will be missed among social circles in town. Mr. Ross being an active member of the local Masonic lodge and Mrs. Ross an active member of the Eastern Star. Their many friends will wish them every success in their new home.

MIXED SPIEL HELD UP ON ACCOUNT OF SOFT WEATHER

The Tofield Annual Mixed Bonspiel was only in operation for one evening, on Monday last. The ice due to warm weather was heavy and the going was hard, especially for the ladies. As soon as the weather becomes cooler, play will be resumed.

U. F. W. A. NOTES

CHEMICAL STERILIZATION OF DAIRY UTENSILS

(Experimental farms note)

Recent experiments conducted by the Division of Bacteriology at the Central Experimental Farm have shown that solutions of hypochlorites are remarkably effective in the destruction of bacteria commonly encountered in milk cans and other utensils. Readily prepared by diluting the concentrated solution with cold water, the hypochlorite rinse bids fair to replace the old method of scalding, which was rarely effective on account of the large quantities of boiling water required to destroy the bacteria present.

The hypochlorite method is quicker, cheaper, more convenient and more effective, but the best results can be obtained only where certain conditions are fulfilled. The first of these is that the hypochlorite rinse must be used only on utensils which have been thoroughly washed, since traces of milk residue or dirt quickly rob it of its germ killing power. Again, it is important that the rinse be used in sufficient strength and allowed to remain in contact with the entire inner surface for a sufficient length of time. With the usual strength of rinse at least 15 seconds contact should be given, while a longer period will result in more complete destruction of the bacteria present. Finally, care should be taken to prevent corrosion of metal utensils, since most hypochlorites will attack the metal if left in contact with it for long periods. This possibility may be readily avoided by postponing the sterilizing rinse until immediately before milking, or else by inverting the utensils on a draining rack so that all remaining traces of moisture will evaporate as rapidly as possible.

THE BROODING OF EARLY CHICKS

(Experimental farms note.)

It is generally conceded that the early hatched chicks give the best results in egg production, particularly during the winter months when the eggs are the highest in price. If one is going to brood early chicks it becomes necessary to arrange for comfortable quarters and artificial heat.

At the Dominion Experimental Station, Kapuskasing, Ontario, records have been kept on the amount of coal required to operate the ordinary No. 12 Buckeye brooder stove. Each stove was in a house 10x12 ft. in size which is supposed to furnish sufficient heat and space for around 500 chicks until they are three to four weeks of age, at which time they would require more space for best results. In actual practice, however, it is not always possible to have 500 chicks hatched at one time, as this would require quite a large flock of breeding hens and also considerable incubator space. In fact better results are usually obtained when the number of chicks is kept below the rating of the brooder.

Over a period of three years it was found that on the average it required 13.5 pounds of coal per day to operate each brooder stove during the month of April; 9.5 during the month of May and 9.2 during the month of June. In giving this coal the value of 1 cent per pound which would be higher than it would actually cost in most localities it may be noted that the cost of coal required to operate one of these stoves is a very small item indeed, even when the number of chicks being brooded is much below the capacity of the brooder. For example if 300 chicks were brooded during the month of April, the total cost of coal would be $4.05 or $1.35 per 100 chicks.

A fatal accident recently happened 13 miles N. E. of Jarvie, when Fred Slobodian age 24 recently from the old country was going into the bush to cut logs with a friend when the shot gun accidently went off killing Slobodian. The trigger of the gun caught on a small twig. Dr. Verreau, the coroner along with A. P. P. Watts, of Westlock made the 130 mile trip to the scene of the accident. Upon investigation they found that an inquest was unnecessary. The deceased who was buried at Jarvie leaves a wife and small children.

For the week ending February 8th, 1930, the following prices were reported paid by creameries per pound of butterfat, in the several grades of cream, and at the points shown:— Jasper Dairy:—Special grade, 42c. All others:— Special grade, 38c; Number one, 36c; Number two, 32c; off grade, 30c.

The Arrival Of Kitty

A Three Act Farce

"The Arrival of Kitty" is a modern, fast moving farce comedy that will keep you in a gale of laughter during the show and in good humor for days thereafter. Witty, sparkling humor—brilliant repartee—rediculously comic situations—all go towards making an ideal amateur presentation. Don't miss it-

Admission: Adults 75c., Students 35c. Children 25c.

LOCAL and PERSONAL

The C. W. L. will hold a silver tea and sale of home cooking in the W.I. Rooms on Saturday, March 1st.

A pleasant social event was held last week at the home of Mrs. Hopgood, when a number of ladies gathered to take part in a quilting bee. Those present included Miss Minnie Wood, Mesdames Hardy, Ferguson, F. M. Webb, Richardson, Griswold, Agnew, Letourneau sr., Beairsto and Kendall. Refreshments were served by the hostess.

Born—To Mr. and Mrs. Erickson, on February 15th, a son.

Mr. Geo. Edwards has purchased one of the Pincott bungalows and moved into it recently.

On Tuesday evening of this week a group of people gathered at the home of Mr. and Mrs. Wm. Thompson. Six tables of cards were played. Miss Fawcett and Mr. C. Ingram won 1st prize and Mrs. Munro Trent and J. Ingram took the consolation. At the close of the playing Mrs. Thompson served lunch after which the guests visited for some time. Everyone voted the evening well spent.

Last Thursday evening Mr. and Mrs. Bigland opened their home to a number of friends and neighbors. Four tables of whist were played and 1st. prizes were won by Mrs. C. Baptist and Munro Trent. Miss Mable Thompson and Fred Munro took the consolation. Mrs. Bigland served a splendid lunch and everyone departed after spending a very enjoyable evening.

On Wednesday evening of this week Mr and Mrs. A. Trent entertained a number of friends to court whist. The first prizes were won by Mable Thompson and Arthur Francis and the consolation by Leda Baptist and H. Whyte. Mrs. Trent assisted by Mrs. Munro Trent served a delightful lunch at midnight. Radio music was enjoyed during the evening and all departed feeling very grateful to the Trent family for the jolly time.

E. CURTIS WINS TWO FIGHTS AT EDMONTON

In the strictly amateur legion boxing tournament at Edmonton this week, E. Curtis, of Tofield won two bouts with opponents on points. He was the only boxer in the tournament listed for two engagements the same evening. He has another engagement at Edmonton in the near future and if he wins, he will box at Calgary before the season ends.

AMISK CREEK

The Ladies' Aid meeting held at the home of Mrs. R. O Berg on Wednesday of last week was very well attended. Most of the members and several visitors were present.

Mr. and Mrs. I. C. Olson held a social evening for the Y.P.A. last Friday evening. About thirty people were present. They all had an enjoyable time. A tempting lunch was served at midnight.

Gunvald Flaaten was a guest at the C. Rude home in Bardo where his cousin was united in marriage to Miss Myrtle Rude on Tuesday evening of last week.

Mr. E. A. Moen was a delegate to the highway Association from this district, to Edmonton last week.

Gunvald Flaaten is shipping hogs to the Pool to-day, Tuesday.

Ralph Olson spent several days in the city last week.

Alice Haugen was taken to the hospital in Camrose last Thursday, to be treated for rheumatism, we hope she will soon recover.

Miss Lena Anderson of Ryley has been visiting with her sister, Mrs. E. A. Moen for a few days.

The R. O. Berg family and Mrs. P. O Flaaten, were visitors at the E. A. Moen home last Sunday.

Our deepest sympathy is extended to the J. Hanson family in the loss of their infant son.

BEHIND THE BOG

BY A. B. C.

The mixed started off with a "Bang" on Monday night—16 rinks playing in the Grand Challenge.

The spiel will continue as soon as weather permits.

The feature of Monday's draw was McCauley was lying 3 enough to win the game but "Lem" Abbott kicked through with a good rock to lie shot. Calvert also made a good comeback to win. The "Barbers" are going strong in the spiel.

Dr. Law's rink beat A. B.'s rink in the annual Saturday night game. No alibis.

Geo. Agnew (the draw man) is doing a good job—So Far.

The bright and snappy costumes of the Ladies give an added touch to this spiel.

LAKE SHORE

On Tuesday evening about twenty of Lloyd Wood's friends repaired to his house and surprised him. The evening was spent in playing cards. Five tables being played. A delicious lunch was served by the ladies. A most enjoyable evening was spent.

Miss Emily Ferguson spent Monday night with Miss Dorothy Walker.

Mrs. T R Murray entertained the S. A. S. on Wednesday.

Mr. and Mrs Saman of Blackfoot Lake, spent the week end with relatives in this district.

Mr and Mrs. Emery Phillips, of Deville spent Sunday at the Eaton home.

Mr. and Mrs. Chas Plante of Woodlawn visited relatives in the district over the week end

Mr and Mrs M. Myres entertained a number of young people at their home on Monday evening. Games were played and a very enjoyable time was reported. Mrs. Myres served a dainty lunch.

We are sorry to report that Miss Beulah Johnson has been on the sick list.

Thanks For Things As They Are

By CLARA HOPPER

I went C.P.R.-ing
Over the prairie
Where flat things are flatter
Than ordinary,
Far things are farther,
Near things nearer,
High things higher,
Sure things serer.
Earth, a shorn sphere,
Went wheeling and whirling,
Twisting and twirling
Around to the rear;

Ethereal seas! how the old, wild breeze,
Fain, famished for trees,
Shrieked in seventeen keys!
Till I feared we'd be hurled
To some five-pointed world.
But the wind fell asleep
As the sky fell aflame;
And my fears fell away,
And the Past filled a frame . . .

I saw the lean Indian
Trudging and trailing . . .
I heard the dry River carts
Screeching and wailing . . .
I gave thanks I live now!
And here!—and how!—
And not on a star 'n
Far 'n
Mars,
Where they've no C.P.R's!

WATCH YOUR WEIGHT

The food taken into the body is used either as a source of energy or for tissue building. In order that it may be available for such purposes the food, as taken, passes through a series of chemical changes which we call digestion, following which it is assimilated into the tissues. It is then available for use as energy. Energy is required to move the muscles; it is also needed to keep the various organs of the body in operation, and, in addition, it is required to maintain the heat of the body. In order to meet the body needs for energy, and also to provide for growth and the replacement of worn-out tissue, a certain amount of food is required. If sufficient food is not taken, the body functions below par, and, if an excess over the amount required is taken, it is stored up as fat. Outside of those cases where there is a disease which upsets certain glands whose internal secretions have some control over nutrition, the putting on of weight means that more food is being eaten than is required.

The amount of food required by different individuals varies a great deal. The growing school child requires about as much as an adult, because not only is the child active, but he is growing. Those individuals whose occupations call for vigorous use of their muscles require more food than do those who sit most of the day. Even among those of similar activity, there is a difference—one person normally using more food to keep his body going than another. By keeping watch on your weight, you can soon learn if you are eating more than you need. Weight that gradually increases over the normal, taking into consideration age, sex and height, is an indication that the food intake should be reduced. It is much easier to avoid overweight than it is to reduce after the excessive pounds have been added.

It is a good plan to watch your weight. It is not suggested that you live with one eye on the weight scale, but a check-up once a month is advisable in order to note any sudden loss of weight and to guard against increasing weight after the age of forty, neither of which is desirable from the health standpoint.

Miss Eloise Wallen spent several days last week at the Tiedeman home.

THE TOFIELD MERCURY

Best Amateur Presentation In Years

"ARRIVAL OF KITTY" GENERALLY ADMITTED TO BE HIGH MARK OF LOCAL THEATRICAL ENTERPRISE

Crowd Immensely Pleased; Theatre Jammed To The Doors

The play, "The Arrival of Kitty" presented by the Tofield Young People's Society, on Monday night at the Variety Theatre, was in every way an unqualified success.

By judicious advertising the public had been led to expect big things from this production—and they were not disappointed. From the rising of the curtain until the last line was spoken the audience was kept in wonderfully good humor, which ranged from ripples of laughter to paroxysms of mirth.

It is impossible to mention any one actor as starring—they all starred. Jack Cookson, as Winkler had an extra heavy part and played it well, and the dual roles ob Bert Swift as Bobbie Baxter and the Bogus Kitty were splendidly portrayed.

The story opens out in a small hotel in the Catskill mountains. Sam the colored porter and Ting the bell hop are sound asleep in the office. Sam gets hungry and wakes up and going over to Ting wakes him also. Ting wakes with a start and rushes Sam, still under the impression he is playing in a football game, about which he had been dreaming. When they are awake, a telegram is delivered to Ting, which instructs him to take over the management of the hotel as the boss is detained in New York. Ting who is attired in the regulation bell boy uniform changes coats with Sam who is wearing a swallowtale. Sam's coat is too big for Ting and Ting's coat is too small for Sam, but with a cleper quip or two they assume the position of porter and boss.

The first party to arrive is Winkler, Jane, his sister-in law and Jane, his niece, and Suzette the maid. Winkler has charge of the party, the object of his coming being to get Jane, his niece away from the attentions of her lover, Bobbie Baxter. Also to have her marry Benjamin More, because when she marries More, Winkler receives $10,000. Interest is added when aunt Jane asks Winkler to find her a husband offering him $10,000 for doing so. The story now becomes complicated and laughable. Bobbie Baxter arrives and recognizing in Ting an old college chum, arranges to meet his lover Jane. They are in despair. Winkler holds the trump card, till Ting seeing a letter and photograph of an actress on Winkler's table steals them and gives them to Bob. They prove that Winkler is infatuated and has had gay times with Kitty Bender a New York actress. Aunt Jane has an horror of actresses and champagne, so Bob, to win Jane the niece denounces Winkler in her presence. By clever acting and dialogue the tables are turned on Bob and he is accused of being the recipient of the letter and photograph. Bob and Jane quarrel. Ting then suggests to Bob that he should impersonate Kitty Bender and this he does. Winkler is nonplussed at Kitty's arrival and hastens to send her off again. In the [illegible] Ting had [illegible] the [illegible] agency on behalf of Winkler to procure a [illegible] for aunt Jane, and Winkler was momentarily expecting Benjamin More to arrive. More arrived but was mistaken for the matrimonial agency man, and in turn was first made to make love to Jane the niece, the bogus Kitty, the real Kitty and aunt Jane. During his love making he was beaten up by Winkler. After the arrival of the real Kitty, scene after scene caused the audience to rock with laughter. Winkler was bewildered [illegible] everything straightened itself out, Jane and Bobbie were united, Aunt Jane got her man, Winkler his [illegible],000.00.

As we said at the beginning it is hard to pick out stars. When one tohnks of the splendid work of one member of the cast one is reminded of the splendid work of others, and it is quite truthful to say they all starred.

Between the first and second acts Rev Gordon on behalf of the church thanked those present for their attendance. He praised Mr. Rowe for his hard work and presented him to the audience so that those present could show their appreciation. This they did in unmistakable terms.

The attendance was the largest seen in the theatre for years. The roads were open and there were many cars in from the country. There was no curling or skating and few other attractions. The theatre was crowded to the doors and financially the venture was a complete success.

At the close of the play the cast presented Mr. Rowe with a pencil as a memento of the event, after which they adjourned to the Club Cafe for lunch.

The cast wishes to thank those present attending for their support and those who helped to make the event a success by supplying properties. Among these are:

Miss Lucille Gray, Mr. and Mrs. Kendall, Swift and Emery, Mr. and Mrs. Carey, the Misses Clement, Mr. Glover, Mrs. N. and Miss Noland, Rogers Bros., Royal Alexandra Hotel, Club Cafe, Bank of Montreal and The Tofield Mercury.

TOFIELD MAROONS LOSE TO EDMONTON ALL STARS

A fast game of hockey was played in the arena at Edmonton, Saturday evening, February 22nd, when the Tofield Maroons and Edmonton All Stars came together for an exciting two periods.

The play was very even throughout the game, both teams making numerous rushes for the opposing goal, but team work was almost impossible, owing to the very soft ice. During the last period the All Stars, in a mad scramble for the puck in front of the Tofield goal, managed to score. The game ended soon after this with Edmonton leading in a 1-0 score. In the near future a return game will be played on local ice.

The Hudson Bay billeted 10 of the Tofield boys, for two nights, and gave them a very good time, which was very much appreciated by them, as this was their first trip to the city this season. Those taking in the carnival, including the Marroons Hockey Club were, H. Bowick, P. Thompson, R. Bowick, R. Craig, R Martin, M [illegible], G Thompson, C. Rowe, B. Clatterham, J. Whyte, J. Swinton, C. Edwards and McQuire, manager.

Lindbrook News

The weather being mild and the roads in shape for autos the turnout to the municipal elections was very nearly complete. Lindbrook poll at the school; P. Holland D. R. O. and A. K. Hicks poll clerk, polled 52 votes, 28 for J. Bailey and 24 for A. Williams. At Westlake poll at the school there; L. Pointer D. R. O. a total of 26 votes were polled A. Williams getting 23 while J. Bailey got 3.

Mrs. Leonard Pointer is in Edmonton this week, having been appointed with Mrs. Robinson of Tofield as delegates to the Anglican convention there. These two ladies represent the W. A. of Tofield and district parish.

We hear that Mr. F. Dunn is the lucky winner of a prize in a competition. The prize consisting of a choice of two autos or $1,000 cash. Mr. Dunn has not decided on his choice as yet. Congratulations.

The warm weather is certainly helping out the feed supply here and the stock are enjoying the freedom from barnyards etc., luckily we have some joy for what with tumbling wheat markets and our experiences of the last two years we feel we have earned some good luck, so lets hope it comes in bunches this year.

Mr. L. Hooper is home ill in bed with a touch of inflammatory rheumatism, but whilst still here de combat is on the mend again.

We hear that Mr. Henri Goubault et famille who sold his farm to Mr. A. K. Hicks and left for Quebec is expected back in the next week or so. Quebec evidently does not appeal after tilling in Alberta.

Ketchamoot Items

Mrs. Ross, of Edmonton is visiting with her daughter, Mrs. Campbell.

Mr. Carlisle took several truck loads of stock to the city last week.

Mr. and Mrs. Henry McGinitie entertained a number of friends to a whist drive at their home Friday night. Mrs. Roy Lee won 1st ladies' prize and Mr. Eddie Bruha won 1st gent's prize while Mrs. J. H. Ingram and Mr. W. Mitchell won the consolation.

Born—To Mr. and Mrs. Harold Smith, of Camrose February 23rd, a daughter

Mrs. McMullen entertained the Young People of this district at her home Sunday evening. A delicious lunch was served at midnight by the hostess and all left for home after spending a most delightful evening.

Kingman News

Mr. and Mrs. Oscar Grahn visited with Thor Grahn on Tuesday.

Ovel Ovrison spent a few days in Edmonton last week.

Messrs John and Frank Anderson and E. Christopherson were business visitors in Edmonton for a couple of days last week.

Lloyd Lindberg was taken to Edmonton on Thursday where he went under an operation for appendicitis. He is progressing favourably.

Mrs A. C. Sunn and daughter returned on Saturday from a three month's trip to the States.

Mr. and Mrs. W. McIntosh visited with Mr. and Mrs. Ole Bjorgum on Saturday evening.

Mr and Mrs. C. Lindberg and family visited with Lloyd Lindberg in Edmonton who is a patient in the hospital there.

Mr. and Mrs. W. Hartschen and family and Mrs. E. Grace were the guests of Mr. and Mrs. E. Erickson on Sunday.

A very keen municipal election was held here on Saturday. The candidates were Wm. Christensen, Peter Stanley and William Lee. The latter was elected with a small majority of seven votes.

Mr. and Mrs. Simovitch and family of Round Hill visited with Mr. and Mrs. P. Rodzunsky on Sunday

Mrs. Thor Horte and Mrs. W. McIntosh were Camrose visitors on Saturday.

Mr. and Mrs. Thor Grahn and Mrs. C. F. Sealund were Edmonton visitors over the week-end.

Mr. and Mrs. W. Jardie visited with Mr. and Mrs. W. McIntosh on Sunday.

COMMUNICATION

It is with a feeling of regret that I sever relations with the Tofield Creamery Ltd., and its many patrons.

If I have been successful in making friends in the Tofield district I am thankful.

I want you all to know that I appreciate very much the many kindnesses extended to me during my stay with you, and at this time I wish to bespeak for my successor the same goodwill and co-operation that you have shown to myself.

Wishing you all lots of good things this year and hoping that you will make it the best ever.

I remain Sincerely,

Alex Ross

Electricity One Step Nearer To Tofield

REPRESENTATIVE OF CALGARY POWER COMPANY BELIEVES VOLUME OF BUSINESS SUFFICIENT FOR INSTALLATION

Mr. Book, of Edmonton, representative of the Calgary Power Company was in town on Monday and Tuesday. He spent these days in company with Mr. W. J. Chapman, secretary of the town, interviewing prospective users. In an interview with the Mercury on Tuesday evening Mr. Book stated that his visit was in the form of a preliminary survey and there were as yet no contracts to sign. He expressed his opinion, however, that the volume of business in sight at Tofield would be satisfactory to the company. Whether or not the line is constructed depends on the willingness of other towns to purchase current.

It is expected the line would be run from Camrose to Ryley through Round Hill, west from Ryley to Tofield and east from Ryley to Viking and intermediate points.

There are a number of prospective customers here who will be very pleased to see the current brought in and they are hoping the volume will be sufficient in other towns to warrant the installation.

Information from other towns indicate that they are just as anxious as Tofield to procure light and power and it is now confidently expected power will be brought here this year.

New Councillors Elected For Cornhill District

ELECTIONS IN DIVISIONS ONE, THREE, FOUR AND FIVE

Messrs Lee, Curlett, Williams and Thompson Elected as Councillors

On Saturday February 22nd the Rural Municipal District of Cornhill held their annual election their being a poll held in four divisions.

In division one Mr. Wm. Lee was returned by a slender majority of seven votes over his nearest opponent, Mr. Christensen, Mr. Peter Stanley came third.

In division three Mr. Curlett, of Deville polled quite a large majority over his apponent Mr. D. Swaby.

In division four Mr. A. J. Williams, the past reeve of the municipality was elected by a good majority over his opponent, Mr. John Bailey jr..

In division five Mr. Wm. Thompson replaced Mr. Morden on the council. Mr. Thompson is an ex-councillor with a number of years service to his credit.

Considerable interest was taken in the election, polling taking place at various places throughout the municipal district.

The first meeting of the new council will be held on Thursday, March commencing at 10.30 a. m.

The following are the election results.

DIVISION ONE

Wm. Lee	75
Wm. Christensen	68
Peter Stanley	24

DIVISION THREE

John Curlett	96
D. R. Swaby	30

DIVISION FOUR

A. J. Williams	115
John Bailey jr.	50

DIVISION FIVE

Wm. Thompson	34
W. C. Morden	15

The councillors retaining office for another year are Mr. Lloyd Wood, division six and Mr. J. E. Broen, division two.

UNDERWORLD PICTURE AT THE VARIETY FOR SATURDAY

For Saturday, next the Variety management will be showing a picture of thrills. The title of the picture "Romance of the Underworld" indicates its general theme and with stars as Mary Astor, Ben Bard and Robert Elliott in the cast those attending may be assured of good acting. The picture which has all the attributes of a modern film success shows treasure amid the forty thieves of broadway.

The Variety contest is still in force. The big drawing takes place on March 22, when "Simba" will be [illegible].

Bardo

Mr and Mrs. A. Haukedal spent last Wednesday and Thursday in Edmonton.

The Ladies Aid at the Ness home on Wednesday last, was very well attended. Mrs. Finseth and Misses Anseno, of Ryley were visitors.

Mr Raymond Nordhus left for Vancouver on Thursday evening We wish him a pleasant journey.

Mr. and Mrs. V. L. Roth celebrated their 28th wedding anniversary on Thursday February 20. In the evening a large crowd of relatives and friends gathered at their home to congratulate the bride and groom of twenty eight years, and to wish them many more years of married life. A very pleasant evening was spent.

Bible Class was to have been held at the Hendrickson home on Sunday evening, but as there were so few present no class was conducted. A pleasant social evening was spent instead.

Mrs. Rustan, of Wainwright visiter her brother, Mr. Hendrickson, on Friday.

THE CURLING WIDOWER

I met a curling widower and he was very glum.
He said, "I don't know where clean sox or meals are coming from;
There is a bonspiel at the rink and all the wives are there.
And husbands true are cast aside and told to take the air."
I listened to his sad lament and then I chanced to say.
"Of course you won't be at the rink to see the ladies play."
He shook his head and off he went, and I felt very sad,
To think a woman could be cruel to such a kindly lad.

But as the 'spiel was warming up and competition grew,
The little group of husbands at the rink was growing, too.
At first they sat in silence and appeared a trifle bored,
And then they clapped, and then they cheered, and then fairly roared.
And as the games drew to a close the spouses stood in line,
And broadly grinned as curlers scored as if to say, "She's mine!"

I met a curling widower, and he was very gay.
He said: "You surely should have seen the little woman play;
I think that curling is the greatest sport you'll ever find."
And here's a husband who is glad his wife's the curling kind."
And as he pointed to the shelf, he proudly told me "There
My Liza always carries home the choicest silverware"

Howard Lee returned home Saturday from Vegreville where he has been playing hockey the past winter.

Lorne Lee, Viola Lee and Hazel Sears motored to Edmonton Wednesday.

Miss Vera Bowick spent the week end with Miss Gertrude Ingram.

Miss Alma Tiedemann spent the week-end with Miss Hazel Sears.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION

SAVE THE BABY TEETH

Because the first teeth or baby teeth are replaced by the secondary or permanent teeth, it should not be thought that they can be neglected and that they are of little or no importance. A clean mouth does much to make a healthy comfortable happy baby. A clean mouth means sound healthy teeth, which are needed to chew the food that will make the baby grow.

If the first teeth are allowed to decay they cannot be used for chewing the child does not secure the nourishment he needs and, as a result he suffers. The teeth with unfilled cavities will then develop a gum boil or an abscess may form at the root. This in turn may infect the second teeth or the infection may pass into the body and damage the heart. The baby tooth serves as a guide, as a place-keeper for the permanent tooth which comes later. The early loss of baby teeth is a common cause of irregular and crooked permanent teeth.

Healthy teeth are the result of proper food. The diet of the expectant mother determines the kind of teeth her baby will have for his first set. The diet of the infant and young child makes the permanent teeth and protects the first teeth. Most important of all foods is breast milk. At three months strained orange or tomato juice is added to the diet and, a little later cod liver oil. Cooked strained cereal is added at six months, and cooked strained green vegetables at seven months.

The first permanent tooth to appear is a back tooth or a molar. It comes behind the last baby molar and is the sixth from the centre. We mention this tooth particularly because of its importance. It appears during the fifth, sixth, or seventh year and is often called the six-year molar. It is frequently regarded as one of the first set and neglected. It is most important, however that these four teeth be preserved because upon their proper position depends much of the arrangement of all the permanent teeth.

Thumb-sucking, the use of a comfort, or the presence of adenoids which cause the child to breathe through the mouth, will spoil the shape of the mouth, throw the teeth out of alignment and so interfere with their proper use in masticating food.

Questions concerning health addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

RED CROSS ANNUAL MEETING

The main feature under discussion at the annual meeting of the Alberta Red Cross Society, which was held in Calgary on Saturday 15th Feb was the definite need for greater support if the Society is to continue to exist in this province. The financial statement presented to the meeting showed a deficit on last year's operations of $13,500.00 and as there is no capital fund from which the Society can draw, it is obviously impossible for this to be continued. In consequence the Executive made drastic reductions all the way along the line and presented a budget calling for an expenditure of nearly $12,000.00 less than 1929. The work of the Division has been on a minimal basis, and therefore the cuts that were made, were very largely made in the services which have been rendered. Despite these cuts the Division is facing a deficit of $5,000 at the end of 1930 unless the revenue for 1930 can be increased by a mount over that received in 1929, hence the definite appeal which was made at the Annual Meeting for greater support.

The reports which were read at the meeting by the Commissioner showed a really splendid work done during 1929, 180 crippled children were treated in the two hospitals in Calgary and Edmonton and as a matter of fact, over $31,000 was spent by Red Cross on Crippled Children's work in 1929. Of these 180 children, nearly half were orthopaedic cases, requiring long hospitalization. These children came from 97 different points in the province and represented 20 different nationalities, giving some idea of the wideness of the work. The Junior Red Cross work showed a remarkable increase of six thousand members, bringing the total to just under 30,000 enrolled as Junior Red Cross members, in 1460 branches throughout the province. There is no question that the work which is being done in connection with the three aims of the Junior Red Cross,—Health-Citizenship and Service, is truly an admirable one. The Outpost hospital at Peace Coupe had another successful year with 224 admissions and over thirty-three hundred hospital days, there being thirty-eight births in the hospital during the year. The Health Service through the Radio broadcasts each week, has proved a very popular feature, and during the last four months over thirty patchwork quilts and some seven hundred and fifty garments were made by radio listeners in, and sent to the Red Cross offices in Edmonton. One could not listen to the reports which were given at the annual meeting without realizing that the work that is being done is of real value to the life of the people of this province, and it would be a most unfortunate thing if because of the lack of a comparatively small additional amount of financial support, Red Cross had in any way to stop operation. If the Alberta Division does not carry on the work, it will be the first province across Canada to break the continuity of the work which is being done by Red Cross and it is hoped that the citizens of Alberta will take sufficient pride in the work which has been done in this Division, to make sure that adequate support is given during the coming year. Ten cents per head of the population would be sufficient to carry Red Cross in this province but the difficulty is to get that ten cents. Let every one do their part in at least sending in their membership fee of $1.00 and doing their utmost in connection with any local activities which may be attempted in support of the work.

SOME GOOD VARIETIES OF VEGETABLES

(Experimental farms note)

Practically all the common vegetables are successfully grown in Northern Alberta and in favourable situations most of the tender ones give fair results.

The following varieties are recommended on the strength of twelve tests at the Beaverlodge Substation, and listed in order of preference, though in some cases there is little to choose among those named.

Asparagus Mary Washington, best; Palmetto and Argenteuil good.

Beans Masterpiece, Davis White Wax and Stringless Green Pod are most prolific. Davis White Wax perhaps a shade highest in quality.

Beets, Detroit dark red and Cros by Egyptian; most varieties good.

Cabbage: Golden Acre earliest and choice, nearly as early and more productive is Copenhagen Market. Enkhuizen Glory also good. Danish Ballhead a choice winter cabbage.

Carrot Chantenay and Improved Danvers especially [illegible]. Most varieties good.

Cauliflower Early Snowball and Early Dwarf Erfurt.

Corn Pickaninny and Banting the surest sweet corns. Early Alberta and Howes Alberta are very precocious flints that may be used for table.

Cucumber. Early Russian, Improved long green; Davis Perfect.

Lettuce Grand Rapids for leaf, Iceberg and Hanson for head.

Onions Sets the surest but fair yields from seed of Red Wethersfield and Yellow Globe Danvers.

Parsnip Hollow Crown.

Pea Gregory Surprise and American Wonder for very early; Thos Laxton slightly later. Stratagem and Lincoln for late.

Pumpkin Connecticut Field and any of the Small Sugars.

Radish White Icicle retains crispness and does not readily bolt. Rennes Oval and Saxa also good.

Rhubarb Ruby.

Spinach Viroflay and King of Denmark. New Zealand retains its freshness longer.

Squash Marrows such as Long White Bush and English Vegetable, are most productive. Hubbards good but mature fewer fruits.

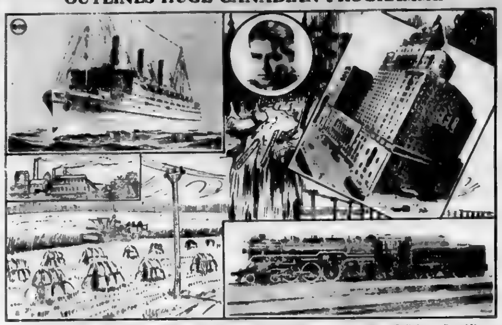
Tomato Earliana, Bonny Best, Alacrity.

1932 GRAIN SHOW NOTES THE TIME IS SHORT

1932 seems to be a long way off but when it is remembered that there is but the season of 1930 and that of 1931 during which to grow grain for exhibit the time is short indeed. All grain for entry at the World's Grain Exhibition and Conference, under the regulations, must be on the exhibition grounds on or before March 1st, 1932. There is, however, no restriction regarding the year in which the grain is grown. Grain grown in 1929 or previously is eligible for entry. All entries must be grown under field conditions.

Some look for dissolution soon after the budget is presented. Others do not think it will come until fall while still more prophets do not think it will anticipate the Empire Economic conference which is tentatively booked for fall.

OUTLINES HUGE CANADIAN PROGRAMME



Upper Left, Empress of Britain, 42,500-ton liner now under construction; E. W. Beatty, chairman and president, Canadian Pacific Railway; Upper right, Royal York Hotel, Toronto, largest and tallest hotel in the British Empire. Lower right, ... C.P.R. locomotive, most powerful of any in use in Canada.

In a vast programme of work from East to West of Canada the Canadian Pacific Railway will expend more than $50,000,000 in new equipment, new branch line construction and improvement to existing roadbed and equipment during 1930 according to announcement recently made by E. W. Beatty, chairman and president of the road.

Every phase of the company's activities will be covered, the president emphasized, and this great development will stimulate Canadian industry and provide employment for thousands of Canadian workmen.

Equipment either new or improved will be to an amount of $14,500,000; improvement and extension of telegraph facilities will run to about $3,000,000; Canadian Pacific hotels will benefit to the amount of $3,500,000; the West will be given additional rail facilities to the amount of $10,000,000; similar work in eastern Canada will total around $7,000,000; and these expenditures will be in addition to the usual expenditures incurred every year totalling around $9,250,000. This $50,000,000 does not include large amounts for ocean steamships new building, nor for the work of the Colonization and Immigration Department of the railway which during 1930 will run close to the million dollar mark.

This impressive programme of growth and development is based on the conviction "that Canada will continue its steady and unhurried progress during the present year," held by the directors of the Canadian Pacific Railway.

EXPECT INCREASE IN BUTTER DUTIES AT THE SESSION

Widespread study has been made during the fall and winter of the dairy industry in Ontario and Eastern Quebec and in consequence attention is now being directed to the problem of creating some system of co-operative marketing which will give the producers a fair return for their goods.

According to the National Dairy Council, except where farmers are able to ship their fluid milk to large consuming centres, the industry is not in a healthy condition. In a submission to the Tariff Board the Council reported 115,000 fewer milch cows in Canada in 1929 than in 1927 and claimed they were now being shipped out at the rate of 2,000 per month.

It is hoped that part of the trouble may be overcome through a new system of marketing, but in addition the Council is asking that the present preferential duty on butter be raised from one cent, as at present, to five cents per pound, with a corresponding increase in the general tariff. Those close to the Council and the Government say some steps will be taken this session of parliament to meet the demands of the dairymen.

Present duties of 12 cents a pound against Canadian butter and 20 cents per gallon against Canadian cream entering the United States are urged as making it more imperative that the inflow of New Zealand butter into Canada be retarded. In 1929 over 34,000,000 pounds of butter came to Canada from New Zealand, the receipts from that source in the month of December reached 16,000,000 pounds.

SESSION BRINGS MANY THOUSANDS TO CAPITAL CITY

Parliament convened last Friday and this week the session is formally launched upon business.

With the possibility of an election in the near future electrifying political life there was an uncommonly large attendance of members right from the opening guns which announced the arrival of His Excellency to declare business under way.

Members of the Government float the idea of an appeal to the people at an early date but members, particularly of the other parties, are sure that preparations are going forward. A partial revision of the Election Act was put through last session. More was to be done this year and the plan was to print the whole consolidation after the further amendments were made. This, however, has been reversed and the reprinting is now under way. The map department is busy bringing its supply of electoral maps up to election day requirements.

These facts and the legislation foreshadowed in the speech from the Throne all tend to support the prophets of an early election. Organization work is well advanced at headquarters of both Liberal and Conservative parties.

Even an ordinary session brings thousands of visitors to Ottawa from all parts of the Dominion. An election year attracts nearly twice as many. Organizers and candidates arrive in droves to study conditions and to receive advice and instructions. This year sees many of the active party workers and many who hope to be candidates already here and that fact lends further significance to the belief than election is certainly not an impossibility.

ALBERTA'S SEARCH FOR CRUDE OIL IS BEING EXTENDED

In Canada oil exploration extends over a wide area in the province of Alberta and oil has been discovered in the southern area as far south as the international boundary, in the Sweet Grass district, and in the north as far as Fort Norman within the Arctic circle.

The wide search is being made for crude oil, which was discovered in commercial quantities in the Fort Norman district, but undeveloped because of the cost of transportation. At present the Turner Valley Field, 35 miles southwest of Calgary, is producing principally high grade naphta, and a limited quantity of crude oil.

The Wainwright field which ranks second to Turner Valley, from the standpoint of development work now in progress, is believed to give better evidence of crude oil and considerable scientific work has been accomplished. The result, however, is not highly satisfactory as far as the search for crude oil is concerned.

At present some 48 wells are drilled or drilling, and ten wells are already procuring gas or oil. The output is as yet comparatively small in volume, but the presence of oil is conclusively indicated and many of the most important operators in the West are now directing their attention to the Wainwright field.

TOFIELD U.F.A.

Annual Whist Drive

will be held at the

VARIETY THEATRE, TOFIELD

TUESDAY, MARCH 11th, 1930

Commencing at 8:00 p.m.

Lunch Will Be Served by the Ladies of The U.F.W.A.

ADMISSION FIFTY CENTS

RYLEY TEAM GIVE LOCALS STIFF OPPOSITION

On Wednesday evening the Ryley journeyed over to Tofield to meet the locals. They were strengthened over their previous visit by a new player Pearce and by the addition of Dr. Richardson of Viking, who was in Tofield on his regular professional visit. On the run of play they were well in the limelight and the locals had to extend themselves to keep a slender margin of goals.

J. Biglow, a new operator at the C. N. R. station donned a Tofield uniform for the first time, relieving Herb Martin who is still unable to play due to injuries. Bigelow was a little strange in new company and on small ice but turned in a good game.

Marvin Kjosness and Dr. Richardson were the pick of the visitors, Marvin was very effective on attack while Dr. Richardson was a tower of strength on defence. He used his weight freely and was the "big rock candy mountain" of the defence.

For the locals Les Glover was in the limelight, scoring twice, though one was ruled offside. His goal in the third period was from centre ice and the puck went like a bullet to the net. Umphrey in the goal never saw it. Bowick in the Tofield goal had plenty to do and was right on.

The score was a tie at the close of each period, and the final result was in doubt until the final bell.

The game opened up fast with Ryley doing the pressing. They were unable to score however and on a three man rush W. Worton scored. Ryley soon evened it up when Kjosness on a lone rush beat Bowick with a hard drive.

The second period saw both teams striving for the lead and the break came when Swinton scored from close. The lead was short lived however for shortly after, A. Oslund scored for the visitors. The period ended two all.

The third period was a grim battle for the extra goal. The break came when S. Worton put a sizzler past Umphrey, but almost from the face off Kjosness sent one just as hot past Bowick and it was three all. R. Whyte then broke into the scoring column by a pretty shot. He brought the puck up and shot from the side but well out. It was a pretty shot and dented the draperies. Then Glover who had been working like a trojan came up from defence and when just at centre put a fast one right into the net. This made the score 5-3 for Tofield at which score the game ended.

This was the first game in which Tofield had a second string forward line. It worked very well, changes being made three men at a time.

The following is the line up:

Ryley — Umphrey; Ewers, Richardson; Kjosness, Anderson, Butler, Oslund, Pearce.

Tofield — Bowick; Glover, Swinton; Whyte, W. Worton, S. Worton, Martin, Thompson, Bigelow.

[illegible]

The election for Councillors was held in the school house last week, Alfred Patterson was the returning officer and Carl Erickson the Poll Clerk. Sixty-five votes were cast, Forty for E. A. Moen and Twenty-three for Mr. Westmascote; two ballots were spoiled. Mr. E. A. Moen was re-elected councillor.

Mr. R. O. Berg, Mr. A. Patterson and Mrs P. O. Flaaten motored to Edmonton last Thursday returning the same day. Mrs. Flaaten stayed until Saturday.

Mr. and Mrs. Nilson and baby were visitors at the Berg home last Wednesday.

Mr. P. Flaaten and Mr. R. O. Berg were visitors at the I. Annabo home on Wednesday.

Conrad and Arthur Patterson motored to Edmonton last Thursday and attended the caterpillar tractor school held there for three days. They returned home on Saturday.

Mr. E. A. Moen, Hilmar Moen, Carl Erickson and Gunvald Flaaten left for Edmonton by train last Monday evening. They will attend the John Deere tractor school being held there.

ALBERTA MOUTH HEALTH CAMPAIGN

An essay contest open to all school children in Alberta from grade VII up is being conducted in connection with the province-wide Good Health Campaign under the auspices of the Canadian Dental Hygiene Council, working in co-operation with the Provincial Department of Public Health and Education, and the Alberta Dental Society.

For the purposes of this essay contest, the province has been divided into twenty-two districts, and a prize of ten dollars will be awarded for the best essay in each district. These prize winning essays will then be submitted to the central committee at Edmonton and the one adjudged to be the best in the province will be awarded a further prize of twenty-five dollars.

The subject of the essay is "Mouth Health" which is the title of a new bulletin just issued by the Provincial Department of Public Health. Essays must not exceed 750 words in length.

Local and Personal

Miss Elaine Wallen spent the week end in the city.

The extraordinary soft weather caused most of the snow to melt from the roads and trails. It has now, Thursday turned colder, but is still nice winter weather.

R. W. Pinnett was a business visitor to the city this week.

A delightful time was enjoyed by all at a surprise party at the home of Mr. and Mrs. Fred McHeffey on Tuesday evening, when a few old friends called to celebrate the birthday of Mrs. McHeffey, who was presented with a lovely serving tray, together with the best wishes of all. After a pleasant social time lunch was served by the ladies. Those present were Mr. and Mrs. Noland, Mr. and Mrs. Kendall, Mr. and Mrs. Beartelo, Mr. and Mrs. Griswold and Mr and Mrs. Lovell.

The McLaughlin Garage have been unloading a carload of new Chevrolet Automobiles.

Born:—To Mr. and Mrs. Harold Smith, of Camrose, on February 22, a daughter.

A birthday party was held at the home of Mrs. Coombes on Monday night last, when a number of friends of Mr. Coombes called on him to help him celebrate his birthday. An enjoyable social time was held and Tom hopes he will live until he is one hundred.

Born —To Mr. and Mrs. G. Shacker, on February 27th, a daughter.

Mr. and Mrs. Jacob Brenneman returned from Albany, Oregon, on Thursday morning, after a visit of about a months duration.

Born:—To Mr. and Mrs. Earl Shaalen, of Kingman, on February 26th, a son.

The C. W. L. will hold a silver tea and sale of home cooking in the W. I. rooms on Saturday March 1st.

The monthly meeting of the Anglican Women's Auxiliary will be held at the home of Mrs. Hobson on Wednesday, March 5th at 2:30.

Mr. O'Hara visited the capital city on Monday returning on Wednesday.

The mixed bonspiel is now in full swing. Many interesting and exciting games have been played, with the "dope" being upset on more than one occasion. We will publish a list of the runners up and prize winners as soon as they are available.

Mrs. Barden was a visitor to the city this week.

SURPRISE PARTY

A very pleasant surprise party was held at the home of Gordon Jobb on Saturday last, when a number of his friends gathered to bid him farewell. The evening was taken up by cards, dancing and other social enjoyments. Mrs. Jobb served lunch after which Bert Swift in a few well chosen words, on behalf of those present, presented Gordon with a token of remembrance, a fountain pen desk set.

Gordon left on Tuesday morning for Rumsey, Alberta to which branch of the bank of Montreal he has been transferred.

SILAS ACKLEY DIES AT MILWAUKEE

The death occurred at Milwaukee on February 14th of Silas Ackley, father of Jim and Jas Ackley of Tofield. Many people will remember the deceased gentleman, he having lived here for some years prior to 1920. Word has been received that his body was cremated.

FOR SALE—No. 1 REWARD SEED Wheat. $2.00 per bushel for quick sale. This is seed from Herman Trelle, grown on breaking. Apply to M. McGinnitie. 'Phone 416.

Have You Renewed?

LAKESHORE

Mrs R. Bethel was very pleasantly surprised on Friday evening last when a number of her friends and neighbors gathered at her home about 8 o'clock to help her celebrate her birthday. The evening was spent at cards and lunch which was prepared by the ladies of the party was served at midnight after which a handsome purse was presented to Mrs. Bethel. Mrs. Bethel was also fortunate in winning the prize at bridge. A very enjoyable evening was spent.

A son was born to Mr. and Mrs. Leslie Jones at Camrose on Saturday, February 22nd. Congratulations.

Mr. Jones went to Camrose on Tuesday to make acquaintance of his son.

Mr. L. H. Graham arrived on Wednesday and is moving on the farm vacated by E. Noland last fall. Mr. Graham comes from Ashmont and we are very pleased to welcome him to our community.

Mrs. H. Wood has been on the sick list for the past week. We sincerely hope she will soon be enjoying her usual health.

THE WORLD DAY OF PRAYER

On January 9th, 1920 Canada held her first interdenominational Day of Prayer. Two years later it was made international, as well as interdenominational and observed by both Canada and the United States. From this beginning the movement has spread over the world and one day of the year is observed as a World Day of Prayer.

On March 7th, 1930 people all over the world will gather together to carry out the same programme of worship, this year prepared by Miss Helen Kim, of Japan. All those of whatever denomination, who wish to join in this programme of prayer gather at the United Church on Friday, March 7th, at 3 p. m. Everyone is cordially invited.

COMMUNICATION

To The Editor —

I wish to take this opportunity of thanking the ratepayers of Division three Municipal District of Beaver Lake No. 486 who so kindly supported me in the election for councillor held at the Amisk Creek School House last Saturday February 22, 1930. It is very gratifying to know that I have the support of so many electors. My motto has always been to be fair and just to everybody, special privilege to none.

Yours very truly,

E. A. Moen

WHIST DRIVE

The U. F. A. wish to announce that they are holding their annual whist drive in the Variety Theatre on March 11th. Further particulars later.

Tofield Hockey Team Play Two Games In City

Lose One And Draw One

On Friday the local hockey team journeyed to Edmonton and played the St. Pats. The game was played at the Arena and was of 45 minutes actual playing time. Before and during the game the Tofielders tried hard to get a regulation hockey game of 60 minutes but the rink management for no good reason that we could see would not allow it.

Our game followed one ending at nine o'clock and as soon as the boys were on the ice the game commenced.

The play was fairly even, but it could be seen that the Tofielders were at a disadvantage due to the size of the ice and strange surroundings. In the first period the locals were outscored 2-0. In the second period they outscored their opponents by two goals to one and in the third the St. Pats scored twice, making a final score of 5-2 for the St. Pats.

The game was clean and was exceptionally well refereed. For Tofield Whyte and W. Worton scored one each.

The St. Pats are juvenile players between 17 and 18. They are husky and fast skaters and rank with the Canadians, Alberta Provincial juvenile champions. Weather permitting we hope to have them visit Tofield this season.

Owing to so much jangling with the rink management over not being allowed to play a regulation hockey game of 60 minutes, we overlooked obtaining their line up and who scored their goals.

Tofield: Bowick, goal; Glover, Biglow, defense; R. Whyte, W. Worton, S. Worton, L. Swinton, R. Martin, M. Kjosness, forwards.

The second game was played on Saturday night against the 10 troop scouts, and resulted in a draw. The teams were well matched and the play, especially in the last period was very fast.

As several members on both teams wanted to attend the Edmonton Calgary game there was no overtime. Three fifteen minute periods were played. The Tofielders scoring were S. Worton two, Kjosness one.

The scouts played here recently and in an overtime game were defeated 4-2.

Those interested in hockey might be interested in reading a few impressions of the Calgary-Edmonton game. This game was one of the Alberta Championship elimination series, and was between the Poolers of Edmonton and the Canadians of Calgary.

In the first period both teams played cautious hockey, Calgary especially rarely sending more than one man up, and as soon as he would lose the puck or [illegible] he would skate right back. The Poolers were not quite so cautious but were not taking many chances. They tried several two and three man rushes but in the first period there was no score by either team.

In the second period Calgary became more aggressive and forced the play. It was in this period that they showed their class, both on attack and defense. The Calgary goalie's work was of a very high order. One play especially being brilliant. Coming up the ice three abreast one of the Poolers sent in a hard drive, the Calgary goalie saved and the puck bounced out almost six feet in front of him, a Pooler flashed in and whipped it back at the goalie, who to save jumped at least one foot or eighteen inches in the air to take the shot on his body protector. It was done with lightning speed and was a brilliant play.

In the second period Calgary were able to score four times. Their skating on attack was very fast, two players especially Nos. 10 and 8 being greyhounds on skates. In this period they did not appear to be using a great deal of combination play, their goals coming chiefly from fast skating and classy stickhandling. With a few minutes to go a Calgary player skated through & when about twenty feet from the goal sent in a hard drive that caught the Edmonton goalie just below the eye. He dropped at once to ice and was unable to resume play. While the second period was easily Calgary's the Poolers were putting up good opposition, and with a little of that elusive thing called luck would have scored one or more goals. Their lone goal was scored in this period. Coming up and shooting hard on the Calgary goalie two or three players closed in on him and put him and the puck into the net before he had time to clear.

The third period was a walkaway for Calgary. They were able to score with comparative ease. Forceful and brilliant attacks by the Poolers invariably came to naught due to superb goal keeping and defensive work of Calgary. In attack Calgary now using three men rushes and combination play, were able to score almost at will. Knowing they had only a substitute goalie to beat they opened up and scored six goals in the last period, the game ending 10-1 for Calgary.

HOLDEN BEAT TOFIELD 7-3

A very [illegible] crowd turned out on Tuesday night to see the local hockey team and Holden meet once again. The crowd was not disappointed for although they were beaten the locals put up sufficient resistance to bring out the best hockey of the season on this rink.

Holden has an excellent team of senior calibre, having turned many invaders for the Dawson cup away empty handed, and in a recent tilt with Vegreville only lost out by the odd goal. Tofield had abominable luck. Towards the close of the first period Bowick was hit with the puck just above the eye and towards the nose, necessitating his retirement from the game. It was a nasty blow and required medical attention. The loss of Bowick by injury, coupled with the loss of Martin from the same cause, caused a re-arrangement of the team that was difficult to handle. Whyte courageously volunteered to play goal and made an excellent showing. Swinton was up and more than held up his end. The two Wortons were up and Glover and Biglow on defence.

At the time that Bowick was injured the score stood at 1-1 and both teams were playing open hockey. There was no further score in the first.

In the second period, for one sweet five minutes the locals had by far the best command of the game. Holden rarely got within shooting distance of Whyte. By stealing some of the Calgary Canadians thunder, with a weakened team, the locals not only protected their sub goalie but went one ahead, making the score 2-1. Then Holden equalized and Tofield retaliated by going into the lead once more. This section of the game was really good hockey and the sudden change in style had the Holden players out generaled and out played.

Then to relieve Swinton, who was going great guns, the Tofield manager put on a junior player and in less than as many minutes three goals were scored against them.

Whyte did good work at this stage but was in a strange position.

With the score standing at 5-3 against them, Tofield opened up but on this style of play Holden had the edge and with only a substitute goalie to beat the visitors ran in two more scores making the final score 7-3 in their favor.

The game was clean, despite a little fracas right at the end of the game. W. Worton was all set waiting for a pass out of the corner when Black whipped his feet from under him and the war was on. Any how it was wasted effort as it was time, play not being resumed.

Referee Clutterham handled the bell.

The ice was in excellent condition and was the best sheet of ice a hockey club has played on in Tofield for at least four years.

Between periods the sweater donated to the club by a small number of friends was drawn for. Calvin McPherson, centre ice man for Holden drew the ticket declaring Mr. Fred Meadows the lucky winner.

The club wishes to take this opportunity of thanking those who helped to buy the sweater. May they live many winters, may their shots on goal prove true and may they be counted "winners" in the great game of life.

We would also at this time like to thank Mr. Clutterham for his services as referee. He is the only one in town, and is called on many times, and the club appreciates very much his good services.

While the club is thanking those for special services rendered mention should be made of the services of Dr Law. Any players injured in play are given the best of attention by the doctor gratis and his services to the club are much appreciated.

Local and Personal

The Wainwright Presbyterial of the W. M. S. of the United Church will hold their annual meeting in Tofield on Wednesday, March 12th. All business will be attended to at the morning and afternoon sessions. In the evening there will be an address by Mrs. McLean of Edmonton, also some musical numbers and an exercise by the C. G. I. T. girls. Every one is cordially invited to attend these meetings.

Mr. George Whyte is progressing favourably after a recent operation for appendicitis at the Royal Alexandra Hospital, Edmonton.

On Friday evening last Mrs. C. Baptiste entertained a number of friends at their home. Card playing took up the first part of the evening. Mabel Thompson and Jack Cookson won first prizes while the consolation went to Mrs. Bigland and John Thompson. Mrs. Baptiste and daughters served an appetizing lunch after cards and the latter part of the evening was spent in community singing and social visiting among the guests. Everyone extended a hearty thanks to the Baptiste family as a exceedingly jolly time was had by all.

Born —To Mr. and Mrs. G. E. Francis, on Sunday, March 2, a son.

Word has been received that Rev. Nugent Wilson, late of Tofield, and for several years in charge of a parish in Lincolnshire, England, is at present in Italy. He has accepted the British Chaplaincy at Trieste, near Venice. The position which is a responsible one involves visits to Belgrade (Jugo-Slavia), Sophia (Bulgaria), Durazzo (Albania), Fiume, Brioni and other places in Italy. Trieste has 250,000 inhabitants and used to belong to Austria before the great war. There are about 300 British people there.

Miss R. Higgins of Edmonton spent a few days in town.

Miss Muriel Malcolm has finished her business course and is now at home.

Messrs. Geo. Agnew, Joe Wiltzen and Bert Calvert made a motor trip to the city this week.

Miss Ruth McLaughlin, who has resumed her studies in Edmonton was home for the week end.

Mr. McLaughlin, of Edmonton, was a guest of his chum, Mr. Leach of the C. N. R. staff this week.

A number of lady curlers were guests of the ladies of the Granite Curling Rink, Edmonton on Tuesday. Those making the trip were Mesdames McCauley, Clutterham, Chapman, Rogers, Innis, Warner, Beirnes, Firth. While there, friendly curling games were played.

Mr. and Mrs. O'Hara are moving from the mine property and will reside in the Worton home.

Tofield and Ryley juniors tangled at the Tofield rink on Saturday, the locals winning by a score of 8-2. The locals promised to have a report of this game in but it has not arrived.

Bardo and Tofield junior hockey teams tangled at Tofield on Wednesday, with Tofield winning by a score of 7-3.

A community sale was held last Saturday. There was only a fair crowd and the bidding just fair also. Later in the season it is expected more interest will be shown.

Cornhill municipal district are holding their regular council meeting today (Thursday).

The most successful dance held in Tofield for years was held at the Variety Theatre on Monday night last. Martin's Orchestra supplied the music, and the dance was arranged by Messrs Hanson, Harris, Leach and Shiltch.

Born—To Mr. and Mrs. Garfield James, on March 5th, a son.

Bardo

The Bardo U. F. W. A. were to have held their monthly meeting in the church basement on Wednesday afternoon, but as only three members and two visitors were present the afternoon was pronounced a failure. It is hoped that the next meeting will be more successful.

A very delightful evening was spent at the J. Stauffer home on Wednesday, when a large crowd of young folks gathered at their home to celebrate the birthdays of Miss Selma Nesseland and Julius Lerbeck ... Many games and contests were played. A bountiful lunch was served at midnight.

Birthdays seem to be quite fashionable at present. Ingolf Brechan celebrated his on Friday. Mrs. Brechan entertained a small party in his honor in the evening. A very enjoyable time was had.

Although the nice weather is very pleasant most of the young people became quite pleased when it turned cold enough to permit skating again. Skating parties were held Tuesday and Friday evenings and, as usual very enjoyable times were had.

Mr and Mrs. Melvin Roth, returned to their home here on Friday after spending the winter in Milford, Nebraska.

Miss Betsy Ness, of Edmonton, visited at her home over the week end.

The Services and the Y. P. S. held at Bardo, on Sunday, were both very well attended.

Visitors at the A. Haukedal home on Sunday were Mr. and Mrs. B. Johnson, Mrs. Hagen and Martin and Mrs. Borum.

Ketchamoot Items

Mr. A. Shultz went to the city Monday to attend the Live Stock meeting which is being held there this week. Mr. J. H. Ingram left Tuesday also to attend.

Fred Williams visited with his parents a few days last week. He returned to Edson where he is working.

The election of officers was held after services Sunday evening for Sunday School which recommences the first Sunday in April in the morning. The officers are as follows:

Superintendent, Mrs. Carlisle; vice superintendent, Mr. Allison; secretary-treasurer, Roy Williams; teachers, Mrs. P. Lee, Mrs. McCowan, Miss Fawcett and Mrs. Whillans and the substitute teachers are Mr. Allison and Mr Gordon.

Mr Whillans was the delegate from this district to the Laymen's conference held at Wainwright last week. Mr Whillans gave an interesting account of his visit at the Sunday services.

Mr Allison was the week-end visitor at the home of Mr. and Mrs. Appleby.

A meeting was held at the school Saturday when Mr Cunningham, of Edmonton brought down the plans for the new school. It was decided to have the school stuccoed.

U. F. W. A. NOTES

The U. F. W. A. met at the Municipal building on February 27th. Mrs. Baptiste's paper on "Successful management of an Incubator" was exceptionally interesting to all poultry raisers. Mrs. Bigland will read a paper on accidents and emergencies at our next meeting, March 27th. Roll call is to be answered by "What is most restful when we have that tired feeling"? Don't forget the annual whist drive which is to be held at the Variety Theatre on March 11th.

JOHN CARLISLE PASSES AWAY

John Carlisle, son of Mr. and Mrs. Thos. N. Carlisle, who lived in the Tofield district until two years ago died in Medicine Hat on Friday, February 28th last of streptococcus infection of the throat. The body was taken to the old home of the family in Peru, Nebraska, for burial, the funeral taking place Friday, March 7th, at three o'clock p. m.

INSTITUTE DISSOLVED

The final meeting of the Tofield Women's Institute was held in the W. I. rooms on Tuesday of this week. Each member had been notified of this meeting, which was held to decide how to dispose of the building, etc. and it was decided to turn the building over to the town to be held in trust for a committee, which was appointed to look after its up-keep, rentals etc. It was brought out at the meeting that were this building to be closed, the townspeople would have no place to rent for card parties, teas, bazaars, suppers and various meetings at as reasonable a price as these rooms can be secured for, and it is for the convenience of the Tofield public that they are being kept open, and we trust those renting the rooms will see to it that they are properly cleaned and straightened out each time before leaving. Mrs. Pascott, who had been made convener of the committee in charge at a previous meeting was in the chair. Other members of the committee are from each church, Mrs. J. Robinson, English church, Mrs. Ed. Sabal, Catholic church and Mrs. Booth of the U. F. W. A. Mrs. Lerbeck will still have charge of the renting and the scale of prices is as follows:

Meetings $2.00, whist drives, adults, $3.00, same for girls or boys $2.50, afternoon teas and sale of evening, $4.00, same for girls clubs, $1.50, suppers, $3.00, bazaars, $5.00.

It was decided to keep the special Institute dishes to rent for $1.00 extra. This will prove a convenience also. The committee held a meeting at the close of the dissolving, and went into the matter of having the rooms thoroughly cleaned, curtains and windows washed and the tables and chairs mended and locks put where they are most needed. The library will have to be moved to the office of the secretary treasurer in the town hall, as Mr Chapman has kindly offered to look after same, and books can be secured at any time during office hours. A number of new books are to be added at once. The old library committee has charge of the moving.

It is with regret that the local Institute was dissolved, but lack of interest was the big issue and if the women of Tofield are not interested enough why have an Institute.

The committee "de affairs" trust they will have the co-operation of the townspeople in their effort to keep these rooms and contents in the best of condition at all times.

Mixed Bonspiel Draws To A Close

The mixed bonspiel is now drawing to a close, there now being only a few games remaining to be played.

The results available at time of writing are as follows:

Grand Challenge 1st, Bissett, 2nd, Chapman, 3rd, Abbott, 4th, Agnew. Booth Semi finals now being played.

Forsdinger—1st, McLaughlin, 2nd, McCauley, 3rd, Dodds, 4th, Cory.

The bonspiel due to soft weather has been drawn out this year. Nevertheless there has been much interest and many enjoyable games played.

Next week two rinks from Ryley are coming to play for the Northwest Utility cup which Tofield now hold. Two lady rinks will also come from Ryley and play.

A ZANE GREY PICTURE FOR SATURDAY

For Saturday of this week, manager Wood of the Variety Theatre has booked a very popular production viz "Under the Tonto Rim" it being a film reproduction of the novel of the same name by the well known author Zane Grey. It is a western story of rare beauty and yet contains sufficient thrills to satisfy all those liking a stirring picture. A well thought out plot, coupled with a splendid cast has produced a picture of rare merit. Usual admission.

U.F.A. WHIST DRIVE NEXT TUESDAY

The annual whist drive of the U. F. A. will be held on March 11th. This event has proved very popular in past seasons and a large crowd is expected to be present.

As usual the ladies will serve an excellent lunch.

CITY PLAYERS TO PRESENT PLAY HERE

On Monday, March 17th, the St. Joseph's College Dramatic Society will present a splendid play entitled "Her Worship the Mayor."

This play has been presented by this company of talented players many times and has met with a wonderfully good reception where shown.

The admission charge is being kept down to the minimum so that all may enjoy the play and it is expected many will take advantage of the visit of these players to spend a very enjoyable evening.

OMISSION

In the recent report of the local play, Bert Calvert's name was unintentionally omitted. Much of the success of the play was due to his clever "making up" of the cast.

WHY NOT U. S. HONEY?

DURING THE past several weeks, Alberta weekly newspapers have been approached by the Alberta Development Board for their support in a campaign designed to influence consumers in favor of "Made in Alberta" products. The campaign is a worthy one, and the Alberta Development Board is a live organization. But, we would call that organization's attention to the incohsistency displayed by one of Alberta's leading producers.

While at breakfast this morning, we reached for the honey jar. It was a very attractive container and we confess a liking for honey—good honey; the kind that is produced in Alberta by the Riedell people. And that little glass jar of honey was purchased in preference to other brands, because it was produced in Alberta.

But, imagine one's chagrin when a glance at the label disclosed the fact that it was "Printed in U. S. A." There are a hundred printing plants in Alberta which might have produced that label and improved upon its design, but the producer who is catering to the Alberta consumer steps across the international border and buys a foreign label to advertise his product, which he hopes to sell in the home market.

Straws point which way the wind blows and this liittle incident is but a sample of the inconsistency of many Canadian manufacturers when it comes to purchasing labels, wrappers and containers. And now, can we be criticized if we are converted to the use of United States honey?

VARIETY THEATRE

Saturday, March 8th
Under The Tonto Rim

This picture was taken from one of the most widely read of Zane Greys books, and with Richard Arlen and Mary Brian starring, it is certainly a very fine Pioneer and Western picture, which follows the book very closely.

Also this is the fourth night of our big prize contest. Who will be the lucky ones to get the prizes? Only two more weeks to get in on them, so be sure and bring your tickets to the show on March 22nd when we show "SIMBA", one of the biggest and most educational pictures which has ever been shown in Canada, as that is the night the draw will be made and the lucky winners will carry home the grub stakes.

(Cont'd from page 1)

Nine competitions, including men's and women's handicap events, men's and women's team matches and mixed foursomes will feature the programme of the second annual Empress mixedwear golf tournament to be played over the 18-hole course at Victoria, February 17-22. The C. G. Beatty trophy in the clubs' award for the men's and women's handicap competitions.

Miss Connie Wilson, champion fancy skater of North America and Great Britain, will take a star part in the ice pageant of the Province Winter Sports Club to be staged at Quebec February 12-13. She will be supported by the best talent of Quebec and a group of stars from Toronto, including the championship four of the Toronto Skating Club. Ottawa will be represented by the Minto Skating Club and 24 Lady skaters from Toronto will perform in the "Union Modern" number.

The greatest fireworks display of the year the "Fete de Nuit" exhibition at Quebec, twenty one of the best known acts in the pyrotechnic line which acts until March, consisted of a sham attack by hundreds of skyrockets, bearing torches upon the garrison of the citadel. The heavy explosions of Roman candles, bombs and rockets began the attack, which culminated when the besiegers were driven back by the garrison, who sent volley after volley of blanks crashing into the sky. When the bugles sounded the "Cease Fire", the show was generally voted one of the finest in years.

The outstanding contributions that the Canadian Pacific Railway has made to the life of the Dominion in an industrial and cultural way were emphasized by E. W. Beatty, chairman and president of the company, in a recent address before the Canadian Club of the Montreal Lengine Hotel recently. The company, he said, had in the past five years, spent over $100 millions on capital account alone and during the same period had paid out over 1,000 miles of branch lines. 1929 with its decrease in earnings, he regarded as an exceptional year not likely to be repeated in subsequent years

A considerable increase in grain shipments from Baie des Chaleurs already been established since the new year over the entire month of December 1929. General Superintendent J. B. Scollard, of the Canadian Pacific Railway, states Dunbia oil grain for December reports from Saint John totaled 504,357; from Montreal to January 1, 1930 was 661,438.

The second annual Sea Music Festival of the Pacific coast passed into history on January 18, where once again regatty bosses greeted the final offerings. Outstanding among the features were the two ballad operas "The Lass of Good Luck" incorporating French-Canadian associations of the 18th century, and "Round for the Rio Grande", a rollicking two act piece by Captain Frederick Wallace. Each of these was repeated at the request on three successive days.

The 15th annual winter carnival with the title of "Quebec Winter Sports Club" tournament will be held at Quebec February 12-13. The Governor-General has been made on the ski hill at Beauharnois and invitations to jumpers of the continent will attend the tournament.

REPORT OF CREAM PRICES

For the week ending February 22 the following prices were reported by creameries per pound of butterfat, in the several grades of cream and at the points shown.

Grand Jacopy: Special grade, 40c. All Others: special grade, 38c; number one, 36c; number two, 32c; off grade, 28c.

Beat The Weeds With Massey Harris Cultivators

The weed nuisance is one of the most serious problems that farmers have to contend with. The most effective method of reducing the loss in crop and money through weed pests is by the use of modern machinery. For this work the Massey Harris Spring and Stiff tooth Cultivators have proved most satisfactory. We have one in stock. Come in and look it over.

Brewing is an Important Industry in Alberta

ALBERTA'S BREWERY PRODUCTS ARE WINNING THEIR WAY IN THE EXPORT TRADE BY SHEER EXCELLENCE

The Brewing Industry is an important factor in the industrial life of this Province.

It is hardly necessary to emphasize the millions of dollars which have been invested throughout Alberta in this industry.

Hundreds of Albertans enjoy steady employment throughout the year in the brewing, storing, transporting of the products of the five great modern breweries of Alberta.

Where beer by the glass is available, most men are satisfied to forego the full bottle of more potent liquor.

Alberta Brewery Products are served by the bottle or glass at hotels. Sold by the barrel or case from our warehouses.

PRAIRIE AIR MAIL SERVICE STARTED

Inauguration of air mail flights on regular schedule over a territory in which, but a few years ago, Red River Carts, tediously drawn by oxen, were almost the sole means of transportation, was hailed by leaders of life in western Canada, Monday as the beginning of a new era in the development of the country.

Striking the keynote of various expressions, Premier John Bracken of Manitoba, in a message to Premier J. E. Brownlee, sent through the Edmonton Journal, said:

"With this annihilation of time and space, let us hope that growing knowledge of each other, our ideals and motives, may draw all Canadians, indeed all men, closer together in bonds of mutual cooperation and understanding.

In a message to Mayor J. M. Deagan, also forwarded through the Journal, Mayor Ralph H. Webb urged all citizens of the west to cooperate in keeping alive the new service.

Deagles Sends Greetings

Greetings were sent by Mayor Deagles to the mayors of Regina and Winnipeg, aboard the first mail machine.

The communications follow:

Hon. J. E. Brownlee,
Premier of Alberta,
Edmonton, Alberta.

"Dear Mr. Brownlee:

"Today the people of Canada celebrate together a unique event in their history—the inauguration of a regular prairie air mail service. On the invitation of the Edmonton Journal I take the occasion of the inaugural flight from Winnipeg to Edmonton to send greeting to you and the people of Alberta.

"Modern life moves so swiftly in its annihilation of time and space that many of us scarcely realize that Canada is today, from a transportation point of view, smaller than was the England of a hundred years ago.

"The prairie air mail is simply another milestone in the conquest of time and space in this country. We have still living among us men who remember the voyageur, Red River carts, the pony express, the first automatic transcontinental mail train. To-day our splendidly efficient mail trains have evoked a new ally.

Full Day Closer

"Winnipeg and western cities are a full day closer together than they were yesterday. We can look forward to the time when a letter posted in Halifax one morning will be delivered in Vancouver the next. A dream?—yes, but here a dream was 30 years ago.

"With this annihilation of time and space let us hope that growing knowledge of each other, our ideals and motives, may draw all Canadians, indeed all men closer together in bonds of mutual co-operation and understanding.

Yours very truly,
"JOHN BRACKEN

His Worship, Mayor J. M. Deagan,
Edmonton, Alberta.
Dear Mr. Mayor:

"On the occasion of the inauguration of western Canada air mail service from the city of Winnipeg westward, covering Manitoba, Saskatchewan and Alberta, may I be permitted to take this opportunity of expressing to you and to the citizens of Edmonton, very cordial greetings from the city of Winnipeg.

"The advent of this new means of communication is assuredly one more indication of the vast possibilities of future development of western and northern Canada, in which aviation will play a leading part.

"It is to be hoped that the air mail service will be a great success which can only be accomplished through the whole-hearted co-operation of the citizens generally and by every city throughout the west, using this service which is now placed at their disposal.

"Again I wish you, one and all, sincere and hearty greetings."

Signed,
"RALPH H. WEBB, Mayor."

Greeting From Edmonton

The greeting from Edmonton to the cities of Regina and Winnipeg were in the shape of letter addressed by Mayor J. M. Douglas to Mayors Ralph H. Webb of Winnipeg, and James MacAra of Regina.

They read:

"On this occasion of the first established air mail service between Winnipeg, Regina and Edmonton, leaving this city at 12:15 today, I wish to take this opportunity of conveying to you the greeting of the city of Edmonton to your fair city and trust that the season of 1930 will be one of great prosperity and progress, not only in your city but in all the cities of Canada.

"I trust that the problems which we have had to solve during the past year will be overcome in the near future and that western Canada in particular will embark on an era of success in every way.

"With kind regards to yourself personally,

Yours very truly,
J. M. DOUGLAS

VARIETIES OF BARLEY FOR ALBERTA

(Experimental Farms note)

"There is no one best variety of barley for Alberta. The variety recommended will depend on the needs of the grower. The varieties available vary in yield, length and strength of straw, and quality of the grain, hence the variety to recommend must be governed by the district in which it is to be grown, the kind of soil and whether grain is to be used for feed, or for malting in Canada, or in Great Britain.

O. A. C. No. 21 is recognized as the standard brewing barley for the Canadian trade. It has a long straw of fair strength, and is a good yielder. The Canadian Brewers offer a premium for well matured plump, bright grain of this variety that is free from impurities. Growers who are considering barley production for the brewing trade would be well advised to use this sort. It is also an excellent feed variety.

Trial tests consistently been one of the heaviest yielding barleys tested at the Dominion Experimental Station, Lacombe. It has stiff straw of medium length and strength. The grain tends towards coarseness and is not favoured by Canadian brewers. In view of the prejudice against it by Canadian brewers, it would seem that the production of this barley should at present be considered mainly from the feed standpoint.

The two-rowed barleys, individually or as a group, produce very fine appearing samples of threshed grain which is plump and high in feeding value. As a class they do not yield as well in this Province as do the six-rowed sorts.

Canadian Thorpe and Duckbill are two outstanding varieties of tworowed barley. These varieties have stronger straw than any of the six rowed sorts now available in the east trade. Canadian Thorpe will slightly outyield, but has slightly weaker straw than Duckbill. These varieties are only fair yielders, but it is possible that because of their strength of straw, they may have a place on strong land where other sorts lodge badly.

Hannchen is another two-rowed sort, that will usually outyield both Canadian Thorpe and Duckbill here.

More O. A. C. No. 21 is grown than of all other varieties combined, but the other varieties mentioned are well worthy of a trial.

CALENDAR REFORM CAMPAIGN GROWING

Active propaganda has been resumed both in Canada and the United States in favor of the adoption of the proposed fixed calendar of 13 months of four weeks each.

The suggestion already favorably considered by the league of nations, is largely a Canadian foundling. While it was largely and variously debated prior and subsequent to its submission to the League, interest ebbed during the past year. Apparently a concerted effort has been made to press the question into the foreground anew and debates as to its acceptability are noisedly common.

A review of the general attitude appears to rest mainly on the part of great majority and concentrated opposition from Jews and Sabbatarians, the Jewish objection being mainly based that once each year and twice in leap years, the Sabbath would fall on the eighth day, contrary to the Jewish doctrine of Divine rest.

Fixed calendar advocates reply that the alleged economic hardships, per civil calculations are not civil, abridgements of any individual's rights, but are inconveniences to meet experience simply because of his particular religious creed and convictions.

In addition to the thirteen months of four weeks the fixed calendar would provide for giving one day each year a non-week day name such as "Year day" and by giving the additional day in leap year a non-week day name such as "Leap day".

Citizens has been the source of a great deal of the propaganda favorable in the changed calendar and the question here can be more clearly gauged than in most centres. The public thing is regarded more in the light of an interest in academic argument rather than a reform which is of any vital concern to the generation.

INCREASED WHEAT DEMAND EXPECTED

According to the well informed sources here an increased demand for Canadian wheat from Europe, with an improvement in prices may be expected shortly. This is due to the fact that while stocks are fairly large at Liverpool they are small at many of the continental European ports. While the crop estimate for Australia has been increased that for the Argentine has been reduced, and also there is no material change in the world's crop. In many of the European countries, particularly Germany, Italy, and Austria, prices have risen in relation to the Canadian price, and it seems likely that the imports of these countries will increase.

Germany for a while exported considerable quantities of wheat to Great Britain; it now seems likely that this country will have to import, and thus will not be a factor in so in the meantime, they should be able to meet with their demand by the best means at our disposal. In practically all cases this implies proper treatment at the earliest possible moment. It is in the earliest stages of disease that medical science has the most to offer. At that time there is the best chance for cure. At that time, too, there is the greatest opportunity for the prevention of further damage or of the possibility of allowing the condition to become chronic.

A great deal has been done to control tuberculosis. This disease now takes as its toll only one half of the number of lives sacrificed to it twenty-five years ago. Its ravages can and will be further reduced. If those who do not contract the disease come under proper treatment in the earliest stages there is every chance for their cure. Delay in securing treatment presumes the chance for a complete recovery. Cancer, which takes an increasing number of lives each year, can be successfully treated in its earliest stages, when it is a local disease. Delay causes a generalized disease which cannot be cured. Diphtheria is a disease which can be prevented; if it does occur, it can be cured, providing treatment is given on the first day of the disease. Every serious case of heart disease and its beginning, and had the patient been treated in the earliest stages and instructed as how to live, a long, useful life could usually have been secured.

In order to obtain early adequate treatment, the condition must be discovered and brought under treatment. Early signs or symptoms should not be considered lightly, but regarded as a warning that attention is required.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

MINISTER U. F. W. A. ENTERTAIN

The minisith U. F. W. A. entertained the C. F. A. members of the community to a weiner supper, debate and social evening, Thursday, February 27th. The debate was entitled "Resolved that Country life is more beneficial than city life". The matter was very ably presented, the affirmative being taken by two grade seven boys, Frank Stanley and Frank Grummet, the negative by two grade eight girls Winnie Leech and Lily Lawfer the decision went to the affirmative. Mrs. Stanley George had arranged a very enjoyable program most of our young people taking part in the lasting songs, choruses, mouth organ solos, violin solos, readings, step dances also ventriloquism at the close of the program. Everyone entertained young and old with some old time dance music which was very much appreciated. Everyone went home feeling they had enjoyed a real social time. On July 21-22 the minisith U. F. W. A. are holding a short course in sewing to which all the ladies are looking forward to with much interest

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIA

EARLY DISCOVERY MEANS EARLY RECOVERY

In the year 1926, Jenner announced his discovery that small pox could be prevented by vaccination. Since that time, due to progress in our knowledge concerning the causes of disease and their manner of spread, other diseases have been added to the group which may be definitely prevented. That these diseases still occur is due to the fact that a great deal of knowledge of the means for their prevention, for rather to a failure to use and apply this information.

There exist, unfortunately, many diseases which we do not know how to prevent, or which we are only able to control partially. The possibility of prevention in this group are limited or do not exist, because we do not know how to proceed to avoid the occurrence of these diseases. The time will come when the well-of mystery which now shrouds them will be pierced by the bright light of science and this will not be a factor in us, in the meantime, they should be dealt with when they occur by the best means at our disposal. In practically all cases this implies proper treatment at the earliest possible moment. It is in the earliest stages of disease that medical science has the most to offer. At that time there is the best chance for cure. At that time, too, there is the greatest opportunity for the prevention of further damage or of the possibility of allowing the condition to become chronic.

A great deal has been done to control tuberculosis. This disease now takes as its toll only one half of the number of lives sacrificed to it twenty-five years ago. Sleuthing by Radio

Photos by Courtesy Northern Electric Company Limited.

Detroit police radio-equipped cars made 1 193 arrests in 1929. In September last year they made 178 such arrests in an average time of 61 seconds each. These arrests ranged from bank hold-ups to kidnapping and from petty crimes to murder. Fifty specially equipped Ford stations patrol the entire city day and night under the direct control of police radio system headquarters.

Above, left to right, the headquarters, note the microphone through which the operator transmits to all cars, particulars of crimes as received. Typical downtown scene through which police cars operate.

Below, the police radio headquarters. One of the radio equipped patrol cars, note receiving set at the back of front seat.

Editorial

THE WOMEN'S INSTITUTE

The announcement of the dissolution of the Tofield Women's Institute came as a great surprise to many people. When one considers the important part in local life this organization played several years ago, it seems difficult to believe that the Institute is no more. From very humble beginnings, the Tofield W. I., in a few short years rose to the point where it was by far the most active social organization in town. In fact other organizations which have, unintentionally no doubt, crowded the W. I. out, have still to attain the heights of service the W. I. gave. Times change, and perhaps no good purpose is served by mourning over the demise of an association which for lack of public interest expired. Yet one cannot help but recall a few of the outstanding triumphs of the Institute in days gone by. There is of course the library, which will go on, then there is the building, which will also be of much service to many people for many years; then one recalls the W. I. garden competition, which unostensibly has resulted and will continue to result in more beautiful home grounds. The W. I kept a seeing eye and harkening ear to the plight of needy families in town and district and have done much good in this respect, while for years they kept a cot and mattress for those having to be taken to the city hospital in an emergency. We wonder how many have forgotten the vigor and enthusiasm which was put into the town tree planting campaign. To be sure few of the trees are alive to day but many were planted and a larger num[illegible] have lived if they had been better taken care of. In the way of entertainment, who remember the big Hallowe'en night arranged by the W. I. several years ago? Or their annual concerts, year by year outstanding concert attractions?

With such a record behind it, one wonders why the Institute ceased to function, and wondering, attempt to advance some reasons which may or may not be right. Actually no one thing caused the Institute's demise—not even public indifference to organization. Rather it was a combination of circumstances, which all together crowded the Institute out of existence. Since the days of the Institute's glory there has come into existence the Tofield U.F.W.A., the ladies' curling club, the local branch of the Eastern Star and the Suiter Bridge Club. We presume ladies have just so much time to spare—and money—to spend for social and service organization purposes and of course the W. I. suffered from competition. Then there is the natural element of change. Having planted trees, beautified school rooms and school grounds, held teas galore, collected clothes for needy families, many ladies wanted to do something more thrilling and competitive and took up curling with its consequent bonspiels, others pleased with such high sounding titles as Magnificent Grand and such like, and liking the atmosphere of a world of make believe, became members of a fraternal order. Others recognizing the social elegance of bridge, found an outlet for their social activities in this manner.

In many ways the passing of the W. I. is to be regretted. To the stalwarts of the society—most of our readers know who they are—must go a great deal of praise. They labored well and they labored long and if the present trend for mottoes is "A bungalow and a car" rather than "For Home and Country" this is no fault of theirs.

SIMBA FOR FRIDAY AND SATURDAY OF NEXT WEEK

For next Friday and Saturday, March 21 and 22, a unique and exceptionally good picture will be shown at the Variety. Simba is the actual photographic experiences of Mr. and Mrs. Johnson in Africa, and the film is the painstaking work of four years. The production is one that no one should miss, educational in the extreme, interesting and thrilling. Something entirely new, it took New York by storm and played to full houses for months at big prices.

Note: Regarding the contest for which draws will be made on Saturday. Those attending the show on Friday night will be listed and the number of their ticket taken. If they are lucky winners in Saturday night's draw the prizes will be forwarded on to them.

To qualify for a prize note you must be in the house Friday or Saturday night.

Prices for Simba, Adults 60c, Students 25c, children 10c.

Kingman News

Roy Melvik left on Monday for Jasper where he will be engaged in carpenter work.

Mr. and Mrs. Oscar Graha and Mr. and Mrs. Thor Graha and family visited in Edmonton for few days last week.

Mr. and Mrs. W. McIntosh entertained Mr. and Mrs. O. Bjorgum last Saturday evening.

O. Thompson and W. Christenson were business visitors in Edmonton on Tuesday.

Mrs. A. Kelmp and children returned to Camrose on Tuesday after staying with Mr. Nels Jardie for a few weeks.

Mrs. George Welch visited with Mrs. W. McIntosh on Tuesday afternoon.

Lloyd Lindberg on Monday after having had a successful operation for appendicitis in the Alexandria Hospital in Edmonton.

A number of young Kingmanites attended the talkie in Camrose on Saturday evening. All reported having a good time.

Miss Irene Horte visited at her home over the week end.

Mr. and Mrs. Joe Munson and family visited with Mr. and Mrs. C. R. Blykert on Sunday.

The funeral of the late Mrs. A. H. Mickelson. who died in the early hours of the morning on Friday, March 7th, was held on Sunday. She was liked by every one who knew her as was shown by the many floral tributes and was a great loss to her beloved ones. The pall bearers were Charlie Johnson, Oscar and Gust Berd, Olaf Johnson, Andrew Johnson and R. A. Heflin. Pastor C. Grundberg and M. D. Stutsman officiated.

Mr. and Mrs. R. Stevens and Mrs. and Mrs. H. Howet, of Westlock visited with Mr. and Mrs. Earl Mikkelsen over the week end.

Lindbrook News

A surprise party was sprung on Mrs. Frank Kortzman last week. The occasion being her birthday. This party was organized by the young folks of Lindbrook, who are certainly stepping forward now in the social whirl of the district, trying to stop we "old uns" from rushing away. This party started off with a whist drive and then of course the usual supper followed by dancing and singing until the wee sma' hours when everyone tho tired voted it A 1 and look forward to many happy returns of the day to Mrs. Kortzman.

On Friday evening last, March 7 Mr. and Mrs. J. H. Brown gave a whist drive at their home to the old "Lindbrook gang". Seven tables of whist were played and the winners were: ladies' 1st, Mrs. N. Ellis; ladies' second, Mrs. W. Fontaine. Gent's 1st. Mr W. Glen and gent's second Mr. J. Lepine. After the game supper was served and small talk etc. indulged in until departure. Mr. and Mrs. J. H. Brown also gave a whist drive the preceding Wednesday to their friends of South Lindbrook, of this we have no details but hear that it was a very enjoyable affair and quite up to snuff.

Mr. Henri Goubault et famille returned from Quebec last Friday and at present are staying with their relatives here.

Mr. Leslie Rogers gave a party to the younger set one evening last week at his home. Leslie has a good gramaphone and to the tunes of this it seems as the song says, "They danced the whole night thro'" so we imagine it was a very jolly evening.

M. Prosper Lepine is building a new barn, hewn logs, and is being assisted by Messrs J. Lepine, W. Fontaine and some others.

Local and Personal

FLASH—"Lucky Strike" Bisset wins Grand Challenge. The Auto Robe and first prize at the Bridge Drive.

Mr. Harris, of the McLaughlin Hardware visited the city over the week end.

The W. A. will hold a silver tea and sale of home cooking in the W. I. rooms on Saturday, March 22nd.

Miss Edna Campbell, who is attending school in Edmonton visited her home over the week end.

Miss Clara Abbot and three friends who is teaching school, visited home over the week end.

Mr. and Mrs. Bud Hannan and Glen Wood motored to Camrose on Sunday.

Ruth McLaughlin visited her home over the week end.

Mr. Fred Meadows, teacher of grades 7 and 8, was sick for a few days this week.

The Young People's Society held their meeting in the form of a social at the home of Mr. and Mrs. J. Cookson on Monday evening. Games and dancing were indulged in until midnight when a delicious lunch was served. All voted the evening a very pleasant one.

Mr. A. P. Harold visited Edmonton over the week end, where he took in the Glenora skating carnival on Saturday night.

Mr. E. Curtiss was defeated in his bout in a boxing tournament held in Edmonton recently.

Mr. A. B. Clutterham motored to Chipman on Saturday, his daughter Eva, who is a member of the Bank of Montreal staff returned with him. They were accompanied by the editor.

The spring Millinery opening at Lucilles Beauty Parlor will be held on Friday and Saturday, March 14th and 15th. Attractive new models at reasonable prices.

The Junior C. G. I. T. are holding a silver tea and sale of home cooking in the W. I. rooms on Saturday Mar. 15th.

TOFIELD JUNIORS WIN FROM HOLDEN ON FRIDAY

On Friday night last the Tofield junior Hockey team met a team from Holden at the local rink. The Holden lads, both in size, weight and speed were formidable opponents for the locals, and before the game commenced the visitors looked good for a win.

Four periods of good hockey were played Tofield emerging victorious by a score of 2-1. The first period saw the locals playing careful hockey, but developing speed and strength on attack when most needed. In this period they scored two.

In the second period Holden tightened up their defence and their forwards worked hard to score. The locals, however, playing steady hockey were able to hold on to theri lead throughout the period.

The third period found Holden making speedy rushes and on one of them scored. They tried hard for the equalizer but the locals held them out and the period ended 2-1.

The fourth period was not quite so fast but contained numerous determined rushes for the equalizer and Whyte had to stop a number of hot ones. The period ended with the locals out in front by a 2-1 score.

All the locals played good hockey working together as a unit resulting in good clean hockey.

For Tofield, Murray McIleffey scored twice and Doug Brown scored for Holden.

Line up—Holden:goal, C. Mohs; defence, D. Brown, L. Logan, forwards, L. Black, R. Farrel, H. Black

Tofield:goal, R. Whyte; defence, P. Thompson, R. Bowick; forwards, R. Craig, R. Martin, M. McIleffey; subs., B. Clutterham, J. Whyte

W. Worton jr. handled the bell.

The annual meeting of the Wainwright Presbyterial United Church of Canada Women's Missionary Society was held at Tofield on Wednesday, March 12th. A complete report of the proceedings will be published next week.

Lakeshore

Mrs. T. E. Soale entertained at a kitchen shower for Mrs. Lionel Ferguson, nee Miss Emma Brela, on Saturday afternoon. About twenty ladies were present and the afternoon was very pleasantly spent. Mrs. Ferguson was the recipient of a great number of useful and beautiful presents. Mrs. Soale served a dainty lunch.

Mr. and Mrs. T. R. Murray motored to the city on Friday.

Mrs. Jas Francis is spending a few days with her sister.

Mr John Murray of Mirror visited at the T. R. Murray home on Monday and Tuesday.

Tofield friends will be interested in the fact that Mr. and Mrs. Jno Murray are removing to Biggar Sask in the near future.

Mrs. Leslie Jones and infant son came home from Camrose hospital on Tuesday.

NOTICE

As new attendants have secured for the library at its present location, it will not be moved to the town hall, as announced last week. The hours for returning and securing books will be from 4 o'clock until 5:30 every Saturday. Please take note of this.

We are adding twelve new books to our long list already on the shelves, and a library such as we have is seldom found in a small town and we feel that we should have better support than is had at present. Perhaps some are not aware of the fact that we have over 600 books on our shelves, and the annual fee is one dollar, which entitles one to two books a week. What better reading could be had for the sum of one dollar a year. The more subscribers we have, the more books will be added, but we must have some interest shown a order to keep the library going. Show your interest by subscribing on Saturday. The new list follows:

"Whipped Cream", by Geoffrey Moss, "Sard Harker", John Masefield; "The Garden of Allah", Robert Hichens; "The Seeds of Enchantment", Gilbert Frankan; "The English Miss", R. H. Mottram; French Leave", Somerville and Ross; "No Other Tiger", A. E. W. Mason, "These Men, Thy Friends", Thompson; "The West Wind", Crosbie Garstin; "At Market Value", Grant Allen; "The Green Hat", Michael Arlen; "Allen Quartermain", H. Rider Haggard.

The members of the new house committee for the W. I. Rooms wish to state that as the rent taken in is the only source of revenue to keep the rooms in shape, they will have to charge a small rent for the tables and chairs taken from the building hereafter. They have been to some expense fixing the place up, although the committee have done considerable of the work personally with the help of a few other good Samaritans and there is always more or less expense connected with a building of this sort, open at any time to rent for so many different purposes. The editor quite accidently, omitted to mention Mrs. Lerbeckmo, as representative from the United Church serving on the house committee in last weeks issue.

Will those having dishes or pie plates at the Institute rooms please come and get them on Saturday.

COMMUNICATION

The following are the results of the chemical analysis of the sample of milk, picked at random from the daily supply of E. McClymont and examined by the Provincial Laboratory, Edmonton.

Total Solids, 11.90 per cent
Butter-fat, 3.40 per cent
Solids, non-fat, 8.50 per cent
Specific Gravity, 1.304

Dr. A. C. Rankin, director of the laboratory states, "the milk represented by this sample appears to be of good quality.".

The foregoing result answers the requirements of our health act and is satisfactory in every particular

Frank F. Law,
M. O. H. Tofield

"Get That Girl"

Football and its feuds, extending through three generations, is the cause of ceaseless warfare between two prominent families, the Nortons and the Brawns. Determination upon the part of the Nortons to win collegiate honors for their favorite institution usually meets with defeat. The Brawns have the poundage.

In the first game between Sanford and Mammoth, played in the early days of the great national pastime, Larry Brawn, captain of the Mammoth team, has the customary fight with Johny Norton, Sanford's quarterback. In the end Mammoth smothers Sanford. Norton leaves the field muttering threats. He will develop a winner.

Twenty five years pass and again the two teams face each other on the gridiron. The elders are watching their youngsters fighting the old battle. The sons of the Nortons and the Brawns fight as their fathers fought. Again Sanford goes down to the most humiliating defeat. The elder Brawn leaves the field gloating. Again Norton is vowing vengeance. This taunt rings in his ears "Sanford hasn't licked Mammoth in twenty-five years. She never will—with a Norton on her team!"

Then comes the fruition of all the Norton dreams. Johny Norton, 2nd, is urged by his father to pick out a husky girl and marry her. Young Norton is small and timid. In his father's office is Clara Gentle. She is a dainty "little" creature of fine proportions and satisfactory poundage. She towers above Johny like the Leviathan over a tug. Eventually they are married and, in due course, have a son who turns out to be a tiny mite of a baby. To make matters worse, the third generation of the Brawn family is the huskiest sort of a youngster.

Both boys finally reach the collegiate stage and young Norton falls in love with beautiful Gloria Havens. Under her urgings he finally makes the team and in the last game of the season scores the winning goal against Mammoth, thereby vindicating the Norton name and winning the girl.

The next meeting of the U. F. A. will be held at the home of W. W. Hill, on March 20th at 8 p. m. Mr A. Schultz will give a talk on "Management of Livestock" with Mr. Chas Kallal and J. B. Warner leading in the discussion. This will be an interesting meeting and a good turnout of members and others is desired.

U.F.A. Whist Drive

Despite a sudden change to colder weather, accompanied by a severe snow storm on Tuesday, the annual whist drive of the U. F. A. and U. F. W. A. was well attended

There was not so large a number as in former years, when the hall has been taxed to capacity. On Tuesday night there were over thirty tables, court whist being played.

The evening was enlivened by music furnished by F. Wood's radio phonograph and at the conclusion of card playing a satisfactory lunch was served.

An item of special interest was the selling by auction of a picture painted by Mrs. Hall, and donated to the U.F.W.A. by her. The painting, a rural night scene, was very well done and Mrs. Hall deserves much credit for her work and generosity in donating it to the local. The painting was purchased by Mr George Bruce.

The prize winners at the whist drive were: ladies' 1st, Mrs. (Dr.) Law; gent's 1st, Mr. Guy Walker; ladies' consolation, Mrs. A. Beirnes; gent's consolation, W. J. Thompson.

MUCH FUN HAD AT CURLING CLUB WHIST DRIVE

On Thursday night last the Tofield Curling Club held a whist and Bridge Drive. There were a large number present, the ticket selling campaign conducted by Mr. Scott being very successful.

Very dainty hand maidens served lunch. These included A. B. Clutterham, Chris Hammond, Lem Abbott, Chas Hobson, A. Dodds, Oliver Letourneau and Mr. Rogers sr. With the exception of Mr. Rogers all wore their best party dresses and it is even rumored they raided Beirnes' drug store for cosmetics—or Calvert's theatrical make-up outfit—we forget which. Anyway they created barrels of fun and everyone there enjoyed themselves — especially Dr. Law.

The prizes were won by the following.

Whist—Ladies' 1st, Mrs. Morton; ladies' 2nd, Mrs. J. W. Chapman. Gent's 1st, Art Williams; gent's 2nd, Johnson Ferguson.

Bridge—Ladies' 1st, Mrs. A. Letourneau; ladies' 2nd, Mrs. Galloway. Gent's 1st, Geo. Bissett; gent's 2nd, H. Hicks.

During the evening a travelling rug was raffled off. Geo. Bissett being the lucky winner. This was George's big night, as in addition to winning the above mentioned two prizes he also won the Grand Challenge in the mixed bonspiel.

Irish Concert Monday Mar. 17

Owing to the sudden sickness of the leading character, it has been found impossible to bring the play "Her Honor The Mayor" to Tofield March, 17th, as advertised.

Rather than disappoint those who have already purchased tickets it has been decided to make this entertainment an Irish Concert. To do this many of the leading artistes of Edmonton have been engaged to come to Tofield for this night.

While regretting that it was unavoidable that this change is made, the committee in charge feel assured that the entertainment given by these talented artistes, will be even more acceptable to the public , and more in keeping with the St. Patrick's day celebration. If, however, any of those who have already purchased tickets, for the play wish to return their tickets, the money will be cheerfully refunded to them by the committe in charge. The following is a brief synopsis of the program for the night:—

Miss Olive Brosseau, vocalist and violinist. Miss Brosseau is well and favorably known in musical circles in Edmonton, and it will be a real treat to hear this talented young lady, as it is only on rare occasions that she journeys outside the city on the concert stage.

Miss Eileen Fogarty, well known Edmonton vocalist.

Miss Jordan, demonstration of Irish Jigs.

Miss Margaret Albright, vocalist, "Killarney" and "Mother Machree".

Sketch entitled, "Nonsense School".

Miss Kathleen Prauss, pianoforte solo and accompanist for the evening.

Mr. P. O. Hunter, Irish Comedy.

Mr. T. Irvine, St. Patrick's Day discourse on "The Day We Celebrate."

The Plow of Progress In The Field Of Enterprise

THE STRONG STEADY PULL OF TINKER, TAILOR, SOLDIER, SAILOR, RICH MAN, POOR MAN, BEGGARMAN, CHIEF. EACH PULLING BY HIMSELF ON HIS OWN WHIFFLETREE AND ALL TOGETHER PULLING TRUE ON THE KING PIN OF COMMUNITY SPIRIT WILL MAKE EVEN STONY GROUND ARABLE, WHILE TO A POTENTIAL FERTILE FIELD, IT WILL BE AS A TOUCH OF A MAGICIANS WAND. OIL THE PLOW WITH HARD WORK AND FERTILIZE THE FIELD WITH COMMON SENSE AND ERE WHILE THE SUNSHINE AND RAIN OF CAUSE AND EFFECT BEATS UPON IT, THERE WILL RISE UP A CROP COMMEASURATE WITH ALL HOPES AND EXPECTATIONS.

The Tofield Mercury

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIA-[illegible]

POOR BLOOD

The blood is an important constituent of the body. About one-twentieth of the body-weight is blood. The blood serves to bring to the tissues oxygen from the lungs and food from the digestive tract. It carries away their waste products from the tissues to the organs of elimination. The internal secretions from the ductless glands are circulated in the blood.

It is evident that the proper nutrition of the body and the removal of wastes depend upon the blood's doing its part in these two important functions.

The blood is subject to certain diseases, but we are not considering actual diseases of the blood, such as anaemias, but rather that condition which many people speak of as "bad blood" or "poor blood". This is heard of often in the spring when people say that their blood is in bad condition.

When such persons are questioned it is generally found that they are feeling somewhat miserable, run-down or below par, and they blame their blood for their unfitness. If they have pimples, boils or other sores, they regard these as evidence of bad blood, and consider that this condition is nature's way of ridding the blood of impurities.

The mode of living of most of this group is a story of neglect of all those habits of life which must receive reasonable attention if health is to be maintained, physical fitness assured and freedom from the ill-effects of neglect of the needs of the body avoided.

The reason why the complaint regarding bad blood is more frequent in the spring, and for the foundation of the popular idea that spring tonics are required is because, during the winter, many people live an unhealthy life. If, during that season, exercise, fresh air, bathing and such matters are neglected, and particularly, if the person continues to eat as much as when he is working hard, then the body suffers.

The condition of unfitness is not due to the blood's being poor or bad but because the whole body suffers from a lack of care. This can be prevented by a proper moderate diet, by fresh air, exercise, body cleanliness and care as to elimination. Spring tonics are not required. It is not through medicines that we keep our bodies healthy; it is through a proper manner of living. The way to "purify the blood" is to attend to the body, to eat properly and eliminate regularly.

CEREAL RUSTS — DIFFERENT KINDS

(Experimental farms note)

The name "rust" is applied to a large number of similar diseases Thompson were the candidates. O. F. great many other kinds of plants. Mention will only be made of those attacking our common cereals

Black stem rust is known to everybody in the west. It attacks wheat, oats, barley and rye, forming brick-red powdery pustules on the stems (less commonly on the leaves) of the green plants. When the plants ripen, the pustules become black and usually have a ragged margin.

Orange leaf rust attacks wheat, and usually appears somewhat earlier than stem rust. It can generally be distinguished from this rust by its small, round, orange colored pustules which appear on the leaves and leaf sheaths but rarely on the stem proper. The pustules usually break through on the upper side of the leaf, while those of the stem rust may break through on both sides.

Yellow stripe rust occurs on wheat barley and rye, and affects both the stem and leaves. It has been fairly common along the Pacific coast and recently has become more or less general in Alberta, although it has only been found three or four times in Saskatchewan and never in Manitoba. It can be distinguished from the latter by the orange color of its pustules. Local epidemics of this rust usually centre around buckthorn hedges which aid in its propagation.

In addition to these rusts, there are the dwarf leaf rust of barley, which occurs on barley only rarely in Western Canada, producing small round, reddish pustules; and the brown leaf rust of rye, with round brownish pustules, which is fairly common on rye.

MOISTURE CONSERVED BY THE SUMMER-FALLOW

(Experimental farms note)

It will probably surprise most grain farmers to learn that only from one-fifth to one-third of the total annual precipitation can be conserved in well-prepared summer-fallow. These amounts have been obtained in a series of soil moisture experiments made at the Dominion Experimental Station, Swift Current, Saskatchewan. Although only a relatively small proportion of the annual precipitation is conserved in the summer-fallow, the importance of this reserve moisture is too well known to require emphasis here.

The storage of moisture in land to be summer-fallowed may begin as soon as the previous crop has been removed. As a rule only comparatively light rainfalls occur during the fall months. Occasionally, however, after-harvest rains are of such proportions as to make an appreciable addition to the soil's moisture reserve.

Winter precipitation, that is snowfall, strange to say, has not figured very prominently as a source of soil moisture. In six years' observations no appreciable increase in soil moisture has taken place in the soil which could not be traced to late fall or early spring rains.

The greater proportion of the moisture stored in fallow land comes from the seasonal rainfall. In the period from May to October inclusive, from one-fourth to two-fifths of the total rainfall has been conserved. The lesser amounts, unfortunately, have been conserved during seasons of relatively low rainfall.

These results, it should be mentioned, refer to summer-fallow in which the soil is maintained in the best possible condition to absorb and retain moisture. As soon as weed growth becomes established in such soil, the proportion of moisture conserved is lessened and may be wiped out entirely.

Experiments have indicated that with the same amount of rainfall wheat yields from land previously summer fallowed correspond very closely to the amount of moisture available in the summer-fallow. This fact is brought out in the bulletin "Soil Moisture and Crop Production", now in preparation. A copy of this bulletin can be secured, when it has been published, by writing to the Publications Branch, Department of Agriculture, Ottawa.

DISPLAY OF STUDENTS WORK AND CLOSING EXERCISES AT THE OLDS SCHOOL OF AGRICULTURE

The School of Agriculture at Olds has arranged to have the display of students work on the afternoon of Saturday, March 22. The closing exercises will be on Friday, March 28. Articles that have been made by students during the fall and winter months are assembled and put on display for a period of one half day. The idea of the display is to provide an opportunity for the students and visitors to view the work that has been accomplished in the practical exercises at the school.

The closing exercises at the school mark the conclusion of the five months school year in both the Agriculture and Domestic science two year courses. The diplomas are presented to the second year students who are successful in their year's work, prizes and scholarships are awarded, addresses by leading public men are delivered and a musical program is interspersed between the various parts of the program.

Both the display and closing exercises are open to the public of the province. The occasions provide very interesting and instructive entertainments and are well worth attending.

DON'T BE A GOOSE

A teacher asked her class to write an essay on geese. This paper was turned in by an eight year old miss:

"Geese is a low, heavy set bird which is most meat and feathers. His head sits on one end and he sits on the other. He ain't got no between his toes and he's got a balloon in his stummick to keep him from sinking. Some geese when they gets big have curls on their tails and is called ganders. Ganders don't have to sit and hatch but just eat and loaf and go in swimming. If I was a goose I'd rather be a gander."—Pathfinder Mag.

GOOD MEMORY

A professor attempted to teach a class of little boys to memorize, "Be not afraid, it is I".

Professor (following day)—Sam, what was the quotation I taught you yesterday?

Sam (after thinking)—Don't get skeered, t'ain't nobody but me.

ENTIRE WORLD MOURNS PASSING WILLIAM HOWARD TAFT; FAILS TO RALLY FROM SEVERE ATTACK

William Howard Taft, former president and former chief justice of the United States passed peacefully from life late Saturday afternoon wrapped in merciful unconsciousness after weeks of illness. A stroke from hardening of the arteries preceded death by half an hour. He was in his 73 year.

The resting of his body in state at the capital and other honors befitting the exalted place he won for himself in the hearts of his country men will be accorded and the remains, at his own request, will rest in Arlington cemetery, the resting place of the nation's heroic dead.

President Hoover was foremost among the many who went sorrowfully last night to the residence on Wyoming avenue where the only man in history to hold America's two highest offices, slept in death. The president announced a thirty-day period of official mourning.

At the point of death for many days, suffering hopelessly from a combination of ailments, Mr. Taft had surprised his physicians by the vitality of his last hours. But at 4:45 Saturday afternoon a sudden stroke, while he was alone, except for his nurse, heralded the end.

Fifteen minutes later Dr. H. G. Fuller reached the bedside, but turned away with a shake of his head. Mrs. Taft summoned from another room, took up her station near at hand for the last vigil. At 5:15 o'clock death snuffed out at last, the flickering flame.

Death Came Swiftly

The only daughter, Mrs. Helen Taft Manning, was away for a short automobile ride when death occurred. The two sons, Robert and Charles, both of Cincinnati, had left Washington after spending several days at their father's side.

The official bulletin issued by Mr. Taft's chief physician said:

"The former chief justice died at 5:15 p. m. A sudden change in his condition occured at 4:45 p. m. from which he failed to rally."

Immediately the news was telephoned to the White House, President Hoover tendered to Mrs Taft the entire facilities of the executive mansion.

Until 9 o'clock Tuesday morning, the body will remain at the home on Wyoming avenue where Mr. Taft died. It will be taken to the capital to lie in the rotunda for three hours before the funeral services at All Souls Unitarian church at 2 p. m.

The department of the Interior has issued a new edition of a land map which shows at a glance the total number of quarter sections of Crown land still available in each township. The map also indicates Dominion Land Offices, existing railway facilities in each district and provides the customary information regarding cities, towns and villages.

A copy of this map together with other material of interest to the prospective settler may be obtained free of charge on application to the Natural Resources Intelligence Service of the Department of the Interior at Ottawa.

RED CROSS AT THE PORTS

Red Cross lecturers have many tales to tell of their audiences at various towns and villages in Alberta. Very often it may be a story of war days when the Greatest Mother had thousands of sick soldiers in her hospitals overseas. Occasionally it is a story of more recent events such as the following, which was told to the writer at a lecture in the north.

A woman whose accent proclaimed her from the Old Country commented on the fact that her first experience of Canada was of her reception by the Red Cross at the Port.

"We landed at Halifax", she said, and everyone was feeling strange and lonesome and homesick. We and our big family had been sick the whole way over, you know what that means, with a half a dozen children. Food was distasteful, and the ships tea far from our usual cup at home. I shall never forget the surprise I had on seeing the Red Cross Nurses waiting for us. They took us into a large room with tea kettles singing on the stove and soon I was resting in an armchair with a steaming hot cup of the best tea I had ever had, I'll never forget how good it tasted. The children were also given refreshments and the baby put to bed in a little cot. It all seemed so wonderfully kind that we were quite cheered up and felt a warm welcome. That is why I like the Red Cross in Canada, they are good to strangers, and not only welcome you at the ports, but take a real interest in you when the children are sick".

This mother's testimony can be multiplied many times. It is a little human story of the quiet unostentatious work that the Red Cross is doing to-day.

VARIETY THEATRE

Saturday, March 15th

"WIN THAT GIRL"

Starring Fox's two funniest comedians
DAVID ROLLINS AND SUE CAROL
Most girls find it hard to keep one man amused but Sue Carol can keep a whole flock of beaus on the jump all the time.

Saturday is your last chance to get in on the big prizes. On Saturday March 22 we will have the draw during the showing of Simba, one of the most educational pictures which has been released for several years. Bring your duplicate tickets with you and you may take home a ham or a sack of flour.

"SIMBA —SATURDAY, MARCH 22ND

AMISK CREEK

The Ladies' Aid meeting held at Mrs. E. A. Moene on Wednesday of last week was very well attended Most of the members and many visitors from the surrounding district were present, about 70 persons in all.

Conrad Patterson assisted at the Tofield Garage for a few days last week.

Miss Ruby Berg who is attending school at the Lutheran College in Camrose spent the week end at the parental home.

Mrs. E. A. Moen, Mrs. I. H. and Mrs. I C. Olsen attended the Ladies' Aid meeting held in Ryley last Thursday.

KETCHAMOOT

The monthly meeting of the M. A. S. was held at the home of Mrs. W. Lee. A large number of members and visitors were present and a very pleasant afternoon was spent by all. A delicious lunch was served by Mrs. Lee assisted by Mrs. J Lee and Mrs. Roy Lee. The April meeting will be held at the home of Mrs. Henderson and all are cordially invited to come. Remember the date April 2nd.

Mr. A. Schultz and Mr. J. Ingram returned home from Edmonton last week.

Mrs. G. W. Sears returned home Saturday from Victoria where she has been visiting for two months.

Mr. and Mrs. Carlisle entertained the young people of this district at their home Sunday evening. A most enjoyable time was had by all present.

We are sorry to report that Mrs. Frank Ray is very ill in the Edmonton hospital and the many friends of Mrs. Ray wish her a speedy recovery.

There will be a social held at the home of Mrs. C. W. Whillans Friday March 21, under the auspices of the M.A.S. and a hearty invitation is extended to all. It is to be an old-fashion social so everyone come dressed as old fashioned as possible. Remember there will be four prizes given out, one for the best dressed young lady and young man and one also to the older people. Keep the evening of the 21 clear.

A number of people from here attended the annual U. F. A whist drive Tuesday evening

A number of people from this district attended the dance at Woodlawn Friday evening and all reported a good time.

We are sorry to report the death of Mr Owens at Bellingham, Washington. He will be remembered as an old timer years ago. He leaves three sons, Ray and Roy Owen, of Bellingham and Guy Owen of Vilna

Annual Meeting Of Women's Missionary Society

The annual meeting of the Wainwright Presbyterial, United Church of Canada, Women's Missionary Society, was held at Tofield March 12th

The following delegates were present.

Mrs. Thorsley, Mrs. Fobes, Mrs. Hay, Mrs. McVittie,—Ryley.

Mrs. MacPherson, Mrs. Shaw,—Holden.

Mrs. Osterhout, Mrs. Reeds,—Irma.

Mrs. Stouffer,—Jarrow.

Mrs. Whitmore.—Wainwright.

The morning session opened with Mrs. Thorsley, president, in the chair.

The devotional exercises were taken by the Irma auxiliary.

An address was given by Mrs. G. Cookson, responded by Mrs. MacPherson, of Holden.

The president of each auxiliary gave short talks on their work, followed by a general discussion.

Mrs. McArthur from Central United Church, Edmonton closed this session with prayer.

The Tofield auxiliary had charge of the devotional exercises at the afternoon session.

This was followed by the following reports:

Recording and corresponding secretary, Mrs. Osterhout, Irma. Treasurer. Mrs. MacPherson, Holden. Literature secretary, Mrs. Shaw, Irma. Secret... ...ance, Mrs. Geo. Cookson, Tofield. Secretary of Mission and Baby Bands, Mrs. Reeds, Irma as substitute for Mrs. Elford. Supply secretary, Mrs. Hay, Ryley. Stranger's secretary, Mrs. Stouffer, Jarrow. Missionary Monthly secretary and Press secretary, as these secretaries were not present, their reports were read by Mrs. Thorsley.

Mrs. Whitmore, of Wainwright gave a paper on India, telling of the wonderful work carried on in the hospitals and schools there.

Mrs. Brink, of Tofield gave a delightful solo, "The Beautiful Garden of Prayer", accompanied by Mrs. Rowe.

A very interesting paper on Home Missions was given by Mrs. Fobes of Ryley, she gave a brief account of the work carried on in each of the eight departments.

Gleanings from the Dominion Board meeting in Toronto were given by Mrs. McArthur. She stressed the need of prayer and emphasized the fact that Christ, left the work of spreading his message to women.

A cordial invitation was extended to the Presbyterial, to meet in Irma in 1931.

The following officers were elected for 1930.

President, Mrs. Thorsley, Ryley.

1st vice president, Mrs. Locke, Irma.

2nd vice president, Mrs. Reeds, Irma.

Recording and corresponding secretary, Mrs. Osterhout, Irma.

Literature secretary, Mrs. Shaw, Irma.

Treasurer, Mrs. MacPherson, Holden.

Secretary finance, Mrs. Geo Cookson, Tofield.

Secretary affiliated C. G. I. T., Mrs. Firth, Tofield.

Mission and Baby Bands, Mrs. Boyd, Holden.

Associate Helpers secretary, Mrs. Hackett, Wainwright.

Supply secretary, Mrs. Hay, Ryley. Stranger's secretary, Mrs. Stouffer, Jarrow.

Missionary Monthly secretary, Mrs. Lane, Wainwright.

Press secretary, Mrs. Coursier, Wainwright.

Temperance secretary, Mrs. Swift, Tofield.

The installation of prayer was given by Miss McLean, returned missionary from Japan.

After a supper served by the members of the Tofield auxiliary the evening session opened with devotional exercises, conducted by Mrs. MacPherson and Mrs. Whitmore.

Rev. Gordon of Tofield extended greetings to the Presbyterial from the Presbytery.

This was followed by songs by the C. G. I. T. groups and a missionary sketch by some of the Sunday School children.

Solos were given by Mrs. Rowe and Mrs. Brink which were very much enjoyed.

Kingman News

Mrs. E. Gross visited with Mrs. E. Erickson for a couple of days last week.

Erwin and Clifford Pederson spent the week end in Camrose with their aunt, Mrs. A. Anderson.

Mrs. E. Erickson and Miss Inga Johnson were Camrose visitors on Friday.

Oval Ovelson spent the week-end at his home here.

Mr. and Mrs. Thor Gruhn and family visited with Mr. and Mrs. E. Erickson on Saturday evening

Mr and Mrs. W. Jardie visited with Mr. and Mrs. D. M. Thompson on Sunday afternoon.

Mr. and Mrs. Jack Erickson and Connie were the guests of Mr. and Mrs. E. Erickson on Sunday.

Mr. A. Asp and children visited relatives in Daysland over the week-end.

Mr. and Mrs. Thor Gruhn and family motored to Hay Lakes on Sunday.

Mr. and Mrs. Axel Nordhuse and Mr. and Mrs. Selmer Johnson and family, of Bardo visited with Mr. and Mrs. Andrew Johnson on Sunday.

COMMUNICATION

To the chairman and Members of the Board of Trustees, Woodlawn, School District

Gentlemen:

It has been commonly felt that our young teachers enter on their first work without sufficient knowledge of the problems peculiar to the one-room rural school, where they almost invariably begin. An effort has been made in recent years to supplement the work of our Normal Schools, by providing, for each student-in-training, some practice and experience in dealing with this type of school

The inspector has recommended your school as being one in which the best in teaching, organization, and management is being exemplified, and it is now proposed to send one of the students to your school for observation and practice work, either during the week commencing Monday April 14th, or the week commencing Monday, April 28th.

The arrangements are being largely through the inspector, the Normal School Staff, and the teacher. While it will not be necessary therefore, for your board to take any direct action in the matter, I am anxious that the trustees should understand the situation in order that we may have their sympathetic support in making the experiment a success.

Thanking the members in anticipation of their co-operation in the effort to better equip our teachers for the rural school.

I am

Yours truly,

Perrin Baker,

Minister of Education

NOTICE

NOTICE is hereby given that the assessment roll of the Town of Tofield for the year 1930 has been prepared and is now open for inspection at the office of the secretary-treasurer of the town from ten o'clock in the forenoon until four o'clock in the afternoon on every day which is not a public holiday, except Saturday, and on that day from ten o'clock in the forenoon until two o'clock in the afternoon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll or to the assessment of any property or to the assessed value of any property, must within thirty days after the date of this notice lodge a complaint in writing with the secretary-treasurer of the town.

Dated at Tofield this 19th day of March, 1930.

J. W. Chapman,

Secretary-Treasurer

Miss McLean gave an inspiring address on the work being carried on in Japan and stressed the need of influence of the children which often dergarten teachers. For it is this in brings the parents to Christianity.

Session closed with prayer by Rev. Gordon.

Local and Personal

The junior C. G. I. T. held a very successful tea on Saturday last in the W. I. rooms. The room presented a spic and span appearance having been recently cleaned and re-decorated. Chintz curtains, new rugs, tables and chairs freshly varnished, added to the charm of those attending. The girls desire to thank all those who helped to make the event a success.

On Friday last a fire of small dimensions occurred at Mr Imber's garage. The alarm was rung but before the equipment could be used the fire was extinguished by Mr Imber and Mr H Hicks.

Mrs. Plum and two children of Artland, Sask. are visiting at the McCarthy home.

HOLY TRINITY

11:30 Children's Service

7:30 p. m. Evensong

T. W. Tusp, minister

Born—To Mr. and Mrs. William Herbert, on Saturday, March 15th, a daughter.

Born—To Mr. and Mrs. W. H Boettiger, on March 17th, a son.

A surprise party was sprung on Miss Gertrude Boulrets on Friday of last week, it being her birthday. The evening was spent with music, cards and dancing and of course the usual good things to eat. The party broke up shortly after midnight all having had an enjoyable time.

Mrs. Glover, very unfortunately fractured her ankle on Monday of last week. Her many friends hope her a speedy recovery.

Mr. O'Hara spent the week end in the city.

On Friday last a rink from the Tofield Curling Club journeyed to Ryley to play for the North Western Utilities Cup, which Ryley won a few days previous. Tofield won the cup without any difficulty and by a very lopsided score. The personnel of the local rink were: J. W. Chapman, A. B. Clutterham, Dr. Morrison and W. Chapman, skip.

The Anglican W. A. will hold a silver tea and sale of home cooking in the W. I. Rooms on Saturday, March 22nd.

SPRING MILLINERY OPENING AT "THE ALYCE SHOPPE" Saturday, March 22nd.

There will be on display a large assortment of the very latest creations in Easter Millinery, for your approval.

Mrs. J. B. Hyslop

NOT ONE DULL MOMENT IN GREAT JUNGLE FILM

"Simba" the motion picture record made by Mr. and Mrs. Martin Johnson, the famous explorer, during four years in the jungles of Africa, is at the Variety this week and is one of the most exciting and thrilling films ever seen in this theatre. It holds not one dull moment from the time the Johnson's lead the outfit for their long trek into the jungles up to the startling climax when half-naked natives, armed only with slender spears, surround and kill full grown lions.

Marching across the screen come antelopes, giraffes, zebras, rhinos, hippopotamuses, herds of elephants, leopards—all the denizens of the jungle, just as they are at home. And they are photographed with a clarity and against such wildly beautiful backgrounds that the value of the film is wonderfully enhanced.

Among the outstanding features of the picture are the charge of the infuriated rhino straight at Osa Johnson, who is forced to shoot him to save her own life; the stampede of a herd of elephants, seeking safety from a jungle fire the swarms of ugly crocodiles infesting the rivers that the party was forced to cross; the gorgeous shots of running giraffes, of speeding antelopes and zebras; perfectly marvelous flashlight photos of lions and leopards; and above all, the scene which shows fourteen lions, playing in a grassy glade like a lot of big cats.

Shoots Charging Lion

One sees Osa Johnson shoot a charging lion that falls within twenty feet of her. This young woman, who evidently has no fear, calmly stalks some of the most dangerous animals to get them into places where her husband can photograph them.

But really the great kick is where "simba"—that is the native word for lion—makes himself a nuisance by killing off the herds of the natives and the blacks, with only their spears turn the robber into a pincushion dodging his charges and hurling their spears until he falls dead.

"Simba" is a picture that should not be missed. It has thrills that are real, not of the Hollywood variety and, more than that, it is a picture the like of which will not be seen for years and perhaps never again.

Letter Of Apology

To Our Friends.

It is with the deepest feeling of regret that the Irish Concert turned out to be such a disappointment. The players started in four cars, and on account of the recent thaw were into and out of the ditch many times. One carload did not get through at all, but turned back when they could not get through the mud. The remaining cars struggled on through into and out of the ditch and in mud up to their knees. As there were so few men in the party, the girls had to get out and push the cars out of the ditch. They were covered in mud on their arrival. One car failed altogether and those walked in, following the Railway track. It was on this account that the car sent from Tofield to help them missed them. The last four miles were made on foot. Some of the girls lost the heels off their shoes and all had their feet rubbed raw with the mud and cinders. One girl walked in her stockingfeet until she played out when two of the men carried her the rest of the way. Two of the players arrived about 9, and tried to carry on until the rest arrived but they had not brought sufficient music for such an emergency.

As the others arrived they were taken up to Mrs. Schmalz house to clean up and change as they were all in a pitiful condition. The girls, however, were too sick and absolutely played out to give their performance, though they gamely tried to carry on. The entertainment was therefore forced to be brought to a close. We regret very much that our many friends were so disappointed and we offer our sincerest apologies for the inconvenience and disappointment caused them.

ALBERTA TEACHERS' PENSIONS ARE SET BACK ANOTHER YEAR PROPOSED PLAN HELD UNSOUND

Government Contribution of $140,000 Not Forthcoming

BROWNLEE STATEMENT

When Sound Scheme Found, Government Will Support Plan

The teachers of Alberta will have to wait a little while longer yet, before the government agrees to contribute $130,000 to 140,000 a year to their pension scheme, to which the teachers themselves would contribute three per cent of their salaries, for pensions ranging from a minimum of $480 per year to a maximum of $1,500.

This became definitely known in the Alberta legislature Monday afternoon, when the government supported by the conservative opposition, voted down by 11 to 35, a motion of Hector Lang, Liberal, Medicine Hat, reading as follows.

"Resolved that the matter of the superannuation of the teachers of the province be immediately referred to a committee of the house with a view of surveying the whole field and drafting a scheme for consideration during the 1931 session of the legislature.

Teachers' pensions, Premier J. E. Brownlee admitted, were a good thing, but if actually sound they cost money, and the schemes in vogue in various provinces today were not actuarially sound.

When the province did find a sound scheme; when it knew what that scheme would cost the government, and when the province could afford that cost, the house would know of it, Mr. Brownlee added. Hon. Perren Baker also opposed the resolution, as also did Conservative leader D. M. Duggan, who, however, felt that the teachers had not had too good a deal, and that the question should be dealt with by the government.

Hockey

VIKING SENIORS PLAY AT TOFIELD ON FRIDAY LAST

For the first time in many years, the Viking senior team journeyed to Tofield and played on local ice.

The game opened up at an exceptionally fast pace, the visitors relying on speed to put them one or two up. The locals were playing careful hockey but long shooting netted Viking two goals in the first half of the period.

The locals speeded up and in the second half of the period and before the bell rang for time had beaten the visiting goalie twice, tieing up the the count. Lee scored first from left wing followed by Biglow.

The second and third periods proved that the fast pace of the first had told upon the visitors. Only sensational goal keeping by their net minder prevented a heavy score being run up against them. He stopped them all ways, hands, feet, legs and body. However, in these two periods, the locals scored three, one by Biglow and two by S. Worton, making the final score 5-2.

The game was fast at all times and the locals were kept on their toes to turn a win. Owing to injury Bowick was not playing, Whyte from the forward line taking his place. Howard Lee took Whyte's place on left wing and proved a very effective player. It is a long time since Howard has played for Tofield and the fans were very pleased to see him in action. He has developed into a fast clean, effective player and could hold a position in real good company.

OLD TIME SENIORS PLAY YOUNG BLOODS

On Tuesday the hockey tid-bit of the year was served up to a small number of spectators, when the old time seniors met the young bloods.

...some time and the old timers were "rarin to go." It was a much better game than was expected, in fact, many claim it the best on local ice this winter. Both teams were desperately anxious to win and the finish was close enough for the most ardent fan and played amid as much noise as a small number of fans could make.

The weather was decidely freakish. In the morning and at noon it was quite warm 40 above. About three o'clock it suddenly changed to cold and when the game was played it was zero. Therefore instead of a slushy surface as was expected the ice was fairly hard. This was easier on the old timers and they stood the pace quite well. There were four 15 minute periods packed full of action. The young bloods opened up the scoring by putting one past Calvert. They followed this up with another and things appeared rosy for them until the old timers had evened up the count. Then the game became one of determined action. Howard Lee, who was the big gun of the old timers worked like a trojan and turned in an excellent game. He played clean, aggressive hockey throughout and went the full sixty minutes. Bud Hasman was good in spurts, Roy Lee and Bissett made a stone wall defence, while Pat Gladue went, for a time with all his old time fervor. The other players, Imler Lerbekmo, Leach and Stan Yakabuski were hitting on all six. Calvert made an excellent goalie. He had a little advantage, not being on skates, but deserves credit for the showing he made.

The young bloods were all playing good hockey, but their two goal lead gave them too much confidence and they crowded in too much, and when Lee did break away he had only the defence to go by. After the game was a 2 2 tie, the young bloods went into the lead to make the score 3 2 and then 4 2. Snapping back into action the old timers made it 4-3 only to have the young bloods make it 5 3. Three goals in a row then put the old timers in the lead making it 6 5 the third period ending this way. In the fourth and final period the old timers played a heavy defence and the young bloods forced the issue. With less than five minutes to go the score was evened and with less than two minutes to go Glover went down the left boards and shooting from just outside the defence scored, this proving to be the winning goal in a hotly contested battle.

A. B. Clutterham ably refereed.

Scores Old Timers, H. Lee three, Bud Hasman three.

Young Bloods: Les Glover two, W. Worton three, S. Worton one.

Penalties none.

Line up Old Timers—goal, Calvert, defence, R. Lee, Bissett; forwards, Gladue, H. Lee, Hasman, Imler, Leach, Yakabuski, Lerbekmo.

Young Bloods—goal, H. Bowick; defence Glover, Swinton; forwards, Whyte, W. Worton, S. Worton, Biglow, Thompson, Martin.

Lamont Dramatic Club To Bring Play Here

The Lamont Dramatic Club, by arrangement with the Tofield Young People's Society will present a three act farce here on Thursday night, March 27th. This play received a wonderfully good reception at Lamont and those attending are assured of an evening of enjoyable entertainment. The admission charges too have been kept down so as to allow all to attend.

The plot hinges around two young married men who want a little freedom for a time. They conspire with a soldier friend to deceive their wives into thinking they have joined up and going to the front. However the wives discover the plot and introduces some little surprises of their own. Many surprising situations develop when the truants return.

IRISH CONCERT ARTISTES HAVE THRILLING TRIP TO TOFIELD

Unfortunately, the Irish Concert presented at the Variety on Monday night was not as it was intended to be. By arrangement with friends in Edmonton, the local catholics were fully expecting to present a concert of high order but owing to the non-arrival of some of the artistes, and the late arrival of others, footsore and weary, the program given was not nearly so good as planned.

Elsewhere appears a letter explaining the circumstances and difficulties over which those appearing had to overcome.

The program opened with a pianoforte solo by Miss Prause which was encored. Miss Fogarty then gave two solos the first of which was "An Old Fashioned Town". Both solos were heartily applauded. Mr. Pat O'Hunter then gave two humorous numbers which greatly pleased the audience, these being followed by "Mother Machree" by Miss Allright.

Mr. Irvine then gave an address on St. Patricks day. Miss Allright then sang "Down the Vale," being followed by Pat O'Hunter with some more humorous numbers. The feature of the evening was Miss Brosseau's violin solo, this was much enjoyed and heartily encored. Some more Irish numbers by Mr. Pat O'Hunter brought the concert to a close.

The artists appeared under very trying conditions, but even so the applause for all numbers was hearty

Mr. Schmalz was chairman for the evening and explained matters to the audience.

After the concert the artists were served with lunch at the home of Mrs Schmalz

NOTICE

On and after April 1st, all motor vehicles will have to be carrying two license number plates for the current year (1930). Any person found operating a car without this year's plates, after the above date, will be prosecuted. Don't forget your driver's license. You must have it with you when driving.

A. P. Police,

Tofield Dist.

A PAIR OF SPECTACLES

(Canadian National Railways Magazine)

NOT LONG ago a man was taking his young son through a picture gallery and on pointing out to the lad the features of a certain picture was surprised to discover that he had defective eyesight. So, he was taken to an oculist, fitted with a pair of glasses, and afterwards the boy said that he saw a new world. The picture and all other things that came within the lad's vision did not change. The change was in the lad himself. The glasses remedied the defect. The boy had become normal and, therefore, capable of appraising what he saw.

This opens up a large field for reflection. What we see depends upon our power of seeing. As we are so will the world be to us. I have often wondered what a blind man's idea of the world is. Perhaps an alteration of light and darkness only; for not having an idea of color he could not imagine blue, or purple or yellow or any other colors of the spectrum that delight the eye and satisfy the taste of the ordinary normal person. There are people, also, who are color blind; all colors appear the same to them. Some people are near-sighted, and distant objects are a blur, while there are far sighted people who cannot appreciate the things that are near; glasses usually rectify these defects.

The physical world is largely a matter of vision. Two men see the same thing, yet they don't see the same thing. There are utilarian glasses and ideal glasses. It is possible for two men to see a wood, the one appraises in terms of cordage, or feet of lumber, with an amount of coin of the realm attached; the other sees with the eye of the artist and the money never enters into the calculation. A traveller in Ireland recently encountered a peasant seated on a hill overlooking a marvellous sea view. In conversation, the traveller discovered that the peasant had once lived and could live more comfortably in a city. On being asked why he did not live in the city he pointed to the beautiful view and said, "You don't get that in the city." Again, it was the matter of sight—and insight. This plain man (as we call him) had something that his more fortunate (?) acquaintance entirely missed.

We see what we are prepared to see. Nor is it different in the world of commercial and social relationships. Listen to a number of men who follow the same pursuit, or have the same interest and it will be found that they wear the same kind of glasses. There are many and varied glasses, and each pair gives the wearer, as he thinks, a true view of the world. There are workers' glasses and employers' glasses, and in few of these is the color, or the focus the same.

In the realm of character the same thing holds true. There are those unfortunate ones who see the worst side of everything and everyone. They question every motive and are prepared to put an interrogation mark after every act of another. Such persons need glasses and a different world would be the result. One writer of long ago very sagely said, "travel round the world and you will never meet anyone but yourself in all your travels," which is another way of saying that we see what we are prepared to see. If one appears to us full of faults and flaws it might be only just in us to consider seriously whether fifty per cent. of the objectionable features are not in us who see. Life in some degree is a mirror, the face that looks out of the mirror is the face that looks into it, and the mentor and critic of his fellows would do well to take care before he blazons abroad his criticism. He to whom everyone is hypocrite is quite probaby a hypocrite himself. The censor of others is not necessarily a saint; were he such his humanity would make his strictures impossible.

Most of us require glasses, glasses of introspection by which we may take a good look at ourselves, glasses of kindliness, glasses of benevolence, and equiped with these what a different world would emerge! It is not meant that we should see the thief as if he were an honest man, or the liar as anything but a liar, nor should we relax our vigilance for breaches of decency and morals; but just as wise people have their glasses examined periodically, so should we test our outlook, in order to be certain not that the world is wrong but that we are right.

HEALTH SERVICE Of The CANADIAN MEDICAL ASSOCIATION

NEURITIS

The letters "itis" at the end of a word mean inflammation, and the term neuritis, when properly used, means inflamation of the nerves.

There are various types of nerves. One group carries sensations, another controls the movements of muscles, and others still control sweat glands, blood vessels and other organs. Most nerves are made up of bundles of nerve fibres, each of which is active in one of the various ways indicated, and so the whole nerve serves several purposes.

The symptoms resulting from the inflamation of a nerve depend upon the variety of nerve fibres contained in the nerve. If these are sensory nerves, there will be pain and tenderness, motor nerves affected mean weakened muscles, and so on.

Prolonged exposure of one part of teh body to cold, as occurs in sitting beside an open window in a motor or a car, may cause local neuritis. Prolonged pressure on a nerve, as when the arm is held in certain positions, injury from a blow, chronic pressure may set up neuritis of the nerves affected.

The nerves are part of the body. No one part of the body is independent of the rest and so the nervous tissue may be involved in disease of other parts of the body, particularly if it is a general disease. Neuritis is not uncommon in such a disease as diabetes.

Poisons, such as alcohol, lead and arsenic, are responsible for the occurrence of neuritis which affects the nerves all over the body. The poisons or toxins given off by disease germs act in the same manner, and so, not infrequently, neuritis is found occuring in cases of diphtheria and typhoid fever.

The many causes of neuritis, some of which have been mentioned, are referred to in order to make clear that when neuritis does occur, it is absolutely necessary to find the cause of the condition if proper treatment is to be prescribed. First of all, it must be proven to be neuritis. Every ache and pain is not neuritis. Treatment then depends upon the cause. The patient, quite naturally, wants relief from his pain and discomfort, but temporary relief is not going to deal properly with the condition, because as long as the cause remains, relapses will occur. The removal of the cause is, of course, the purpose of proper treatment.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto will be answered personally by letter.

THE LAMBING SEASON

(Experimental farms note)

Where ewes have been carefully fed and have had access to plenty of exercise during the winter months, there is generally little trouble experienced at the lambing season. At no other period during the year, is time so exacting upon the shepherd or the owner as at lambing. To a large extent, the success and profits depend upon the care and attention given the ewes at this season. A crop of healthy well-nourished lambs is a good assurance of successful financial returns, while a poor crop will invariably mean a loss.

At the Dominion Experimental Station, Morden, during the breeding season in the fall, small groups of pure bred Hampshires are bred at different times, and records kept as to number of ear tag and date bred. This simplifies the work at lambing time as ewes that are beginning to show can be placed in small pens and by observing the ear tag number and looking up date bred, the shepherd has a good idea when lambs may be expected.

LAMBING PENS These are made by placing two small gates each about four feet long and three feet high, fastened together by hinges, across one corner of the pen. Successive gates can be added as needed. The ewes are kept in these pens for a couple of days after lambing and in this way closer attention can be given ewe and lamb.

CARE AT LAMBING-Careful attention is paid the ewe that shows any delay in lambing and the shepherd is always close at hand for any emergency that may arise. If a lamb happens to be born in a weak condition, it is quite often necessary to give some stimulant such as a small dose of brandy, and hand feed the lamb by means of a bottle a few times until it gains sufficient strength to look after itself, when the ewe and lamb may be returned with the rest of the lamb crop.

In the case of single lambs, where the ewe is only suckling one lamb, it is quite often necessary to hand-milk the ewe for a while so as not to allow the milk to remain in the udder and cause udder trouble.

Where triplets are born to one ewe, and a single to another ewe, around the same time, one of the triplets is transferred to the ewe nursing a single and by careful manipulation such as watching the ewe while the strange lamb is feeding for a few days, the ewe will in most cases take to the two lambs as her own. Sometimes it is necessary to tie the ewe up to avoid butting the strange lamb.

Good succulent feed with a reasonable amount of grain should be fed to ewes for period prior to lambing and especially while nursing lambs in order to supply an abundance of milk for the lambs, and to keep them coming along so that they can utilize early pastures.

Docking and castration is performed at from 10 to 14 days of age, depending on the vigour of the lamb. A number of the best males are left and castration delayed until the lambs are at least four weeks old. At this age it is less difficult to weed out the weak types, while those that show promise are developed to be later sold throughout the district as farm flock sires.

WANT HIGHWAY FROM CLYDE TO SMITH

A joint meeting of the Boards of Trade of Westlock, Pibroch, Dapp, Jarvie and Fawcett and some of the U. F. A. locals of the districts concerned was held in the Community hall at Pibroch on Tuesday for the purpose of urging on the Provincial Government the desirability of constructing a highway from Clyde to Smith passing through the villages along the Northern Alberta Railway. There was a large representative attendance and great interest and support was manifested. The advantages of opening up the country to the north and — affording a good outlet to settlers, besides shortening the route to the Peace River District were emphasized. A resolution was unanimously passed urging the government to immediately commence the construction of a main highway, and delegation was appointed to take up the matter with the Government. M. G. H. Gardam, of Westlock, was appointed chairman, with C. Antonsen, Pibroch, secretary, and petitions in support of the application can be obtained from either. Copies are being forwarded to the post-offices and the secretaries of organizations in the district. It is hoped that all residents of the district will make a point of signing the petition at an early date.

FOR SALE BY OWNER 160 ACRES S. E. Section 7, Tp. 60, Rge. 3, Mer. 5 Price $36.00. Apply to Mrs. F. H. Kincaid, 1075. Woodward Avenue, Portland Oregon.

EDMONTON GETS NEW SEAT; FOUR OTHERS CREATED

Redistribution Committee's Report is Along Lines Forecast

Confirming previous rumors that the new redistribution recommendations would set up five new seats—Edmonton, Calgary, North Peace River, Clover Bar and Drumheller, and would consolidate four southern constituencies into two new ones making a net gain of three seats, the report of the special committee was tabled in the provincial legislature on Monday by the Chairman, W. G. Farquharson, U. F. A., Gibbons.

There will be 63 seats in the legislature at the next general provincial election in consequence, instead of 60, if the house adopts the report—and this is considered as a certainty.

The four southern seats to be merged are Okotoks and High River, and Nanton and Claresholm, respectively.

Okotoks is represented at present by Hon. George Hoadley, minister of agriculture and public health; High River is the present seat of Sam Brown, Farmer member. The merged constituency will be known as Okotoks-High River.

Nanton-Claresholm

Nanton has D. H. Galbraith as its present sitting member, while G. B. Walker represents Claresholm, both of them being farmer members. The new constituency will be known as Nanton-Claresholm.

The North-Peace River riding takes in all the northern part of the province north of the Peace, and takes in portions of the present Grouard and Athabaska ridings in addition.

The new constituency of Clover Bar has been carved from parts of the present Victoria, Camrose, Leduc and Edmonton ridings. It takes in towns along the G. T. P. to Lindbrook, this side of Tofield, and the C. P. R. line to Dinant, this side of Camrose; other towns included are Fort Saskatchewan, Scotford and Lamont while such districts as Elk Island Park, Ministik and Hay Lakes, will be included in the new constituency.

New Drumheller Riding

The new constituency of Drumheller, which will cover some four townships including the city of Drumheller, takes its territory from Handhills and Bow Valley ridings, with a small corner out of Didsbury.

The aim of the committee, stated Chairman Farquharson, has been a three-fold one—to gather together into each riding, those people bound by community interest, which still observing as closely as possible, the matter of equalizing population in each rural riding, having consideration at the same time, to the limits imposed by geographical matters such as hills, rivers, lakes, etc., and such economic boundaries as railway lines, municipalities, etc.

Here and There

[illegible] with his niece, Miss [illegible] MacKenzie, who is to be married in London next month. Hon. Henry R. Randolph [illegible] Lieutenant Governor of [illegible] attended the official opening of the New Brunswick provincial legislature. In his trip by [illegible] across the Dominion Mr. Bruce called on every Lieutenant Governor in Canada.

Captain A. J. Hosken, R.N.R., skipper of Canadian Pacific liner Empress of Russia, was recently a winner for the second time in succession of the E. W. Beatty shield for safety and efficiency. The shield was donated in 1926 by the chairman and president of the railway for competition among company ships of the Pacific fleet.

First week in March witnessed the addition of Alberta and Saskatchewan to the Canadian Pacific Railway's broadcasting chain which now covers Montreal, Toronto, Winnipeg, Fleming, for Saskatchewan and Calgary for Alberta. Slogan of the broadcast is "Cheerful and Good," and sea chanteys and songs from ballad operas together with high class orchestral pieces are put on the air every Friday night between 10 and 11 Eastern time.

In Ottawa electricity for domestic use is cheaper than anywhere else on the continent, if not in the world, according to authorities on the subject. It is sold at a rate that averages less than one cent per kilowatt-hour which means that the average bill for electric light incurred by citizens of the Canadian Capital is about $1 per month.

At the World's Poultry Congress to be held at the Crystal Palace, London, England, next July, Canada will be a conspicuous participant. The Canadian exhibit of live birds will total about 1,000. The last World's Congress was held in Ottawa in 1927.

One of the largest real estate transactions of modern times will be put through at the present session of the Canadian Federal Parliament, when legislation will be [illegible] the Government to hand over millions of acres of land, a substantial amount of water power, vast forest wealth and other natural resources to the provinces of Manitoba, Alberta and British Columbia.

The music, songs and dances of Latin, Celt, Scandinavian, Slav, Teuton and British will all be represented for Canadians this month when on March 19-22, the third Great West Canadian Folk Dance, Folk Song and Handicrafts Festival will be held under the auspices of the Canadian Pacific Railway at the Palliser Hotel, in Calgary.

Unusually heavy pre-Lenten weddings were indicated this month from the Windsor street station, Montreal when 25 blushing honeymooners left that city for Ottawa, Quebec and New York on one morning. Station officials say that this is very heavy for the time of year and comes close to the number leaving the station on mornings of the special month of June.

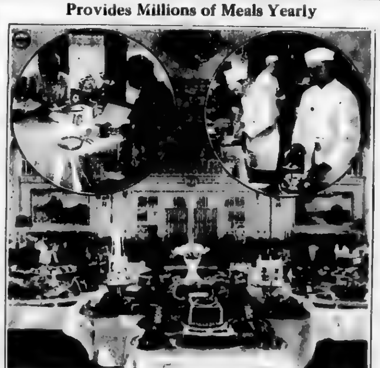
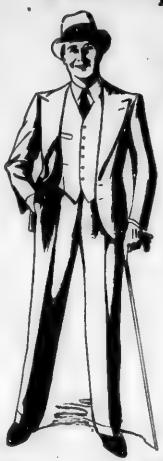
Provides Millions of Meals Yearly



About 12,800,000 meals a year are served to travellers by the Canadian Pacific, which is the equivalent of saying that it provides 37,000 every day and 250,000 every week of the year. This gigantic total is made up of about 4,200,000 in dining cars and station restaurants; 4,450,000 on Atlantic and Pacific steamships; 1,350,000 on inland and coastal steamers; and 2,500,000 in the company's hotels and bungalow camps. Lay-out shows first-class dining saloon on "Empress of Australia"; lunch for two on typical trans-continental Canadian Pacific flyer; and kitchen on C.P.R. dining car with the men in action behind the guns.

This year!—let Your Spring Suit be a Royal York



To men who are contemplating the purchase of a new suit or topcoat this spring, we suggest 'Royal York' clothes, tailored to measure at $27.50.

Fit and style built in by master tailors—designing by one of the highest salaried craftsmen in America—fine woollens from the best British mills—made and absolutely guaranteed by W. R. Johnston and Co. Limited—it is no wonder that 'Royal York' clothes, introduced only last year, already are the favorites of thousands of Canadian men.

Come in today and see the new 'Royal York' samples for spring and summer! Every one represents value you have never dreamed was possible at $27.50, tailored to measure. When you see them you will understand why "every Royal York customer is a permanent customer."

C. P. R. ENTERS BROADCAST FIELD

A series of radio broadcasts has been inaugurated by the Canadian Pacific Railway every Friday night from 10 to 11 over CKAC in Montreal and CKGW in Toronto with possibility of extension to other major Canadian cities in the near future. The basis of the programme has been organized under the baton of Rex Battle, whose work as the director of concert orchestras in Montreal and latterly at the Royal York, Toronto, has won him great popularity. A small opera company has been organized for the production of light ballad operas such as have featured the Canadian Pacific Music Festivals at Toronto, Winnipeg, Regina, Vancouver and Victoria, and these will be given under the direction of Alfred Heather, well-known character actor and impresario. Ballad operas in French produced at the Quebec Festival, together with French-Canadian folk songs, will be produced under the direction of Charles Marchand, popular folksinger. The larger illustration shows a sea-chantey scene from the ballad, "Bound for the Rio Grande," with inset of John Goss, who will star in the radio production. The other insets are of Rex Battle, leader of the orchestra, and Alfred Heather, character actor and producer of the ballad operas to be broadcast.

HIS OLD STUFF

A certain salesman was proposing to his best girl.

"And Sweetheart," he finished, "I'll lay my hold fortune at your feet."

"It isn't a very big fortune," she reminded him.

"I know dear," he replied, "but it'll look awfully big beside your little feet."

VARIETY THEATRE

Saturday, March 22nd

SIMBA

THE LION WAR OF A LUMBWA TRIBE

A drama of desperate realities, picturing indisputably wild beasts of jungle and veldt, and the wild savages of Africa in the lives they live and the deaths they die

The story itself is not a staged or Movie production, it is Africa as nature made it. The Johnson's cameras take you there a-foot, alongside and into the thick of it. The high excitement of a river crossing amid hundreds of hungry crocodiles, encounters with giant rhinoceros, and fighting the ever-attacking hippopotamus and the greatest natural scene it was ever privileged a human eye and camera to record. The mad elephant stampede in the burning jungle

The Maritime Livestock Marketing Board have extended their purchasing plan so that now 4 more clubs and associations may purchase feeds at a considerably lower price than formerly. [illegible] made of feed have already been ordered

The directors of the Canadian Pacific Railway have decided to apply to Parliament for an amendment to the company's charter permitting it to change the par value of shares of its ordinary stock from $100 to $25 per share with the exchange of one share of the old stock for four shares of the new. This action has been dictated by a desire to place the company's shares within the reach of investors of moderate means and thus increase the number of its shareholders particularly in Canada

Miss Jean Parkes of Vancouver becomes "Her Majesty" of the 1931 Banff annual winter sports carnival, following her election as Queen at the resort's concluded gathering at the famous mountain resort. She won against rivals from Calgary and Australia and was crowned amid colorful pageantry in the closing hours of the carnival.

"Not how much land settlement work but how good," was enunciated as the policy of the Canada Colonization Association by W. M. Neal general manager of western Lines Canadian Pacific Railway at the annual dinner of officials of the organization held at Calgary recently. Mr Neal said that during the past five years the association had settled 4270 families on 444,769 acres at a purchase price in excess of $85,000,000

The largest terminal grain elevator at any port on the seven seas has recently been put into operation at Vancouver by the Alberta Wheat Pool. It has a capacity of 5,150,000 bushels and is known as Vancouver Pool Terminal No. 1. During the crop year ended July 31, 1929 Vancouver shipped 96,138,216 bushels of grain as compared with 79,714,312 and 34,015,[illegible] in the two previous years

More than $4 [illegible] will be expended on new equipment, new branch line construction, and improvement to existing equipment and roadbed by the Canadian Pacific Railway during 1930 according to an announcement made recently by E. W. Beatty, chairman and president of the company. Of the huge sum $11,000,000 will be expended on new equipment and [illegible]

THE TOFIELD MERCURY

Vol. XIV., No. 7 WEDNESDAY, MARCH 26th, 1930

Tofield Trims Chipman To The Tune Of 8-3

In one of the most exciting games of the season, Tofield defeated Chipman by the score of 8-3. There was a good crowd out to watch the game.

Chipman came here with a high reputation having lost only one game out of fourteen and they were a good team, having fast skaters and good stickhandlers, but they lacked finish around the goal.

The game was played at a fast clip throughout, both teams using subs frequently.

Tofield opened the scoring in the first period after about five minutes of play when S. Worton checked an oncoming player and scored. Tofield scored again when Howard Lee, who played a wonderful game, took the puck and shot from left wing and scored. Tofield was playing a defensive game and the opponents rushes came to naught at the local's defence. After a few lightning fast rushes on both sides, R. Whyte took the puck from centre and dented the draperies behind the visiting goalie. This ended the scoring for this period and the teams went to the dressing rooms with the score 3—0 for Tofield

The second period opened with Chipman pressing and trying hard for a goal. The play was very fast at this stage of the game. Chipman was finally rewarded when they scored on Hannan on a nice shot, but Tofield came right back and scored when Howard Lee stickhandled through the defence and placed a neat counter in the net. This was all the scoring in this period, due to the work of the rival goalies who were stopping them from all angles. The period ended with Tofield hanging on to their three goal lead by the score of 4—1.

In this period Chipman came out determined to overtake the lead piled up against them and they came within an ace of doing it when they scored twice in rapid succession to bring their total to 3.

The period opened up with fast end to end rushes. Chipman then scored on a fast two man rush which gave Hannan no chance to save. They repeated this a few minutes later and their chances began to look rosy when they were within one goal of tying the score and the hopes of the Chipman rooters ran high but they were dashed earthward again when Howard Lee stickhandled through the entire team drew the goalie out of his cage and neatly slipped the rubber disc in. This was the best play of the evening and had the crowd on their toes wildly yelling for more. This started the Tofield team scoring. W. Worton then took the puck rushed down centre ice, shot from outside the defence and scored. On another beautiful rush, Howard Lee tricked the forward line passed to W. Worton at the defence who scored from a close in shot. In the dying minutes of the game Howard Lee added one more goal for good measure and this ended the scoring.

The game was remarkably clean considering the stiff checking and fast pace, only 3 penalties being handed out by referee Clutterham; Chipman one, and Tofield 2.

The Tofield team played real hockey with Howard Lee the big noise. The defence of Glover and Lee were right up to scratch and this with Hannan in goal was one of the reasons Chipman did not get more goals. Herb Martin was back in the game after being laid up with injuries received in the Wetaskiwin game.

Mr. A. B. Clutterham handled the bell to the satisfaction of all.

Lineup:—Tofield: goal, Bud Hannan; defence, Les Glover, H. Lee; forwards, R. Whyte, W. Worton, S. Worton, J. Bigelow, P. Thompson, L. Swinton, H. Martin.

MRS. RAY PASSES AWAY

Mrs. Frank Ray, for many years a resident of the Tofield district passed away at her home on Monday morning last. The funeral was held at Tofield on Tuesday, service being held in the United church. Rev. Gordon officiating. Interment took place in the Tofield cemetery.

Professor Corbett Gives Address

On Monday evening last, professor Corbett, of the University of Alberta gave a splendid illustrated lecture on "South with Shackelton".

He appeared here under the auspices of the Young People's Society and spoke before a very small audience. In addition to the address, slides were shown which added much enjoyment of the lecture.

His lecture outlined the search of Shackelton for the South Pole.

Shackelton started out in 1930 and their ship was frozen in when they had every reason to believe that they would have clear sailing, in the antarctic summer. As the summer drew on and the antarctic winter commenced then Shackelton knew that they would have to remain ice bound for at least 6 to 8 months more during which time the strain which the ice caused on the sides of the ship smashed it to bits.

Shackelton then decided to try and make "Elephant Island" 300 miles away. With the men and dogs hitched on to the life boats they started, but in three days they had only travelled 10 miles and Shackelton knew it was beyond their physical power to make the trip. So they decided to make camp.

Here Corbett pointed out how destiny plays with men, with their geological instruments they found that they were not far from an island where on a previous trip he had cached some provisions. So they started to make their way toward this island but one night when they were within 30 miles of the island a storm arose which lost them for two weeks. After the storm they took their bearings and found that they had been blown about 300 miles away from the island. They were all becoming weak and exhausted from the lack of food.

When they least expected it the ice began to break up and they set off in the three life boats for an island. When they reached this they were overjoyed to be on earth again, but the island itself was nothing but rock. From here Shackelton decided to make one of the most daring trips ever taken by an explorer. He set off with three or four of his best men in one of the life boats to reach safety. He promised those left behind on the island that he would be back on the 1st of August.

After being storm tossed and nearly drowned many times they reached the island but to their dismay found that they had landed on the wrong side. So Shackelton and one of his men started off over the mountains to the little village for help. When they arrived they got a boat and went around the island and got their friends and soon after got a ship and went back for the remainder of his companions.

They found all the men alive, al through one had fallen and broken his leg and it had to be amputated.

Shackelton said that not once did he hear any of the 28 men complain and within two months of their return all but the one with the broken leg had joined the allies on the front.

Mr. Corbett was attentively listened to and it is a pity that more were not out to hear him.

WEDDING
Scott—Bell

At the manse of Eastwood church on Saturday evening, March 22, a quiet wedding was solemnized when Grace Charlotte, second daughter of Mr. and Mrs. E. W. Bell of Edmonton was united in marriage to Norman E. Scott of Tofield, second son of Mr. and Mrs. E. Scott of Gysboro, Nova Scotia. Rev. A. B. Argue officiated.

Mr. and Mrs. Scott left on Monday for Tofield where they will reside.

DULUTH HORNETS WIN FROM TULSA
Laurie Scott Blazing Star in 2-0 Playoff Victory

Led by Laurie Scott, brilliant Duluth centre, the Hornets got the jump on Tulsa in the semi final series of the American Hockey Association by defeating the Oilers in a speedy and exciting game 2 to 0.

Scott was the outstanding player of the game, and came through with both of Duluth's scores, one each in the first and second periods, while his general play was of the highest order.

Local and Personal

Born—To Mr. and Mrs. B. M. Anderson, on March 25th, a son.

R. Skitch was an Edmonton visitor over the week end.

Mr. Haukedal from Bardo has taken over the pool elevator in Tofield.

Ruth McLaughlin was home over the week end.

Miss Muriel Malcolm is visiting her home.

W. Worton was a business visitor in Barrhead last week for a few days.

The Mercury will very shortly become an eight page paper

The Mercury's publishing day is Wednesday, so all copy must be in by Tuesday noon.

Mrs. Clutterham, Blake Clutterham and Richard Cory motored to Edmonton on Saturday.

The draw for the Variety prizes was held last Saturday. Those winning the prizes were:

1st, Mr. Bigelow; 2nd, Dorothy Baptist; 3rd, Leslie Glover; 4th, Mrs. R. Wilson.

Mr. and Mrs. McLaughlin, Mr. and Mrs. Calvert motored to the city on Friday.

Mr. Hetsler, formerly of Ryley has been transferred to the managership of the Tofield Creamery.

The W. A. will meet at the home of Mrs. Weatherill on Wednesday, April 2nd, at 2:30 sharp

The W. A. take this opportunity of thanking all those who contributed to the success of their silver tea last Saturday.

Mr. Thompson was home over the week end. He has recently taken over the managership of the live stock pool at St. Paul.

The postponed meeting of the U. F. A. was held on March 20th at the home of Mr. W. W. Hill. Although the roads were not at their best about twenty five people came to take part in an interesting meeting

The next meeting will be held at the home of Mr. A. Dodds on the evening of April 3rd. A talk will be given by Mr. T. R. Murray, W. W. Hill and G. A. Trent on the "Farm Labor Problem"

The library at the former W. I. rooms is open every Saturday now from 4 until 5:30. New members may join at this time and are entitled to two books each week and there is such a choice to pick from, over 600 books. A new member, who is recently new in town, was heard to remark on Saturday, "Your library is just wonderful. I did so much enjoy two books this week." This pleasure can be yours, as well. Come in and look over our large list of books on Saturday. It costs but one dollar to join for a whole year, and one learns so much from a good book.

After the routine business was finished Mr. A. Schultz, C. Kallal and J. B. Warner gave most interesting papers on management and care of livestock. The subject was very capably handled and brought out much discussion and appreciation from the meeting. After the conclusion of the meeting an enjoyable lunch was served by Mrs. Hill. A hearty vote of thanks was voted to the hostess and host for their hospitality

Hobson's butcher shop closed its doors on Saturday night last. Mr. Hobson has purchased a business in Edmonton on 96th street and will take possession on April 1st. On Wednesday when interviewed by a Mercury representative, Mr. Hobson stated he did not know whether a new butcher would go into the shop vacated by him or not. Negotiations were under way but if he did not sell he could use the fixtures in his shop at Edmonton. Mr. and Mrs. Hobson have both been very active in social life in the town being members of the Masonic Lodge and Eastern Star lodge respectively. They were also keen curling enthusiasts, and were members of the local club.

Lindbrook News

A whist drive was given by Mrs. A. Gall at her home here last week to the Lindbrook's youngest set. The ladies first prize was won by Robert Smith (acting as lady). The gents first was won by Art Williams whilst Joe Hooper secured the booby. Everyone present voted the affair A. I.

A surprise party was sprung on Mr. Otto Lindgren by his friends on the evening of the 19th. It really should have been the 17th not being his birthday, but some unforeseen circumstances prevented [illegible] hence the 19th being the day [illegible] dancing and cards were the order of the evening and it must have been a whale of a time for it was daylight when the party closed.

Mr. Fred Wilde has returned from Victoria B. C. where he wintered and [illegible] ready to slash into spring work on his farm here

Mr. Henri Gouhault and family moved into Tofield this week. Mr. Gouhault having work at the mines there in view.

Mr. B. E. Clarke rode from Manville to here last week, a distance of about 150 miles, on horseback. He returned later to Manville with Mr. Birk's truck and brought his family and household effects back here arriving Sunday night. He reports an awful trip over the muddy, icy and greasy roads and would not care to repeat same under such conditions. Mr. and Mrs. Clarke and daughter Elizabeth will reside on their place here formerly known as the Lancaster's place

Mr. J. Wozencroft had a bad spell of health this last week and what makes it worse is at present Mr. Wozencroft is alone with her; their expected housekeeper having failed to arrive.

We hear that Mr. and Mrs. Wm. Gray, who are new arrivals last year and have been living on the [illegible] farm this winter are leaving for Calgary this week. Mr. Gray has [illegible] obtained a good position [illegible]

Mr. A. E. Silverside of Lindbrook [illegible] has purchased a Ford truck [illegible] his hauling etc. also useful for [illegible]

YOUNG PEOPLE'S SOCIETY ENTERTAIN MR. HIBBERT AT BANQUET SUPPER

On Monday evening, the Tofield Young People's Society entertained Mr. Hibbert to a supper. Mr. Hibbert who is the general secretary of the Young People's Work Board made the trip along the line from Edgerton to Tofield, stopping off at points where Young People's work was in operation. The purpose of this trip was to meet with the Sunday school teachers and Young Peoples groups and to help them in any way he could

At the conclusion of the supper Mr. Hibbert was introduced by Miss Cooper and asked to speak a few words. In this little talk he told about his work on this trip that he was just completing and conveyed the greetings of other groups to us.

At 7 o'clock we all adjourned to the body of the church, where Mr. Hibbert gave an illustrated lecture on "From Prairie to Palms". This lecture was made up from his trip to Los Angeles to the Sunday School Convention and it proved to be very interesting

This lecture was open to the public.

Mr. Hibbert left on the 9:15 train to Edmonton and from there will return to Calgary

Mr. and Mrs. S. Simovitch and family of Round Hill visited with Mr. and Mrs. Rodnunsky on Sunday

Chas Lindberg left for Minneapolis last Sunday for a two weeks stay with his sister, who is seriously ill.

Mr. and Mrs. W. Jardie were dinner guests of Mr. and Mrs. J. R. Fleming on Sunday.

A number of ladies visited with Mrs. Geo. Welch on Tuesday in honor of her birthday.

A. Danielson left on Monday for Camrose where he will have an operation.

Bardo

Miss Hannal Jensen, who has been working in Edmonton, returned to her home, here last week.

Mrs. Nita Kindley entertained the Ladies' Aid at her home on Thursday afternoon. Although there was not a large attendance, a very enjoyable afternoon was spent.

Mr. Rorem returned home from Grand Prairie on Thursday. He was accompanied by his son Lyman, of Valhalla, and his bride. Mr. and Mrs. Lyman Rorem will visit friends here for a few days.

Riverand Bjelde, who has purchased the Swartzendruber house, had it moved to his farm at Dodds, last week. Five tractors were required to move the house

Mrs. Magda Hendrickson is teaching in the lower room at Bardo now, as the former teacher, Mrs. P. Bjornson is moving to her new home in Camrose.

There were services and Y. P. S. at Bardo on Sunday. Both meetings were well attended.

Quite a number of Bardo Young People attended the social at the Whillans home Friday evening. They report an enjoyable time.

Mr. Joe Eide left for Canoe, B. C. on Monday morning. He plans to work there during the summer.

CORNHILL MUNICIPAL COUNCIL MEET

On Thursday, March 15th the Cornhill Municipal Council held their first regular meeting of the year, all councillors being present.

The following were declared duly elected

Wm. Lee, division 1; J. C. Corbett, division 2, A. J. Williams, division 4; Wm. Thompson, division 5

Declaration of office was taken by the newly elected councillors.

Mr. Wm. Thompson was appointed reeve and thanked the council for the honor bestowed upon him and the confidence placed in him.

Much other business was transacted an outline of which will appear in our next issue which will be published earlier in the week

Taking the School to the Scholar

[illegible] ... the Canadian Pacific Railway was called into consultation and the result ... the travelling school car which has been operated during the winter months with increasing success for the past few years.

Every child loves a train but when that train comes ... [illegible]

... and French-Canadian ... They come on snowshoes, skis, by ... from near and far ... get acquainted among themselves. Difference of speech makes little difference ... them and soon they are all using English. Children of pioneers, they are bright and adaptable. Layout shows exterior of car; interior with class of boys and girls all set for lessons; another interior showing teacher and blackboard; and two types of school children on their way to the car.

VARIETIES OF OATS FOR ALBERTA

(Experimental farms note)

Banner and Victory oats constitute at least seventy-five per cent of the oat crop produced in the Province of Alberta. These varieties have proven themselves satisfactory both in an experimental and commercial way.

Banner has consistently outyielded all other sorts at the Dominion Experimental station, Lacombe ... a vigorous grower and has a long strong straw which stands up well unless the crop is very heavy. It is the best variety to use for the production of green feed as it will give a greater tonnage per acre than any other oat. Because of ... [illegible] ... are ... [illegible]

Victory oats are a ... earlier maturing ... and produce ... acre than Banner ... [illegible] ... an attractive sample.

Banner and Victory oats appear to be too late maturing for certain sections of the province. For such localities Alaska is the best of the very early maturing sorts available in the seed trade. In considering the production of this variety it is well to keep in mind that it will not produce as much grain or straw as either Banner or Victory, and that the only justification for growing it in preference to these sorts that it is from a week to ten days earlier in maturing. This latter factor makes this sort a very useful variety to use on late spring ploughing or when the land is partially fallowed before seeding. When seeded in the regular season, this variety is frequently ready to harvest in July. It is possible to seed it in the open plains section of the province as late as June 1st, with reasonable assurance of its ripening.

A number of promising new sorts are being developed by different Agricultural institutions. Since these ... are not available in the seed trade, they need not be considered at present.

HEALTH SERVICE OF The CANADIAN MEDICAL ASSOCIATION

VARICOSE VEINS

The veins carry the blood all over the body back to the heart. The blood current in the veins is much more slow than it is in the arteries and from the lower part of the body, the blood in the veins is going up hill.

Varicose veins are enlarged veins. They occur when, for one reason or another, the blood, instead of circulating freely, is checked to some extent and ... held back in the veins ... become distended as a result. This occurs most commonly in the ... [illegible]

Anything which interferes with the flow of the blood in the veins is a cause. Constriction of the legs by ... garters contributes to the condition. The pressure of tumours in ... an overloaded bowel in ... and sometimes pregnancy ... result in varicose veins. Certain forms of heart disease in which the flow of blood ... [illegible] ... surrounding the veins are weak ... quality, the veins do not ... the necessary support and in their weakened state, are apt to become enlarged. Overweight is a common cause because of the extra force required to send the blood through the abnormal amount of tissue. Long standing predisposes ... the occurrence of varicose veins.

The prevention of this condition is first of all, a question of keeping within the limits of normal weight and by having the muscles in good condition through regular exercise.

Varicose veins of the rectum, called haemorrhoids or piles, are usually the result of constipation. Prevention lies in the correction of the constipation by proper diet and exercise. The cathartic habit does not correct constipation, in fact, it is one of the most frequent causes of the condition and ... the habitual use of cathartics is indirectly a common cause of haemorrhoids.

Those who stand for long hours may be helped by lying down each evening and by having the legs gently massaged from the feet to the hips.

Once the condition has developed relief may be secured through proper treatment, but, in all cases, the cause of the condition must be removed, it is much more simple to prevent than to treat, and we would repeat that prevention lies in the maintenance of normal weight, in the development of healthy muscles and in the correction of constipation.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

INFLUENCE OF THE NURSE CROP ON THE STAND OF SWEET CLOVER

(Experimental farms note)

When a nurse crop is used there are really two crops competing for moisture and nutrients in the soil. Because of its quicker germination and growth the grain crop becomes established much sooner than the sweet clover, which gives the nurse crop a decided advantage. When the amount of moisture is limited, the sweet clover seedlings are the first to suffer.

Light is essential to the normal growth of sweet clover. If the nurse crop is rank growing and leafy the amount of light reaching the sweet clover is inadequate for its proper development and the stand may be materially reduced. This is one reason why oats and barley are not so satisfactory as wheat for a nurse crop.

The kind of nurse crop used has a marked influence upon the stand of sweet clover, which stand is reflected in the yield of hay obtained. At the Experimental Farm, Brandon, the highest yields of hay, on an average of four years, occurred when no nurse crop was used. Flax and wheat reduced the yields much less than barley or oats. If the yield of hay, where no nurse crop was used, is expressed as 100 per cent the reduction in yield by using flax, wheat, barley and oats as a nurse crop is 2.5, 9.0, 17.0 and 17.8 per cent respectively. While flax gave the least reduction, it did not prove satisfactory. The sweet clover was as high or higher than the flax at the time of cutting which seriously interfered with its harvesting and threshing. The stand of flax was poor in some cases, due largely to crowding by the more vigorous sweet clover plants. Wheat, on the other hand, proved most satisfactory. It produced a valuable cash crop the year of seeding and caused a relatively small reduction in the stand of sweet clover. This slight reduction in hay yield was more than compensated by the returns from the wheat crop.

This year!—let Your Spring Suit be a Royal York

To men who are contemplating the purchase of a new suit or topcoat this spring, we suggest 'Royal York' clothes, tailored to measure at $27.50.

Fit and style built in by master tailors—designing by one of the highest salaried craftsmen in America—fine woollens from the best British mills—made and absolutely guaranteed by W. R. Johnston and Co. Limited—it is no wonder that 'Royal York' clothes, introduced only last year, already are the favorites of thousands of Canadian men.

Come in today and see the new 'Royal York' samples for spring and summer! Every one represents value you have never dreamed was possible at $27.50, tailored to measure. When you see them you will understand why "every Royal York customer is a permanent customer."

FOURTH OFFICIAL IS ARRESTED IN CREAM GRADING SCANDAL; CHARGES OF CONSPIRACY LAID

Percy Jones cream receiver for the provincial dairy pool was arrested late Tuesday night by officials of the criminal investigation department Alberta Provincial Police, and charged with conspiracy, this being the 4th arrest to be made in the cream grading case, in which two government cream graders and one employee of the Swift-Canadian Edmonton plant, were arrested over the week end and on Monday.

The formal charge of conspiracy preferred against Jones, was read to him following his arrest, and he was granted bail in the sum of $6,000, of which accused man was required to find $3,000 and two sureties of $1,500 each.

Alberta provincial police officials are reticent as to details of the case.

The men previously arrested, and under bail to appear for preliminary hearing early in April, are Robert M. Callander and James Galbraith both of whom are provincial government cream graders, and A. Crook, an employee of the Swift-Canadian Company.

Details of the charges have not yet been made public, but it is understood that they relate to alleged wrongful grading of cream shipped to the plant by farmers, and to alleged fraudulent issuing of checks to persons, either not shippers of cream, or actually fictitious people.

The arrests were made by officials of the criminal investigation department of the A. P. P., the men appearing before Inspector Duncan of that branch, and formally charged. Bail was set in each case at $3,000.

Officials of the provincial government point out that while cream graders are paid by government checks, they are not really government employees, since the fund from which their salaries come is made up of a certain percentage of the money deducted by the creameries from all cream checks, so that the work of cream grading is actually paid for by the cream shippers themselves.

Each year the department of agriculture holds a special course in cream grading and the persons taking this course are the men from among whom later appointments as cream graders are made by the government. These men act in the capacity of guardians to the shippers, in much the same manner as the check weighman at a coal mine acts as guardian of the interest of the miner.

In the case of Jones, it is pointed out, the offences alleged against him cover a period during which he was working as a cream grader. He was later engaged by the dairy pool as cream receiver.

$300.00 IN ONE DAY OFF ONE ROUTE

Times are hard—there is little money in the country—yet people have to eat and buy clothes and they do.

Since the beginning of the year the Tofield district has been bombarded with sales literature from located as far west as Vancouver and as far east as Montreal. Catalogues broadsides, circulars all find their way to the farm mail box and unresisted and allowed to have full sway, the produce results in increased sales for the houses that sent them. This week over three hundred dollars from one rural route in one day went to mail order houses out of town. This may have been an exceptional day and it may not have been—we do not know—but we do know that the quantity of sales literature coming into the district has never before been exceeded and that the amount of advertising done by local merchants have never been for 12 years at least at such a low ebb. To us it is a simple matter of cause and effect.

NEWSPAPERMEN'S VISIT

Eighteen members of the Canadian Weekly Newspaper Association, representing every province from Nova Scotia to British Columbia, reached Montreal, March 7, by Canadian Pacific train from Ottawa. They held meetings at the Windsor Hotel and were later entertained at dinner there by Lord Atholstan, proprietor of the Montreal Star. The photograph shows the party on arrival at the Windsor street station, Montreal, and from left to right they are: A. W. Marsh, Echo, Amherstburg, Ont.; J. A. MacLaren, Examiner, Barrie, Ont.; R. S. Anslow, Hants Journal, Windsor, N.S.; H. R. Anslow, Graphic, Campbellton, N.B., (immediate past president); David Williams, Bulletin, Collingwood, Ont.; J. A. J. Davis, Canadian, Carleton Place, Ont.; Hugh Savage, Cowichan Leader, Duncan, B.C., (president); D. C. Dunbar, Mercury, Estevan, Sask.; G. H. Mitchell, Post, Hanover, Ont.; E. J. Bennett, Leader, [illegible], Sask.; M. Macbeth, Sun, Milverton, Ont., (1st vice-president); ... Lake, Advance, Timmins, Ont.; Lorne Eedy, Journal-Argus, St. Mary's, Ont.; Charles Clark, Times, High River, Alta.; J. L. Cowie, News-Express, Carberry, Man.; C. R. McIntosh, M.P., News, North Battleford, Sask.; E. Roy Sayles, Mercury, Renfrew, Ont., (managing director and treasurer); George Legge, Leader-Mail, Granby, Que.

Here and There

It is reported that coal ... in Central ... Island ... Upper River recently discovered amount to 460,000,000 tons of bituminous coal.

Arne Palsson, national librarian of Iceland, the oldest ... democracy where the thousandth anniversary of the first Parliament in the world will be held next June, arrived at Saint John on board S.S. Montcalm, recently, with a view to visiting Canadian Icelanders. A Canadian Pacific ship will carry visitors to the great world gathering in Iceland.

A special train, a University on Wheels, is operating from Moose Jaw early in February and ending at Saskatoon March 15. It consists of two seed cleaning cars with lecture car and is bringing to farmers in out-of-the-way districts in the west the very latest in agricultural methods. The lecture car is in charge of officials of the Field Crops Branch of the Saskatchewan Department of Agriculture. The train is travelling over Canadian Pacific lines, with which company the department is co-operating.

Entries continue to pour into Victoria for the second annual Empress Hotel midwinter golf tournament over scenic Colwood course, February 17-22, for the E. W. Beatty Trophy and a long list of silver cups. With the new Club House at Colwood slated to open shortly, a heavy entry list is expected for this popular tourney which is attracting golfers from all over the United States and Canada.

The Quebec Winter Sports Association has decided to hang up cash awards for the winners of the Ice Canoe Race slated to be held February 23. Canoeists will leave Levis with their ice canoes, make their way across the River St. Lawrence to Quebec, take a lug aboard under the shadow of historic Chateau Frontenac, and then negotiate the half-mile stretch that separates the two cities.

"By careful selection of the character of colonists we can place in Canada we help in the development of the Dominion," Col. J. S. Dennis, former chief commissioner of Colonization and Development, Canadian Pacific Railway, and now acting in an advisory capacity to the department, said on sailing from Saint John recently on a trip of inspection to Great Britain and Europe. He will discuss certain agreements between the British Government and the C. P. R. regarding movement and placing of British colonists in Canada.

We are now in position to do any kind of truck hauling.

G. A. AGNEW
ON IMPERIAL PRODUCTS

THUGS LOOTS EDMONTON STORE; ESCAPES; IS CAPTURED LATER BY CONSTABLE AT UNITY, SASK.

Working with the coolness of a veteran, a young man about twenty-five years of age, walked into the Manning grocery at the corner of 118 ave. and 89th st., shortly after 10:30 p. m., Saturday, and covering J. R. Manning, the proprietor of the store who was alone at the time, with a loaded revolver, emptied the cash register of some $50 at least, backed out of the store and disappeared in the dark.

Less than 16 hours later on Sunday afternoon, a man whose name was said to be Albert Barron, was arrested on the C. N. R. east bound train at Unity, Sask., by Town Constable Henry Gray, and, after a desperate escape and re-capture, was finally lodged in the town cells to await the arrival of an escort of the Alberta Provincial Police at Edmonton.

A. P. P. Constable Ward left Edmonton Sunday night for Unity, and will arrive there at 11.40 a. m. Monday, returning immediately with his prisoner to Edmonton, where he will be charged with robbery while armed.

Mr. Manning at first treated the gunman's request to "stick 'em up" as a joke and attempted to stall until aid came, whereupon the bandit drove a bullet into the floor about twelve inches from his victim's foot and with an oath announced that he would shoot to kill unless he got action. He got it.

"I was working at the rear end of the store about 10:30 Saturday evening," Mr. Manning informed the Journal, "when a young man walked in and asked me if a man named Bill Gorman had been in the store. I told him that I did not know anyone by that name and he replied that he had an appointment to meet Gorman at my store. He sauntered out to the door and looked around for a few minutes and then came back in.

"I was still working at the rear and he remarked that he would stick around a few minutes if I did not mind since it was cold outside. I told him to go ahead. He walked back slowly to where I was and suddenly snapped out:

"Stick 'em up! This is a hold up and I mean business!"

I saw he had a nickle plated revolver in his hand and stood up. I figured that if I could stall him off for a few minutes someone might come into the store," Mr. Manning explained. "I started kidding him and asking him what the joke was about.

"I'm not joking, I want action and d—— fast, too, or I'll drill you. Get me? he snarled, and at the same time he shot, the bullet hitting the floor a few inches from my foot.

"He backed me behind the counter and made me open the drawers of the McLaskey file," Mr. Manning continued. "There was no money there and he became more ugly.

"I want some money, and I want it fast or I'm going to start shooting, he told me.

"Then he saw the cash register and made me open it. Without taking his eyes off me he reached out and took the bills out of the drawer and then, ordering me to stand still, he backed slowly to the front door and out. I saw him start running south of 89th st., and then he disappeared in the dark.

Massey Harris Drills

Massey Harris No. 11 drills for 1930 offer outstanding features that mean long service, ease of handling, and quick thorough seeding. They sow the seed accurately and positively at the bottom of a wide furrow and their rugged construction enables them to stand-up under fast operation.

Look over the features and you will see why these drills are so popular and satisfactory. All steel construction, lightest yet strongest, steel grain box, two wheel driven lift, milled feed runs, alemite lubrication, wide steel wheels, centre seed delivery double discs. Made in all sizes.

"A Regiment of Two' Played Here

Lamont Dramatic Society Presents Three Act Comedy Here

On Thursday night of last week The Lamont Dramatic Club, by arrangement with the Tofield Young People's Society presented a three act comedy, entitled, "A Regiment of Two."

The Lamont Dramatic Society are an organization of many years standing and have presented quite a number of plays at different times.

The story of the play centred around two husbands who desired to have at least one free night each week. Consequently they persuaded their wives that they had joined the gallant 39th, and on the nights the 39th were drilling the husbands were having a good time at the Tigers Club. Then came war in the Panama and the 39th were called to the front. The husbands took this opportunity of going on a fishing trip and just at the time the wives were grieving over their death on the battle field they turned up safe and sound.

Throughout the play "Melson the plumber" was prominent and the audience got many a laugh out of his work. Harry and Laura as the lovers were good, Harry slow and slightly nervous and Laura charming and vivacious. Mrs Milton and her married daughter were rather skeptical of their husbands truthfulness, while Gordon Harrold as Lord Dudley played a difficult part well. Hilda as the maid was good and gave the audience many a laugh. "Brother Jim" played the part of a wealthy Texas rancher well and added action to the plot.

GOOD BIDDING AT BEARISTO'S AND WHEELERS SALE

No doubt due to the unusual economic conditions prevailing this year here has not been so many auction sales as in other spring seasons.

The sale called by F. O. Ball for Mr. Bearisto was a good sale the bidding being brisk and prices good. This was a credit sale and it is interesting to note that the selling was about evenly divided between cash and credit purchasers.

At the Mrs. Wheeler sale there was a good attendance. There was a considerable amount of small stuff sold. The horses sold for $85.00 and cows for $67.00. This also was a credit sale, the proportion of credit and cash being about half and half.

DIX SCORES HIT IN SPORT STORY

If you are in any sense, a baseball fan, don't miss Richard Dix in "Warming Up," the Paramount star's latest photoplay, which comes to the Variety Theatre on Saturday, April 5th.

If you like your entertainment in the form of romance, the same tip holds good.

Dix comes to the Variety Theatre in a screen story which, from all appearances, will be ranked alongside of "The Quarterback," one of his best. In "Warming Up," he is the same athletic, lovable Dix but this time his toe is in the pitcher's box.

The story concerns a young rookie whose troubles are not confined to the diamond and particulary to a jinx which seems to have settled on his trail for good. There is also a delicate and charming little love theme which runs through the production.

Jean Arthur playing opposite Mr. Dix for the first time has a chance to prove why the star cannot be blamed for loving her. She is quite pretty and capable.

Many colorful figures of the diamond are seen in support of Richard Dix including Mike Donlin, famous Giant of other days, Mike Ready, the oldest living professional, Chet Thomas, Wally Hood, Truck Hannah, Bob Murray, Joe Pirrone and many others.

Bardo

Born.—To Mr. and Mrs. R. M. Anderson, on March 28th, a son. Congratulations.

The Bible class of the Rorem home last Monday was well attended and a very interesting evening was spent. It was held at the Hendrickson home on Sunday evening, this meeting was also well attended.

A very large crowd of people gathered at Rorem's on Tuesday evening to charivaria Mr. and Mrs. Lyman Rorem. Several lively games were played, these were followed by a sumptious lunch. At the close of the evening the bride and groom were presented with a purse from their friends. Mr. and Mrs. Rorem left for their home in Valhalla on Sunday.

Mrs. Emma Kido, who has been in a Sanitorium in Calgary the past four months, returned to her home on Thursday much improved in health.

Mr. and Mrs. T. A. Rorem and Mr. and Mrs. S. Rorem were supper guests at the Hendrickson home on Friday evening.

A large crowd attended the kitchen shower that was held on Mrs. Myrtle Bjornson at the Hendrickson home on Saturday afternoon. The bride, who is soon leaving for her new home in Camrose was presented with many useful gifts.

Born.—To Mr. and Mrs. Carl Blake, on March 27th, a daughter.

LINDBROOK

A very enjoyabel event took place at the home of Mr. and Mrs. Frank Cortzman on Thursday night last, when a number of friends gathered for a whist drive. The party was held in honor of Mr. and Mrs. Hobson who are shortly leaving. Ladies first was won by Mrs. J. Branton and ladies' consolation went to Mrs. Pat Gladue. Gents first was won by Mr. J. Forstell and the consolation by Mr. Branton. After cards the hostess served a delightful lunch.

PIANOFORTE RECITAL

A pleasant event took place on Friday afternoon, when Mrs. A. S. Carey invited the mothers of her music class to a recital at her home.

Varied and delicious refreshments were served by the hostess, and after school, the class assembled and presented the following programme in a most creditable manner, even the little ones taking part.

The programme was as follows:

Betty McCarthey and Beatrice Baptist, "The Camel Train,"; Hugh Gordon, Sonatina; Mary Hill, Mazurka; Henry Hicks, "Ups and Downs" and "The Swing"; Betty McCarthey, prelude "The Swallow", (Caopin); O. Baptist, "Daisy Chains"; Esther Jacobs, "Happy-go-Lucky"; David Carey, "The Teddy Bear"; Billy and Mrs. Carey, duet; Helen Cookson, "Dans le Pre"; Eleen Forestell, "Fairies Waltz"; Jean and Eleen Forestell, duet, "In the Attic:" Mr. Carey, songs, "Give a Man a Horse He Can Ride," and "Requiem". Mrs. Carey, piano solos, "Romance" (Sibelius), Mazurka (Chopin).

At the conclusion of the programme, the pupils did ample justice to the good things to eat provided by the hostess.

Mrs. Carey then explained her plans for stimulating the interest of the class by competition and home supervision, and everyone went home feeling that the afternoon had been both pleasant and profitable.

GARAGE CHANGES HANDS

On April 1st, The Tofield Garage which has been conducted by Mr. Mordon for some time, passed to the ownership of Johnson and Patterson, both well known local men.

Mr. Johnson has been connected with the garage for about five years, while Mr. Patterson has spent his entire life in this district.

Both men are working partners and promise their patrons first class service.

Ketchamoot Items

Sunday school will reopen next Sunday April 6th at 10:00 o'clock a. m. preaching service at 1:00 a. m. Please take note of the change in time from the afternoon to the forenoon for the summer months. Lets one and all do our part toward the Sunday services and make a good start next Sunday.

Mrs. Wheeler's sale on Wednesday was largely attended and bidding very satisfactory. Mr. Frank Ball was the auctioneer and Mr. Oliver Letourneau clerk. Mrs. Wheeler is undecided where she will locate.

Mr. and Mrs. Ole Hanson have rented the Mrs. Wheeler farm and moved in last week.

Mr. and Mrs. Mel Myres have moved to the Myres farm in the Bardo district better known as the Haugen farm.

Mrs. Henderson, Mrs. W. A. Mitchell and Miss F. Fawcett visited Mrs. J. Appleby at her home Wednesday.

Mr. Howard Lee purchased the 38 acre field just east of the Bardo station from Mr. D. F. Black, of Victoria B. C.

Mrs. Grace Mitchell, Milton, Roger and Franklin Ray wish to express their thanks to their many friends for kind expressions of sympathy and beautiful floral tributes received during their recent bereavement.

The annual congregation of the Ketchamoot United church was held on Thursday afternoon at the Wm. Lee home with a goodly number of members present. Reports of the activities of the various organizations of the church were present. Rev. Gordon acted as chairman, Mr. Wm. Lee, secretary read his report while there is a small deficit on the minister's salary the report was very satisfactory. Mrs. Frank Shupe secretary of the M. A. S. gave a very gratifying report of the society with $700.00 in saving bonds, $40.00 ready to apply on the minister's salary and a nice sum to carry over. Mrs. Carlisle superintendent of the Sunday school reported a successful year for that department of the work.

The following were re-elected to the board of managers for the year. Messrs Wm. Lee, A. F. Schultz, W. A. Mitchell, C. A. Ingram, D. McCaven, C. J. Whillans. At the close of the meeting refreshments were served by the ladies and a social time was enjoyed.

The funeral services of the late Margaret Ray who passed away at her home Monday, March 24th was held Tuesday afternoon at 2:00 o'clock at the United church in Tofield. Rev. Gordon officiated and interment took place in the Tofield cemetery. The pall bearers were: Messrs John McGinitie, A. F. Schultz, J. H. Ingram, A. J. Williams, G. W. Sears, Wm. Schroeder. Floral tributes were received from the family and many old time friends and from the M. A. S. society.

The late Mrs. Margaret Ray came with her family from Boston U. S. A. some twenty years ago and lived practically on the homestead in the Woodlawn district, where she lived a quiet life looking after the welfare of her family. She leaves to mourn her loss, husband, one daughter, Mrs. Grace Mitchell and three sons, Milton Roger and Franklin at home and 12 grandchildren and a host of friends who send sympathy to the family.

NEW BAKERY TO COME TO TOFIELD

Information has been received to the effect that Tofield will shortly have a new bakery.

Mrs. Ruby, on behalf of herself and Mr. Ruby was in town recently and arranged for the purchase of the building at the south end of main street, now occupied as a shoe repairing establishment.

Mr. Ruby has the reputation of being a first class bread baker, besides being expert in all kinds of buns, cakes, pastries, etc.

It is expected the shop will open the beginning of May.

Local and Personal

Angel Food Cakes. Special prices for Saturday delivery. Also salad dressing. Phone 904, Tofield.

The cast of "The Arrival of Kitty" which was produced here with such great success a short time ago, will journey to Lamont on Friday and present the play there.

The warm spring like weather of the past few days have brought out many cars that have been in store for the winter.

The garages are all busy and the gas pumps are being kept working. Many farmers are getting ready for spring work, by tuning up tractors, putting their plows, discs, seeders etc in working order and others are overhauling the harness and getting their horses in shape for field work.

The big question is moisture. A real good rain or a heavy soft snow fall, followed by moderately warm weather would make things hum throughout the district.

Spring is all right if it were not for spring house cleaning and that job of raking the yard. Where DO all the cans come from.

Born—To Mr. and Mrs. Percy Sutton, March 31st, a son.

Born—To Mr. and Mrs. Charles Anderson, April 1st, a son.

A meeting of the ladies golf club will be held at the home of Mrs. Firth on Tuesday afternoon, April 8th, at 2.30 p. m. All ladies interested are invited to attend.

Kingman News

Mrs. Olaf Olson is sick with pneumonia. We all wish her a speedy recovery.

A few Kingmanites attended the whist drive and dance in the Community Hall east of Camrose on Friday. All report a good time.

Quite a few farmers have started work on their land and this is the earliest for many years.

Mr. and Mrs Johnson and Mrs. T. Horte visited with Mr. P. M. Simonson on Sunday.

Mr. and Mrs. T. J. Rognese visited with Mr. and Mrs. H. Paulson on Sunday.

Wm. Thompson Elected Reeve

Much business Transacted at First Regular Meeting

The first regular meeting of Cornhill Municipal District No. 457, was held at the Municipal Office at Tofield on Thursday, March 13th.

The following councillors were present. Wm. Lee, J C. Curlett, A. J. Williams, Wm. Thompson.

The returning officer announced the election of William Lee Div. one; J. C. Curlett, Div. three; A. J. Williams, Div. four; and Wm. Thompson, Div. five.

The newly elected councillors then took the oath of office

A motion nominating Wm. Thompson as reeve was unanimously carried.

Mr Thompson in accepting the appointment thanked the councillors for their faith in his ability to carry out the work of this important office and expressed the desire that he would have at all times the full co-operation of all the council in working out the problems of the district.

Councillor Williams was appointed deputy-reeve for the ensuing six months.

J. O. A. Letourneau was appointed secretary-treasurer for the ensuing six months.

The secretary-treasurer's bond for $5000 was read and found satisfactory.

The minutes of the previous meeting were read and formally passed.

The auditors report for 1929 was read and adopted

Dr. F. F. Law, M. D. was appointed medical officer of health for divisions, one, three, four, five, six and Dr. M. E. Krause of Camrose be appointed medical officer of health for division two.

J. O. A. Letourneau was appointed assessor for 1930.

Moved by Councillor Curlett, this council recommend to the proper authorities all property north of Canadian National Railways in divisions three and four and all of township 51 and 52 in 19 w4m be embodied within the restricted area as to the Provincial and Dominion Prairie and Fire Act. The above resolution is placed on record in order to assist the dominion Park Authorities in controlling prairie fires

Moved by Councillor Williams that Mr Ellis be given authority to fence road diversion running through the N. W. 22-51-20 w4m and submit his account to the district for payment. It is understood from the above that Mr Ellis will donate diversion right of way (location to be determined later) on road diversion running through the N. W. 22-51-20 w4m in lieu of compensation having road diversion running through his yard Carried

The budget for the ensuing year was then submitted to the council

Moved by Councillor Curlett that the municipal rate for 1930 be set at ten mills. Carried

A communication was read from Mr. Martin Hirsch regarding appeal for road. Councillor Broen will look into this.

A communication was read from Mr. Oscar Grahn re appeal for road. Councillor Curlett will look into this.

The council in considering Mr. Philip Bjorkgren's proposal to contract road work and do same with Caterpillar tractors and large graders, the latter to be furnished by the district, believed it was too soon to introduce this policy, although they felt that better roads could be built for less money on the above basis

The council requested the secretary to obtain more information from Department of Public Works before any action be taken by them in cancelling old road plan No. 511 showing survey road section 3, tp. 50, rg 20 w4m. as they were not aware of any new survey having been made.

During 1929, road diversion on the east side of the N. E. quarter of sec 22-50-20 w4m was dispensed with by having a grade built across slough on regular road allowance. Mr. A. J. Williams advised the council that he was prepared to re-purchase the land in this diversion at a fair market price.

The Secretary was instructed to advise the C. P. R. that new survey would be made re road diversion effecting the S. E. 9-49-21 w4m, the first time the district had occasion to call their surveyor down from Edmonton. Further that the council did not intend to make use of present surveyed road diversion except an exceptionally small portion on one corner of said quarter section.

Moved by Councillor Curlett that Mrs. E. Adelaide Williams application for old age pension be approved.

Moved by Councillor Williams that Mr. George Norton's application to purchase the N. W. 7-51-21 w4m for the sum of three hundred dollars cash be accepted.

Mr. Theo Waters of South Cooking Lake also had an application in for above land agreeing to pay $300 but in three annual payments. The former proposal was the most satisfactory

Councillor Curlett promised to look into the matter of proposed road as suggested by Mr Geo. McAllister in his undated communication.

Councillor Curlett promised to report at the next regular meeting the result of his investigations re valuation of road diversion taken by district across the S. E. 21-50-21 w4m the property of Mr. Peter Heitman.

Councillor Williams will investigate appeal for road along N. E. corner of the N. E. 20-51-20 w4m as made by Mr. J. Rachomme in his communication of January 24th.

Secretary was instructed to obtain information re costs from Hay Lakes Drainage District.

Secretary was requested to write the Department of Public Works drawing their attention to the necessity of the district having to plan a larger culvert where the Calgary Power Co. made a deep ditch across road running through the N. W. 3-49-20 w4m than the original natural drain. It was contended that the Calgary Power Co. should stand the cost of this undertaking in view of their making a deeper ditch in order to provide a sufficient flow of water from Miquelon Lake to provide for their reservoir at Camrose.

Councillor Broen will investigate complaint made by foreman M. Thompson in which M. Thompson stated P. Heffner had not received credit on pay sheet for road work performed in 1929 amounting to $9.70.

Council decided not to rebate penalty on taxes as proposed by Mr. J. Rognese for John Myhre re N. E. 3 and S. E. 10-50-20 w4m.

Secretary was instructed to write the Soldier Settlement Board, Edmonton, to the effect that this district did not intend providing settlers with seed grain.

Moved by Councillor Lee that Councillor Curlett and Williams represent this district in conjunction with M. D. of Strathcona re endeavoring to have Provincial Government recognize present proposal of building highway from Uncas to Lindbrook along south side of C. N. R.

Moved by Reeve Thompson that lease given Coun. Williams in 1929 effecting north and south road allowance along section 21 and 22 tp.50 rg. 20 w4m be renewed subject to approval of Dept. of Public Works. Carried

The accounts were presented, passed and ordered paid.

Moved by councillor Lee that unless changed at some future date by the council, the second Saturday of each month be set as the day of all regular meetings during the year. Carried.

HOCKEY CLUB MEET

The final 1929—30 season hockey club meet was held this week when the boys gathered together to have their photograph taken

With only minor changes this same group of boys have been playing hockey together for the past five years, and during that period have had many a good time together, which will no doubt be remembered for a long time to come. It is hoped that circumstances will combine so that they will again be together next season. Already plans for the smoother working of the organization are being considered.

This year the team has played 15 games, won nine, lost five, drawn one.

Omitting the forty per cent of gate receipts, the club has received from gates, shows etc. just over $300.00 and will wind up the season just about broke, but no debts. The boys themselves are worthy of some praise Contrary to the common procedure of most small town sport clubs, they have never solicited subscriptions from the townspeople, but rather have always endeavored to give value for money received.

The expense of their trips away was mostly borne by themselves, the club only being in a position to furnish a portion of the railway fare. Incidently this year, the club has been responsible for the turning in of some fifty odd dollars to the town's treasury.

FAREWELL PRESENTATION

On Sunday last, March 30th, the many friends of Mr. and Mrs. Jas. O'Hara gathered at their home to ... appropriate and ... best wishes to them as Mr. and Mrs. O'Hara will be leaving T... Mr. O'Hara having work in Edmonton which will take him and ... into the north country later.

During the past three years in which they have lived among us they have made many friends and taken an active part in work connected with St. Francis Church.

Mr. O'Hara, a most capable and talented musician has been ... in the church and both have been helpful members in many ways.

A dainty lunch was served and [illegible] suitable to the occasion made. Rev. Father Hughes gave a splendid ... which expressed the sentiments of all so ably and perfectly.

Mr. O'Hara replied most fittingly.

A very pleasant afternoon was enjoyed by all and all joined in wishing them the best of good luck, good health and all prosperity, and may the bright and welcome light of deep and sincere friendship ever gladden their way and bring to Mr. and Mrs. O'Hara the joys which their pleasing and charming personalities ever deserve.

TOWN COUNCIL MEETING

A regular meeting of the town council was held on Monday evening March 31st. There were present, Mayor Swift, Councillors Jobb, Taylor, Chapman and Rogers.

A quantity of routine work was transacted, and first and second readings were given to a By-Law setting the rates of taxation for municipal and school purposes, the rates being exactly the same as in 1929.

The annual Court of Revision on the 1930 assessment roll was set for Monday, May 12th, at 8.30 p. m.

THE SELF-FEEDER FOR HOGS

(Experimental Farms Note.)

The practice of self-feeding farm animals is coming more and more into general use. Under this system a continual supply of feed is kept before the animals, enabling them to eat whatever they want, when they want it, and in whatever quantity they desire. Of all farm animals the pig has been found to adapt itself most profitably to self-feeding methods.

The advantages claimed for the self-feeder are that it saves labour and ensures satisfactory gains being made with a minimum waste of feed with both growing pigs and with old sows which are being fattened. It is not so well adapted for the use for feeding brood sows or any other kind of breeding stock that should be kept on less than a full ration.

A self-feeder to be entirely satisfactory must be so arranged that the contents will feed into the troughs without any stoppage caused by the blocking of the meal in the hopper.

The type of self-feeder used with success for a number of years at the Dominion Experimental Station, Lacombe, Alberta, is provided with a movable board secured with thumb screws which enables the flow of feed to be accurately regulated. It is necessary to regulate this board according to the character of the feed used and to make frequent inspections to see that the feed supply is sufficient and the feeder properly adjusted.

Experimental results at Lacombe indicate that the self-feeder when properly constructed and when used in connection with a properly balanced grain ration will not only save labour but will give greater gains and produce the gains with a grain requirement which is not out of line with that required by hand-feeding. Based on a seven year average of results comparing self-feeding with hand-feeding, it has taken 8 per cent more grain to produce 100 pounds increase in live weight when the self-feeder was used than when hand-feeding was practised. On the other hand, self-fed pigs made 19 per cent higher daily gains than those hand-fed, proving conclusively the possibility of preparing hogs for market at a much earlier date when a self-feeder is used. Furthermore, self-fed hogs invariably showed more uniformity of size and more even finishing than those hand-fed, but did not on the average conform quite as closely to bacon standards as did the hand-fed hogs.

A circular giving detailed plans and specifications for the construction of a self-feeder can be secured free of charge from your nearest Experimental Station or from the Publications Branch, Department of Agriculture, Ottawa, Ont.

VARIETY THEATRE

Saturday, April 5th

Richard Dix the star of "Sporting Goods," "Easy Come-Easy Go" is with us again in another of his very clever pictures. This one though, is a baseball comedy-drama, and with spring here we are all interested in baseball, so come around Saturday at 8.30 and see Richard Dix and Jean Arthur do their stuff in "WARMING UP."

YOU'LL LAUGH—YOU CAN'T HELP IT

Also the third Episode of "QUEEN OF THE NORTHWOODS," and it's getting better every time so if you haven't started to follow this Serial yet, this is just the right time to get in.

Saturday, April 12th. Tom Mix in "The Last of the Duanes."

Friday and Saturday, April 18th and 19th. "Abie's Irish Rose."

For Your Convenience

Always desirous of making it more convenient for patrons to deliver their cream we have made arrangements with Mr. George Brace to have cream left at his store where the creamery truck will pick it up twice daily.

Will those desiring to use this service please 'phone the creamery regarding the delivery of their cheques.

The creamery staff is always willing to give the very best of service possible to patrons and respectfully solicit your business.

The Tofield Garage

Under New Management

On April 1st, The Tofield Garage came under new proprietorship and new management.

The new proprietors Messrs Johnson and Patterson are well known to the Tofield public, Mr. Johnson having been connected with the Tofield Garage for the past five years. Mr. Patterson has only been connected with the garage for a short time but is well and favorably known throughout the district, having spent his entire life here.

Both proprietors are practical men and understand the needs of auto and tractor owners completely.

The above combined with the fact that the Tofield Garage is exceptionally well equipped with modern repair machinery, ensures patrons of first class service at reasonable prices.

All Automotive work will be undertaken including high grade jobs such as cylinder regrinding, valve grinding by an electrical machine specially bought for the purpose and all kinds of acetylene welding.

Your patronage is solicited and you may be assured the firm is "on its toes" to serve you.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION

CLEANLINESS

Cleanliness, which is essential to health, is something more than a matter of aesthetics. It means cleanliness within and without. It includes the removal of all waste matter produced in the body, as well as freedom from dirt on the outer surfaces of the body.

If the skin is to function properly, the pores must not be blocked; they must be kept clean by the regular bathing of the body.

It is probably true that a large majority of people do not drink sufficient water. A glass or two of water before breakfast and between meals is a habit which should be cultivated. In this way the required intake of water will be secured and, in addition, the habit will be found to be of very real assistance in overcoming faulty bowel elimination.

Constipation is one of the most common complaints of the human family. It represents self-neglect and failure to develop a habit which can be established if simple rules are followed and persisted in until the regular habit is established.

The most important consideration is the establishment of the habit. The taking of food is a natural time for evacuation is a half-hour after a meal. There is some difference of opinion as to how many movements there should be daily, but there should be one at least. The toilet must be visited at exactly the same hour every day whether or not there is an urge to go.

In addition to the regular toilet habit and the free use of water, fresh or dried fruits should be used regularly. If the bowel is not irritated, the addition of foods containing some roughage, such as cabbage, celery and whole cereals, may help.

It is also necessary that the individual exercise daily. Exercises which bring into play the abdominal muscles are useful. A minimum of daily exercise maybe considered, some as an hour's walk.

The care of the teeth and hands are special points of personal cleanliness. The regular proper use of the tooth-brush to free the teeth of food particles and to massage the gums is required. The thorough washing of the hands before preparing or eating food is one of the most simplest and most practical measures in preventing the spread of communicable diseases.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto will be answered personally by letter.

GETS ROYAL BUMPS, BECOMES INSANE, BARRHEAD STORY

Struggling playfully to get free when four of his friends endeavored to give him the "royal bumps" at a church party at Neerlandia, 16 miles from Barrhead, Thursday night, according to doctors, Lorne Sturweld, 20, fell and struck his head on the floor, became violently insane within a few minutes and is now at the General hospital here where physicians are endeavoring to learn what injury he received to his head. A fracture of the skull is feared.

Sturweld was brought to the city at 6.00 a. m. Friday by Dr. E. J. Verreau of Barrhead who is in consultation with other physicians. An X-ray examination of the youth will be made.

At 3.30 p. m. Friday the patient was still unconscious. He had lost consciousness during the trip to the city.

According to Dr. Verreau, who states that his information of the occurrence is rather meagre, Sturweld was at a church party at Neerlandia when he received his injuries.

There had been some bet among young men it is reported, in regard to the ability to grow the largest moustache and it was during a discussion of this that Sturweld was picked up by four others who endeavored to give him the "royal bumps."

Two were at his head and two at his feet and when the patient struggled those at his head lost their grip and he fell to the floor, receiving a sharp blow, Dr. Verreau states.

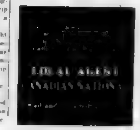
Sturweld appeared to be all right for a few minutes but suddenly became violently insane and it was necessary for six grown men to control him and tie him up for the trip to Edmonton.

Alberta Provincial police will investigate the case.

From later reports it is understood that Sturweld left the hospital on Monday quite recovered from his accident.

OBITUARY

The funeral of John Dean who passed away on March 31st, aged 69 years was held on Tuesday at two o'clock at All Saints Church. Rev. Canon Peirce Goulding officiated and interment took place in the Edmonton cemetery. The pall-bearers were Corporal R. A. G. Baker, Constable J. N. Cormick, F. V. J. MacGillycuddy and R. Broos. Many beautiful floral tributes were received. He is survived by his wife and one son. Mr. Dean was known by many in the district, having visited here many times.



Lower Farming Costs

Reductions in the price of oil and tractors feature this seasons business. The McCormick-Deering Tractor reductions are as follows:

22—36 $75.00 — 10—20 $40.00

LOWER OIL PRICES

The British American Oil reduction is:

Old Price $1.40 per gal. — New Price $1.10 per gal.

For Your Convenience

Always desirous of making it more convenient for patrons to deliver their cream we have made arrangements with Mr. George Brace to have cream left at his store where the creamery truck will pick it up twice daily.

Will those desiring to use this service please 'phone the creamery regarding the delivery of their cheques.

The creamery staff is always willing to give the very best of service possible to patrons and respectfully solicit your business.

THE TOFIELD CREAMERY

The Tofield Garage

Under New Management

On April 1st, The Tofield Garage came under new proprietorship and new management.

The new proprietors Messrs Johnson and Patterson are well known to the Tofield public, Mr. Johnson having been connected with the Tofield Garage for the past five years. Mr. Patterson has only been connected with the garage for a short time but is well and favorably known throughout the district, having spent his entire life here.

Both proprietors are practical men and understand the needs of auto and tractor owners completely.

The above combined with the fact that the Tofield Garage is exceptionally well equipped with modern repair machinery, ensures patrons of first class service at reasonable prices.

All Automotive work will be undertaken including high grade jobs such as cylinder regrinding, valve grinding by an electrical machine specially bought for the purpose and all kinds of acetylene welding.

Your patronage is solicited and you may be assured the firm is "on its toes" to serve you.

The Tofield Garage

Mrs. Hull Passes Away

By Our Ketchamout Correspondent

Mrs. Frank Hull passed away at her home Monday evening, March 31, after a long illness. She was stricken three years ago with a stroke and was unable to walk afterwards but bore her affliction with a true Christian spirit to the end. Mrs. Hull was born at Plano, Illinois, July 29, 1856, and died March 31, at the age of 74 years, 3 months and 29 days. Mrs. Hull came with her husband and family from Iowa 24 years ago and took up a homestead at west Ketchamout district, where they lived until several years ago when they built up a nice home on their farm near the school house. They celebrated their golden wedding some two years ago.

While Mrs. Hull always had a frail constitution she was more ambitious than the average person. She taught school before marriage and was a member of the Methodist church, where she held the position of president of the Ladies' Aid for many years in Iowa. She organized the district R. C. society in war time later changing it to the "Home Improvement Society". She served on the school board for several years and at the time of her death was a member of the U. F. W. A. in fact she was always willing to help any good cause and she will be greatly missed for her kindness and hospitality.

The funeral services was held at the house Wednesday, at 10:30 a. m., where a large gathering was present to pay their last respects. Rev. Gordon officiated. Mrs. Torrie sang a favorite of the deceased, "Will there be any Stars in my Crown". Interment took place in the Tofield cemetery in the family plot beside the body of her own son Clinton. She leaves to mourn her loss her husband two daughters, Mrs. Lois Barnes and Mrs. Edna McBeth of Calgary, one sister Mrs. Olson of Portland Oregon, 12 grandchildren and one great granddaughter, one son and two daughters predeceased her. A large circle of friends extend sincere sympathy to the family.

The pallbearers were: Messrs John McGinitie, C. A. Ingram, J. H. Ingram, Frank Shupe, A. F. Schultz, and G. W. Sears.

Beautiful floral tributes were received, from the family, wreath; U. F. W. A., spray; Missionary Aid Society, spray; and the following friends sent floral tributes.

Mrs. William Mitchell, Mrs Henderson, Mrs. McMullen, Mrs. Chester Coombes, Mrs. G. W. Sears, Mrs. Herman Lawson, Mrs. John McGinitie, Mrs. Henry McGinitie, Mrs. Bruhn, Mrs. J. H. Ingram, Mrs. William Lee, Miss F. Fawcett, Mr. Sam Stirritt, Mrs. W. K. Mitchell, Mrs. Marsh Mitchell, Mrs. Roger Ray, Mrs. John Brown, Mrs. Frank Shupe, Mrs. Henry Sutton, Mrs. Peter Lee, Mrs. Leslie McGinitie, Mr. A. F. Schultz and Mr. Richard Turner.

CARD OF THANKS

Mr. Frank Hull, Mr. and Mrs. Oscar Barnes and Ralph Barnes wish to thank all of their many friends for their kindness and thoughtfulness in their recent bereavement.

On March 28th, 1930, Mr. and Mrs. J. L. Abbott at their home in Tofield Alberta, celebrated their silver wedding Anniversary with a bridge party and dance.

Mr. and Mrs. Abbott are old timers of the Edmonton and Tofield districts. Mrs. Abbott being a daughter of the well known pioneers, Mr. and Mrs. Robt. McKernan, was born and educated in Edmonton. Mr. Abbott will also be remembered as one of Edmonton's old timers.

About two years after their marriage they moved to Vegreville and, staying there for a short time, then decided to try Tofield as a permanent residence, and for 22 years Mr. Abbott has been Tofield's popular barber. Mrs. Abbott always taking her place in the benevolent and social life of the community.

Their only daughter, Clara, now teaching at Edberg, Alberta was home for the anniversary. Relatives from Edmonton present were Mrs. Robert Turnbull, Mrs. Wes McKernan and Mrs. Mason Hunter, Mr. and Mrs. Thos. Carr and son Kenneth motored from Edberg, Alberta Mrs. Carr being an only sister of Mr. Abbott.

The early part of the evening was spent in bridge, the honors going to, Mrs. Bissett, Mrs. A. Agnew and Mrs. Lee, Mr Letourneau, Mr McLaughlin and Dr Law. After a delightful lunch was served by Mrs Abbott, Mr. J. W. Chapman expressed the good wishes of the Tofield friends and as a remembrance presented them with a mirror tray containing Community silver in the Adam pattern.

Many beautiful gifts were received from relatives, daughter, Clara, silver flower basket and roses; Mrs. Robt. McKernan, "mother" Silver cake plate; Mrs. R. Turnbull, bud vases; Mrs. Cushing, of Regina, flower basket; Mrs. Hickey, of Calgary, knife rests; Mrs. M. E. Hunter, coffee spoons; Mrs. Wes McKernan, well and tree platter.

The town guests invited were: Mr. and Mrs. Brace, Mr. and Mrs. Ward, Mr. and Mrs. Pinnett, Mr. and Mrs Hobson, Mr. and Mrs. H. Rogers, Mr and Mrs. Letourneau, Mr. and Mrs. Hammond, Mr. and Mrs. Chapman, Dr. and Mrs. Law, Mr. and Mrs Beirnes, Mr. and Mrs. Clatterham, Mr. & Mrs. Agnew, Mr. & Mrs. Bissett, Mr. and Mrs. McCauley, Mr. and Mrs. Jobb, Mr. and Mrs. Taylor, Mr. and Mrs. Morton, Mr. and Mrs. McLaughlin, Mr. and Mrs. Calvert, Mr. and Mrs. John Lee sr.

Lakeshore

In honor of Miss Emily Ferguson whose marriage took place recently a miscellaneous shower was held at the home of Mrs. W. E. Seale on Saturday afternoon, March 29th. About 45 relatives and friends were present to enjoy a very pleasant afternoon.

For the benefit of the bride a very comical and instructive "Mock Wedding" was staged. In fact it was so real that one of the guests was seen to be sitting over in the corner quietly weeping. This was the source of much laughing and enjoyment. Miss Elenon Weeks gave a life history of Emily Ferguson, this had been very suitably planned to suit the occasion.

Miss Ferguson was then made the recipient of many beautiful and useful gifts among which was a considerable amount of silverware in the Ambassador Pattern.

A very enjoyable lunch was served after which the guests departed wishing Miss Ferguson a long and happy married life.

The home of Mr. and Mrs. T. W. Ferguson was the scene of a very pretty wedding on April 2nd, when their third daughter, Emily Jane, was united in marriage to Ernest Roberge eldest son of Mr and Mrs Albert Roberge. The bride looked charming in a dress of Tabac brown flat crepe with touches of cream and carried a bouquet of pink roses. The rooms were beautifully decorated and after the ceremony which took place at two o'clock a delicious supper was served after which the happy couple left on a short honeymoon by auto. On their return they will reside on a farm near Bawlf. Only the immediate relatives of the contracting parties were present.

We are very sorry to report that Goldie Jacobs has been quite ill with pneumonia. Nurse Wood has been caring for her and we hope that she will soon be enjoying good health again.

Mrs. Jas. Murray and two children left for Biggar, Sask., where they will make their future home, on Wednesday morning after spending several days with Mr and Mrs. T. R. Murray.

Mr. and Mrs. R. C. Phillips entertained a number of friends on Friday evening at bridge. Four tables played and first prizes were won by Mrs Geo. Francis and T. R. Murray and consolations by Mrs. Murray and Mr Jas Secord. Mrs. Phillips served lunch at midnight.

Mr. Ed and Charlie Hazelwood of Coronation spent a few days last week at the T. R. Murray home. The Hazelwoods and Mrs. Murray's late parents were friends of many years standing consequently their visit was much enjoyed.

The young people of the Tiedemann family and Miss Ellen Walker motored to Holden on Sunday and visited at the Chris Tiedemann home there.

Hereafter divine services will be conducted at the school every Sunday at 3 p. m.. Sunday school at 2 p. m.

Easter Musical Program To Be Rendered Here

TOFIELD UNITED CHURCH CHOIR ASSISTED BY EDMONTON SOLOISTS WILL RENDER INSPIRING WORK

For many weeks the choir of the Tofield United Church have been faithfully practising an Easter programme of music which will be presented at the Variety Theatre on Tuedsay, April 15th.

It is many years, if ever, since such a meritorious programme of Easter music was rendered by a Tofield choir, and there is no doubt the welcome accorded the announcement of the rendering of the programme will be sincere and hearty.

Assisting the choir of twenty-eight voices will be vocalists of outstanding ability from Edmonton, and the announcement of the programme creates pleasureable anticipations. Vocal solos, duetts, trios and chorus renderings will be given, all telling the wonderful Easter Story.

The impressive cantata, "The Thorn Crowned King" by Holton, opens with a chorus jubilant faith in God, reciprocating God's love to man. A young maiden sings of Jesus' devotion to mankind issuing in the death on Calvary. "Twas all because he loved us so." Men question was there no alternative for Jesus but to die to save mankind and make answer, "There was no other way".

The thrilling tenor solo supported by the chorus telling of the betrayal must quicken even the most hardened. The trial scene with its jeers and its scoffings is redeemed by a woman's exultant avowal of faith and life devotion to Jesus as her Lord and King. Then the voice of Pilate bargaining to release Jesus is drowned in the mob's unfeeling "Crucify Him", followed by the quiet dignified bearing of the Cross to Calvary.

The expression of grief by a tripple trio of women's voices is one of the best arrangements. The story of the burial brings to a close part one, "The Crucifixion."

After the tense and solemn part one of the cantata, part two, "The Resurrection", gives two diciples expression of faith, followed by a bass solo and chorus trumpeting the fact of the resurrection. A big bass booms out the fact that Christ has arisen. The devoted women in the garden tell the story of Jesus' appearance and the consequent joy to them. All nature seems glorified. Then a double choir number reiterates the astounding fact that "Jesus Lives" until there is universal acclaim because the impossible has actually occurred.

Then is a universal paean of praise the chorus and orchestra put forth their ascription to God.

PROGRAMME

Solo "O Come to my heart Lord Jesus"! Mrs. Brink

(Gold Medalist Alberta Musical Festival)

Cantata, Part I. "The Crucifixion".

(Time One Hour)

(Intermission five minutes)

Duett "How Sweet the Name of Jesus Sounds"

The Stumbling Block

Whatever may be the outcome of the naval conference in session in London, and at the time of writing it is still problematical and obscure, the fact that leading statesmen of the world, engrossed as they are, with many domestic and other problems, and carrying heavy responsibilities, have for months doggedly persevered in their efforts to find common ground upon which a reduction of armaments can be brought about, is, in itself, one of the most hopeful signs for world peace.

Not many years ago such a conference would have, long ere this, broken up in an open confession of failure, with national feelings more embittered than ever and a still more feverish renewal of warlike preparations on the part of all nations. Even if the present conference does not succeed in reaching a formal and unanimous agreement, the persistency, the intensity with which those participating have sought for a solution is encouraging and full of hope for ultimate future success.

The proceedings of the conference as they have dragged along week after week, have proven the sincerity of the statements made by the various representatives at the opening session, namely that they and the governments they represent are keenly desirous of reaching an agreement, that [illegible] make future wars impossible, that they believe in the [illegible] the Kellogg peace pact, and to that end are willing to [illegible] sacrifices to achieve a reduction in armaments and [illegible] the possibilities of war and of the burden of [illegible] their people.

[illegible] has been demonstrated over and over again. [illegible] formula or plan was found to be unacceptable to any [illegible] one nation, the others sought for amendments that would [illegible] the objections raised. When the objections urged were found to be insurmountable that formula or plan was discarded and something different brought forward. Step by step, in sub-conferences innumerable, by direct [illegible] between those countries which were farthest apart in their [illegible] were gradually overcome.

But how much has been accomplished, the world does not yet know: [illegible] of a really definite nature. But the whole effect has been [illegible] beyond all question that the nations now understand and [illegible] each other's viewpoints and difficulties better than ever before, [illegible] evident that the negotiations have been conducted with [illegible] and yet with an absence of that bitterness and ill-feeling [illegible] years. Whatever the present outcome the way, we [illegible]

[illegible]

Noted Flier Performs Thrilling Exploit

Australian Ace Forces Machine To Rise In Forest Clearing

Captain Charles Kingsford D. Smith, the Australian ace who flew from the United States to Australia in 1928, has just performed one of the most thrilling exploits of his career.

He is now the director of an air line. Recently when one of the company's triple-engined machines made a forced landing in a forest clearing near Bonalbo, Northern New South Wales, it seemed that the 'plane could be moved only by being dismantled.

Smith went to the scene, repaired the damaged under-carriage, tied the 'plane's tail to a tree and set his engines going full speed. When the machine lifted from the ground a farmer cut the rope and the 'plane flashed away like a rocket.

Even then the straining 'plane, bucking like a broncho, could barely rise above the towering forest trees. A topmost bough tore the fabric from underneath the fuselage and the machine trembled like a wounded bird, but it kept up and Smith got it safely to the airdrome.

A TIRED FEELING IN SPRINGTIME

Not Sick, But Not Up To the Mark—You Need the Help Of That Sterling Tonic, Dr. Williams' Pink Pills—They Give New Vitality.

With the passing of winter many people feel weak, depressed and easily tired. The body lacks the vital force and energy pure blood alone can give. In a word, while not exactly sick, the indoor life of winter has left its mark upon them. A blood-building, nerve-restoring tonic is needed to give renewed health and energy. Dr. Williams' Pink Pills are an all-year-round blood builder and nerve tonic, but are especially useful in the spring. Every dose helps to make new rich, red blood and with this new blood returning strength, cheerfulness and good health quickly follow.

No medicine to take—you simply inhale the soothing fumes of Catarrhozone and get well. That grippy, neuralgic headache passes away. Nose and throat are cleared of offensive discharges. Catarrh, nose colds, coughing and spitting come to an end when you use Catarrhozone. It is safe, reliable, sure to eradicate your cold. Get Catarrhozone from any druggist. Two months' treatment, $1.00, small size, 50c.

Catarrhozone A Ten-Minute Relief!

Drummond Was a Telegrapher

Recalls When Well Beloved Habitant Poet Held Down Night Trick

Dr. Drummond going out into the parishes of ancient Quebec, attending the sick, listening to old stories and songs, with his eyes and ears always open and his sympathy tuned to catch the simple life of the habitant in its many phases, is a familiar figure in Canadian literature. Not so well known is the Drummond of the seventies, before he wrote "Li'l Bateese," "The Wreck of the Julie Plante" and the other ditties that have become so well-beloved. In the seventies, Drummond was an undergraduate at McGill College, studying medicine and attending lectures all day and at night operating a telegraph key.

"Bill held down the same trick on the Associated Press wire as I did later on," says Thomas Rodger, special representative of the Canadian National Railways' telegraph and telephone department, who has just [illegible]

[illegible]

Standing Up Under Loss

Takes More Than Market Crash To Down Canadians

During the recent market crash, paper losses sustained by Canadian listed and unlisted stocks amounted to more than $5,000,000,000. This is more than double the gross funded debt of the Dominion, or $86 per capita.

And yet, with a loss of more than five billion dollars, the people of Canada can go about their business with little more than the embarrassment of feeling sheepish over being had.

The truth is that no stock crash can knock the props out from beneath a country that has trillions of dollars in natural resources, both mapped and uncharted.

The mines alone of this Dominion are worth more than the total resources of Germany, France and Italy. Our forests and fisheries have more latent wealth than the combined wealth of all the Balkan states.

Our annual exportable wheat crop is worth more than the goods that Spain has produced for export in the past fifty years.

That is why Canadians can take a little financial blow of $5,000,000,000 without feeling it.

Some country!

Natives Of Canada Go Abroad

Wainwright Buffalo Find a New Home In Adelaide, Australia

Jupiter and Tuxis and Casper, the three Wainwright bison presented to Adelaide, Australia, by the Canadian Government, reached their new and far distant home in the pink of condition, and are now well settled between the yaks and the African buffalo, according to word received from Australia. On the gate of their enclosure has been fastened a brass tablet bearing the word "Buffalo from Wainwright Park, Alberta, Canada. Canadian National Railways, donated by the Dominion of [illegible]."

Linking Canada and Britain

British Post Office To Provide Direct [illegible]

Canada and Britain are to be linked by direct wireless telephone. The House of Commons recently debated the respective merits of the Marconi and the British post office wireless systems. Hon. H. B. Lees-Smith, postmaster-general, revealed that the Canadian government had expressed a desire for direct service.

The direct service will be provided by the post office. Arguing the general merits of the post office system as contrasted with Marconi, the postmaster-general said the lower costs of its aerials enabled it to give three wave lengths to each Dominion. The Marconi system provided two to most of the Dominions and only one for Australia.

Topographical Map of Humboldt

Interesting Facts In Connection With Early History Of the West

Few people can resist the fascination of a modern map with its implication of travel and appeal to the imagination.

Particularly fascinating are the maps of Western Canada where changes are swift and continuous. A case in point is the Humboldt Sheet of the Sectional Map of Canada, embracing 4,300 square miles of central Saskatchewan between townships 33 and 40, ranges 15 to 29, west of the second meridian, of which the 7th edition since 1902 is now off the press of the Topographical Survey, Department of the Interior.

In very early days in the West, people travelled almost wholly by water. As the Humboldt area lies nearly forty miles from any water route it remained an unknown land except for occasional winter travellers until the construction in the '80's of the main line of the C.P.R. to the south, when Humboldt telegraph station became the half-way point on the stage route between Qu'Appelle and Prince Albert.

On his way north to survey a portion of the Arctic coast, in December, 1836, Thomas Simpson travelled diagonally across this area. His approximate course across the country is indicated by the line of the Canadian National Railway northwesterly. Taking observations by the way, as did most of those early explorers who had a working knowledge of surveying, Simpson appropriated the cariole intended for him for the carriage of his books and instruments, travelling himself all the way to Athabaska on foot.

Quill lakes, on the southeast corner, 1708 feet above sea level, he refers to as "Lac aux [illegible]" and informs us that they derived their name from the multitude of wild fowl that moulted there every summer. The portions of these lakes falling within the mapped area cover seven townships and have been reserved for a Bird Sanctuary, together with [illegible]

... the roses, marigolds, golden rod, lilac bergamot, white tansy, bluebells, harebells, and asters in such a profusion of colour that his impression was of an earthly paradise, but he says sadly, "Where hundreds of homesteads shall yet be, there is not one!" Yet the new map now shows on the area 4,270 buildings exclusive of the towns and villages.

Those were [illegible] of great buffalo hunting expeditions from Red River, when hundreds of people travelled together in a picturesque brigade, the men riding, the women driving the Red River carts, and the children general "Chores" for the women. Captains and policemen were elected to preserve order, outposts set, laws made for the hunt and strictly enforced by fines or the destruction of the clothes and accoutrements of the offender, or by expulsion from the brigade. A hunt over this very country has been vividly described as like the assault of light cavalry on an innumerable foe, the dark moving sea of numberless buffalo. Even a few years ago there were traces of the buffalo brigade camps where the women and children prepared the dried meat and pemmican and dressed the hides [illegible] a slaughter which did not cease until all the carts were well filled, when the little army returned home. Curiously enough many of the [illegible] have been built along the travellers' [illegible] of early days. These in turn followed roughly the buffalo trails which were never far from water and thus tended to seek the lowest level.

By 1879 another traveller describes meeting train after train of Red River carts with freight going westward heavily laden with supplies for the new settlements in the Prince Albert, Battleford and Edmonton districts, or returning empty to [illegible]. [illegible] day, places that had been the camping grounds of others were passed, the square of soil dug by the careful freighters that formed a fireplace, the ridge poles left lying on the ground, the ashes of campfires and little enclosures ten feet square where smudges had been made against the assaults of the ubiquitous mosquito. Incidentally he mentions that the telegraph line having been [illegible]

[illegible]

W. R. DEVENISH

General Superintendent of the Canadian National Railways, Edmonton, who has been appointed General Superintendent of the Manitoba District, with headquarters in Winnipeg.

Requires Some Solving

Question Of Supply and Demand In Front Class Problem

At the present time it is said that there is too much wheat in the world, too much wool in the world, too much coffee in the world, too much rubber in the world. There is so much of each that the world price is affected, which means that the people who produce coffee, rubber, wool and wheat are not getting a price that is considered profitable.

What is to be done about it? The articles referred to are regarded as necessities in the modern world and yet the demand for them is not sufficient to keep the price at a level that is required to meet costs of production.

At one time in the world's history a gentleman named Malthus predicted that if the number of the people in the world were not kept to a certain level there would not be enough food for all, and the human race would face starvation. He urged the limitation of population. [illegible]

[illegible] Turkey Stock

Turkey Approval and Banding Campaign In Saskatchewan

Recently compiled records of the 1929-30 turkey approval and banding campaign, conducted by the Poultry Division of the Saskatchewan Live Stock Branch, reveal that 2,172 turkeys were approved and banded. Despite the fact that a number of the birds were down in weight because of the poor growing season last summer, the results show a very logical improvement with respect to the number of birds graded as "A" or "B" with a corresponding decrease in the number of grade "C" birds.

Many breeders have disposed of all the approved turkeys which they had for sale. A few breeders are offering at greatly reduced prices, some good turkeys which are capable of improving the type, conformation and plumage markings of many flocks throughout the province.

For information as to the location of these turkeys, together with prices, those interested may communicate with W. H. McLellan, secretary-treasurer, Saskatchewan Turkey Breeders' Association, Poultry Division of the Provincial Live Stock Branch, Department of Agriculture, Regina.

Have Made Good Progress

Reindeer Herd Will Remain In Northern Alaska During Summer

The drive of 3,000 reindeer from the west coast of Alaska, eastward, to the delta of the Mackenzie River, in the North-West Territories of Canada, is progressing favorably, and in March the herd was expected to reach the basin of the Colville River, in northern Alaska, where it will remain during the coming summer, resuming the movement in October. A word of the progress of the reindeer purchased by the Dominion Government, was brought by Mr. A. E. Porsild, of the North-West Territories and Yukon branch of the Department of the Interior, who recently returned [illegible] Alaska. While in the north, Mr. Porsild selected the animals to be included in the movement, and [illegible]

Strong Minded Children Choose Careers Early

And Usually Stick To Their Decision Says Educationist

"When I grow up, I'm going to be a p'liceman an' wear a fur coat an' walk around an' take down license numbers."

So maintains the boy next door. Or average little boys, for that matter.

"An' when I grow up, I think I'll be a nurse, so's I can help give the babies their bath," returns the little girl next door.

Down in New York, lives an educationist, one Professor Harry Dexter Kitson, of Teachers' College, Columbia University, who maintains that such a speech, from a strong-minded child, indicates that in all probability the child will abide by his decision when grown up.

Dr. Kitson recently completed a vocational study in New York which showed that 14 per cent. of policemen and 12 per cent. of nurses decided upon their [illegible] age of 12. His study revealed that although most boys and girls have no vocational interest, the few who do make early [illegible] fairly closely to them when they [illegible].

"We should not expect most immature persons to have an interest in any particular vocation," Dr. Kitson maintains.

Other results showed that nurses are far more interested in their profession than teachers. This was discovered by submitting to nurses a question used several years ago to test the teachers. They were asked what activity they would devote themselves to if they had a million dollars and did not have to work. The answers to this question, correlated with a mathematical scale of interest, showed that 33 per cent. of nurses had a maximum interest in their work as against 19 per cent. of teachers.

It was found that the ages at which interest cropped out in policemen and nurses with regard to their eventual life's work varied from three to 24 years, with the largest [illegible]

Canada Week In Bristol

People Of British Isles Becoming More Familiar With Canadian Products

Mr. Douglas S. Cole, Canadian Government Trade Commissioner stationed at Bristol, has evidently left no stone unturned to make the special "Week" planned to give the housewives of Bristol an opportunity of becoming more familiar with Canadian food products a success. This special "Week" terminated on Saturday last and, according to the "Evening World," it was successfully inaugurated by the Lord Mayor of Bristol, who, together with other civic officials, members of the Press and the Bristol Provision Trades Association, were guests of the Canadian Government at luncheon at the Grand Hotel.

Early in the week, Hon. Mr. Buckle, Minister of Agriculture for Saskatchewan, wired as follows to Mr. Cole:

"In Saskatchewan we are greatly interested in your efforts to increase the sale of Canadian farm products in the West of England, and express our appreciation. In the forward development of our agricultural policy recognition is given to the fact that high class products as well as volume are demanded in the markets of the British Isles, and it is our ambition to meet such requirements. Reciprocal trade within the Empire is a most worthy objective and we [illegible] highly successful for all concerned."

To which Mr. Cole replied:

"Many thanks for cabled good wishes. Over 400 Bristol stores will be stocking, displaying and selling Canadian food products during coming Canada Week. Every co-operation received from Lord Mayor of Bristol, wholesale and retail trade associations and other bodies."

The Bristol Times and Mirror has the following to say:

It seems that Canadians with two or three hundred years' experience of bottling food, have found tens of thousands of people in this country [illegible]

Back To Civilization

Deprived Of Its Comforts People Realize How Wonderful It Is

"The men of the Byrd Antarctic expedition scattered all over Dunedin," writes Russell Owen, staff correspondent of the New York Times, "revelling in the shops, walking the hard pavements with joy at the unaccustomed sensation of not sinking in at every step, eating enormous meals and generally having the time of their lives. It seems too good to be true to be ashore again and dodging automobiles." And lolling in barbers' chairs, no doubt, and luxuriating in hot baths, and commanding bell boys to do trivial errands, and declining all drinks made with ice, and watching the sun go down at night. It is somewhat pathetic indeed, to read of the delight which can be caused by these prosaic things that have become so commonplace to the rest of us, somewhat chastening too, for it serves as a reminder that we should not take our civilization too much for granted. Even at Thanksgiving time, we are somewhat mechanical with our gratitude for the blessings to which we have fallen heir, but if some turn of events were to deprive us of these blessings, as the men of the Byrd expedition have been deprived of them for the last year, we should realize pretty quickly that even food, clothing and water are things that have been wrested from the earth by painful labor and that it is a dreadful hardship to be without them. The main objects of the expedition, of course, have already been attained, the game has been won, the goal posts torn up, and we witness merely the return of the team to its own home campus. Yet so far as many of us are concerned, this return trip may provide more food for thought than the scoring itself. What is more stimulating than the discovery that the humdrum world we live in may after all have a touch of the miraculous about it?

W. I. MUNRO

Superintendent of the Portage Division of the Canadian National Railways, Winnipeg, who has been appointed General Superintendent of the Alberta District with headquarters in Edmonton.

Saskatchewan Will Fight Cancer Scourge

Legislation Provides For Commission To Administer Act and For Diagnostic Clinics

Saskatchewan, first of Canadian provinces, has made preparations to tackle the growing menace of cancer as a public health problem.

The necessary machinery is provided in a Bill to establish a permanent Cancer Commission in the province, which has just been passed by the Saskatchewan Legislature. In this advanced legislation, Hon. F. D. Munroe, M.D., Minister of Public Health, in the Co-operative Government, has enhanced the already high prestige of Saskatchewan in matters pertaining to the public health. Incidentally, too, he has, thus early in his ministerial career, ensured himself of a permanent niche in Canada's hall of medical fame.

In piloting his first major legislation through the House, Hon. Mr. Munroe emphasized the necessity of co-ordinating efforts and providing the means to combat the scourge. Backing his arguments with a wealth of statistical information, the minister emphasized the fact that a comprehensive anti-cancer programme must provide three main features. The education of the public, facilities for diagnosis and the means for treatment. All three factors are provided for in the new Act.

Stressing the importance of the educational factor, Hon. Dr. Munroe declared that "the one great handicap under which all physicians labor at the present time is the delay on the part of the patient in consulting them." Early diagnosis and treatment were essential requirements of a successful campaign, he added.

Provision is made in the Act for the establishment of consultative diagnostic clinics in the province wherein facilities will be provided for early diagnosis of the disease. Then in order to overcome the prohibitive cost of radium required for treatment, statistics relative to the efficacy of which were cited, the Act provides for the purchase of a quantity of radium by the Government.

In discussing this phase of the matter Dr. Munroe stated that "radium is used in the treatment of cancer in two ways. In the great majority of cases the radium salt is used in various types and forms of containers and needles, but there is also a field for its use in the form of gas. The gas is collected from a quantity of the radium salt in solution, into very minute tubes of gold, called 'seeds.' A somewhat elaborate apparatus is required to generate and purify this gas and, as well, to collect it and regulate the dosage in each seed."

The minister then stated that it was proposed to establish an emanation plant of this nature at the University of Saskatchewan, whenever there was assurance of a sufficient demand for the gold seeds to keep the plant in operation. Dr. Munroe stated, in this connection, that medical [illegible] neighboring provinces and in Alberta already had informed him they would welcome the opportunity of procuring these seeds. The Act also makes provision for the regulation of the sale of radium emanation [illegible].

Operation of the Act will be assigned to a permanent Cancer Commission.

One and one-half grammes of radium will be procured, according to present intentions, at a cost of $105,000 to $115,000. It is not, however, the intention that the diagnosis and treatment of cancer will be a free service, but definite assurance was given by the Minister that the charges would be reasonable and that provision would be made so that "everyone may receive the necessary service able to pay for it or not."

B.C. Fishing Regulations

Complete revision of the fishery regulations for British Columbia has been adopted by an order in council of the Dominion Government and a number of important changes in the regulations have thereby been made, says a statement issued by the fisheries branch. Under the constitution the right of making fisheries regulations for all the provinces rests with the Dominion authorities.

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with belching, from sour and acid stomach? Many believe they have heart trouble and tremble with fear, expecting any minute to drop dead. This condition can be prevented, likewise relieved.

Take Carter's Little Liver Pills after meals and neutralize the gases. Sweeten the sour and acid stomach, relieve the gas and encourage digestion.

The stomach, liver and bowels will be cleansed of poison, painful and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c pkg of Carter's Little Liver Pills.

Would Save Millions

Many Simple Forms Of Waste Could Be Stopped

How much water is wasted by a dripping tap? An answer was provided when New York decided to levy a fine of two dollars for every tap found leaking. In two years 40,000 million gallons of water were saved. It seems absurd to worry about the amount of steam wasted when a locomotive blows a whistle. But Dr. Foley of Indiana University, has calculated that 2,484,036 tons of coal are consumed annually in generating steam to blow United States locomotive whistles, and that if the whistles were moved slightly forward and adapted to a single high-pitched note, more than a million pounds a year could be saved. But this loss is small compared with that involved in throwing into the dust-bin cinders that would still give a lot of heat. It is estimated that a third of the cinders thrown away retain from forty to seventy per cent. of their heating value.

Recipes For This Week

(By Betty Barclay)

COURT BOUILLON

2 cups cold water
2 slices carrot.
1 slice onion.
1 sprig parsley.
2 tablespoons lemon juice.
Bit of bay leaf.
¼ teaspoon peppercorns.
1 teaspoon salt.

Put ingredients in saucepan, adding head and bones of fish, if at hand, bring to boiling point and cook thirty minutes, or until reduced to one cup. Use for sauces, fish aspic, to flavor the water in which fish is cooked, or as a foundation of a fish soup.

MARSHMALLOW WHIP

1 package strawberry flavored [illegible]
1 cup boiling water
1 cup cold water or fruit juice.
6 marshmallows, finely cut.

Dissolve gelatin in boiling water. Add cold water or fruit juice. Chill. When slightly thickened, beat with rotary egg beater until like whipped cream. Add marshmallows. Pile lightly in sherbet glasses or pour into mold. Chill until firm. Serves 6.

SUNDAY SCHOOL LESSON

APRIL 6

THE LAW OF THE CROSS

Golden Text: "If any man would come after Me, let him deny himself, and take up his cross, and follow Me."—Matthew 16.24.

Lesson: Matthew 16.13 to 17.27.

Devotional Reading: Isaiah 53 7-12.

Explanations and Comments

The Law Of the Cross, verse 21.—Before this Jesus had referred to his approaching death (Matthew 9 15, John 2 19-22, 3 14) but from now on He spoke plainly about it, declaring that He must go to Jerusalem, there to be ill-treated by elders and chief priests and scribes, and be put to death. "He must die because He would save. The great 'must' which ruled His life was a cable of two strands: obedience to the Father, and love of man. These haled Him to the cross, and fastened Him there. This verse covers an indefinite time, during which Jesus gradually spoke about His coming sufferings. Ordinarily we exaggerate the suddenness and therefore the depth of Peter's fall, by supposing it took place immediately after his confession."—Alexander Maclaren.

"And the third day to be raised up." "The Evangelists, indeed, write it down in plain language, as fully taught by their later experience, that He was to be rejected by the rulers of Israel, slain, and to rise again the third day. And there can be as little doubt that Christ's language (as afterwards they looked back upon it), must have clearly implied all this, as that at the time they did not fully understand it. Otherwise they could not afterwards have been in such doubt about His death and resurrection. He was so constantly in the habit of using symbolic language, and had only lately reproved them for taking what He said about 'the leaven' in a literal, which He had meant in figurative sense, that it was but natural they should have regarded in the same light, announcements which, in their strict literality, would seem to them well-nigh incredible. They could well understand His rejection by the scribes as a sort of figurative death, or violent suppression of His claim and doctrines, and then, after briefest periods, their resurrection as it were, but not those terrible details in their full literalness."—Alfred [illegible].

The Law Of the Cross For All Disciples, verses 24-26. Then Jesus said unto His disciples, "If any man would come after Me, let him deny himself, and take up his cross, and follow Me." Not only must Jesus, Himself, endure the cross, but Peter (and all true followers) must be ready to deny himself, yield his will to the Master's, and take up his cross, accept the persecution in store for him, and follow his Master.

Will Not Claim Land

In an interview, Rear Admiral Richard Evelyn Byrd said that he had no intention of claiming for the United States the new Antarctic lands he had discovered. He declared that the newly found land in the Antarctic was for the world as much as for his own country.

Horror Of the Sea

Natives Of Australia's Barrier Reef Terrified Of Stonefish

Though beautiful to look at, Neptune's gardens are full of tragedy. There the struggle for existence is keener and more violent than on land (writes a contributor who describes the wonders of Australia's Barrier Reef). The stonefish is a dreadful thing inhabiting the coral gardens, and so closely does it blend with its surroundings that it is difficult to distinguish it. But the lightest touch causes 13 horrible, poisonous spikes to discharge a deadly venom into its victim, who endures an agony that is only relieved by delirium or death. In 19[illegible], Dr. J. L. Wassell, quarantine and health officer for Queensland, trod upon a stonefish while walking on the barrier. The spikes penetrated his boot and went into his foot. He lingered in torture for three days and died. Before that time little was known of the stonefish except by the natives. They always hold the creature in horror. So greatly do they fear it that they make models of it in wax and teach their children to watch for it and avoid it.

Judged By Their Work

Something Wrong When People Zig Zag, Says Doctor

I was recently walking with a doctor who makes nervous diseases his specialty, writes a correspondent. He said "Look at this woman in front of us. Watch how she zig-zags this way and that. She doesn't keep a straight course for a dozen steps at a time." I watched, it was as the doctor said. He went on to tell me that a great many women and some men walk in this way. "It indicates weakness of purpose, indecision, a restless temperament. If people walk straight, they probably think straight," the doctor said. "A walk like that is a symptom of something wrong. It's a symptom a great many people display."

The Problems Which Confront Agriculture In The West Now Are Vitally Aggressive

Prof. W. W. Swanson, M.A., Ph.D., professor of economics at the University of Saskatchewan, addressed members of the Canadian Club at a luncheon in Regina recently. Dr. Swanson took as his subject, "Wheat and Changing Agriculture."

"I think we should think less of our cherished principles as to how we can organize the life of the world on a co-operative basis and come back to hard realities," Dr. Swanson declared. He suggested the establishment of a wheat council or body composed of men representing the private individual as well as members of the Wheat Pool to determine a selling policy which would give the farmers the greatest net returns for what they produced from the soil.

"It is the duty of all of us to attempt to strengthen and maintain the morale of the Wheat Pool, to get the farmers behind this selling agency, because if it should collapse at this time, it would be fatal to the economic life of the west," he continued.

Describing wheat as the life-blood of commerce, the plasma of society, Dr. Swanson deplored the tactics of pessimists who were destroying the morale of the country rather than attempting to build up the strength of the faith of the community in wheat possibilities.

"I believe it is a good deal more important to explore all avenues of co-operation in our own country before we turn to the foreigner," Dr. Swanson remarked in stressing the importance of securing the best business brains and abilities to be placed at the disposal of the farming community."

[illegible] confronting agriculture in the west today were vitally aggressive, according to Dr. Swanson. A profound change had come over the texture of economic life, due to the introduction of power on the farms, the [illegible] of the farms and the spread of the "city point of view" and [illegible] of the country.

"The agriculturist [illegible] a battle today in which every ounce of courage, energy and morale is required to achieve success," Dr. Swanson pointed out.

The fundamental effect on marketing in Canada of what occurs in the wheat markets of the United States was outlined by Dr. Swanson, who saw in the artificially built up co-operatives of that country the creation of a wheat surplus in that republic which, in turn, would affect the Canadian markets.

"Never under any circumstances can we avoid the factors of demand and supply. Problems we face in Canada are only part of a world-wide problem," Dr. Swanson asserted. "We must analyze the factors of demand and supply so that we can build up a marketing structure of stone and iron rather than straw."

Pleading that a bond of sympathy be established and strengthened between the men of the soil and the city-bred, Dr. Swanson also urged the maintenance of a rural point of view. "Our wishes, our hearts and our hopes are bound up in the rural point of view. If we lose this vision, we lose all that the pioneers of this west have built up."

Dr. Swanson saw, not the tragedy of wasted natural resources, but the waste of human life on the farms in the boys and the girls who were not to get an education this year, an opportunity to broaden themselves spiritually, traceable to the economic conditions of the country today as affecting agriculture.

The loyal marketing of wheat based on the real price of the world and the staunch support of the men who believe in the west, would build up the type of democracy required, in the opinion of Dr. Swanson.

Guest: "Why are you smelling every drop of coffee?"

Host: "I put myself a drop of rum in one and have forgotten which."—Sondagsnisse-Strix, Stockholm.

Had Satisfactory Year

Western Canada Increased Dairy Production In 1929

Western Canada experienced a very satisfactory year with respect to dairying during 1929 according to annual returns now being made. Manitoba had an increase in production of creamery butter of more than 1,000,000 lbs., Saskatchewan records an increase in the same line of 30 per cent., while Alberta had an increase also of more than 1,000,000 lbs. Total value of all dairy products in the three western provinces for the year was $57,630,000. Alberta experienced the best year since 1924 in this respect with a total dairy products value of over $30,000,000. Saskatchewan's total was $21,962,000 and Manitoba's was $14,307,000. In eleven of the large exhibitions held throughout Canada during the past year, the prairie west captured 80 per cent. of all first prizes in butter, and 86 per cent. of all prizes, over half of which came to Manitoba.

Kootenay National Park

The Kootenay National Park in the province of British Columbia is unique among the other Canadian reservations. It was created originally, not so much for its own sake, as to preserve, in perpetuity, the beauty of the natural landscape and the charm of native animal and plant life along the route of the Banff-Windermere highway, the first motor road across the central Canadian Rockies.

Canada Won Second Place

King's Trophy For Rifle Shooting Efficiency Goes To South Africa

South Africa won the King's trophy of 1929 for rifle shooting efficiency. More than 60,000 boys in all parts of the Empire competed.

Canada ranked second, closely behind South Africa, while Great Britain came third and New Zealand fourth. Australia did not qualify.

The results were announced by the National Rifle Association recently after careful compilation of the thousands of scores. It is the fourth South African victory out of five years.

The minimum number of boys competing in each Dominion is 2,000. South Africa scored 83.3 per head out of a possible 100. Canada stood second with 80.2 and Britain in third place was far behind with 68.5. The New Zealand average was 66.5. Australia showed only 1,388 boys competing.

The number of competitions was 40,130.

The National Rifle Association announced "Canada's excellent average showed an increase on her previous score of 2.6 per fiver. The Dominion possesses a much larger number of really expert shots than any [illegible] country, and indeed, as many marksmen and first class shots as the winners, but the standard of mass proficiency is for similar numbers, below South Africa, although it shows marked improvement annually."

Canada has 73 silver and 172 bronze medals of honor, awarded to individuals making scores of 100 or 99 (silver), and 98 to 97 (bronze) respectively—a number in each case far in excess of the aggregate won by other Empire competitors and amateur competitors.

Famine Conditions In China

Three Hundred Tons Of Beans In Transit Which Will Save Lives Of Two Million People

Three hundred tons of beans, now being delivered for shipment from Shansi Province to the neighboring province of Shensi, in the famine-[illegible] area of North [illegible] China, will save the lives of two million people, officers of the China famine relief have stated.

Over an area of about 450,000 square miles, embracing five provinces and a population of about 30 million, relief workers are struggling against what is described as the worst famine China has known in 70 years. Eight million dead is the toll which hunger has taken in the past two years during which famine has been continuous and growing.

Crop failure occasioned by drouth and aided by revolution and banditry which drew men away from the business of insuring a proper food supply, brought millions face to face with slow but certain annihilation. Figures in the story of the disaster are computed from the estimates of missionaries, press correspondents and agents of the relief committee, who have travelled extensively through the stricken area.

In a country where facilities for communication were so slow that 200,000 persons were killed in ten minutes by an earthquake without the rest of the world being aware of the fact, relief work is rendered most difficult, Dr. S. Parkes Cadman, chairman of the national committee, explained to the Canadian Press.

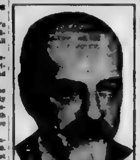
Astronomy Master: "Williams can you give me the name of any star that has a tail?"

Williams: "The only one I know is Rin-Tin-Tin."

Vessel Awarded Shield

Judged best of the Canadian Pacific's Empress fleet on the Pacific in boat, fire, life service and collision drills, and in general orderliness and smartness, H.M.S. Empress of Russia, Captain A. J. Hosken, R.N.R., has been awarded the Canadian Pacific Steamships Shield for safety and efficiency. The trophy is awarded annually for ships plying the Pacific Ocean only. In the photograph it is being presented by Captain E. Aikman, general superintendent of Canadian Pacific Steamships, to the "Russia's" commander. The ship is a familiar vessel on the Vancouver-Victoria-Honolulu-Orient service. Shield is shown in inset.

Grand Duke's Tour



The religious consciousness of the great nations of the world is awakening to the evils of the Bolshevist regime in Russia, according to Grand Duke Alexander, who is making a lecture tour of Canada and the United States. Travelling over Canadian Pacific, his tour in this country will include visits to Winnipeg and Vancouver and from the latter city he will go south to California and thence back to New York. In the two seasons he has been lecturing he has delivered 52 addresses in 32 Canadian and American cities.

Prizes For Good Seed

Saskatoon Board Of Trade Announces Interesting Competition

To encourage the growing of good seed, and to stimulate efforts to produce prize-taking exhibits for the World Grain Show, at Regina, in 1932, the Saskatoon Board of Trade, has announced a $250 competition for wheat grown in 1930, to be exhibited some time during the winter, possibly at the 1931 winter fair. This will be open to farmers within a radius of 50 miles from Saskatoon.

The grain for this exhibition must be grown from third generation No. 1 Marquis, supplied by the board. Not less than six bushels will be supplied to any one farmer, and the price will be $1.95 per bushel f.o.b. Saskatoon.

Applications for seed should be sent immediately to Commissioner J. H. Holmes, at the Board of Trade offices.

Prize money will be divided as follows: First prize, $75; second, $50; third, $40; fourth, $35; fifth, $30; sixth, $25; seventh, $20; eighth, $15; ninth, $10; and 10 successive prizes of $5 each.

Indians and Eskimos

Easy To Distinguish Between the Two Races, Says Minister Of the Interior

Who shall decide who are Indians and who are Eskimos? This was the question asked by Sir George Perley, (Cons., Argenteuil), when the bill to amend the Indian Act was before the House of Commons. The bill amends the Indian Act to meet the change whereby Eskimo affairs were transferred from the superintendent general of Indian affairs to the commission of the North West Territories. Hon. Charles Stewart, Minister of Interior, thought it was easy to distinguish Eskimos and even the most northerly Indians. The appearance of the Eskimo and language both distinguished them from the Indians.

"Is your wife shy about telling her age?"

"Very—about ten years shy."

General Currie Presents Strong Case For Great War Veterans Before Committee At Ottawa

The War Veterans' Allowance Act was social legislation, while the Pensions Act was a contractual relationship between the people of Canada and the soldier, consequently the two should not be confused, nor should the former be regarded as denying to the disabled ex-service man his right to claim for pension under the latter. This was one of the distinctions drawn by General Sir Arthur Currie, G.C.M.G., former commander of the Canadian Corps, who appeared before the special parliamentary committee on returned soldiers' problems at Ottawa, and laid in front of that body the case for the ex-soldier.

Sir Arthur's presentation of the case on behalf of his former comrades created a deep impression, which was strengthened by the volume of support accorded to his views by the numerous speakers who followed him.

The wishes of the people of Canada with respect to the treatment of disabled soldiers had not been carried out, Sir Arthur said, in the manner desired by the people themselves. He did not attribute this failure to the pensions commissioners or to any of those vested with the administration of the act, but rather to the interpretation of the act and to the faulty machinery set up for its operation. The former corps commander entered a plea for the "burned out" veteran, for whom no provision was made. He stressed the impossibility of such a man proving conclusively that his disabilities were due to war service, and equally was it impossible for the pensions board to prove that they were not. The responsibility in this regard should be shared and in every case the man should get the benefit of the doubt.

He had no brief for the malingerer, the man who claimed a pension and was not entitled to it, nor had any war veteran any sympathy with such a "leadswinger." [illegible] did not alter the fact that a condition of dissatisfaction existed among the veterans and among the people of Canada, and that situation had to be faced.

Sir Arthur pointed to a number of defects in the pensions act, the chief of which was that it was a "legal document" and few returned soldiers understood such documents. The pensions board stood in the relationship of a court charged with the administration of this enactment and did not have the proper facilities at its disposal for the carrying out of this task. He suggested that the pensions commission be made an itinerant body. At present the board is stationary in Ottawa, while the appeal board is a travelling court. The situation should be reversed. He also asked that greater facilities be extended to soldiers to prepare their claims.

The former corps commander was emphatic in his opposition to the war veterans' allowance act being administered both by the pensions board and by the departmental committee, proposed by the bill. He cast no reflections upon the personnel of either body, but in the former case the pensions board would be dealing with something entirely outside their scope since the act was social legislation, while in the latter case departmental officers were subject to the direction of the minister who was himself subjected to many importunities. He thought that the Canadian Legion could administer the allowance to better advantage.

In the course of the hearing recently numerous ex-soldiers spoke. All represented various organizations, but in this case the soldiers had become united and all their sections would have a common spokesman in Col. L. A. LaFleche, D.S.O., M.C., Dominion president of the Canadian Legion. A number of specific cases were cited wherein considerable hardship with no compensation [illegible].

Railway Officials Promoted

Canadian National Railways Makes Operating Changes On Prairies

To meet the vacancy caused by the promotion of W. I. Munro, superintendent of the Portage Division, Winnipeg, to general superintendent of the Alberta District, at Edmonton, a number of changes in the operating department of the Canadian National Railways were announced recently in a circular issued by A. A. Tisdale, general manager, and approved by A. E. Warren, vice-president of the western region. The changes are effective as from March 12, and are as follows:

E. Crawford, superintendent at Regina, to be superintendent of the Portage Division, Winnipeg.

I. A. Macpherson, superintendent Saskatoon, to be superintendent of the Regina Division.

D. W. Sleeper, superintendent at Melville, to be superintendent of the Saskatoon Division.

J. J. Napier, superintendent at Brandon, to be superintendent of the Melville Division.

J. W. Crane, superintendent at Prince Albert, to be superintendent of the Brandon Division.

J. A. Rogers, assistant superintendent at Saskatoon, to be superintendent at Prince Albert.

C. H. Brown, assistant superintendent at Edmonton, to be assistant superintendent at Saskatoon.

G. H. Linney, assistant superintendent at North Battleford, to be assistant superintendent at Edmonton.

P. G. Russell, assistant superintendent at Smithers, B.C., to be assistant superintendent at North Battleford.

G. A. Clay, conductor, to be assistant superintendent at Smithers.

Could Prove It

"How's business?" asked a business man.

"Reviving," a second business man answered. "We got a hundred-thousand-franc order yesterday."

"Get out! I don't believe you," said the first man.

"It's the truth," said the other. "I'll show you the cancellation."

Millions Spent By Tourists

Statistics issued by the Dominion Bureau of Statistics show that the tourist trade in Canada reached a new high level in 1929, resulting in an estimated expenditure by such tourists of approximately $300,000,000, an increase of more than $34,000,000 over 1928.

Frank: "I suppose you found your trip to Europe broadening?"

Fred: "Yes, and flattening, too."

Competition In Cattle Trade

Britain Recently Imported Ninety Head From South Africa

Apparently Canada will also find more competition yet in the livestock export trade to Britain. An initial shipment of live cattle from the Union of South Africa to Birkenhead has arrived recently, writes Harry A. Scott, Canadian trade commissioner in Liverpool. These cattle, which are understood to have come mainly from the Orange Free State province, and were shipped from Cape Town, numbered 90 head of shorthorns, but owing to tempestuous weather and the resultant late arrival of the vessel, eleven head had to be jettisoned. The majority of the consignment is reported to have arrived in good condition, apart from a certain loss in fat. Dealers who had the handling of the shipment at Birkenhead state that the cattle were, on the whole, the finest lot yet received from Africa and quite suitable for British market requirements. After being slaughtered the beef was despatched to London and Manchester, the remainder being disposed of at Birkenhead and Liverpool.

There are 3,865 things that might cause the queer rattle in your car, but it always takes $18.50 to make the right one confess.

KIDNEY TROUBLE BACKACHE VANISHED

British Medical Association

More Funds Required To Finance Big Meeting To Be Held In Winnipeg

The committee of medical men in Winnipeg who are in charge of the arrangements for the meeting of the British Medical Association in that city next summer, have requested Manitoba members of parliament, particularly Dr. J. P. Howden of St. Boniface, to ask the Federal Government for more financial assistance.

The meeting of the British Medical Association will be an event of historic importance. It is 24 years since the association met in Canada, the last occasion being in 1906 when the meeting took place in Toronto.

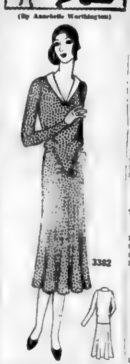
It is estimated that the cost of looking after the delegates, providing [illegible] accommodation for their sessions, will be $60,000. It is understood here that this does not cover the expenses of the delegates in any way, shape or form. Each delegate will come from Great Britain at his own expense.

So far the Federal Government has agreed to give $20,000 to the committee. It is believed that the provincial government of Manitoba is giving $10,000. And the city of Winnipeg $10,000. This still leaves $20,000 to be found. The Canadian Medical fraternity are subscribing privately to a fund to be used for the meeting, but it is thought that in order to make the event certain of success a further Federal grant is desirable. Dr. Howden, probably will ask for a supplementary vote of from $5,000 to $10,000.

Winnipeg Newspaper Union

Fashion

(By Annebelle Worthington)



The new fitted hipline, swathed in Grecian manner, makes this printed crepe frock very desirable.

The neckline is generally becoming in deep open V, finished with rolled collar of plain harmonizing crepe.

The hemline achieves a fluttery fulness through the gradual widening of the circular skirt that moulds the figure through the hips.

Plain crepe silk and light weight woolens appropriate.

Style No. 3382 comes in sizes 16, 18 years, 36, 38, 40 and 42 inches bust. In the medium size 3 yards of 39-inch material with ½ yard of 27-inch contrast is sufficient.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Yukon's Silver [illegible]

The Yukon's production of silver which is derived mainly from the silver-lead ores of the Mayo district, has been increasing during the last two years and will probably [illegible] to supply an increasing amount in the future.

Summer Tours

National Railways Makes Ready For the Holiday Season

As the sun gains in strength and the days begin gradually, almost tentatively, to put on length, thoughts of summer crop up. With many they are thoughts of golf, with others they [illegible] the mountains, the [illegible] lakes travel. Escorted tours that relieve the traveller of all the irksome responsibility of details become more and more popular, according to C. W. Johnston, general passenger traffic manager, Canadian National Railways, who was discussing the system's plans for the coming summer.

Seven personally-conducted all-expense tours have already been arranged, he stated, and they will take in all parts of Canada.

Two will explore the Maritimes, four will cross Canada from either Montreal or Toronto, and one from Winnipeg.

The first to get under way will be the Pitman Maritime tour, which will leave Montreal on June 27th. Occupying 17 days, the itinerary will take in Quebec, Ste. Anne de Beaupre, Montgomery Falls, as well as all the principal cities and towns of the provinces by the Atlantic. There will be a steamer trip through the Bras d'Or Lakes in Cape Breton, a motor trip of 150 miles through the land of Evangeline, and another hundred [illegible].

One of the most important tours [illegible] organized under the auspices of "The New Out[illegible] [illegible] 20th, and will cover [illegible] miles by rail, 1,800 miles by steamer, and [illegible] miles by automobile. Both railways will be used and among the spots to be visited will be Jasper National Park. The "Pilgrims" will travel between Vancouver and Prince Rupert by Canadian National steamer and will also visit the Peace River Country.

The ninth annual personally conducted tour of the Canadian National System will leave Winnipeg on July 2nd, crossing the prairies to the Pacific Coast and including the boat trip along the "Inside Passage."

On July 10 and July 16th, respectively, the Adams and Pitman "Across-Canada" tours will leave Montreal, on the way to Minaki, Jasper National Park, Wainwright and the Pacific Coast. The first will be for 24 days and the second 23. Western Canada will also be visited by the Kerr-Bryson sixth annual tour, which is due to leave Toronto on July 9th. All the salient features of the Maritimes will come before those who become members of the Adams Maritime tour, leaving Toronto on August 5th, and Montreal, August 7th.

Griddle Cakes

Tested Recipe Is Herewith Given [illegible]

Who doesn't like griddle cakes? From father to the youngest member of the family, every one clamors for more—when they are tasty! Here is a tested recipe:

- 1 cupful Borden's St. Charles Milk
- 1 cupful water
- 2 tablespoonfuls melted butter
- 1 egg, well beaten
- 3 cupfuls white flour
- 1 teaspoonful salt
- 4 teaspoonfuls baking powder
- 2 tablespoonfuls sugar

Combine the milk and water, add the shortening, sugar, and the egg, and beat in the dry ingredients which have been sifted together. Beat thoroughly and fry as usual on a slightly oiled griddle, or on an unoiled aluminum or soapstone griddle. If very thin cakes are desired, add two more tablespoonfuls of St. Charles Milk and water. For further interesting recipes write for the Borden Cook Book, addressing The Borden Co., Ltd., Dept. W.L., 140 St. Paul W., Montreal.

B.C. Man First Member

Application and Fee Received By World's Grain Conference Office

The honor of becoming the first member of the world's grain exhibition and conference goes to Cecil Tice, provincial agronomist, British Columbia. His application and the fee of ten dollars were received at the office of the exhibition at Regina recently.

From Lima, Peru has come the first acceptance of the invitation to participate in the exhibition. Due to its diversified climate, practically every agricultural product known to man can be raised within the borders of Peru.

The first prize of $2,500 for wheat, the largest cash prize for any kind of grain offered at any exhibition has aroused the interest of grain growers all over the world.

There is but one class in the Hemp section for seed of any variety. The exhibit must bear the variety name and consists of 20 pounds. There are twenty prizes for Hemp seed grading from $75 down to $12.

PALPITATION

Throbbing of Heart After the "Flu"

Mrs. J. Cunningham, Sault Ste. Marie, Ont., writes:—"Last February I had a severe attack of influenza which left me with palpitation and throbbing of the heart.

"I felt very weak and tired so began to take

and used about six boxes and have found them help me a great deal, and am very thankful for having found such a good medicine."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Month Without Full Moon

February, 1866, was the most remarkable month in the history of the world. There was no full moon. That same year, January and March had two full moons each. This never happened before and will not happened again for 2,500,000 years.

Denmark has adopted a "standard" type of pig.

SUNDAY SCHOOL LESSON

APRIL 13

THE CHILD AND THE KINGDOM

Golden Text: "Suffer the little children, and [illegible] them not, to come unto Me, [illegible] to such belongeth the kingdom of heaven."—Matthew 19.14.

Lesson: Matthew 18.1-14; 19.13-15. Devotional Reading: Psalm 34.1-8.

Explanations and Comments

The Kingdom Of Heaven Is Entered By the Childlike, 18.1-4. In answer to the disciples' question, "Who then, is greatest in the Kingdom of Heaven?" Jesus called to him a little child (possibly Peter's, if they were in Peter's house at Capernaum at the time), and putting him in the midst of the disciples said, "Except ye turn, and become as little children, ye shall in no wise enter into the Kingdom of Heaven." The double Greek negative in the last clause is most emphatic. Far from being the greatest in the Kingdom of Heaven, they were in danger of never entering it. They [illegible] wrong ambition and jealousy, and become unpretentious, humble as little children. A child has no thought about greatness. "Jesus [illegible] not say that the childlike spirit is inherently better than the spirit of the man. He does not promise that it shall possess or govern the Kingdom. He affirms only that it is the condition of entering the Kingdom. It is not that the child is better than the man, but that the [illegible] stands at [illegible] gate of the [illegible] takes the [illegible] step toward the Christian character. Docility, receptivity, open-mindedness, the eager listening spirit of the little child—this is the polar opposite of the unteachable, satiated, closed heart of the Pharisee, and as the latter blocks the way to the Kingdom, so the former opens it. Better things than childhood has to offer are to be gained through the discipline [illegible] of life, yet entrance to the [illegible] is attained by no other door [illegible] unspoiled, natural, spontaneous spirit of the child, and many a sophisticated and unteachable life will find a shock of surprise that it has lost the key." F. G. Peabody.

Better Food Standards

New Regulations Require a More Careful Elimination Of Weed Seeds

Better feed oats and barley is assured by the new regulations of the seed branch of the Dominion Department of Agriculture, which require a more careful elimination of weed seeds. Under these new regulations, while wild oats and other grains present are taken into consideration, the quality of the grain itself now mainly determines the grade.

In the past there have been frequent complaints, especially from the eastern feeders, of the excess of weed seeds contained in feed grain from the west. Under the grain inspection practices now in force even the lowest grades of feed oats and barley may have not more than 3 per cent. of weed seeds.

With this new system of inspection in operation, eastern feeders will be able to buy oats and feed barley on certificate, and with much greater assurance as to the cleanliness and quality of the grain so purchased.

The one proper place for a knocker is outside the door.

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Others contain mineral and dangerous mineral drugs, which remain in the system, cattle in the joints and cause aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect.

Avoid lubricating oils which only grease the intestines and encourage Nature's machinery to become lazy.

A purely vegetable laxative such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleansed and constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red pkgs.

Huge Copper Nugget

Six Hundred Pound Nugget From Northern Hinterland To Be Sent To National Museum

A 600-pound nugget of native copper will shortly be added to the national museum exhibits. The nugget was found at Husky Creek, in the Coronation Gulf district, by Major L. T. Burwash, of the Yukon and North West Territories branch of the Department of the Interior on August 4 last year.

When he found the lump of copper, Major Burwash carved his [illegible] on it and made arrangements to have it transported by dog sled from Husky Creek to Coronation Gulf station, from where it will be brought to Ottawa by rail and boat. It will probably arrive in October.

Regina Largest Distributor

Regina is described in Industrial and Commercial publications as the largest distributing centre of Western Canada and the greatest centre for the distribution of farm implements in the world. In the latter business a turn over of $35,000,000 is reached every year.

TWICE BENEFITED BY SAME REMEDY

Recommends Lydia E. Pinkham's Vegetable Compound

Cobourg, Ontario—"Years ago when I had a sick father and a nursing baby to [illegible] I got all run down and I took Lydia E. Pinkham's Vegetable Compound to get strength to do my work. Another [illegible] at Change of Life, I had severe headaches and felt tired all the time. I took seven bottles of the Vegetable Compound and felt like a new woman. I recommend it to any woman who is at the age when she needs building up."—Mrs. T. K. [illegible], R.R. 4, Cobourg, Ontario.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES, LAYING PENS, DAIRY BARNS, SUNROOMS, ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Local and Personal

The W. A. will hold a silver tea and sale of flowers, home cooking and needlework in the Institute rooms on Saturday, April 19th. Orders taken for Easter Lilies and Daffodils. Phone 45 or 112.

Mr. A. Saborge visited Tofield for a few days last week on a business trip. He has been in Calgary where he has been working on the Government Telephone building.

Born—To Mr. and Mrs. Albert Vaughin on April 1st, a daughter.

Miss Rose motored to the city one day last week.

Mr. and Mrs. Bud Hannan motored to Camrose on Sunday.

Mr. McLaughlin, Mr. and Mrs. Calvert motored to the city on Monday.

Mr. Harris of the McLaughlin Hardware motored to the city on Sunday.

Mr. and Mrs. Ruby, the new baker are in town making arrangements for their new bakery.

J. D. Hannan was a visitor in town a few days last week.

The young people's society cast who so successfully presented the play "The Arrival of Kitty" here a few weeks ago journeyed to Lamont last Friday and presented the play there. From all reports there was a fair attendance and the play went over big.

AMISK CREEK

The Ladies' Aid held their monthly meeting at the J. Anneke home on Wednesday of last week. Nearly all of the members and many visitors from Bardo and Ryley were present.

Ruby Berg and Hernie Anneke who are attending school in Camrose paid a short visit to their parental homes last Saturday.

Hugo Straumer arrived from Grande Prairie on Wednesday of last week, where he has been working on his homestead throughout the winter. He will now assist with the spring work at Ralph Olsen's farm.

Mr. and Mrs. H. Hillerud and four of the children returned from Bellingham, Washington, last Saturday, where they have been since last October.

Several from here attended the sale at Mrs. Wheeler's last week.

Mr. and Mrs. Streustad and family, Mr. and Mrs. L. Rolstad and children, Mr. and Mrs. J. Nilson, Mrs. J. Viken from Grande Prairie and Miss Jacobson, teacher at the Shaw school, were all guests at the P. O. Flaaten home last Sunday.

Mr. and Mrs. E. A. Moen and children visited at the Berg home last Sunday.

Mr. and Mrs. I. C. Olsen motored to Camrose on Thursday of last week.

Mr. E. A. Moen and several others from this vicinity are shipping hogs and cattle to the pool to-day, Tuesday.

Quite a few from here attended the old time social held in Ryley last Friday night.

Mr. and Mrs. Bjornson from Bardo visited at the P. O. Flaaten home on Saturday and Sunday.

BEAUTIFYING THE FARM HOME

(Experimental farms note)

Every unimproved or unplanted home in Canada can be made more attractive and more valuable by the planting of trees, shrubs, vines and flowers, and a well kept lawn. The cost of the nursery stock required is one of the most profitable investments a farmer can possibly make, because such improvements will actually increase the money value of the place by many times the amount spent in a simple plan of home planting. It will make it more valuable as a home and it will certainly command a better price if put up for sale. It is surprising how a few improvements will turn a mere house into a real home. In addition to its increased monetary value the attractive farm home goes a long way in holding the family together; in keeping the young people on the farm. They will love their home and be proud to bring in their friends.

Some may say that it costs too much or that it takes too much time to care for flowers and shrubs. It is, however, more a matter of disposition than of time or money. The farmer who is disposed to have flowers and attractive home surroundings will have them, no matter how busy he may be. Canadian farms should be more than just farms, they should be homes in the country.

LAKE SHORE

On Wednesday evening of last week Mr. and Mrs. J. H. Johnson entertained a number of their friends at a bridge party. Five tables played and first prizes were won by Mr. and Mrs. T. E. Seale while the consolations were won by Miss Nala Shaw and Mr. T. A. Jones. Mrs. Johnson served a dainty lunch at midnight and altogether a most delightful evening was spent.

Mr. L. H. Graham returned on Sunday evening to his former home at Ashmont where he will spend about two weeks. Mr. Graham's two daughters are exhibiting calves in the children's competitions at the spring show in Edmonton this month.

The many friends of the Hall family in this district extend their sympathy to the bereaved ones in the loss of their wife and mother.

Mr. Burns of Peace River began duty as teacher of the Lake Shore school on Tuesday, April 1st.

Mrs. J. Murray and two children lately of Mirror came on Wednesday morning to spend a few days at the T. R. Murray home.

Mr. and Mrs. Jones sr., of Clover Bar spent a few days last week visiting relatives in this district.

We are sorry to report that the infant son of Mr. and Mrs. Leslie Jones has been quite ill with an attack of bronchitis.

Mr. and Mrs. Phillips and Mrs. Plants and children spent Sunday with friends in the Woodlawn district.

U. F. W. A. NOTES

The U. F. W. A. met at the Municipal building on March 27th. Mrs. Highmde paper on "Accidents and Emergencies" was worthy of a place in the family medical book. Mrs. Morton gave a report on the whist drive and Mrs. T. E. Seale read the month's bulletin on co-operation.

Regular meeting of April 10th cancelled.

FAREWELL PRESENTATION

On Sunday last March 30th the many friends of Mr. and Mrs. Jas. O'Hara gathered at their home to show their appreciation and to extend their best wishes to them as Mr. and Mrs. O'Hara will be leaving Tofield soon. Mr. O'Hara having work in Edmonton which will take him and his family into the north country later on.

During the past three years they have lived among us they have made many friends and taken an active part in work connected with St. Francis Church.

Mr. O'Hara a most capable and talented musician has been organist in the church and both have been helpful members in many ways.

A tasty lunch was served and remarks were made suitable to the occasion. Rev. Father Hughe gave a splendid address which expressed the sentiments of all so ably and perfectly.

Mr. O'Hara was presented with a substantial cheque and the following excellent address was read by Mrs. Furman which also shows so well the liking and appreciation of Mr. O'Hara and their deep regret at his departure.

It was with the deepest regrets that we heard of your intended departure from Tofield.

Your faithfulness as organist in the Tofield Catholic Church has been a true example of Christian endeavor and steadfastness. We always felt that no matter what the weather or condition of the roads or other inconveniences Mr. O'Hara would be at his accustomed post at the organ.

As an indication of our appreciation and esteem we would ask you to accept this small token and we only hope that in the years to come it will remind you of a few of the friends you made in the congregation of St. Francis Church, Tofield Alberta.

Mr. O'Hara replied most fittingly.

A very pleasant afternoon was enjoyed by all and all joined in wishing them the best of good luck, good health and all prosperity and may the bright and welcome light of deep and sincere friendship ever gladden their way and bring to Mr. and Mrs. O'Hara the joy which their pleasing and charming personalities ever deserve.

KINGMAN

Oscar Thompson and Ed Tollefson motored to Round Hill on Sunday.

Mr. and Mrs. Thor Grahn and family visited in Edmonton Sunday.

Mrs. W. McIntosh was a visitor in Calgary for a week.

A number of Kingmanites took in the play at the Normal School in Camrose on Friday evening. All reported having a good time.

Mr. and Mrs. E. Erickson, Mrs. C. O. Pederson and Mrs. Jack Erickson motored to Edmonton on Wednesday.

There's "Gold" In The Golden Rule

A heading in a business magazine reads "There's Gold In the [illegible] Rule" and the accompanying article proves it. There is no doubt that following the Golden Rule in business as well as out of it, in the long run will [illegible] otherwise, and by this we mean materially profitable. There is a principle recognized by modern business that the business man [illegible] be permanently successful must contribute to the profit and [illegible] with him, those from whom he buys as well as those [illegible] and in a measure this is recognition of the [illegible].

[illegible] the rule in the Golden Rule observed even to such a [illegible] for the gold which may be mined from it. Is it observed because [illegible] the right thing to do or because it is the more [illegible] the more profitable thing? Are we to do unto others from pure [illegible] the doing of because we wish to have them do the same to us? [illegible] force and advantage of the Golden Rule lie in our [illegible] in itself and in what prompts us to practise.

[illegible] follow the Golden Rule because there is "gold in it" would be [illegible] honest because it is the "best policy." Neither [illegible] rate high among the things considered admirable. To follow the Golden Rule because it charts the inherently right course in our dealings [illegible] and because we wish to be and to do right is in the highest [illegible]able. But to follow it merely or chiefly because "there's [illegible] in it" is well not something we would care to boast about. The great[illegible] from living the Golden Rule cannot be set down in [illegible].

[illegible] Western Canada our people have very largely accepted and [illegible] the principle of co-operation in connection with their economic [illegible]. Unfortunately it is not quite so generally accepted [illegible] community relationships. The question therefore [illegible] acceptance of one of the principles found in the [illegible] a belief that "there's gold in it" rather than [illegible] that co-operation is indeed the better way for all con[illegible] and are we maintaining our great co-opera[illegible] a dollar and cents basis, or are a majority of our [illegible] in this way make some contribution to the [illegible].

Many fine and lofty sentiments, the sentiments of the Golden Rule [illegible] uttered by advocates of co-operation and we are convinced that [illegible] men and women have joined co-operative organizations not because they felt that they themselves would reap any particular benefits, but because they felt such organizations would be the means of benefiting others and the country as a whole. They are practising the Golden Rule because they believe it to be right, not because there may be some "gold" in it for them.

And if co-operation is to live and continue as a vital force in the life and activities of this country, if it is to grow and develop as a great controlling influence and force not only in an economic sense but in all our community life, it must be through a general acceptance of the view, and its practice in everyday life, that selfishness is wrong and unselfishness is right, that the welfare and happiness of others is our concern as well as [illegible] that the Golden Rule is to be practised not because there is "gold" in it for us but because it is the only correct rule by which to measure [illegible] lives and acts; that we must be honest with each other not because it [illegible] be best policy, but because it is right. If we expect others to accord [illegible] to us in our [illegible] we must [illegible] recognize and believe in the honesty of [illegible] others.

True co-operation is founded on the Golden Rule. It is its underlying principle. It is the [illegible] which our great co-operative organizations can safely build not because there is gold in it for anybody but because it is the only safe [illegible] human conduct and intercourse.

Apple Trees For Prairie Farms

Sixteen Varieties Of Apples Found Suitable For the West

After fifteen years of seed planting the experimental work of the Dominion Department of Agriculture has developed sixteen varieties of apple trees suited to the climatic conditions of the Prairie Provinces. Of these varieties two have been graded "very good" and four "good." Horticultural experts point out, however, that it will take several more tree generations to evolve the ideal species. Prairie farmers can help in this work by getting seed from the Experimental Station at Morden, Man., for planting in their own gardens.

DO YOU FEAR A HEARTY MEAL?

Dr. Williams' Pink Pills Will Tone Up Your Stomach Making Mealtime a Pleasure

Are you afraid of meal-time? Does eating distress you? Would you rather go without food. That is the condition of many due entirely to indigestion. There can be no perfect digestion, hence no enjoyment of meal-time unless you have rich, red blood. This pure blood is necessary to tone up your stomach and make it capable of properly digesting the food.

Many so called stomach remedies merely try to digest your food for you. That is a mistake; nature should do that work and if nature does not do it serious results are bound to follow. Tone up your stomach by driving out the poisons that are in the blood. Make new rich blood and your appetite and digestion will soon be normal; meals will once more be a pleasure.

The one sure medicine to enrich the blood, restore strength and banish stomach trouble and indigestion is Dr. Williams' Pink Pills. Concerning them Mrs. Wm. T. Thompson, Brussels, Ont., says: "For years I suffered with indigestion, headaches and dizzy spells. I tried a great many so called remedies without relief. As a farmer's wife with three little girls it was almost impossible to be idle and I just dragged myself through my work. I suffered so I was actually afraid of meal time. A friend advised the use of Dr. Williams' Pink Pills, and although I had lost faith in ever being well again, I purchased a supply and began taking them. Gradually the dizziness and headaches left me. My appetite improved and soon I was able to enjoy my meals. I gained in weight and my health in general is better than it has been for years. I feel I owe much to Dr. Williams' Pink Pills for they relieved me of all my misery."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

New Species Of Whitefish

Newly Discovered Member Of Finny Tribe Found In Manitoba

Discovery of a new species of whitefish in Clear Lake, Manitoba, is announced by A. Bajkov, of Manitoba University. The new species has been named Coregonus Odonoghuei, in honor of Dr. C. H. O'Donoghue, formerly of the faculty of Manitoba University. The newly-discovered fish is common in Clear Lake. It lives at a great depth during the summer, coming to the surface only in the spawning season.

The worms that infest children from their birth are of two kinds, those that find lodgement in the stomach and those that are found in the intestines. The latter are the most destructive, as they cling to the walls of the intestines and if not interfered with work havoc there. Miller's Worm Powders dislodge both kinds and while expelling them from the system serve to repair the damage they have caused.

Covered Long Distance

Walter E. Davidson, carrier on a rural route from the post office at Westville, Indiana, for 25 years, retired recently on a pension. During his service, Davidson wore out seven autos, nine horses, two wagons, and two sleighs, and travelled approximately 223,000 miles, a distance only 1,776 miles short of nine trips around the world.

A Matter Of Opinion

It is announced that Ontario and Quebec are to have "new penitentiaries which will be models for the world." This brings to mind the presentment some years ago of a Brantford, Ontario, grand jury, in which it was stated that conditions at the local jail were such as to make it "one of the most desirable places of residence in the city."

Children's Colds Best Treated Externally

THAT'S why modern mothers prefer Vicks—it cannot upset delicate stomachs. Rubbed on throat and chest, it acts two ways at once:

(1) Its healing vapors, released by the body heat, are inhaled direct to the air passages;

(2) It "draws out" the soreness like an old-fashioned poultice.

2 ways at once
VICKS VAPORUB

Imperial Agricultural Conference Arranged

First Meeting To Be Held In South Africa In 1932

Another link is being forged in the chain of Empire unity. To the present Imperial gatherings will be added an Imperial agricultural conference, and the first meeting will take place in the Union of South Africa in 1932. The conference will meet every second year.

A tour of New Zealand by farmers from Britain, Canada and South Africa provided the opportunity for deciding on an Imperial conference. Lord Bledisloe, who has been called Britain's leading farmer, and who has come to New Zealand to assume the governor-generalship, addressed a conference of the visiting farmers and representatives of farmers in this great agricultural dominion recently.

Lord Bledisloe called the present meeting a landmark in the history of the empire. He stressed the vital importance of uniformity in the production and sale of agricultural products if a settled, continuous market for these products was to be secured.

The British Empire Producers, Empire Marketing Board and similar organizations will be asked to circulate propaganda on behalf of empire agricultural products; empire preferences will be further discussed, and information will be gathered so the next conference can study financial and marketing organizations for farmers, as well as the extension of foreign markets.

Persian Balm is inevitably chosen by discerning women. Delightful to use. Subtly fragrant. Cooling and refreshing. Imparts a rare youthful charm to the complexion. Invaluable for softening and making hands flawlessly white. Tones and stimulates the skin. Useful for the family also. Protects the tender skin of the child and is excellent for the father as a hair fixative and cooling shaving lotion.

Mark Twain's Immortal Boys

Last Survivor Of Famous Quartette Died In Seattle Recently

"Huck" Finn, Tom Sawyer, Mark Twain and Erastus Finn, kids who used to play together in Hannibal, Mo., years back—are all gone now.

The last to go was Erastus Finn, who was not as well known as the others, made so famous by Mark Twain. Ninety-five years old and a veteran of the civil war, Erastus Finn died in Seattle, a victim of pneumonia.

In recent years the old man loved to recall memories of his boyhood days when he and his brother "Huckleberry" and Samuel Clemens were friends of Tom Sawyer.

"Huck" Finn died a few years ago in Eugene, Ore. They're all gone now, are Mark Twain's immortal boys.

Powerful Medicine.—The healing properties in six essential oils are concentrated in every bottle of Dr. Thomas' Eclectric Oil, forming one of the most beneficial liniments ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells.

Times will not be much better so long as the new model of an automobile creates keener interest and invites closer inspection than a grand champion animal at an international exhibition.

Jed—"How did you find your wife when you got home last night?"
Ted—"Just as nice as pie."
Jed—"How's that?"
Ted—"Short and crispy."

Minard's Will Stop That Toothache.

Town Planning Advantage Shown

An Attractive Community Depends Greatly Upon the Appearance Of Its Streets

The following advantages that accrue from a systematic effort at town planning are given by Mr. Stewart Young, of the Town Planning Department of the Saskatchewan Government.

The general appearance of any community is most important, and if ways and means by which more agreeable surroundings can be produced are analyzed, it will be found that an attractive community depends greatly upon the appearance of its streets.

The appearance of a business street may be marred by the use of the sidewalks for storage or advertising purposes. Curb gasoline pumps do not add to the appearance of any street and should be prohibited. Electric light and telephone wires, when placed on a street tend to give it a ragged appearance. They should be placed underground in conduits or on lanes.

The appearance of the residential streets of any community reflects the mental attitude of the citizens. Every community should have a definite policy in respect of tree planting on residential streets. The boulevard system should be used.

Usually a sidewalk four and a half feet in width placed at a distance of about two feet from the street line with a graded roadway about twenty-four feet in width is sufficient to accommodate all traffic on residential streets. The intervening space between the sidewalk and the vehicular traffic way should be planted with trees spaced about twenty feet apart, and alternated slow and fast growing.

Several advantages are to be gained by this method of planting. Fast growing trees mature in a period of from twenty to twenty-five years, at the end of which time the slow growing tree has reached a stage where it becomes useful. Moreover, insects seldom attack more than one variety of tree in a season. The result is obvious where a street is planted entirely with one variety of trees.

Deliver Tea By 'Plane

Tea Freight, Begun On Oxen-Cart, Ends With Trip On Aeroplane

It is a far cry from the slow-moving, primitive, high-wheeled cart, hauled by oxen along the roads of Ceylon, to a speedy aeroplane in the winter sky over Lake Erie, but many of the people of Pelee Island are now drinking tea, carried there by air, that joggled along in an oxcart under a tropical sun in Ceylon only a few weeks ago.

The Salada Tea Company, because of the freezing over of Lake Erie, between Pelee and the mainland, recently shipped several hundred pounds of tea by air, in order to replenish the diminishing stock of a certain grocer on the island.

Test Is Satisfactory

The annual retest of the herds in the Fraser Valley, B.C., for T.B. is being carried on at present by about twenty veterinarians. More than half of all the dairy cows in the province (53,000) are located within this area and in the last test only three quarters of one per cent. re-acted.

New Municipal Bridge

The cities of Winnipeg and St. Boniface are conferring on the question of a new inter-municipal bridge to replace the present Norwood bridge.

Something To Leave Alone

Guest Towels Seem To Serve No Useful Purpose

It has been said that "actresses may happen in the best of families." Another enigma is "Why the guest towel?" Every family may not have an actress, but nearly every family has a set of guest towels. Why? Nobody uses them not even the guests.

We all know the lineup of towels on the rack near the bathtub. There are the ones for the family and those for the guests. No matter whether there are any guests or not, there must be guest towels.

The family dare not use them, and the guests, usually trained in the same manner in their own homes, also refrain for no other reason than "What is good enough for the host is good enough for me."

Rayon is not suitable material for paper-making, tests by government specialists indicate.

Make dresses bright as new!

DIAMOND DYES are easy to use; go on smoothly and evenly; NEW. Never a trace of that re-dyed look when Diamond Dyes are used. Just true, even, new colors that hold their own through the hardest wear and washing.

Diamond Dyes owe their superiority to the abundance of pure anilines they contain. Cost more to make. Surely. But you pay no more for them. All drug stores—15c.

Wheat Sales Affected

Eating Habits Of Those Who Desire Slenderness, Is Held Responsible

The modern feminine desire for slenderness according to Professor James L. Boyle, of Cornell University, has altered market standards of long standing, cut the consumption of bread by 30 per cent and considerably affected the wheat sales of the world.

Doctors, nurses, schools and even beauty parlors have helped to bring about these changes, the professor said in an address recently. Meat consumption also has declined those in search of necessary vitamins preferring oranges, grapefruit, pineapples, lettuce, tomatoes and cantaloupes.

"All these changes in customers' food habits can be considered as market developments," Professor Boyle said. "The consumer is the most important of the people concerned with marketing."

After the horse came the automobile, and right after the automobile comes the collector.

To Study British Methods

Chinese Officers Will Learn How "Big Time" Navy Is Run

Twenty Chinese naval officers and cadets have gone to Great Britain to study British methods of running a "big time" navy.

They are making the trip at the invitation of the British Government, and will remain about two years.

The officers in the party expect to enter Greenwich Naval Academy and take the same course in tactics as British students. The cadets however must first spend some time on various naval vessels to learn the rudiments of British navy practice.

Makes Breathing Easy. The constriction of the air passages and the struggle for breath, too familiar evidence of asthmatic trouble, cannot daunt Dr. J. D. Kellogg's Asthma Remedy. This is the famous remedy which is known far and wide for its complete effectiveness even under very severe conditions. It is no untried experimental preparation, but one with many years of strong service behind it. Buy it from your nearest dealer.

Interesting Records

Among the most valuable records preserved in the Public Record Office of England, are the pipe rolls, a statement of the King's income and expenditures, so called because they are rolled in the shape of pipes. They date back to 1131 and were not discontinued until 1833.

Mr. Finklestein: "Yeah — ain't I lucky?"

Stockings woven of human hair were worn by basket-maker Indians who lived in the southwest about 2,000 years ago.

Minard's for Falling Hair.

SORE CORNS Removed by PUTNAM'S Corn Extractor

NO AID FROM OTTAWA FOR UNEMPLOYMENT

Ottawa.—Ottawa will not provide "a five-cent piece to any Tory government" in any of the provinces for unemployment relief, Premier W. L. Mackenzie King told members of the House of Commons. This attitude was taken by Premier King, when he spoke in the debate that was precipitated by A. A. Heaps (Lab., Winnipeg North). The Labor member moved an amendment to the motion to go into supply, urging that the government take immediate action to deal with the unemployment situation.

The Federal Government is without power to embark upon social legislation like unemployment relief, for the British North America Act invests the provinces with all jurisdiction in matters of this character, the premier held. His remarks caused a sensation in the House and there were Conservative cries of "shame" when he declared that the Federal Government, after reducing taxes and adding to the exchequer since 1921 was not prepared to distribute these savings among the Conservative governments of Saskatchewan, British Columbia, Ontario, New Brunswick and Nova Scotia.

Any government headed by a Progressive premier would be looked on with favor in regard to unemployment relief. He said that no request had come from the Alberta, or Saskatchewan governments for relief.

The prime minister spoke for two hours. He did not believe there existed in Canada at present an emergency which would justify the Federal administration in embarking on any program of unemployment relief or engaging in any scheme of unemployment insurance. There must always be a certain amount of seasonal slackness in outdoor work during the winter months in Canada. That had always been the case and always would be. He did not feel that the Federal Government was called upon to ask the taxpayers to bear a burden which rightly lay on the provinces.

On Monday last, said Prime Minister Mackenzie King, he had moved the House into committee of supply, but Mr. Heaps had moved an amendment requesting the government to act in the matter of unemployment. The House was far from united as to what was in Mr. Heaps' mind. One phase that had been emphasized was that unemployment was a national problem. He didn't think this could be questioned, but a great deal depended on what inferences would be drawn from it. If it meant a national problem to the exclusion of the provinces and municipalities, then the point could not be admitted.

There must be, in an endeavor to meet this problem, some division of labor, Mr. King said. The League of Nations may do something to a solution, but its part would be vastly different from that of a municipality. Because it has been conceded unemployment was a national problem, some members had inferred that an emergency existed which the Federal Government should deal with. Some scheme of social legislation in the form of unemployment insurance had been suggested.

No request from Alberta or Saskatchewan, he said, had been received for unemployment relief. Yet, the premier stated, "we have been in touch with the premiers of these provinces on the question of natural resources." The premier of Manitoba had not asked for any assistance, he continued, nor had the premier of Ontario made any such request. "And," the prime minister asserted, "we have a wire from the premier of Quebec that he does not want any assistance."

The premiers of New Brunswick, Nova Scotia and Prince Edward Island had not, he declared, sent any communications for relief. The only request was from a "few gentlemen" who had come to Ottawa, Premier King said.

There had been no representations, Premier King stated, except from some parts of Western Canada, and chiefly from those who wished to take a certain attitude on the budget debate and desired to indicate that an emergency existed.

Racer Postpones Test

Daytona Beach, Fla.—Kaye Don, British racing champion, announces he has postponed indefinitely his proposed assault upon the world automobile speed record because of unfavorable beach conditions.

Question Of General Election Discussed

But No Official Statement Is Issued For Press

Ottawa, Ont.—The question of a general election was discussed at a recent caucus of the Liberal party.

While no official statement was issued at the conclusion of the meeting, it is understood Premier Mackenzie King stated that he was no more decided whether to hold an election this year or in 1931, than he was three months ago. But, at the same time, it is said the prime minister [illegible] members they [illegible] begin preparations and continue to make preparations.

The views of a number of private members were expressed; and, it is understood, that in the course of this discussion a suggestion was made that August 25 next, might possibly be the date for an election.

At the Top Of the World

Folks Get the Blues When It Is Mid-Winter In the Arctic

Winnipeg, Man.—All the top-of-the-world folk get the blues when it's mid-winter in the arctic. This is the comment of William Murray, manager of the Hudson's Bay Company post at Herschel Island, off the north shore of Canada. He refers to the brief period when daytime is a generous word for two hours of murky twilight.

From November 26 until January 16, observes Mr. Murray, no sun is visible at Herschel Island. Little or no travelling is done although there is fairly good light at mid-day, when a red glare appears in the southern sky. For days before the sun's return natives stand eagerly on top of their igloos seeking first glimpses of Old Sol.

Menaced By Oil Gusher

Fire Hazard Threatens Lives and Property Of Oklahoma

Oklahoma City, Okla.—A great gusher roared like a young volcano in the backyard of Oklahoma City, while men made futile efforts to control a spout of gas and oil unleashed in the race for riches.

The gusher has driven inhabitants from its environs, deluged the section with a thick coat of petroleum, through which even trucks cannot pull, filling ravines with gas and threatened lives and property with a fire hazard.

A pebble, driven by the tremendous flow of gas released into the sky, might strike the spark which would envelop the countryside in flames.

Reserve Bank For Australia

If Established, Will Have Ten Million Dollars Capital

Canberra, Australia.—Hon. E. G. Theodore, Commonwealth treasurer, introduced in the House of Assembly a bill to create a central reserve bank similar to the Central Reserve Bank of South Africa. The bank will have a capital of $10,000,000, drawn from the Commonwealth Bank, and the board will include representatives of Labor.

The proposal marks another step in the Labor government's comprehensive program, for restoration of the economic and financial position of Australia, a program which also includes a compulsory wheat-marketing pool.

War Reparations

Ottawa.—Canada has received $19,151,436 in payment of war reparations, Hon. Fernand Rinfret, secretary of state, informed the House of Commons in reply to a question from Earl Lawson (Con., York West). The question also asked the amount paid out of reparations for claims awarded by the reparations commission. The reply to this was that no sums were paid out of the amount received for reparations. Payments were paid under the provisions of the reparation payment act.

U.S. Authorizes Commission

Washington, D.C.—The McNary bill to create a commission of three persons to co-operate with Canada in considering the feasibility of constructing a highway to connect the northwestern part of the United States with British Columbia, Yukon Territory and Alaska, was passed by the Senate and sent to the House.

Might Suggest Dissatisfaction

Ottawa, Ont.—For Canada to adopt another flag beside the Union Jack might indicate or suggest some dissatisfaction with the present position of this country within the Empire, Robert S. Smith, member of parliament for Cumberland County, N. S., told members of an Ottawa service club.

Famine Takes Heavy Toll

Hundred Die Every Day In Chinese Province Of Shensi

New York, N.Y.—People are dying at the rate of one hundred a day in the plains of the Shensi province in the famine stricken area of China, according to a report received from Mrs. Philip S. Dutton, at Taiku, in North China.

Mrs. Dutton, formerly of Sault Ste. Marie, Mich., estimates that by the beginning of summer two-thirds of the population will be dead. The inhabitants, she says, are tearing down their houses and selling the material to obtain money for food. In every yard is a pile of leaves which the owners are eating. When the leaves are gone they will die, Mrs. Dutton says.

STUDY VARIOUS PROBLEMS OF GRAIN INDUSTRY

Ottawa, Ont.—Three fellowships established by the Canadian Wheat Pool to further scientific research in problems of the Western Canadian grain industry, each having an annual value of $1,200 have been awarded by the National Research Council.

As announced the successful candidates are:

R. G. Dunlop, B.Sc., University of Saskatchewan, who will undertake research in the Department of Field Crops and Plant Biochemistry of the University of Alberta.

H. R. Sallans, B.Sc., University of Saskatchewan, who will undertake research in the the Department of Wheat Chemistry, of the University of Saskatchewan.

C. A. Winkler, B.Sc., University of Manitoba, who will undertake research in the Department of Agricultural Chemistry of the University of Manitoba.

Sixty-five persons have been successful in securing a national research council post-graduate research scholarship, tenable in Canadian universities during the year 1930-31. This year considerably more than twice as many applications were received as there were awards available, says a statement issued recently by the Research Council.

Three classes of post-graduate scholarships are awarded, known as bursaries, studentships and fellowships, having an annual value of $750, $1,000 and $1,200 respectively.

These awards are provided to enable Canadian students who have graduated with distinction from a university to continue their training in science until they have qualified for a Ph.D. degree in order to build up a corps of thoroughly trained research workers for service in Canadian industries, universities and in the technical departments of the federal and provincial governments.

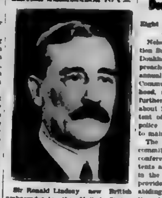
Surveyor-General Named

Victoria, B.C.—Official announcement was made by the government of the appointment of F. C. Green, Victoria, to the position of surveyor-general of British Columbia, to fill the vacancy caused by the death of J. E. Umbach.

Liquor Vessel Seized

Boston, Mass.—The British two-masted schooner "Aramay," with 800 cases of liquor aboard, was seized off the coast of Maine by a coast guard patrol boat recently, Thomas F. Flanagan, in charge of the customs enforcement squad here, announced.

BRITISH AMBASSADOR TO U.S.



Sir Ronald Lindsay, new British ambassador to the United States who, with Lady Lindsay, has just arrived at Washington, D.C., to take over his new duties.

Cosgrave Re-Elected

Retains Presidency Of Irish Free State Executive Council

Dublin, Ireland.—William T. Cosgrave was re-elected by the Dail Eireann to serve as president of the Irish Free State executive council. He thus maintained his ascendancy over Eamonn de Valera, campaigner for an "Irish Republic."

Cosgrave who had been defeated by a narrow margin recently on an old age pensions bill, was chosen for his old post by the Dail after De Valera and the Laborite leader, T. J. O'Connell, had been thrust aside in turn.

The successive votes were:
For De Valera 54 for, 93 opposed.
For O'Connell 13 for, 73 opposed.
For Cosgrave 80 for, 65 opposed.

Pay Tribute To Writer

Memory Of Hans Christian Andersen Is Honored At Copenhagen

Copenhagen.—One hundred thousand persons gathered at the town hall here to sing the national anthem in memory of Hans Christian Andersen, writer of fables and fairy stories.

Two Copenhagen officials spoke in English, French and German concerning Andersen's humble birth 125 years ago, and their words were broadcast throughout Europe.

Members of the diplomatic corps paid homage at the grave to the man who enriched the simple imaginative literature of all lands and paved the way for the modern [illegible].

High Prices For Livestock

Calgary, Alberta.—Forty mature Aberdeen-Angus bulls brought an average price of approximately $190 each at auction during the opening session of the Calgary spring bull sale. A total of 19 animals were sold including a number of yearlings which were less in demand, the average for the animals of this breed being $171.

Deputy Warden Transferred

Kingston, Ont.—It has been announced at Portsmouth penitentiary that Deputy Warden Robert R. Tucker is being transferred to Saskatchewan penitentiary at Prince Albert. Mr. Tucker came to the Portsmouth prison as chief keeper in 1914.

Navigation To Open Soon

Buffalo, N.Y.—Navigation on the Great Lakes is expected to open about April 20, according to Captain Dan H. Bowen, manager of the Soulte Ste. Marie Marine Bureau.

MAROONED AVIATORS RETURN TO CIVILIZATION

J. D. Vance and Brian Blasdale, Northern airmen who made a forced landing at Baker Lake last November while searching for the McAlpine party, and had to spend the winter at Baker Lake, arrived in Winnipeg over the Canadian National Railways from Churchill on March 29. They came out to the end of steel by dog team, and at Mile 327, on the Hudson Bay Railway, they were met by the photographer of the Canadian National Railways who made the above photo in the clothes the Eskimos made for them. Vance is seen on the left and Blasdale on the right.

Doukhobors On Rampage

Eight Fanatics Stage Nude Demonstration at Nelson, B.C.

Nelson, B.C.—A nude demonstration Sunday by eight non-community Doukhobors, who interrupted the preaching of Peter Veregin at the annual meeting of the Christian Community of Universal Brotherhood, at Brilliant, was followed by further disorders Monday night by about 200 who did not go to the extent of disrobing. The provincial police from Nelson were called out to maintain order.

The demonstration resulted in a committee being appointed by the conference to interview the malcontents and offer them a tract of land in the Slocan Valley for their use provided they would agree to be law abiding, to send their children to the schools, and to pay lawful taxes. This offer was rejected by the disturbers, who demanded the privilege of living in close association with the community without obligation to pay rates or obey the laws. They were then requested to leave.

Carried By Large Majority

Jews In Quebec Are Granted Separate School Rights

Quebec, Que.—By a vote of 52 to 6 the Quebec Legislative Assembly approved of giving separate schools to the Jewish people on the Island of Montreal.

Hon. Athanase David, provincial secretary, explained the bill, and said it spoke for the attitude of toleration which this province has always taken as regards minorities. Premier Taschereau made it clear he stands against the neutral school and for this he also favored the bill. He hoped if Jewish schools are established they will be along lines of good Canadian thought.

LIQUOR EXPORT BILL OPPOSED IN THE SENATE

Ottawa, Ont.—A declaration by Senator Charles E. Tanner, of Halifax, that in his opinion the government bill to prohibit liquor clearances to shipments destined for the United States appeared to have been "dictated from Washington," featured discussion of this measure in the Senate.

The entire time of the Senate during a brief sitting was devoted to discussion of the bill. Senator Tanner occupied the major part of the time in a lengthy speech supporting the Conservative amendment to the motion for second reading.

This amendment which was moved by Senator W. B. Willoughby, Conservative leader in the Senate asks that the bill be not read a second time at present, "but that it be referred to a special committee, to be selected by the Senate, for the purpose of first obtaining information as to the effect the passing of the bill would have on the economic, national and international conditions and relations of Canada."

Senator Tanner asserted that the bill could commit Canada to a policy of the prevention of liquor export to the United States.

"The more we give these people, the more they want," said Senator Tanner, with reference to the United States. As far as the government of the United States was concerned he considered it both "relentless and selfish." The United States, he declared, always got the best of any bargain that it entered into with [illegible].

"Are they taking our interests into consideration in the tariffs they are framing?" asked Senator Tanner, in elaborating on his declaration that the United States consequently looked after its own interest exclusively. "How about the Chicago diversion? Are we getting any nearer to a solution of that?"

Senator Tanner said that the United States representatives in London today were saying: "Here we are. If you care to come to our terms there'll be an agreement." The senator expressed admiration for the point of view which he attributed to the United States. They were looking after their own interests, and he wished that the government of Canada would take a similar attitude in respect to the Dominion.

There were two other speakers. Senator Nathaniel Curry of Nova Scotia, said he would not vote for the bill. In his opinion withdrawal of Canada's liquor exports from the United States would not affect the situation in that country. Canada exported about two per cent. of the liquor consumed in the United States. Illicit manufacturers would very soon make up that deficiency.

BRANCH LINES TO SERVE NEW WESTERN AREAS

Winnipeg.—Covering nearly 90 miles leading into rich agricultural territory in Saskatchewan and Alberta, the Canadian Pacific Railway has just let contracts for grade construction of four branch lines, it was announced by D. C. Coleman, vice-president of western lines.

These touch Choiceland and Prince Albert, Bonningdale, Rockglen and Leduc. The contracts cover less than half of the railway's present grading program, and it is expected that tenders will be let this month for a substantially increased amount for branch lines.

When completed this year, the Tuffnel-Prince Albert line will give over 90 miles of new road north of the Saskatchewan River extending northwest from the new Nipawin bridge in land so rich in agricultural promise that it is already rapidly being settled up. This branch will be a significant part of the company's lines radiating from Prince Albert. The present contract covers the road from Choiceland westerly, a distance of 25 miles.

Projected to afford railway facilities to a large number of farmers who are located south of the Saskatchewan, the Bonningdale line also traverses a rich farming district between Saskatoon and North Battleford.

From Rockglen westerly is a continuation of the company's Fife Lake branch to afford transportation to a district of exceptional agricultural possibilities that is now being settled by British families brought to Canada by the co-operation of the Canadian Pacific Railway and the British Government.

Approximately 20,000 acres have been divided into quarter section farms supplied with the necessary farm houses, out building, horses, cattle and machinery. Additional contingents of settlers arriving this spring will profit by this transportation advantage.

The connecting of Lacombe and Western lines with Edmonton and Leduc, on the Calgary and Edmonton road, will furnish better access to the Alberta capital for the entire district. In addition, this rounds out the plan for the entire line and makes it suitable for the improved operating conditions now under consideration. The line as now built, will considerably shorten the haul for large numbers now engaged in mixed farming.

Early Seeding Operations

Saskatchewan Farmer Has Sown 200 Acres Of Wheat

Saskatoon.—Here's a record in spring operations for farmers of the West to shoot at. Thomas Wilson, of Harris, 50 miles southwest of here, had sown nearly 200 acres of wheat when his outfits pulled out of the fields recently.

Mr. Wilson, who is one of the "Big Four Farm" brothers, found the soil badly in need of moisture. For a depth of eight inches the land was like powder, he said. A few other farmers in Harris district are seeding. P. Moon, who farms at Grasswood, four miles south of here has plowed up 20 acres of brome grass. He plowed four inches deep and found no frost.

Outrages At Neudorf

Reward Of $300 Is Offered For Conviction Of Offenders

Neudorf, Sask.—The municipality of McLeod has offered a reward of $300 for the conviction of the parties believed to be waging a Vendetta against Louis Ulmer, a farmer of this district and his family. Last September when the farm was in possession of Ulmer's father, four horses and two cows were killed in a peculiarly cruel manner, and subsequently the granary was burned down, 1,400 bushels of wheat being destroyed. Recently two more horses, a cow and a calf were killed outright and four horses badly injured.

Australia Plans Larger Acreage

Melbourne, Australia.—Addition of a million acres to the wheat growing area of the state of Victoria is the aim of the state government. Hon. William Slater, state treasurer recently announced the associated banks in co-operation with the government are making $1,000,000 available for sowing additional wheat acreage.

All the relics of King Tutankhamen will be removed from his tomb by the end of this year.

Training the Mind Of a Child

Formative Period Of the Child's Mind Is During the First Five Years

Parents of today are exceptionally lucky in the fund of [illegible] knowledge they have at their command as to the feeding and care of their children. In these days of broadcasting health advice, disseminating of health literature and forming of health centres, there is little or [illegible] for sickly children who are the prey of disease. Vaccination and [illegible] the dangers of [illegible] and the discovery of the value of sunlight [illegible] preventing others [illegible] to the bodily health of our children.

The one subject on which all psychological [illegible] agree is that the [illegible] of their children in the home [illegible] parent during the first years of their lives is the most important factor in developing well balanced adults free from mental and [illegible] complexes.

Although the adult human has so much greater powers than any other creature in the animal kingdom, the human infant is the most helpless and dependent for a longer period than any other creature. The chick can scratch for its own food and the young fish can swim alone but the baby must be cared for throughout the first five years of its life. The case of the parents during this period is fitting it to take its place in the world when it grows older and enabling it to become adapted to its environment. This fitting into one's environment, the psychologists say, is sanity. People who can adjust themselves to the changes life brings with it, are essentially sane, while those who shrink from reality and dwell in a world of illusion are in some degree insane.

This business of teaching the child to become adaptable is the parents' responsibility and the basis of bringing up children who will grow to be sane adults.

Fear is one of the things with which the parent has to cope. The infant or young child has very little sense of fear, as shown by the fact that it constantly fails to realize the dangers of fire, climbing and so forth. The child cannot be allowed to discover by experimentation the dangers of these things and so must be taught to fear them.

Aside from these natural fears which come from the instinct of self-preservation, there is neurotic fear, that is, the fear of situations and people which are not harmful. When a child shows fear of strangers it is due to the [illegible] to being with one person and he fears every one else until he is able to adjust himself to being with other people.

[illegible] and a vivid imagination. These fears must not be laughed at. The parent must understand and help the child to realize that strangers will not harm him, and that the dark is the time for sleep. "Children who close their eyes do not see the dark and mother is not far away." And the child sees that while it was a baby its mothers' constant care was a necessity, whereas now it should be proud of becoming self-reliant.

Fear of self is a common ailment of childhood, and if not coped with can cause untold unhappiness in later life. It causes bashfulness and self-consciousness and the inferiority complex which we hear so much about, or on the other hand it may cause bullying and the desire to show off as compensations for this feeling of inferiority. If a child can be prevented from thinking too much about himself by having outside interests and interesting playmates, this fear may be overcome in childhood.

Fear of punishment or ridicule is often the basis of a habit of lying.

Freud claims that the cause of all these fears is to be found in the child's emotional life. He must have proper outlets for his emotions or they become welled-up within him and cause the child to be at a loss for some way of expending them and they may later break out as abnormalities. A child's emotional life often is disturbed because the parents misunderstand him.

There are two recognized emotional classes, the Introverts, and the Extraverts, as one psychologist calls them.

The Introverts find it more difficult to adapt themselves to their surroundings. They are constantly turning their thoughts within rather than without to people and affairs happening around them. They are always wondering what others think of them and are usually sensitive and self-conscious.

The Extraverts are the opposite type, interested in other people and things, and are usually self-reliant. Everybody has qualities of both these types, but if parents try to decide to which type their children belong, they will not cause unhappiness and nervous instability in a child of the Introvert type by blaming him for not taking an active part in things and not mixing well with his playfellows.

There is a happy medium between giving a child too much adult companionship and not giving him enough. Too much tends to spoil the child and make him too demanding when with children his own age. But too little deprives him of sympathetic understanding and the sense of self-respect which adult attention engenders in him.

Anticipation forms a health outlet for a child's emotions. Give him something special to look forward to which will break the monotony of his life and he will have pleasure in anticipating and thinking about it. As well as this, every child needs some sort of hobby into which he can put some of his own personality.

A child's emotional stability often depends on his parents' attitude to his natural questions dealing with sex. A child's question should be answered frankly to prevent him from thinking about the matter any further. It is when a child gets to brooding over these things that harmful results follow. Parents should be the natural source of information in all subjects.

Some sort of religion whose basis is love and which he sees practiced in the daily lives of those about him, is an invaluable aid to a child struggling with the little problems which make up his life. Often a child who has no companions of his own age creates an imaginary playmate. This used to be considered abnormal and queer, but it is now recognized as a normal child's method of making up for its lack of companionship. In fact it is only bright children who are capable of creating their playmates, and they are very real to them and should be treated with respect by parents.

Lying is often a great cause of strife between parents and children. Professor Earl Barnes says that at the age of three it is negligible, unimportant at six, serious at nine and tragic at twelve.

This is because young children do not understand the difference between truth-fancy and falsehood. During the first five years children are apt to talk merely for the sake of hearing themselves and do not distinguish between the products of their imagination and actual facts.

Lies are of two kinds—morbid and normal. Morbid lies are those which are acted out and embellished. These are usually told over a long period of time. We have all met this type of person, who tell things about their families or themselves—money or travel—which are obviously untrue. The cure for this type is broadening the child's outlook and getting him interested in some concrete thing so that he can really accomplish things, instead of telling of things he would like to accomplish in the form of lies.

Normal lies told by children of eight or so, when they have some idea of the difference between truth and falsehood are usually from some self-seeking motive—to obtain something they want or to avoid punishment. Truth telling is a product of civilization and the young child is not quite ready to take its place in this civilization. The best method of preventing the habit is to place before the child a constant example of truth telling in all matters. Don't let him see you condoning a "white lie" or he will soon decide that truth is only for certain occasions and use this to his own advantage.

"How long did Smith work for you?"

"Two hours—perhaps three—he was with me six months."—Muskete Vienna.

Husband (excitedly): Where is my hat?

Wifey: Hanging on that lamp.

Husband: Lamp! Huh! What crazy place will I find it next, I [illegible]

Wifey (snappily): On your head, I suppose.

Scribes in Turkey are taking to the use of typewriters since the adoption of the Latin alphabet there.

Telephone Language

Differences In Form Of Speech Between London and New York

Differences between the King's English and American usage, which strike the American traveller as amusing, have caused some complications for the secretaries of the American delegation to the London Naval conference. The British "telephonist" employs an altogether different set of expressions from her American counterpart, the "operator." A busy line brings forth the statement, "The line is engaged." When a connection is made the expression is "You are through," which means that your connection is through and not "Your time is up, please deposit another nickel."

"Hold on, there," is used for "Hold the wire." When a call is uncompleted it is announced as "ineffective." A call which is completed "matures." "Information" becomes an "inquiry desk." They do not "answer"—is transformed into the more formal, "There is no reply." An "operating room" is called a "switch room" and "long distance" is "trunk exchange." When lines are "out of order" in New York, they are "not working" in London. For telephone calls the "charges" in America become "fees" in London. For what Americans usually designate as "talking" over the telephone, with the British is "speaking."—New York Evening Post.

How To Induce Sleep

People Can Take Their Choice Of Many Ways

The sleep habits of 509 distinguished men were made public at Colgate University, Hamilton, N.Y., and upset some popular notions.

The critical age when it is unsafe to lose sleep is 25. Contrary to classical anecdotes, men of important affairs sleep about the full eight hours. It is youth instead of age that sleeps the least.

A large number of unusual personal idiosyncrasies are reported in inducing sleep. One editor of a national magazine sticks his feet out from under the bed clothes. One supreme court justice buries his face in his pillow. A young writer strains to keep his eyes open.

Three men repeat Masonic rituals. An actor-playwright repeats Christian names in haphazard fashion. A judge counts backward, or repeats the alphabet backward.

A judge thinks about the binomial theorem or extracts a few square roots in his head. A college professor eats onions. A writer of detective stories thinks about the futility of everything. One bishop thinks about things accomplished rather than those ahead, another bishop smokes and a third bishop prays.

Occurrences Of Graphite

Found In Northern Parts Of Canada and Baffin Land

Graphite is found in Canada in the provinces of Ontario, Quebec, New Brunswick, Nova Scotia, and British Columbia, and in the northern parts of Canada in the Northwest Territories and on Baffin Island. Nearly all of Canada's graphite production comes from Ontario and Quebec, where graphite has been mined for more than sixty years, most of the producing mines and seven existent graphite concentrating mills being situated within a radius of 150 miles of Ottawa.

Probably more than one-third of the people of the earth live in China and India.

The Canadian Government's aviators mapped 52,000 square miles of territory during the 1929 season.

Chinese Financier

"Chinese people are beginning to realize the value of currency and are learning to handle it systematically. The financial position in China is better today, but not until the government adopts higher taxation will there be peace," is the view of K. N. Chang, president of the Bank of China, and outstanding financier of the country, who sailed from Vancouver for Shanghai aboard Canadian Pacific liner "Empress of Russia" recently. Photograph was taken on the ship.

Why People Are Bored

Do Not Take Time To Be Really Interested In Any One Thing

According to the Christian Century, as quoted by the Literary Digest, thousands of people in this modern civilization of ours are inexpressibly bored. The question in many homes is, "What shall we do?" Weary of bridge, tired of the radio, surfeited of the movies, men and women do not know what to do with [illegible]. This is not the general attitude by any means, for the variety of entertainment enables one to escape from one to the other. Yet this rush from one activity to another is in itself productive of boredom to some people. They are like people in a motor car speeding over the highway. They go so fast they have no time to observe, the beauties of nature are presented only as a blur, and blurs are notoriously uninteresting.

The fact is that interest in life cannot be sustained without an aim, and when an aim is lacking leisure is undesirable. The negative attitude we adopt when we drift from pleasure to pleasure deadens our highest potentialities, and, unconscious sometimes of the reason, we grow discontented. But the reason, if we examine ourselves, is that we have chosen to be lazy when our highest impulses urged us to purposeful activity. Leisure, indeed, like fire, is a good servant, but a bad master, but leisure can only be made the best of by deliberately resolving to concentrate attention upon a few things. Far better to be interested in one thing than bored by many, and the more attention is directed towards a thing the more interest in it grows, and with interest happiness. It is a sign of boredom, probably, that people are turning from novels to biography, travel and history. After a while they know all the plots, and get tired of reading of the same themes. So they take up biography and find that life itself has greater variety. But they would gain more out of literature if they were deliberately to seek to master one phase of it, instead of sipping like a butterfly at many literary blossoms, and, what is more, they would not get "fed up" so easily.

Phonograph records in ten different languages are sold in Egypt.

Canadian National Hotel Appointments

C. L. Weldon Appointed Manager Of the Fort Garry, At Winnipeg

The resignation of A. W. Hodgdon, resident manager of the Fort Garry Hotel, Winnipeg, was announced recently by A. S. McLean, general superintendent of the hotel department, Canadian National Railways.

C. L. Weldon, manager of the Macdonald Hotel, at Edmonton, will become manager of the Fort Garry Hotel, and Mr. Weldon will be succeeded by N. H. Tillman, the present manager of the Prince Arthur Hotel at Port Arthur.

H. E. Perrott, assistant to the general superintendent of hotels, at Winnipeg, becomes resident manager of the Prince Arthur Hotel, and he will be succeeded in his position in Winnipeg by Charles J. Monaghan, chief clerk of the hotel department at Montreal.

C. L. Weldon, the new manager of the Fort Garry Hotel, at Winnipeg, was born in Montreal on March 29, 1891, and before joining the hotel service of the Canadian National Railways, he was engaged in hotel work in Montreal, New York, Philadelphia. In 1926 he was appointed assistant manager at Jasper Park Lodge, Alberta, and at the close of the season he became assistant manager at the Fort Garry Hotel. From there he was transferred to special duty in the hotel department at Montreal, and in 1927 he was appointed manager of the Macdonald, at Edmonton.

N. H. Tillman was born in Indiana on August 2, 1896, and went to Edmonton in 1908, where he engaged in the hotel business. When the Macdonald Hotel was opened he joined the staff there and remained there until 1926, when he spent a short time in the Fort Garry, at Winnipeg, before being appointed assistant manager of the Chateau Laurier, at Ottawa. Recently he was promoted to be manager of the Prince Arthur Hotel at Port Arthur.

H. E. Perrott was born in Ottawa on June 19, 1888, and entered the service of the Canadian National Railways hotels as chief clerk at the Fort Garry Hotel, in Winnipeg, in 1913. He later served at the Macdonald Hotel, in Edmonton, and in 1922 he became chief clerk to the general superintendent of hotels at Montreal. In 1927 he was appointed assistant to the general superintendent with headquarters at Winnipeg.

The Bard Of Avon

Controversy Still Rages Over Authorship Of Shakespeare's Plays

One of the strangest arguments in history is the never-dying feud over the authorship of Shakespeare's—or Bacon's—plays. The mild debate over authorship of the American Declaration of Independence never attained anything like the prominence of the Shakespeare-Bacon controversy. A gentleman has just bobbed up in California of all places with "irrefutable evidence" that Bacon wrote the plays. But, in a few weeks somebody in Bombay, or Batavia, will come forward with equally irrefutable evidence on the other side. We don't suppose it matters much, but if you want our personal opinion in the controversy, it wasn't Shakespeare and Bacon at all, but two other fellows.—Vancouver Sun.

One morning, when the children were eating breakfast, Milford put two heaping spoonfuls of sugar in his cocoa.

"I should think one spoonful would be enough," objected his sister.

"I should think so, too," he replied, "but it's not."

Flattery is different from poison in that those who swallow it are the only ones who never turn sick.

Free Land Still Attracts

Official Figures Show Increase In Homesteading Last Year

Contrary to what seems to be a prevailing impression the lure of free land has lost nothing of its power to attract settlers to Canada in those districts where homesteading is still available. According to the official figures about 2,775,000 acres were taken up last year, an increase of 285,000 acres over the 1928 total. The aggregate of entries in 1929 for the quarter section (160 acres) of homestead lands offered free to newcomers on payment of a registration fee of $10 was 16,435, an increase over the preceding year of 1,779 entries or 11.4 per cent.

Analyzing the returns the Quebec Chronicle-Telegraph remarks that, as in 1928, the greatest number of homesteads were taken in the province of Alberta, with 9,892 entries. In Saskatchewan, 6,129 persons avail themselves of the offer of free homesteads and in Manitoba the number was 747. Each of these provinces shows considerable gain over the previous year; 20.5 per cent. in Manitoba, 11.6 per cent. in Saskatchewan, and 10.2 per cent. in Alberta, while there was also a gain of 16 per cent. in the aggregate for land in the Railway Belt and Peace River Block of British Columbia. The British Columbia entries totalled 276 in 1929, compared with 703 in the previous year.

While these homestead lands are now for the most part some distance from railways and established communities, the Chronicle-Telegraph comments, they offer to the settler good prospects in view of the rapid settlement that is taking place throughout the Canadian West. From homestead areas in the Peace River District farmers in recent years have carried off some of the most coveted awards at the International Grain and Hay Shows and at other fairs and shows at which there are competitive entries from all parts of the continent.

Finds New Planet Is Frozen Solid

Receives Very Little Heat and Sunlight Say Astronomers

If human beings inhabit the new planet spinning 4,000,000,000 miles away in space, they are hardy folk because it probably is so cold there that nitrogen would be a solid and oxygen a dense liquid.

Such was the consensus among Chicago astronomers. They pointed out that the newly discovered astral body receives only one 2,000th as much heat and sunlight as the earth.

"We like to toy with the idea that astronomers on the new found planet may be peering at us through telescopes," said Prof. George Van Biesbroeck of the Yerkes Observatory, at Lake Geneva, Wis., "but if there is any form of life there, we may be sure it is quite different than any on earth.

"Of course that does not mean conditions of years. Life on the earth is comparatively new."

Japs Like Department Stores

Make Visit To One a Regular Sight-Seeing Trip

The development of large department stores in Japan is so recent that the average customer looks upon an atmosphere of modernity and luxury. The stores represent to the Japanese a super-commercial exhibition. It is not uncommon for great crowds to go shopping without any intention of making purchases. Sight-seeing parties from country districts, family groups, and bodies of students from schools may be seen in the stores at almost any time. In the summer season all of the principal stores in Tokio place at the disposal of their customers large, attractive roof gardens.

"Can we play store in here, Mama?"

"Yes, but you must be very, very quiet."

"We will, Mamma. We'll pretend we don't advertise."

"When I grow up I want to be a cashier."

"Do you earn much money?"

"I don't know, but it is so good for running practice."—Pages Gaies, Yverdon.

NEW TYPE OF SAFETY PLANE

Walter Stein, German aeronautical expert, is coming to Canada in the hope of organizing a company to manufacture the latest model of the Focke-Wulf aeroplane. One of the company's 12-passenger Mowe transport machines is seen at the left of illustration. The Luft Hansa has ten 'planes of this model in service. At the right is a Focke-Wulf sport model doing its stuff at a low altitude. Five years of experimentation is embodied in the newly perfected curvatures of the wing-surface which, it is claimed, prevent spinning and provide exceptional cross-stability.

Great Britain Refuses To Enter Military Security Pact With France

London, England.—Great Britain refuses to enter a military security pact with France as the price of reduction of French naval demands.

This attitude, which may dash hopes of a five-power agreement, was made absolutely clear recently by a British spokesman after Premier J. Ramsay MacDonald had conferred with Foreign Minister Dino Grandi, of Italy.

The spokesman added, however, that negotiations seeking a formula satisfactory to both France and Britain were continuing.

England, the spokesman said, is anxious and willing to go the limit for peace and for improvement of the machinery for keeping peace and giving security against war.

"But any further military commitments are absolutely impossible," he declared. "They would be tantamount to tying ourselves down to engage in military operations without being able to control the situation from which they arose. No British government could undertake such commitments, which are contrary to the feeling of the whole British people."

Previously, the Italian delegation issued the following communique:

"Signor Grandi, accompanied by Signor Rosso, had lunch with Prime Minister MacDonald at Chequers. Before lunch, in conversation lasting more than an hour, MacDonald and Grandi discussed the present state of the work of the conference. Grandi again took the opportunity to state Italy's viewpoint on the problem of disarmament. The position of Great Britain and Italy also was examined regarding the questions of interpretation of article 16 of the League of Nations covenant."

The final statement of the communique was regarded as significant. France in seeking a British security pledge had sought to make mandatory the provisions of article 16 relating to action to be taken against an aggressor, whereas England for years has interpreted the provisions as optional. The mere fact that the article was discussed today might indicate that its re-interpretation has not been dropped as a means of solving the present conference deadlock.

Italy's interest in the proposal was held natural, in view of her position in the Mediterranean, a possible future trouble scene.

The French expressed pessimism when they learned of the British statement. The whole attention of British diplomats will be concentrated on Mediterranean problems this week. A new Anglo-Egyptian treaty and settlement of Palestine's political future also will be discussed at another conference.

Opened Exhibition By Radio

Marconi Spoke From Genoa, Italy, To Sydney, Australia

Genoa, Italy.—Short radio waves cutting across the Atlantic, America and the Pacific carried the voice of Marquis Guglielmo Marconi, inventor of wireless, from his yacht Electra here, to Sydney, Australia, to open the electrical exposition there.

Marconi spoke across 11,000 miles to Director J. Fisk, of the electrical association, sending a message which outlined what he intended doing later in the day—transmitting a small unit of power to Sydney in order to close a circuit there and light the electric lamps of the exposition.

Wheat For Starving Chinese

Western Farmers Asked To Donate a Bushel Of Grain For This Purpose

Winnipeg, Man.—Pleas from far off China, where millions have died of starvation and millions more face a like fate during the coming year have reached the little settlement of Domaine, Sask., centre of a thriving agricultural district.

From business men and agriculturists of the district comes a plan to aid the people of the northern sections of China, where 3,000,000 persons have perished from hunger and privation.

The thousands of farmers of the western prairies are urged, in a resolution adopted at a meeting of Domaine folk, to donate one bushel or more of wheat each, and the railway companies of the Dominion are requested to arrange free transportation of this grain to the Orient.

Tenth Anniversary Of Suffrage Celebrated

Luncheon Party In Forty-Two States Joined By Radio

Washington, D.C.—The National League of Women Voters on March 26, celebrated ten years of women's suffrage with a chain of luncheon parties stretching across the United States.

The birthday parties were arranged in 42 states. The luncheon tables were joined by a nation-wide radio hook-up, with Carrie Chapman Catt, silvery-haired, 70 years old, the grand old lady of women's suffrage addressing the thousands of celebrants.

The birthday celebration was the first of a series planned for the next few months in recognition of the first decade of women's voice in government. A convention will be held in Louisville, April 18.

Dr. R. M. Mitchell Acquitted

Jury At Weyburn Returns Verdict Of Not Guilty

Weyburn, Sask.—Dr. R. M. Mitchell, charged with theft in the Court of King's Bench here, was acquitted by a jury that returned a verdict 20 minutes after retiring.

This concluded a case that has attracted attention of everybody in Weyburn and district for some time. Dr. Mitchell was formerly superintendent of the mental hospital here, and late last fall was requested to hand in his resignation. Following certain investigations by the government, a charge of theft was laid by the attorney-general's department.

The charge arose out of alleged handling of monies in the X-ray account in connection with the hospital.

Airmen Reach Railway

Vance and Bisdale Complete Long Trek Southward

Winnipeg, Man.—Jim Vance and Brian Bisdale, Northern airmen who wintered at Baker Lake, off the west coast of Hudson Bay, have completed a 100-mile trek southward by dog-team. They reached the fringe of civilization March 26, when they entered Gillam, which is Mile 327 on the Hudson Bay Railway, and the farthest north point to which the "Muskeg Limited" is operating along the line to Churchill.

Millions For Good Roads

Saskatchewan Government Has Ambitious Program For This Season

Regina, Sask.—Nearly seven millions will be spent on Saskatchewan roads this season it was announced in the legislature by Hon. A. C. Stewart, K.C., Minister of Highways, during the course of the debate on the budget.

The total of $6,852,286 is to be divided as follows: On trunk highways $2,962,585; gravel surfacing, $3,373,401; sundry grading, $390,000; colonization roads, $120,000. The latter refers to roads in newer districts of the province, part of the scheme of the new Anderson government.

Mr. Stewart assured the members that there was no intention on the part of the government to create a highways commission or of abandoning the present department of highways. Roads of the province, their construction and maintenance, would remain as they had always done, under the direct control of the minister.

British Coal For Canada

Tonnage Chartered For Trade Says British Minister Of Employment

London, Eng.—Very considerable orders for British anthracite and soft coal have been obtained in Canada, said Rt. Hon. J. H. Thomas, lord privy seal and minister of employment, in the House of Commons. The minister was questioned by Sir Kingsley Wood, Conservative member for West Woolwich, who asked if anything had been done to secure westbound cargoes for the grain boats coming from the Dominion. Sir Kingsley suggested coal as the most natural article of cargo exchange.

"Yes sir," replied Mr. Thomas quickly, "my information is that very considerable orders for British anthracite and soft coal have been obtained in the Dominion and I am able to announce that a substantial volume of tonnage has been chartered for this trade to commence with the opening of the St. Lawrence to navigation."

Will Not Resign

Hon. Dr. Godfrey Will Stand Pat Over Famous Postscript Episode

Toronto.—Hon. Dr. Forbes Godfrey, Minister of Health for Ontario, has reiterated his stand that he will not resign because of the public rebuke administered to him in the legislature by Premier G. H. Ferguson, over the now famous "postscript episode." He also denied a rumor that he will take a long vacation. "Both are a pile of dreams," he declared.

It was for his action in adding a postscript to a letter written to a constituent of his in which an application for a mother's allowance made by a woman residing in Long Branch, was refused.

The postscript reads as follows: "See her if you can and get her support the 30th (election day), and we will be able to take more time with the case."

Death Results From Blow

The Pas, Man.—Leslie Jarvis, 15, is dead following a friendly boxing match with a companion in his father's store at Hudson Bay Junction, Man. He fainted when struck a heavy body blow and failed to regain consciousness.

NEW APPOINTMENT

Emile J. Hebert who has been appointed passenger traffic commissioner, Canadian Pacific Railway, effective April 1. Mr. Hebert has been connected with the railway almost since its inception in the passenger department. His associations with French-Canadians all over Canada are at once close and wide.

Overseas Wireless Phone

Direct Wireless Telephone Service Between Canada and Britain Is Contemplated

Ottawa, Ont.—Confirmation of the statement of Hon. H. B. Lees-Smith, British postmaster-general, respecting the contemplated establishment of a direct wireless telephone service between Canada and Great Britain was obtained from officials of the Department of Marine. So far, however, the matter has not gone beyond the negotiation stage.

When the system is established it will operate through the Marconi beam wireless at Drummondville, Que., from where the transmission will be direct to Rugby, England. This circuit has been operating experimentally for the last year. It was employed recently in the broadcast of the King's speech at the opening of the naval disarmament conference. Officials were unable to say when the system will be inaugurated commercially.

Elected Party Leader

J. W. McDonald Is Chosen As Leader Of Liberal Party In Alberta

Calgary, Alberta.—J. W. McDonald, K.C., former mayor of McLeod and prominent in political life of the province, was elected leader at the convention of the provincial Liberal Association.

The election was made on the third ballot, and Mr. McDonald will accede to the post previously held by Captain M. T. Shaw, K.C.

The race for leadership was close between Mr. McDonald and W. R. Howson, of Edmonton, and H. Montgomery, of Wetaskiwin, who were the other candidates.

German Cabinet Resigns

Berlin, Germany.—The Mueller cabinet has resigned. The resignation followed an all-day discussion of party leaders which failed to result in an agreement on the question of unemployment insurance. The ministry, which has been in office almost two years, has had difficult sailing of late, particularly with the financial program of Dr. Paul Moldenhauer, minister of finance.

Government Will Continue The Trade Treaty With Australia

Ottawa.—Both the sub-amendment, calling for revision of the Australian treaty, and the amendment declaring that it should be abrogated, met with defeat in the House of Commons. The sub-amendment, which was moved by Hon. H. H. Stevens (Cons., Vancouver Centre), was defeated by a vote of 105 to 51. The amendment, which came from Robert Gardiner, U.F.A. member for Acadia, was even less successful. It was lost by 141 to 30.

Party lines were followed closely in the division on the sub-amendment. All the Conservatives present, and H. B. Adshead, Labor member for East Calgary, favored the Conservative proposal. Lined up against it were all the Liberals, Liberal-Progressives, Independent members, Progressives and members of the U.F.A.

Support of the U.F.A. amendment calling for abrogation of the treaty came from members of the U.F.A. party, Progressives, and one Liberal, A. Boucher, the Conservatives, Liberal-Progressives and Independent members.

Following defeat of the sub-amendment and amendment, the government motion to go into supply was declared carried. This motion has been before the House for some days but discussion of the Australian treaty has prevented its passage.

West Grows Airminded

Western air mail service between Winnipeg and Calgary—over 800 miles in distance—has been inaugurated recently and the Canadian Pacific Express Company has renewed its contract made in 1926 to carry express packages in addition to the regular mail. This allows of a saving of more than 21 hours between the two cities. The package which pilot W. J. Buchanan is shown delivering to a Canadian Pacific Expressman, was mailed eight hours previously at Calgary and had therefore travelled at the rate of more than 100 miles an hour to reach Winnipeg, its destination.

Viscount Willingdon Sees No Danger In Situation In India

Toronto.—His Excellency Viscount Willingdon, Governor-General of Canada, was made life member of the Empire Club at a luncheon when the certificate was presented to him by Sir William Mulock, chief justice of Ontario. A distinguished gathering witnessed the ceremony and heard His Excellency discuss the British Empire.

In making the presentation Sir William Mulock said: "May it ever be to him an outward and visible sign of the place he occupies in the hearts of all Canadians who considered the British Empire the most effective instrument for world welfare this earth has ever known."

His Excellency said there were limitations to what a governor-general could say. He would like to speak of India, China, the naval conference and various other vital matters and if he were prime minister instead of governor general perhaps he could give a tip to the club on the general election date, he added facetiously.

Discussing the change in the countries of the Empire from colonial to dominion status, equal partners now in working out the Empire's destiny, Viscount Willingdon said some feared this development would result in the Empire's disruption, but speaking from the bottom of his heart, he could foresee nothing but a closer growing together of the partnership with co-operation growing firmer.

From a personal acquaintance with Mahatma Gandhi, Indian Nationalist leader, Lord Willingdon said he did not think there need be any anxiety about the "adventure" of Gandhi for complete independence. Gandhi had tried the same thing when Lord Willingdon was governor of Madras several years ago. The British government had pledged itself to hand over the machinery of government to India when its people were fitted for self-government.

Meanwhile Gandhi's followers were in a great minority of the Indian population, the Indian princes and the moderates and thoughtful people who "thoroughly disapproved of Gandhi's adventure" would in the future, as in the past, remain loyal to the British crown.

British Companies Interested

May Invest In Oil Fields and Later Build Steel Mill

Calgary, Alberta.—Laying down of a million dollar stock and oil-well drilling and operating equipment in Calgary during the coming summer and later establishment of a steel mill in this city or at Vancouver if the market proves sufficiently attractive are being recommended to the large British financial and manufacturing interests represented by R. A. Raymont. Mr. Raymont has spent some time looking over the market provided by the Turner Valley field.

While declining to give out the names of the British companies which are interested, he stated that they are in a position to handle Canadian business in practically unlimited volume. And it was possible that a merger of a number of well-known firms engaged in the iron and steel manufacturing industry may be formed with a subsidiary Canadian company to handle the business in the Dominion.

Amendment Is Lost

House Of Commons Defeat Amendment To Bill Providing For Divorce Courts

Ottawa, Ont.—The House of Commons defeated the amendment of Thomas McMillan, Liberal member for South Huron, to the Woodsworth Bill providing for divorce courts in Ontario, by twenty votes. The vote stood for 88, against 108.

The amendment expressed regret at the spread of divorce in Canada and advised a campaign to foster the idea of the sanctity of the home in the Dominion.

After the vote on the amendment there were calls for a vote on the main motion. Mr. Speaker Lemieux ruled that as the private members' hour had expired, it would not be possible to take this vote if any one objected. George Spotton, Conservative, North Huron, objected, so the vote was put over until another sitting.

Heavy Penalty For Robber

Montreal.—The maximum penalty of 14 years in the penitentiary was given Robert A. Watson, who confessed to a series of armed robberies in Montreal during the winter when he appeared in police court here. Watson called himself the "Lone Wolf" and robbed some half dozen managers of chain stores and other premises during his career here.

Bandit Gets Heavy Sentence

Hamilton, Ont.—Fred Brooks, bandit, said to be from Saskatchewan, who tried to hold up Bert Irving in his drug store recently but was overpowered, was sentenced to seven years by Magistrate Burbidge. He is also to receive 30 lashes in three instalments. He pleaded guilty to armed assault.

Would Bring Results Of Research Work To The Knowledge Of Farmers

Regina.—Recommendation will be made by the Agricultural Committee of the Canadian Chamber of Commerce following a session here that research work in Canada be extended in all the provinces of Canada, and that further methods be adopted by the Canadian Chamber of Commerce to bring the results of such research to the knowledge of individual farmers as far as can be done.

A second resolution was passed that "the conference suggests to the Canadian Chamber of Commerce that a national bureau of agriculture be established in the Canadian Chamber of Commerce, which bureau would be completely directed by one or more recognized experts, whose duties it would be to survey the whole question of agricultural production, marketing, research, education, grading, standardization and so forth, and make available to the agriculturists and to business findings and recommendations which because of their authoritative, impartial and thorough nature will commend themselves as sound national procedure and inspire greater confidence on the part of our producers, middlemen and consumers."

In this connection the Regina conference will recommend to the Agricultural Committee of the Canadian Chamber of Commerce that this committee recommend in turn to the Dominion Government that a committee be set up to study agricultural problems in Canada, members of the body to be men familiar with the economics of agriculture.

"What's Ahead for Agriculture in Canada?" was the question upon which the National Agricultural Committee of the Canadian Chamber of Commerce based its discussion at the opening session of a meeting at the Saskatchewan Hotel. Col. Robert McEwen, London, Ont., [illegible]

Representatives attending the meeting were welcomed by Col. J. H. Woods, Calgary, president of the Canadian Chamber of Commerce, and by George H. Barr, K.C., Regina, Saskatchewan vice-president of the Canadian Chamber of Commerce.

Hon. J. D. MacGregor, lieutenant-governor of Manitoba, told the meeting that, in his opinion the day of $1.75 wheat had passed and emphasized his opinion that the farmers of the prairies must enter diversified farming. The climate and the various soils of the prairies were admirable for the growing of forage crops and thus the possibilities for live stock were great.

"Pay your taxes with your stock and have the returns from your grain crop as velvet," he said.

Hon. Mr. MacGregor was winner of the grand championship at the Chicago International Exhibition for the years 1912 and 1913, and is known across the continent as one of the leading stock men of Canada and the United States.

George H. Barr, K.C., spoke of the opportunity for service provided through the medium of the Canadian Chamber of Commerce.

Geographical Features Named After Indian Chiefs Are Numerous From Coast To Coast

Geographical features named after Indian chiefs are numerous in Canada. It is exactly 100 years since the first appearance on a map of the name Petawawa. According to the records of the Geographic Board of Canada, Petawawa River occurs on a map made in 1829 by Colonel John By, who built the Rideau Canal.

The name is now applied to the military camp on the Petawawa River in Renfrew County, Ontario. The Indian chief Petawawa, is said to have hunted in the region and the meaning of the name is "the sound is coming" or "approaching sound."

In some cases an Indian has been commemorated by a name given him by the whites. There are several examples of this nature in New Brunswick, where Barnaby River, Bartibog River, Cain River, and Paris River bear the names of Indian chiefs who once lived on these streams.

In Quebec the town of Donnacona recalls the "Lord of Canada," who was taken to France by Jacques Cartier in 1536 and died there. In Manitoba, Pegu's post office takes its name from a Saulteaux chief who, in 1835 was granted an annuity of $25 by the Hudson's Bay Company. He was a friend of the colonists of the Red River Settlement (Winnipeg) and well disposed towards the whites.

In Saskatchewan, Cutknife Hill according to tradition, commemorates a Sarcee who was killed on it in battle with Crees. In Alberta Crowfoot Village, Mekasto railway station, and Chiniki Lake, are a tribute to the worth of Indian chiefs who on the coming of white men ceded their title to vast acres and forsook tribal warfare. Crowfoot, head chief of the Blackfeet was a keen business man, not a warrior, who kept his tribe at peace with the whites. Mekasto, or Red Crow, head chief of the Southern Bloods, was loyal throughout the 1885 rebellion. Chiniki was a Stoney Indian chief.

Kananaskis pass, in the Rockies, commemorates an Indian who made a wonderful recovery from the blow of an axe. Pouce-Coupe River, in Alberta and British Columbia bears the name of a Beaver Indian chief who settled on the river with 500 followers.

The name is French for "cut thumb." In British Columbia, Kinbasket Lake, an expansion of the Columbia River, was so named in 1866 by Walter Moberly, C.E., after a Shuswap Indian chief who was of service to him on an exploratory trip. Nicola Lake commemorates an Indian chief whose other name, Nwistesmeekin, meaning "walking grizzly bear," well describes his character.

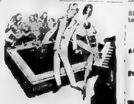
To Grow Early Potatoes

B.C. Association Imports Certified Seed From Prince Edward Island

For the purpose of supplying the prairie markets with early potatoes, some fifty farmers on Lulu Island, British Columbia, have formed the Richmond Early Potato Growers' Association. Each member will put in a special plot of two or three acres of early potatoes, which will be planted simultaneously at the end of the present month, so that they will be ready for market at the same time. Irish Cobbler has been selected as the variety to use and a car-load of certified seed has been imported from Prince Edward Island.

Pankhurst Statue Unveiled

A statue of Mrs. Emmeline Pankhurst, who led the movement for the enfranchisement of women in Great Britain, was unveiled in Victoria Tower Gardens, Westminster, in the presence of many of the leading fighters in the suffrage cause. Many political leaders were present and Stanley Baldwin, the former Premier, performed the unveiling ceremony.



"Sing us a song."
"I dare not with all these people."
"Pooh, they won't listen." — Muskete, Vienna.

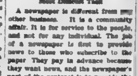
Here To Give Service

Paper An Community Affair Has Most Difficult Task

A newspaper is different from any other business. It is a community affair. It is for service to the people, and not for any individual. The job of a newspaper is first to provide news to those who subscribe to the paper. They pay in advance because they want news, and the newspaper's part of the contract is to provide the news. That is why newspapers find it hard to comply with requests by individuals to leave out items of news. If newspapers left out unpleasant news to individuals every time they were asked to do so, the day would eventually arrive when there would be no newspapers.

In the case of court cases the newspaper treats such as cases, not as individuals. There is no more animosity in a newspaper reporting public proceedings than there is in police or other public officials doing unpleasant things to individuals, such as taking them before the courts. It is part of the job in each case. In the instance of newspapers, as with police and other officials, care is always taken that the innocent shall not suffer.

Newspapers have to be trusted to do the right and fair thing as far as possible at all times, consistent with adherence to the clear and straight path of duty. The task is always a difficult one, and the public should realize it.



(By Annabelle Worthington)

Lingerie detail presented in eggshell crepe collar of a crepe silk in dark blue background printed in green, is decidedly chic to wearer. The eggshell crepe appears again in neat turn-back cuff.

Style No. 3372 that can be had in sizes 36, 38, 40, 42, 44 and 46 inches bust, achieves a most unusual slenderizing effect through the moulded long-waisted bodice, and fitted circular skirt. A narrow belt indicates normal waistline, which is generally becoming to most figures.

Black silk crepe with asparagus, brown with turquoise blue, purplish-blue chiffon, crepe marocain in putty beige and canton crepe in terra-cotta are ideal selections.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Problems Poultry Men Have Not Solved

Why Eggs Should Differ According To When They Are Laid

Why should eggs laid in January, February, and March, make light cakes, and eggs laid in May, June and July make heavy, soggy cakes? Why should eggs laid in March give a low percentage of chickens as compared with eggs laid in January, February, April or May?

These were some of the unsolved problems mentioned by Professor R. K. Baker, head of the poultry department at the University of Saskatchewan and producers of the world's champion hen, in his discussion before the Saskatoon branch of the Canadian Society of Technical Agriculturists on "some discoveries that have affected poultry breeding."

Discoveries regarding vitamins had made the 300-egg hen possible. Leg weakness, partial paralysis and crooked keel bones were becoming rare since vitamins had been studied and the birds were getting sprouted oats, cabbage, carrots and cod liver oil.

X-ray experiments on eggs were giving interesting results. A short exposure is said to improve the hatching percentage of the eggs. An exposure of 5 to 20 minutes is said to increase the rate at which chicks grow after hatching. An exposure of several hours is said to affect the sex ratio of chicks so that more of the chicks are females.

When the University of Saskatchewan flock was started in 1913 the laying average was less than 100 eggs per hen. By 1926 it was over 175 eggs. Last year's average has only been worked out for one family. The 44 daughters of one bird average 217 eggs. There was not a poor bird in the family. The 358-egg champion came from another family.

Colour Indicates Real Grade

Maple Sugar Or Syrup Of Light Color Is the Best Grade

The maple sugar industry is one of the oldest known to this continent. It was brought to the early settler by the native Indian and today is of outstanding commercial interest. The Dominion Department of Agriculture finds that quality in maple sugar and syrup is clearly indicated by colour. The grading rule is the lighter the product the better its quality. Grade 1 is very light in colour, corresponding closely to clover honey in appearance. Grades 2 and 3 are perceptibly darker, while Grade 4 corresponds quite closely to the colour of buckwheat honey. Quality counts in maple products as in everything else.

Completing Dairy Survey

Dr Misner, of Cornell University, N.Y., has returned to his work, after completing the field work of a survey of the dairy industry of Saskatchewan. J. K. Finlayson, of the Saskatchewan Markets Branch, has gone to Cornell with him, where he will complete the summarization of the facts and figures, which will occupy about two months.

Nearly 30,000 tons of beans were shipped daily during the recent bean harvesting season in southern China.

N. B. WALTON

General Superintendent of the Manitoba District of the Canadian National Railways, who has been appointed General Superintendent of Transportation for the Western Region, succeeding V. I. Smart, the new Deputy Minister of Railways and Canals.

Garnet Wheat In Quebec

Excellent Quality Of Wheat Grown In the Abitibi District

Samples of Garnet wheat grown as an experiment in the Abitibi district of Northern Quebec, by the settlers there, have reached the Colonization Department of the Canadian National Railways. They are excellent in quality and size of kernel, and apparently demonstrate the adaptability of this variety of wheat for the northern districts of Quebec and Ontario. The experiments in Garnet wheat were carried on last season by 105 farmers in the Abitibi district, and these farmers produced altogether about 6,000 bushels of the wheat, the yields averaging between 25 and 30 bushels per acre. This is considered to be a splendid record for the northern districts, and the farmers are so pleased with the success of the trials, that they are planning on seeding even larger areas during the coming season. The experiments were conducted by the farmers more or less in the nature of a "field and bin" competition, under the direction of Father Minette, who has been in charge of settlement work in that district for the Quebec Department of Colonization. The samples of Garnet wheat sent to J. E. L. Foros, general agent of the Colonization Department of the Canadian National Railways, at Montreal, are to be exhibited to prospective settlers for that district.

A New Society

What is declared to be the hardest-thinking society in the world has been formed in Europe. It is "The Puzzlers' League," and has on its rolls enigma experts, wizards of the cryptogram, the crossword and the charade. The motto of the society is: "Puzzle solving fights off boredom, the greatest enemy of the human race."

She—"When you save up a thousand dollars I'll marry you."

He—"I know where I can borrow five hundred."

She—"Well, maybe that's enough to start with."

COLONEL W. G. BARKER, V.C., D.S.O., M.C.

The photograph here shows Col. W. G. Barker, V.C., D.S.O., M.C., with bar, who was instantly killed in Ottawa, when his aeroplane stalled at a low altitude and crashed to the ground. Col. Barker was one of the greatest of Canada's war aces, having 52 enemy aeroplanes to his credit.

Three Hundred Millions Spent By American Tourists In Canada During Year 1929

Gold from the south washes over the international boundary in great waves as soon as the tourist season begins. The year 1929, for which figures were just made public, was the best on record. Practically 300 millions were spent in Canada last year by tourists.

Canadian tourists in other countries, mainly the United States, were also generous with their cash, keeping in mind the Dominion's small population. One hundred and eleven millions were spent by Canadians in other countries, according to bureau of statistics' estimates.

The balance of tourist business in Canada's favor, amounting to some 189 millions, was twice as great as the adverse trade balance (visible balance) for 1929.

The expenditure grows by leaps and bounds. Automobile tourists from the United States spent $24,000,000 more last year than in 1928, and steamer and train tourists another $8,000,000 more.

When tourists' expenditures are added to "visible" trade figures with the United States, expenditures here to exports, and Canadian expenditure there to imports, the present difference of $350,000,000 in favor of the United States is cut in half.

Less than a decade ago (1920) the expenditures of tourists in Canada was calculated at $83,000,000.

Hard Legal Problem

English Magistrates Puzzled Over Definition Of "Farmer"

What is a farmer?

Hundreds of people who gain their livelihood from their own land in the counties of England are affected by that legal question.

Large sums of money, too, are involved, for dependent on the answer to the problem is the amount of rates which may, or may not, have to be paid by the men and women who consider themselves "farmers" in the legal sense.

Is, for example, a bee-keeper a farmer? Can a keeper of chickens be called a farmer?

One side of the difficulty has been settled by the Oxfordshire Quarter Sessions in considering a rating appeal—the first case of its kind. The magistrates at the Oxford County Hall decided that a bee-keeper was a farmer, and, as such was entitled to have his home rated as a "farmhouse."

Christopher Bartlett, of Sandford Mount, Charlbury, appealed to the quarter sessions against the assessment of his house, because he was a bee-keeper. His house had been assessed at £100, whereas he maintained that as a farmhouse the assessment should not be more than £40.

"He is the largest bee-farmer in England," said E. Gorst, counsel for Mr. Bartlett. "His house has been assessed as a country house, whereas it is used by a man who is working an agricultural holding and is therefore a farmhouse in fact."

Dr. Earengey, counsel for the rating authority, and one of the foremost barristers on the Oxford circuit, submitted that bee-keeping was not farming. R. T. Barrie, the rating officer for the Chipping Norton Council, gave evidence that, in his opinion, £100 was the fair and proper assessment for Sandford Mount.

Eventually the magistrates upheld the appeal of Mr. Bartlett, and fixed the assessment of his home at £60—a reduction of £40 from the former rateable value.

Publicity For Grain Show

Exhibits Will Be Displayed At World Poultry Congress

World Grain Exhibition and Congress, to be held in Regina, in 1932, has obtained exhibition space at the World Poultry Congress, to be held in London, this year, at Crystal Palace, London, England. Oscar Turcott, Canadian Exhibition manager, London, England, will arrange the display that will occupy a square with 576 square feet of space at the entrance to Crystal Palace.

The World Grain show will have the display of grains and other crops to be exhibited in Regina situated in the commercial section of the displays at the World Poultry Congress, and announcements of the World Grain Show, such as are being distributed from Regina, will be distributed from the exhibit square to delegates from all parts of the world attending the congress.

Similar exhibitions of grain and associated crops will be made at Antwerp, Paris and Buenos Ayres under the personal direction of Mr. Turcott.

Plant Clean Seed

Need For Planting Clean Seed This Year Is Greater Than Ever Before

You may not always be able to afford finest quality registered seed for planting; but you can always afford clean seed for planting. The seed branch of the Dominion Department of Agriculture are urging the planting of clean seed this year more than ever before—clean seed pays, particularly with the weed menace reaching the alarming proportions it does in many parts of Canada today.

There are many effective ways of cleaning seed, depending upon the quantity to be cleaned, location and equipment. In many parts of Canada seed cleaning machinery is readily available for the purpose, while in others suitable screens can be adapted to the fanning mill, and in some of the more remote sections the old pioneer method of wind-cleaning is always available.

"To attain happiness," says a lecturer, "one must vibrate in tune with one's environment."

According to that, a man with St. Vitus Dance at a jazz concert would be in perfect bliss.

A first edition copy of Dickens' "Great Expectations" was sold recently in London, for $1,275.

Oldest Trainman

Canada's Oldest Trainman Celebrates Birthday at Truro, N.S.

Claiming to be Canada's oldest trainman, Robert Williams, of Truro, N.S., rounded out the ninety-one mark on March 1st. He was born at West River, Antigonish County, Nova Scotia, March 1, 1839, and when seventeen years old got a job on the construction of the Nova Scotia Railway. Feeling the call of the sea, he joined a sailing vessel and rounded "The Horn." On a trip from Liverpool, England, with troops for a far-off station, his ship was wrecked while rounding "The Horn," and he was among the 49 saved. Once he fell forty feet from the rigging and broke an arm and also injured an eye. In the early seventies, he decided to give up the sea, and, in 1874, joined the service of the Intercolonial Railway, now part of the Canadian National Railways System, and retired on pension in 1910, at the age of seventy-one.

Russian Bees Stingless

Entomologists Have Proved This After Three Years' Experiment

That everything from Russia is not dangerous was established with the announcement that Russian bees do not sting. This was the result of three years' experimenting at the agricultural station at New Brunswick.

The bees from Russia produce as much honey as Italian bees, but swarm less frequently, it was said. During the entire experimentation period neither Ray Hutton nor B. F. Diggers, entomologists at the station, ever were stung.

Earned His Publicity

Floyd Waite, of Los Angeles, claims the worlds record or whatever it might be called for staying buried six feet in the ground in a box with a six inch pipe and a telephone for outside connections for 301 hours, and no one has been found so far who does not agree that he is welcome to it. Floyd was buried Feb. 22 with nothing for company but a telephone.

"You will suffer poverty until you are sixty-five."

"And then—and then?"

"You will have got used to it."

"You said I was a rogue, a liar, a swindler—I have proofs of it."

"Then you know what I said is true."—En Rolig Half Timma, Gothenborg.

If Skinny, Beware, Says Doctor. Gain Quick

New Ironized Yeast Adds 5 to 15 Pounds In 3 Weeks, New Health, Strong Nerves—Or No Cost

"Skinny folks subject to many grave diseases," says an eminent physician. When sick they lack reserve strength and many die.

Don't run risk of dangerous disease from skinniness. New Ironized Yeast adds 5 to 15 lbs. in 3 weeks. Ends nervousness, constipation, indigestion over night. Clears skin like magic. New pep first day.

Two great tonics in one. Weight-building Malt Yeast, and strengthening Iron. Far stronger than unmedicated yeast. Results in half time.

Get new health and weight quickly. Get pleasant tablets of Ironized Yeast from druggist today. Feel great tomorrow. If not delighted, manufacturer refunds your money.

The Making Of Pencils

Has Become Great Industry Since the Sixteenth Century

Pencils have played an important role in this work-a-day world ever since the sixteenth century; and few people realize what a great industry the making of them is.

Black-lead pencils date back to 1564, when the Borowdale mine, with its deposits of graphite—plumbago, or blacklead—was discovered. Before then metallic lead was used. Up to the end of the eighteenth century pencils were made from the virgin graphite. The lumps were sawn into thin sheets, cut into square strips, and then encased in wood. In 1795, an Englishman, Elias Wolff, discovered how to make a pencil on the lines of today's article. The graphite was combined with antimony.

The black-lead used now-a-days is a mixture of graphite, special chalks, clays, and other materials—a secret. The mixing is an important process. Expert chemists supervise every stage, for the proportions have to be absolutely correct and the blending perfect. Exhaustive laboratory tests of composition and character follow. Approved, the mixture is ground to an extreme fineness and transferred to cylinders. From these it is forced under great pressure through dies, and emerges in the form of a continuous thread of the required diameter.

The next process is to cut the threads to the proper lengths. They are then dried, and "fired," like pottery, to a certain temperature. That makes them ready for their wooden casings.

The wood for British-made pencils is the best quality cedar. Ingenious machines cut into "slats" of pencil-length and wide enough for six pencils. The slats then go to a drying room for seasoning. That effected, they are grooved to take the strips of lead. The latter are laid in the grooves after the slat has been glued, and another slat is laid on top. The joint is perfect and invisible.

After the ends have been cleared, the six-pencil slats are passed through a machine which cuts them into separate pencils—round, hexagon, or other shapes. Other machines sand-paper their surfaces and smooth them for coloring. Several coats of the required color are applied automatically to each pencil. Then comes the polishing by experts, which gives the fine glossy finish and, finally, the stamping of the pencils with their grade and maker's name.

Whaling fleets in the Antarctic this season have caught nearly twice as many whales as a year ago.

Will Be Well Advertised

Representatives Of World's Grain Congress Going To Poultry Show In London, England

Regina and the World Grain Congress, 1932 will receive considerable advertising this summer in Great Britain as a result of arrangements completed and officially announced.

The management has secured considerable space in the Crystal Palace, London, England, for the period of the World's Poultry Congress, which will be held there in July next, and every effort is to be made to make this section of the congress typical of Canada and representative of Canadian field crops.

Well informed representatives of the World's Grain Show will be in attendance with a goodly supply of attractive literature so that visitors may secure all the information desired at first hand.

These representatives will be enabled to be in direct touch with delegations and others from practically every crop producing country in the world attending the poultry congress. Between 40 and 50 different countries were represented by exhibits or delegations at the poultry congress held in Ottawa, in 1927, and the World's Grain Congress management expect an even greater number will be represented at the Crystal Palace congress next July.

Death Penalty For Cowardice

Bill To Eliminate Harsh Regulations Is Before British Parliament

Elimination of the death penalty for cowardice is among modifications and regulations regarding the death penalty in the British army, which the government will lay before parliament in the army and air force annual bill, the text of which was published recently.

The death penalty will be abolished in the army, also in punishment for leaving a guard or picket patrol or post without orders. Intentionally causing false alarms in action or elsewhere, and leaving sentinel posts before being regularly relieved. These modifications with suitable alterations also will apply to the air force.

The death penalty will be retained for such acts as "shameful abandonment or delivering up of any place or garrison," "shameful casting away of arms in the enemy's presence," treachery, or annoyingly imperilling in active service the success of His Majesty's forces."

During the great war one officer was shot for murder and one for desertion, but none for cowardice. In the same period, 264 privates were shot for desertion, and 18 were shot for cowardice.

United States Immigrants

Seventy-Two Per Cent. Of Emigrants From U.S. Come To Canada

Seventy-two per cent of United States emigrants in 1929 came to Canada, according to statistics of the Department of Immigration, at Washington; and, commenting upon this, W. W. Husband, second assistant secretary of Labor, said that for the great majority of citizens who annually leave the States, Canada appears to be the promised land. Fertile agricultural lands appear to be the greatest lure. The year's emigration was 23,443, of which 16,886 went to Canada.

Customer: "So you've got rid of that pretty assistant you had?"

Druggist: "Yes, all my gentlemen customers kept saying that a smile from her was as good as a tonic!"

A Public Danger.

Caught Disease On the HANDS!

Skin disease threatens us every day. Invisible germs of blood poison, eczema, etc., are waiting to infect the least cut or sore place. The money you use carries germs—you get them on the handles, rails and straps of the trains and street cars, and in a score of other ways.

Solely through Zam-buk, Mr. Henry C. Davis of South 17th Street, Kansas City, U.S.A., has just escaped a virulent type of eczema, contracted, he suspects, through use of public towels.

"I had medical advice," he says, "tried in addition all sorts of so-called eczema remedies, without finding the hoped-for relief. Zam-buk treatment soon gave positive results. It took away the painful irritation and quickly purified and healed the deep troublesome sores."

Uses and Abuses Of Radium

Name Is Familiar But Little Known About It

It is surprising how the often repeated name of some substance eventually endows it with magic in the minds of many persons. Thus the name of radium has become so well known that it is in this class. It is surprising that the name should become so familiar and yet so little should be known of the substance.

J. W. Sale, expert of the United States Food, Drug and Insecticide Administration, reports that only 5 per cent. of the various remedies claiming to contain radium have the mineral present in appreciable amounts. The articles examined include hair tonics, bath compounds, tissue creams, tonic tablets, face powders, ointments, mouth washes, opiates, healing pads, etc. Apparently the use of the word radium in connection with these products is intended principally to promote sales, for there can be no conceivable reason why radium present in some of these preparations could be expected to have any beneficial result.

Radium is an extremely dangerous material. It has had much use as a cancer remedy. But at the same time it will cause cancer if improperly applied. Used in a face powder in any appreciable amount it would be almost certain to cause trouble. But perhaps there is no cause for worry. Mr. Sale tells us that in the case of one product, radio-active water, that was examined, it would be necessary to drink 1,957 gallons daily in order to get a minimum radium dosage. It is the psychologist side of the question that is most worthy of study.

Lonely Magdalen Islands

C.N. Radio Provides Daily News Service To Population In Winter Months

Through the courtesy of the Canadian Press in co-operation with the Canadian National Railways, the people of the Magdalen Islands in the Gulf of St. Lawrence, who are more or less cut off from communication during the winter months, are now receiving a daily news service from CNRA, one of the Canadian National Railways network of trans-continental stations, which is situated at Moncton.

The inhabitants of the islands, who number about eight thousand made a request for such service as they are sometimes without news for two and three weeks at a time when weather conditions prevent airmail flights.

The service is very much appreciated by the people of the solitary islands in the Gulf and it demonstrates the great utility of radio as means of communication for those who live in outlying regions.

Nine O'clock Is Dead Line

Most Farmers Cut Out At That Hour Says Radio Digest

Amid all the ebb and flow of a changing civilization it is surprising to learn from the Radio Digest that 9 o'clock is still bedtime down on the farm. Broadcasters who have surveyed the field for business purposes report that the ideal hour to get a farm program over is 8.30 o'clock all the year 'round. After 9 o'clock the stations can almost hear the receiving sets click off.

The backbone of the nation continues its age-old disapproval of whoopee manufacture after that hour. Farming is a stern taskmaster, despite electrical mechanisms and labor-saving devices of other kinds. In countless farm parlors—or kitchens—sturdy Americans will declare, "Mother, it's time to go to bed," and climb stairs to well-earned repose.

An industry that insists on retiring at 9 o'clock can not be in such dire straits as farm blocs describe.

London Bus Driver Emigrates

Solves Traffic Jam Problems By Breaking Away To Wide Open Spaces Of Western Canada

It took twenty-one years for A. W. J. Powell, bus-driver, to weary of the whirl and roar of London traffic and break away to the great open spaces. But at last the bus yielded to the plow, and this spring will find Powell on the land somewhere in the prairies.

His sons had a great deal to do with it. Alfred Arthur Edward, who is twenty, came to Canada in 1928, and liked the country so well that he persuaded a younger brother, William Henry Charles, to join him the following year. Places were found in Ontario for the two boys by the Canadian National Railways. Their experiences convinced the father that it was time to forsake the bus, and arrangements were therefore made by the European Colonization Organization of the Canadian National Railways for the family to sail for Canada in March. The Winnipeg office will help them decide where to make their future home.

Before leaving London, Powell confessed that he had always had a hankering for a farm.

"I like bus driving first rate, but the traffic jams in London are a bit of a nuisance. The best way to solve the traffic problem is to move out of it, and I'm told there aren't many traffic jams out on the Canadian prairies. I always had in my mind's eye a place of my own in one of the Dominions."

Powell was one of the many London bus-drivers who drove London buses in France during the war, and he was one of the forty who went to Buckingham Palace in 1919, to be received by the King.

Line To Churchill Not Complete Yet

Report Of Immediate Train Service To Churchill Is Denied By C.N.R.

The report which has gained newspaper circulation that the Canadian National Railways will inaugurate regular passenger and freight service between The Pas and Churchill in April is incorrect according to A. A. Tisdale, general manager, western region, Canadian National Railways. The report which emanated from The Pas apparently found its beginning in the intention of the company to move to Churchill, in the near future, certain supplies which are required by the Government for the continuation of dock and elevator facilities at Churchill this summer. The last ninety miles of the line to Churchill has received only the first lift of ballast and it will have to be given a second lift before it can be turned over by the construction to the operating department for regular service. Ballasting work can only be done when the weather moderates and it is not expected that the line will be ready for the operation of passenger trains until well on into the summer and no scheduled passenger or freight service is under contemplation by the company at the present time beyond Mile 326.

With so thorough a preparation at hand as Miller's Worm Powders, the mother who allows her children to suffer from the ravages of worms is unwise and culpably careless. A child subjected to the attacks of worms is always unhealthy, and will be stunted in its growth. It is a merciful act to rid it of these destructive parasites, especially when it can be done without difficulty.

Finishes Big Task

Worker-Poet Of 76 Puts Whole Bible Into Verse

The entire Bible has been rewritten into poetry, making 6,000 closely written pages, six sacks full of manuscript, by William Houston, 76 years old, a working man at Cincinnati.

Houston's Bible is a rhymed version of the historic Bishop Bible which dates back to 1537. He has studied all the old Bibles in the Public Library there and knows thousands of lines by heart.

His verse is the old-fashioned "ryhme royal," with stanzas of seven lines, and in the quaint English of hundreds of years ago, which he mastered by studies of Chaucer and Spencer.

World's Fair For Vancouver

The organization of a World's Fair at Vancouver in 1936, to celebrate the city's golden jubilee, will be undertaken by the Vancouver Exhibition, if approved by the city council, it is announced by J. G. Matheson, general manager.

Nowadays a child picks up geography from a rumble seat, arithmetic from a dial phone and the alphabet from a radio log.

Minard's has Wonderful Antiseptic Power.—

For any BABY

We can never be sure just what makes an infant restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as Baby has a fretful spell, is feverish, or cries and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Sometimes constipation. Or diarrhea—a condition that should always be checked without delay. Just keep Castoria handy, and give it promptly. Relief will follow very promptly. If it doesn't, you should call a physician.

All through babyhood, Castoria should be a mother's standby; and a wise mother does not change to stronger medicines as the child grows older. Castoria is readily obtained at any drugstore, and the genuine easily identified by the Chas. H. Fletcher signature that appears on every wrapper.

Produces Artificial Fever

Scientist Tells Of Possibilities Of New Discovery

Discovery of a new short length wave, that may easily be developed into a death ray, but also may have great curative properties, was announced, at Philadelphia, by E. L. Manning, of the General Electric Company's research laboratories.

Speaking before the Engineers' Club of Philadelphia, Mr. Manning said:

"We have learned to build vacuum tubes which will broadcast such a short length wave that people in the neighborhood will have their blood temperatures raised. This means that we can produce artificial fever and hold it under control, within any limits we choose."

Manning stated that if natural fever was "an attempt on the part of the body to kill off bacteria that attack it, as is believed, this new discovery may prove of startling value in the treatment of disease."

The ray, Manning said, could easily be used to induce such a high fever in human beings that it would result in death.

"We are experimenting with rabbits and rats," said Mr. Manning, "and the results are most encouraging. Diseases corresponding to those of humans appear to have been eliminated by these artificial fevers," he said.

Alberta Coal Production

Coal Mines Of Province Produced 7,117,250 Tons In Year 1929

Alberta coal mines produced 7,147,250 tons of coal, valued at $22,491,061 during the year 1929, according to the annual report of A. A. Millar, chief inspector of mines for the province. In addition to the coal mined there were 77,197 tons of shale mined from which 26,077,733 bricks were manufactured.

Combine-Harvested Wheat

Combined-harvested wheat in Canada compares very favourably with binder-harvested wheat from a milling and baking standpoint. In general no difference could be observed between the two in regard to these qualities, although in one season at least the combine-harvested wheat was slightly superior to the binder-harvested wheat.

Minard's for Falling Hair

Water-Fowl Suffer From Drought

Owing to drought conditions in Canada's Prairie Provinces during 1929 many ponds, prairie sloughs, and shallow lakes used for breeding purposes by water-fowl were dried up.

Little Helps For This Week

"Cast thy burden upon the Lord, and He shall sustain thee." Psalm lv. 22.

Child of my love, lean hard,
And let Me feel the pressure of thy care.
I know thy burden, child; I shaped it,
Poised it in mine own hand, and made no proportion
In its weight to thine [illegible] strength,
For even as I laid it on I said,
I shall be near, and while she leans on Me
This burden shall be Mine, not hers,
So shall I keep My child within the circling arms
Of Mine own love. Here lay it down, nor fear
To impose it upon a shoulder which upholds
The government of worlds. Yet closer come
Thou art near enough: I would embrace thy care,
So I might feel My child reposing on my breast.
Thou lovest Me? I know it. Doubt not then,
But loving Me lean hard.
—Paul Pastnor.

He that takes his own cares upon himself loads himself in vain with an uneasy burden.—Bishop Hall.

HEALTHY CHILDREN ALWAYS SLEEP WELL

The healthy child sleeps well and during its waking hours is never cross but always happy and laughing and spreads sunshine to the whole household. It is only the sickly child that is cross and peevish. Mothers if your children do not sleep well, if they are cross and cry a great deal do not scold them. That is their way of telling you they are ill. When baby is like this give him Baby's Own Tablets and he will soon be well and happy again. The Tablets are a mild but thorough laxative which regulate the bowels, sweeten the stomach, banish constipation and indigestion, break up colds and simple fevers and promote healthful sleep. They are absolutely guaranteed free from opiates and other harmful drugs and may be given to the new-born babe with perfect safety and good results.

Baby's Own Tablets are sold by all dealers in medicine or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

International Dairy Congress

Canada will be identified, officially, with the International Dairy Congress at Copenhagen, Denmark, in 1931, through the appointment by the Department of Agriculture of Dr. J. A. Ruddick, dairy and cold storage commissioner, as Canadian correspondent.

Thirty American airplanes are in service in Peru.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

This year!—let

Your Spring Suit be a Royal York

To men who are contemplating the purchase of a new suit or topcoat this spring, we suggest 'Royal York' clothes, tailored to measure at $27.50.

Fit and style built in by master tailors—designing by one of the highest salaried craftsmen in America—fine woollens from the best British mills—made and absolutely guaranteed by W. R. Johnston and Co. Limited—it is no wonder that 'Royal York' clothes, introduced only last year, already are the favorites of thousands of Canadian men.

Come in today and see the new 'Royal York' samples for spring and summer! Every one represents value you have never dreamed was possible at $27.50, tailored to measure. When you see them you will understand why "every Royal York customer is a permanent customer."

KETCHAMOOT

Great excitement was caused on Saturday when it became known that small pox had broken out at the Bluff home, Miss Bessie Burrows being the patient and most of the neighborhood being [illegible], many were vaccinated the same day.

Sunday school and preaching services were called off on Sunday owing to small pox scare, though it is thought school will be carried on as usual as most of the children were vaccinated during the winter.

Mr. and Mrs. Herman Lawson entertained the young people of the community at their home Sunday evening, March 30th. The evening was spent with music and dancing after which lunch was served by the hostess. These get-to-gether evenings for the young people have been so successful that they will soon organize a young people's society.

Mrs. Sam Nomeland spent several days at the home of her daughter Mrs. Percy Sutton caring for her new grandson.

Miss Hazel Sears spent a few days with her friend Miss Margaret Myres in the Bardo district, Mr. Myres being away in the city.

Mr. Herman Lawson had the misfortune to lose a valuable horse last week.

Mrs. Henderson entertained the M. A. S. at her home on Thursday afternoon, a large crowd of members and visitors were present and spent a very pleasant afternoon.

A special meeting of the ratepayers will be held at the school house on Saturday, April 12 to take a vote for a new school house.

FINE PICTURE FOR APRIL 18-19

Rosemary Murphy (Nancy Carroll) and Abie Levy (Charles "Buddy" Rogers), meet in France, he a soldier of the A. E. F., and she an entertainer. They love each other and come to understand that nothing in the world can stop true love.

The war over, Rosemary and Abie are married in a Methodist Episcopal church in Jersey city.

Abie takes Rosemary home to his father, Solomon Levy, (Jean Hersholt), an orthodox Jew, and introduces her as his sweetheart, Rosie Murphyski. Solomon is delighted and arranges a home wedding after the Jewish custom.

Then—discord. Intolerance, and bigotry step in.

Rosemary's Irish father, (J. Farrell MacDonald) arrives with a catholic priest just as a rabbi joins the young lovers in their second marriage. While their fathers argue, fume, fret and seek to break the tie that binds the children, Abie and Rosemary get together with the kindly priest and the tolerant rabbi and the priest marries them once again.

But the barrier of religion is so high and the gap between the families so wide that the young people are left alone. They are befriended only by Mr. and Mrs. Isaac Cohen (Bernard Gorcey and Ida Kramer), old friends of the Levy family.

Then comes Christmas eve. Mr. and Mrs. Cohen and the rabbi persuade Solomon to visit his new grandchildren. The priest urges Patrick to go and see his daughter and her children.

The surprise party starts in bitter argument, but ends in peace when Abie and Rosemary present their twins, Patrick Joseph—named for Rosemary's father—and Rebecca—named for Abie's dead mother.

The fathers forgive their children and shake hands. Tolerance has won.

NOTICE

On Wednesday evening April 16th, there will be a tennis meeting held in the town hall at 7.30 p. m. All those interested in tennis are asked to attend.

NOTICE

A meeting of all returned men and all others having served or been connected with any of His Majesty's forces land, sea or air or any of the auxiliary forces or members of the R. N. W. M. P. and have received honorable release therefrom is called for Thursday night, February 17th, at eight o'clock in the Council Chamber, Tofield for the purpose of completing organization of a Branch of the Canadian Legion here. Captain G. L. Hudson the Legion representative from provincial command will address the gathering on aims and objects and work. Much enthusiasm has been evident recently especially since Sir Arthur Currie's speech at the Legion convention and a large increase in membership has resulted, some twenty applications have already been forwarded and charter applied for. We expect to have Tofield well in the front ranks among our branches. Come and let others know.

Electricity For Tofield Now Definitely Assured

Calgary Power Company electricity for Tofield is now definitely assured according to a letter received by Mr. J. W. Chapman, town secretary-treasurer. The line which will be constructed from Camrose to Ryley, thence east and west to Viking and Tofield respectively will be it is fully expected, constructed early this summer. The following letter received by the town from the company definitely promises current, subject to certain provisions, and these provision are sure to be granted.

Calgary, Alberta
April 11th, 1930

Town of Tofield,
Tofield, Alberta
Attention Mr. J. W. Chapman,
Secretary Treasurer.

Dear Sir:—

Our directors have now decided to proceed with the extension of our power line from Camrose north through Round Hill to Ryley and west to Tofield also a line from Ryley east through Holden and Bruce to Viking. This line, however, will be built subject to certain reservations.

First — that authority can be obtained from the Board of Public Utilities Commissioners to proceed with the work.

Second — it will be necessary to have the full co-operation of the various councils concerned in assuring the success of the project.

We are immediately preparing our franchise agreements which are necessary for towns and villages and which will be in accordance with all other similar sized towns and villages throughout the Province. We will appreciate if the signing of these agreements could be expedited so that the work can be proceeded with in the early part of the summer.

We will be glad to have the assurance of your co-operation in overcoming any difficulties which may present themselves and also your assistance in having as many consumers as possible lined up. As soon as our franchise agreements are drawn up we will get in touch with you again.

Yours truly,

Calgary Power Company, Limited.

W. Anderson, Commercial Manager

The announcement that the Calgary Power Company will bring current here will be received with much pleasure. Such places as the hotel, restaurant, garages and filling station have felt the need for electrical current other than that generated by themselves for some time. Many residences will use it for electrical appliances such as toasters, washings machines etc. The Company hopes to have this point on a self supporting basis within twelve months.

The services and the Y. P. S. held at Bardo on Sunday were very well attended.

ANNUAL MEETING OF TOFIELD CURLING CLUB

The annual meeting of the Tofield Curling Club was held at the rink on Friday evening April 11th, when new officers for the ensuing year was elected.

The officers elected were as follows; Hon. President, Claude Gallinger; president, Dr. F. F. Law; vice president, Geo. A. Agnew; secretary treasurer, J. W. Chapman; executive committee, A. B. Clutterham, H. T. Ward, John Lee sr., Mr C Hammond, John Chapman, J G Jobb.

In recognition of his work as chairman of the building committee, John Chapman was given a life membership in the club, by a unanimous vote of those present. On behalf of the club, the retiring president H. T. Ward also made a presentation to Mr Chapman.

A satisfactory report was read by the secretary; the new rink being entirely paid for and there being sufficient funds on hand to meet all other indebtedness.

SHAMROCK HAM DEMONSTRATION

On Saturday of this week, April 9 Mr. Stevens will demonstrate Burn's Shamrock Hams at Bellamy's Butcher Shop. Mr. Stevens will have a baked ham on display from which he will give samples to those desiring same. He will also have a number of choice recipes which he will be pleased to give to those interested.

Kingman News

Mr. H. Farmer returned from Edmonton last Tuesday, where he has been visiting with relatives for two weeks.

Mr. A. W. Boegter motored to Edmonton on Tuesday.

Mr. and Mrs. Vagui and family, formerly of Manitoba, have purchased a section of land from the Bank of Montreal, where they intend to make their home.

Thor Horte motored to Ministik Lake on Thursday.

Miss Alice Simonson spent the week end at her home here.

Mr. A. Asp and son motored to Metiskow on Saturday, returning on Sunday.

Mr and Mrs. Thor Horte motored to Camrose on Friday.

A very enjoyable evening was had when a number of friends surprised Percy Simonson it being his eighteenth birthday. Many interesting games were indulged in, and a delicious lunch was served at mid night

Mr. and Mrs. John Ness, of Edmonton spent the week end with Mr and Mrs Thor Horte.

Mr and Mrs. Jack Hardin, of Vegreville and Mr. and Mrs. Sam Simovitch and family of Round Hill visited with Mr. and Mrs. P. Rodzonsky on Sunday.

Mr and Mrs W. Jardie, Mr and Mrs. John Anderson and C. Charnberg were the guests of Mr. and Mrs E. Erickson on Sunday.

Irene Horte will practice teaching in the Coal Hill school this week and Ole Olson of Rosalind will practice teaching at the local public school.

Visitors at the C. Lindberg home on Sunday were Mr. and Mrs. Kortzman of Edmonton, Mr. and Mrs. C. E Blychert, Mrs. R. Molvik and children, and Mr. and Mrs. P. Seramstad of Camrose.

Mr C Lindberg returned on Sunday night from a month's visit at Minneapolis.

Mr. and Mrs. O. Hansen and family were Sunday guests of the Tollefson family.

CHARLES SPILSTED, WELL KNOWN OLD TIMER PASSES

On Sunday evening, April 6th, there passed away, one of Tofield's respected old timers in the person of Mr Charles Spilsted.

Mr. Spilsted had been a resident of this district for many years, where with his family he lived on the farm Mr. Spilsted was keenly interested in thing agricultural and took an active interest in the Tofield Agricultural Society, before that organization's demise. He was a charter member of Palestine Lodge No. 46 A. F. and A. M. and a member of the Church of England.

He leaves to mourn his loss, his wife, one daughter, Mrs J. B. Warner, Tofield, and six sons, Ernest, John Charles, Herbert, and William all of Tofield and Richard of Edmonton.

The funeral was held on Wednesday last, service being held at Holy Trinity church, Tofield, Archdeacon Howcroft officiating. The members of the Palestine Lodge No. 46 A. F. and A. M. attended the funeral, 25 members being present. The floral offerings were numerous and beautiful. Interment took place in the Tofield cemetery.

CARD OF THANKS

Mrs. Charles Spilsted and family wish to thank the many friends for their expressions of sympathy, kindness and help, during their recent bereavement.

BOWLING RESULTS

	Pld.	W.	L.	Pts.
Lerbekmo	5	5	0	10
McLaughlin	5	4	1	8
Calvert	5	3	2	6
Yakabuski	4	2	2	4
Letourneau	5	2	3	4
Skitch	5	2	3	4
Abbott	3	1	2	4
Bissett	5	2	3	4
Rogers	4	1	3	2
Craig	5	1	4	2

High Scores for the week were:—Mrs. E. Rogers 190 and A. E. Calvert 266.

KETCHAMOOT

Field work is general throughout the district some seeding has been done.

There has been no new cases of small pox as yet. Miss Burrows is able to be up and around again.

Diptheria has broken out in the Henry McGuitie home, little Harvey being a patient. The family is under quarantine. We hope that it will be the only case.

Master Lloyd Ferguson, of Lakeshore district spent a week at the home of his grandparents, Mr. and Mrs. J. H. Ingram.

Mr. and Mrs. Campbell, and Mr. and Mrs. Coombes motored to Edmonton returning home in the evening. They were accompanied home by Mrs. Campbell's mother Mrs Ross.

Mrs. Chas Whillans and Mrs. G. W. Sears assisted at a quilting bee at the Chas Ingram home Wednesday afternoon.

A delightful evening was spent at the Shore home Friday evening, when Mr and Mrs. Shore entertained about forty friends to a whist drive. Nine tables played, the first prizes were won by Mrs. Campbell and Harvey McClymont while the consolations went to Mrs. McClymont and W A Mitchell. The hostess assisted by Mrs. Davidson served a delicious lunch at midnight.

Miss Mildred Ingram returned home Saturday after spending a few weeks at the home of her sister, Mrs. T. D. Ferguson of Lakeshore.

The school meeting on Saturday was well attended. 33 votes were against a new school house and 21 for it. It is to be regretted our children are to be deprived of a least one or two years of high school. It seems now a days the children are rushed through public school at the age of thirteen or fourteen and then must either stay at home and forget a great deal of what they learn before they are really old enough to appreciate an education, or stay in town which is impossible in some cases, and it is not always the expense in keeping them in town but to have them away from home at that age.

ABIE'S IRISH ROSE FOR SATURDAY

Anne Nichols' "Abie's Irish Rose" is one of the greatest motion pictures ever made.

A broad statement that, but it is a statement of fact, and can be proven by any who attend the premier of the Paramount screen version of Anne Nichols' play at the Variety Theatre Friday and Saturday.

As a screen play Abie is even more entertaining than it was behind the footlights. It has been made into a sweeping, amusing broadside against intolerance, racial hatred and bigotry; but at no time does it preach. It is always entertaining.

In short, "Abie's Irish Rose" is the story of a Jewish lad, Abie Levy, who meets, woos and weds an Irish girl, Rosemary Murphy. Their parents object to the match, but their complaints come too late, for they were first married by a methodist minister, then to please the Jewish father, a rabbi joined them. The third ceremony was performed by a catholic priest, but still the parents objected and disowned their children. Christmas comes around, and twins are born. These twins, one with a Jewish name and the other with an Irish, bring the two families together in a bond of happiness.

A great theme is that. Its greatness should not be told this briefly, nor can the beautiful touches of the picture be described in so few words. To see the picture is to realize that such a topic has never before been so finely translated to the screen.

Anne Nichols supervised the production of "Abie's Irish Rose". The players include Jean Hersholt, as Solomon Levy; Charles Rogers as Abie; Nancy Carroll, as Rosemary; J. Farrell MacDonald as Patrick Murphy; Bernard Gorcey and Ida Kramer as Mr. and Mrs. Isaac Cohen, and Camillus Pretal and Nick Cogley as the Jewish Rabbi and the Irish priest.

The Problem Of Unemployment

The nations of the world, and more especially those of the white race, and of these those most highly industrialized, are confronted with a common problem which is becoming increasingly acute, namely unemployment, resulting from a lack of gainful employment for hundreds of thousands of people, able, willing and competent to work, but who are unable to secure it.

The present situation is a paradox. No less competent an authority than the United States President's Committee on Recent Economic Changes teaches the conclusion that the rise in unemployment in recent years is not so much the result of recession in industry, closed factories and general depression usually advanced as causes of unemployment, as it is the direct outcome of prosperity itself.

In other words, the intensified activity which has characterized progress in the past decade has likewise intensified, and in a sense created anew, one fundamental economic problem, the problem of unemployment.

The problem of unemployment has been recognized since the war as a serious one in Great Britain, and greater publicity has been given the British situation than in other countries, largely because of the fact that in Britain, with its scheme of unemployment insurance, facilities existed for obtaining a more accurate accounting of the actual number out of work. It is now becoming more generally known that the percentage of unemployed population is almost as high in many other countries, and higher in some, and the number of the enforced idle is increasing until it is now estimated that 20,000,000 people throughout the world are unemployed. The situation in Canada is decidedly better than it is in the United States, Great Britain, Germany, Italy and most other countries. Even so, unemployment is a subject of growing concern in this Dominion to all Governments, all political parties, labor organizations and business interests in general.

Of course, in a young and developing country like Canada, and particularly in view of its long winter months which necessarily slow up many of our major activities, there always has been and, in all probability, ...

Practice Of Inoculating Seed Of Various Legumes Has Been Found To Be Beneficial

During the past few years practically all Ontario farmers have come to recognize the value of inoculating the seed of the various legumes when they are being grown on land which has not previously been sown to these crops or on land where their cultivation has lapsed for a period of years. This practice has proven a good one and is now used in every progressive agricultural country of the world, but the discovery of a proper method of getting the inoculation or culture to the farmer was not done in a day and the history is rather interesting.

The first efforts in this direction were made in Germany where samples of the soil which had been used for growing the legumes was transported to the virgin soil and there spread around to insure the presence of the bacteria. The disadvantages of this method were obvious and a commercial company ...

New Grain Act

New Act Is a Consolidation and Revision Of the Old Measure

Canada's new grain act was up for consideration by the committee of the House of Commons on agriculture and colonization. The new act is a consolidation and revision of the old measure but involves no change in the operation of the legislation except on minor points.

Col. C. M. Biggar, K.C., who drafted the new act explained the chief difficulty with the old act was that the sections were badly arranged and occasionally inconsistent. With regard to some provisions there was doubt as to their constitutional validity, he said.

In drafting the new act, Col. Biggar stated, it was necessary to find new constitutional bases for some sections in order to ensure their validity. The sections are arranged differently and simplified ...

State Of Canadian Business Is Fair In Comparison With Conditions In Other Countries

Delegation To Investigate Modern Farm Machinery

Men From Britain Visiting Canada and United States

Commissioned by the British Government to spend some weeks in both United States and Canada to investigate modern farm machinery and labor-saving devices on the farm, J. E. Newman, of the Institute of agricultural engineering, Oxford University, Thomas Baxter, ex-president of the National Farmers' Union of England, and G. Clarke, representing labor organizations were in Montreal recently on their way to Ottawa. The delegation was met by F. W. Walsh, superintendent of agriculture of the Canadian National Railways, who extended to them the facilities of the department for assisting them in their investigations.

The members of the delegation stated they expected to spend the ...

[illegible]

Whilst the state of Canadian business is uneven and may be regarded as disappointing compared with that of a year or two ago, it is fair in relation to world conditions, declares the monthly commercial letter of the Canadian Bank of Commerce. Canada's unemployment problem, though by no means negligible, is not nearly so grave as in some of the older countries, the letter points out.

During the month of March business conditions showed a gradual accession in industrial and construction operations which tended to offset unsettlement in other branches of commerce, says the bank's letter.

"We have mentioned before that the reduction in agricultural purchasing power would leave its mark on the economic structure and this has proved to be the case. Until the farming community experiences favorable weather and market conditions, business as a whole will continue on a smaller scale than in the four preceding years. However ...

Stops a Cough In One Night

A cough may be Catarrh with a dry tickling in the throat, it may be accompanied by partial stoppage of the nostrils and shortage of breath. Often there is a gagging in the throat and every cough tears and hurts.

Coughs have a hundred different causes, yours may be due to any of the following:

Asthma	Inflamed Throat
Extreme	Bronchitis
Enlarged Tonsils	[illegible]
Inflammation	Croup
Stomach Disorders	Pleurisy

One remedy upon which physicians are relying today is Catarrhozone. It removes the cause of the cough, doesn't smother it.

It's simply wonderful to think how quickly a bad throat or catarrh can be helped with Catarrhozone. Its rich balsamic vapor is carried along with the breath to the innermost recesses of the lungs, bronchial tubes and chest, making it impossible for the germ of Catarrh to live. Thus soreness in the chest is at once alleviated, phlegm is loosened and ejected from the throat, old standing coughs are removed.

REMEMBER THIS, you breathe Catarrhozone and it will alleviate coughs, colds, catarrh, and weak throat. Large size guaranteed, costs $1.00 and lasts two months, smaller sizes, 25c and 50c. Beware of imitations and insist on "CATARRHOZONE."

WORLD HAPPENINGS BRIEFLY TOLD

Activity in civil aviation in Canada doubled during 1929 according to figures made public at the National Defence Department.

On its annual arctic cruise this summer the S.S. Beothic will endeavor to reach Melville Island, situated 360 miles beyond the most westerly point yet reached by steamship.

Prominent railroader, pioneer of the West, and veteran of the Riel rebellion, W. H. Tomkins, 68, died recently at his home in Winnipeg. He was captured and held prisoner at Batoche, Sask.

Rt. Hon. Montagu Norman was re-elected governor of the Bank of England. This makes the eleventh year in which he will fill the office of governor to which he was first elected in 1920.

J. R. Nesbitt, of Shoal Lake, prominent dairyman, has been granted an honorary diploma from Manitoba Agricultural College. The honor follows the established custom of honoring each year one outstanding man in Manitoba's agriculture.

In a motion adopted by city council, of Toronto, police commissioners have been asked to prohibit the operation of a "bad and doubtful debt" collecting car, whose driver, clad in a brilliant uniform, with his gaily decorated car parked in front of homes of debtors, drew a good deal of unwelcome attention.

Ralph Hull and Ralph D. James, of Vancouver, students at the University of British Columbia, have been awarded mathematical scholarships valued at $1,000 each, by the University of Chicago. These are the first awards of the institution to Canadian students who plan to specialize in mathematics.

Because "the results were not very satisfactory" there will be no repetition this year of the provincial government's placing British trainees on Ontario farms, Hon. John S. Martin, minister of agriculture has stated. Any trainees that do come he added, will have to come under the United Church settlement scheme, the Dominion government or the railway companies.

Many Uses For Spruce

The wood of all Canadian spruces is tasteless and odourless, making it valuable for food containers. It is also in great demand for musical instruments, principally for organ pipes, piano sounding boards, violin backs, etc.

Inquiry by experts of the Mayo Foundation indicates that rheumatic persons can "sense" the approach of rain.

Dandruff

You needn't be bald. Minard's kills Dandruff, checks falling hair, stimulates new growth and adds a healthy gloss. Rub into scalp with finger tips, four times a week.

MINARD'S "KING OF PAIN" LINIMENT

London Woman Fills Important Position

Made Chairman Of Central Public Health Committee

A woman has been chosen at the head of a vast public undertaking of vital importance to thousands of Londoners.

On April 1, the old Boards of Guardians will have ceased to exist. Their functions as far as the County of London is concerned will be exercised by the London County Council. A new committee called the Central Public Health Committee will be responsible for all the infirmaries, hospitals and institutions previously administered by the Metropolitan Asylums Board, and also for the public ambulance services now administered by the London Fire Brigade and the M.A.B.

The chairman of this committee which will have the health and welfare of thousands of Londoners under its control, is Dr. Florence Barrie Lambert, a well-known member of the London County Council, and the chairman of the old Public Health Committee which under the new regime becomes a sub-committee of the Central Committee.

It is a colossal job to place upon the shoulders of a woman. It involves the care of the necessities of a city of millions.

An Exciting Pursuit

Cave Exploration Has Added Much To World Knowledge

An archaeologist says there are numbers of caves yet to be explored in England with good prospects of "finds" throwing light on prehistoric periods. In Derbyshire at least a dozen caves have this summer been explored for the first time. Here there were human jaws and other bones, remains of cave bears, and antlers of the giant elk, a creature from ten to thirteen feet high, which is not to be met with in Derbyshire nowadays. Cave exploration is an exciting pursuit, and its results in various parts of the world have added a great deal to the knowledge of early man and the beasts he had to contend with.

Experiment a Success

Complete Newspaper Page Sent By Radio From San Francisco To New York

The complete front page of a newspaper has been transmitted across the country by radio for the first time.

Giving the present a peep into what may be commonplace in the future, engineers of the General Electric Company at Schenectady, N.Y., reported that successful experimentation had permitted them to read the first page of the San Francisco Call-Bulletin three hours after it had left the press. It was reproduced in full size in the laboratory of a new type automatic carbon receiver connected to short wave receiving equipments actuated by signals originating 2,000 miles away.

The engineers did not hesitate to forecast many possibilities for this improvement in facsimile transmission, which, while still in a highly experimental stage, gave an indication that some day radio may be delivering a large part of business mail and may also bring daily newspapers directly into the home.

Appears In Real Life

Forgetful Professor Gives Luncheon and Forgets To Attend

Professor Alfred A. Michelson, distinguished University of Chicago scientist, gave a luncheon for Dr. Lee DeForest, radio tube inventor, and forgot to attend it. It was a gathering of famous scientists at the Quadrangle club, assembled at the invitation of Professor Michelson to honor Dr. DeForest. The distinguished guests waited and waited. The soup got cold. Finally Dean Henry Gale, of the University of Chicago physics department, stepped in as substitute host and the luncheon went on.

Heart and Nerves Caused Her To Have Cold Hands and Feet

Mrs. Joseph Price, Red Pine, N.B., writes:—"Several years ago I was troubled with my heart and nerves and was so bad, at times, my hands and feet would become numb and cold.

"I happened to see

advertised and started taking them at once. I continued for some little time, and since then I have had no return of my trouble."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Passenger Air Service

Air Mail Service Will Now Take Passengers Over Prairies

Western Canada's first passenger air service across the prairies was officially inaugurated recently by the air mail contractors, Western Canada Airways, with the issue of an official scale of transportation rates from Winnipeg to western cities now served by the air mail 'planes.

The new rates for carrying passengers over the sky route across the western plains are approximately the railway fare plus one-half, J. A. McDougall, secretary of Western Canada Airways, said last night, and officials of the company believe that it will not be long before the travelling public will avail themselves of the new and swift means of transportation.—Free Press.

Will Combine Exhibits

Saskatchewan, Manitoba and Alberta will combine their exhibits at the World's Poultry Congress to be held in London, England, next July. The exhibit will occupy a frontage of 36 feet and will be the largest of the provincial exhibits.

Strengthening Butter Boxes

Recent tests on butter boxes at the Forest Products Laboratories, Department of the Interior, showed that one wire applied around the centre of the box doubles its strength.

Middle-age is the period when you know a dozen dandy ways to regain vim and vigour if you only had time.

Horses Do a Half More Work When Clipped

Clipped horses work easier. Do not sweat their strength away. Groomed in a quarter of the time.

Do You Suffer With Headache?

So easy to get quick relief and prevent an attack in the future. Avoid bromides and dope. They relieve quickly but affect the heart and are very dangerous. They are depressing and only give temporary relief, the cause of the headache still remains within.

The sane and harmless way. First correct the cause, sweeten the sour and acid stomach, relieve the intestines of the decayed and poisonous food matter, gently stimulate the liver, start the bile flowing and the bowels pass off the waste matter which causes your headache. Try Carter's Little Liver Pills. Druggists 25c red pkgs.

Recipes For This Week

(By Betty Barclay)

VEAL A LA KING

- 2 pounds lean veal.
- ½ cup butter.
- 6 carrots.
- 2 onions.
- 1 bay leaf.
- 4 cloves.
- 1 quart cream.
- 1 sweet pepper.
- 1 can mushrooms.
- 1 can sifted peas.
- 2 cans noodles.

Two pounds of lean veal—trim off all fat and cut into cubes about one inch square. Brown slightly in ½ cup butter. Add water to cover well. Add 6 medium-sized carrots, 2 medium-sized onions cut up, 1 sweet pepper, 1 bay leaf, 4 cloves, and boil all together until meat is tender. (Do not let water boil down—add enough to keep about 1 pint of liquid.) Add 1 quart of sweet cream which has previously been heated to boiling point, thickened as for gravy, and add one can mushrooms cut up, 1 can sifted peas. Salt to taste. Add ¼ teaspoon paprika. Serve on chow mein noodles.

PANAMA SALAD

(Serves 4)

- 4 slices pineapple.
- 2 large oranges.
- ½ head lettuce.
- 4 Maraschino cherries.
- ¼ green pepper.

Place slice of pineapple on bed of lettuce. Lay sections of orange on pineapple slice, to form a domed appearance. Cut a rosette of cherry and place on top of fruit sections. Rosette is made by cutting the cherry in six or eight sections leaving it joined at the tip. Two diamond-shaped pieces of green pepper are placed on each side of the salad, near the cherry. Serve with French dressing.

Canada's Oldest Men Dead

Within a period of less than three weeks death claimed the two oldest men in Ontario, and two of the oldest in Canada. James Wilson, 109-year-old negro, died at his home in Welland, Ont., and two weeks later at St. Joseph's hospital, Peterboro, James Hendley, of Peterboro County, died in his 109th year.

SUNDAY SCHOOL LESSON

APRIL 20

JESUS TEACHING FORGIVENESS

Golden Text: "Forgive us our debts, as we also have forgiven our debtors."—Matthew 6.12.

Lesson: Matthew 18.15-35.

Devotional Reading: Psalm 32.1-7.

Explanations and Comments

How To Treat Offenders, verses 15-20. Jesus' parable about the Good Shepherd, illustrating His care for those who go astray (our last lesson), is followed in Matthew's Gospel by His counsel in regard to man's treatment of offenders. He advised His disciples first to tell the offender of his fault, then to rebuke him in the presence of two or three others and then, if he still gave no heed to their words, to tell his offense to the Church. "When two or three are gathered in My name," he added, "there am I in the midst of them."

Unlimited Forgiveness, verses 21, 22. Peter's question about forgiveness of offenders naturally followed: "Lord, how often shall my brother sin against me, and I forgive him? until seven times?" Seven denoted the perfected number. Peter's heart glowed with self-complacency, for was he not ready to go much farther in forgiveness of the ordinary man? Did not the Talmud say: "When a man sins against another, that other forgives him once, he forgives him a second time, he forgives him a third time, but the fourth time he does not forgive him"? "No, I tell you, Jesus answered, "not until seven times, but times without number, until seventy times seven." Magnanimity is not calculating, there is no place for arithmetic in the grace of forgiveness, or, as Dr. Jowett poetically says, "forgive to a number where the scaling power of arithmetic retires with wearied wing."

Peter himself was an illustration of the grace of unwearied forgiveness. He sinned, and sinned, and sinned again. Dr. J. D. Jones fancies Peter after Christ's death saying to himself, "O to grace, how great a debtor, daily I'm constrained to be," and again and again taking himself as a text and preaching a sermon of comfort and hope to downcast and despairing souls.

"O Man! forgive thy mortal foe,
Nor ever strike him blow for blow;
For all the souls on earth that live,
To be forgiven must forgive.
Forgive him seventy times and seven;
For all the blessed souls in heaven
Are both forgivers and forgiven."
—Tennyson.

Carloads Of Horses

Animals Being Assembled At Moose Jaw For Spring Work

Under the management of the Saskatchewan Co-operative Live Stock Producers, Limited, the horse marketing section of that organization is undertaking to assemble carloads of horses at the Moose Jaw yards in readiness for spring work. With the aim of improving the condition of these horses they will be fed for a few weeks before offered for sale. This affords buyers an opportunity to visit the yards and select their teams.

Completes Long Air Journey

Bishop Geddes Makes Trip From Aklavik To Edmonton

Covering the two thousand miles from Aklavik, on the Arctic ocean, to Edmonton, in 17 hours of actual flying time, His Lordship Bishop W. A. Geddes completed a trip March 30 which would have taken ten weeks of ordinary winter travel. In open water, the journey by steamboat would have lasted three weeks.

The bishop, accompanied by Mrs. Geddes, left Aklavik in a Commercial Airways aeroplane piloted by Capt. W. R. (Wop.) May. It was 35 below zero when the machine left Aklavik. This was ordinary winter weather at that point, although a bad storm was experienced the week before.

On over Fort McPherson, Arctic Red River, Fort Good Hope, the machine passed in completing the last air mail trip to the Arctic before the ice breaks up. When Fort Norman was reached for the end of the first day's flying, it was 40 above zero after a heavy rain had fallen.

On the second day, Fort Simpson, Hay River, and Fort Resolution were reached, while the second night was spent at Fort Chipewyan. Pilot May went on to Fort McMurray and Pilot Glyn Roberts called at Chipewyan and picked up Bishop and Mrs. Geddes whom he brought on to Edmonton.

Income Tax Collections

A total of 137,101 persons paid income tax during the fiscal year ended March 31st, 1929, and the sum collected was $38,433,323.25, the largest amount yet gathered in by the Federal authorities. In 1928 there were 215,277 taxpayers who paid in $55,571,961.57.

Scot (to ironmonger): "Tuppence is too much for this mouse-trap. Besides, ah want one that'll kill the mouse afore he can eat the cheese."

THE MERCURY, TOFIELD, ALBERTA

A FIVE POWER NAVAL PACT HAS BEEN REACHED

London, Eng.—After many weeks of negotiation the five great navy powers of the world have reached an agreement. There will be a five-power naval limitation agreement and three powers—the United States, Great Britain and Japan—will sign certain additional clauses to which the two Latin nations do not at this time, feel they are able to subscribe.

There will be the two understandings, the partial agreement of the five and the complete accord of the three.

Political discussions regarding a security pact and definition of the guarantees provided by article 16 of the League of Nations covenant will be left over for Geneva and the league.

The main provisions of the proposed major pact are:

1. A five-power agreement on the extension of the Washington capital ship holiday until 1936. This means an extension of five years.
2. A five-power agreement which would bring within the scope of the Washington treaty, limitations in aircraft carriers under the 10,000-ton mark. The Washington limitations on this category applied only to those over that tonnage.
3. A treaty among the five powers in the direction of the humanization of submarine warfare.
4. A treaty among the five powers covering special exempt vessels not covered by the Washington treaty.
5. A five-power treaty on methods of limitation. This covers the old problem so prominent at Geneva of the limitation by lump tonnage as against limitation by categories.

The foregoing provisions will be signed by all the powers attending the conference.

The three-power agreement of Great Britain, the United States and Japan goes further. It limits not only the Goliaths and aircraft carriers, but it limits all categories of warships. It covers cruisers, in the matter of which the United States and Great Britain differed so radically at the Geneva tri-partite conference in 1927.

It is understood that the following limitations of tonnage will apply:

Cruisers carrying eight-inch guns: British Empire, 146,800 tons; United States, 180,000 tons; Japan, 108,400 tons.

Six-inch gun cruisers: British Empire, 192,200 tons; United States, 143,000 tons; Japan, 100,450 tons.

Destroyers: British Empire, 150,000 tons; United States, 150,000 tons; Japan, 105,500 tons.

Submarines: Britain, the United States and Japan to have 52,700 tons each.

The only naval restriction affecting France is that in respect to the extension of the Washington battleship holiday and also that concerning aircraft carriers. France, however, never built up to the limit in battleships allowed her by the Washington treaty.

Bill Given Hoist

Legislation On Resources Agreement Will Stand Until After Easter Recess

Ottawa.—Legislation to ratify natural resources agreements with the four western provinces will not be proceeded with until the first of next month.

A misunderstanding was the cause of an unlooked-for delay.

Hon. Charles Stewart, Minister of the Interior told the House of Commons that the four bills could not be proceeded with until after the Easter recess as he was not prepared to complete ratification at this time.

Drafts of the agreements have been returned by the governments of Saskatchewan, Manitoba, Alberta and British Columbia.

Suggests Pensions For Blind

D. B. Lawley Advocates Aid For Those In Isolated Areas

Ottawa.—Pensions for blind persons living in isolated parts of the country were advocated before the Canadian Federation of the Blind by D. B. Lawley, travelling secretary of the organization.

There are 7,000 sightless persons in Canada, he said, the majority of whom lost their sight after reaching 35 years of age. The handicap, he explained, weighed much heavier on those living in rural areas. He recommended setting up federal and provincial advisory committees to deal with the welfare of these unfortunates.

For Royal Ranch

Shipment Of Thoroughbred Stock Arrives From England

Saint John.—Seventy head of the finest thoroughbred stock arrived here from England destined to go forward by the Canadian Pacific Railway to the Prince of Wales' ranch in High River. This is the first shipment made to the ranch for four years, and great care has been taken by Professor Carlyle in his selection of the animals to secure the very finest types.

"The 40 pedigreed Shorthorn cattle, all of which have passed the extreme tuberculin test, are quite the best shipment that has ever been brought to Canada in my experience," Professor Carlyle said. They represent purchases made from some of the most famous Scottish and English breeders as well as a selection of nine two-year-olds and three yearlings, heifers from the home farm at Stroke Climsland, Cornwall, which are of the Prince's own breeding.

These heifers are of certain notable Shorthorn families not at present represented on the ranch.

Included in the contingent are 30 Hampshire Down sheep, three of which were prize-winners at every agricultural competition in which they have appeared. These are to improve and supplement the herd on the ranch at present, which has enjoyed such success, rams having been sold and supplied to ranches from Texas to the Peace River.

National Fuel Policy

Matter Brought Up In House Of Commons In a Series Of Questions

Ottawa.—The question of a national fuel policy for Canada is being brought up in the House of Commons in a series of questions propounded by T. L. Church, (Cons., Toronto Northwest). Mr. Church enquired:

"1. What steps have been taken to carry out a resolution which passed the House of Commons in 1926-27 for a national coal supply for Canada by which all coal would be mined and coked under the British flag, whether from Wales, Nova Scotia or Alberta?

"2. Has the attention of the government been called to allegations made "of sweated labor" regarding coal for Canada from Russia made in the House of Commons, London, on April 7, by Sir Newton Moore, (Richmond)?

"3. What steps does the government propose to take regarding contracts for Russian coal coming into Canada to insure the carrying out of the terms of the aforesaid resolution for a national coal supply, and to prevent Russian coal displacing shipments of Welsh anthracite?

"4. Is the government aware that 25,000 tons of Russian coal have recently been sold to a Montreal firm, displacing coal mined and coked under the British flag."

New Trade Relations

Germany To Cultivate New Markets With Adjoining Countries

Berlin.—Cultivation by Germany of closer commercial relations with her eastern and south-eastern neighbors, possibly at the expense of present trade relations with Canada and the United States and Argentina, was urged by Herman Dietrich, vice-chancellor and minister of economics.

He mentioned that the adverse trade balance with Canada was 218,000,000 marks, with the United States, 796,000,000 marks, and with Argentina, 370,000,000.

"They send us their surplus agricultural produce but decline to buy from us to the same extent. Consequently, readjustment of our commercial relations with the border states is perhaps the most important task of Germany's economic policy, and this applies especially to Poland and Rumania," he said.

Might Take Canadian Lumber

Ottawa, Ont.—A party of British Columbia manufacturers, who recently visited Australia and New Zealand, have been in conference with Hon. James Malcolm, Minister of Trade and Commerce, and said a friendly attitude to Canadian products was observed and it is believed that if a revision of the Australian trade agreement was considered, Australia might be prepared to give a preference to Canadian lumber.

Floods Threaten Manitoba Farms

Winnipeg, Man.—Rising river-levels west of Winnipeg, forced farmers to resort to dynamiting ice-jams in an effort to obtain relief from threatened floods. Sudden mounting of the level of the Assiniboine River at Poplar Point, about 40 miles west, promises to immerse miles of farm land unless the ice is allowed to flow free.

Peace Memorial Park

Money To Be Raised By B.C. School Children Donating Ten Cent Pieces

Vancouver.—Money subscribed in ten-cent pieces by the school children of British Columbia will be devoted to laying out of a peace memorial park on the Canadian side of the Peace Arch at the international boundary between British Columbia and the state of Washington. It was decided at a meeting here of the International Peace Memorial Association.

The United States end of the Pacific highway is being diverted to the Peace Arch, and the Department of Public Works, at Victoria, is changing the Pacific highway from its present position to the right-of-way to the arch.

The work of the International Peace Memorial Association will be to establish a magnificent park area on the Surrey side of the line. The Dominion Government has agreed to turn over certain lands there for a park.

WAR VETERANS ALLOWANCE ACT IS ENDORSED

Ottawa.—Broadly speaking, the ex-soldiers' organizations of Canada endorse the War Veterans' Allowance Act, which provides for granting to unemployable ex-service men a certain monthly allowance at the age of 60, said Lt.-Col. L. R. La Fleche, president of the Canadian Legion, to the special parliamentary committee on returned soldiers' problems. The bill provides for considering the "burned out" veteran, who is wholly unemployable, eligible for the grant before he has reached 60 years of age.

What was anticipated as a contentious matter was the clause which establishes a departmental committee, under direction of the minister, to control the operation of the act. The minister of pensions, Dr. J. H. King, informed the committee that on this departmental body the veterans would have an honorary member and also honorary members on the various district boards.

Col. La Fleche, speaking on behalf of the veterans, declared that this new provision would be satisfactory inasmuch as it would enable the ex-soldier organizations to keep in touch with the decisions of the committee. He said that the veterans desired it to be made clear that this bill should not have any bearing on the provisions of the Pensions Act.

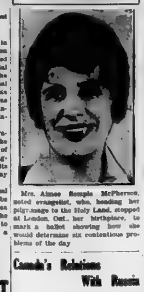
Shipped As Waste Paper

Large Liquor Cargo Seized At Niagara By U.S. Customs Officials

Niagara Falls, Ont.—A carload of waste paper, billed from Port York, aroused the suspicions of United States customs officials across the Niagara River. Working on the theory waste paper is not shipped such distances, the officials opened the car and discovered more than 1,000 cases of rare wines and cordials, hidden under the layer of waste.

The liquor was dumped into the river from the lower bridge to the great delight of boat owners. Word quickly spread that liquor was being thrown over and many persons rowed down under the bridge and salvaged bottles which had not broken.

VISITS BIRTHPLACE



Mrs. Aimee Semple McPherson, noted evangelist, who, heading her pilgrimage to the Holy Land, stopped at London, Ont., her birthplace, to mark a ballot showing how she would determine six contentious problems of the day.

Canada's Relations With Russia

Are Very Similar To Those With Other Countries

Ottawa.—Diplomatic relations between Canada and Russia are similar to those existing between the Dominion and other countries with the exception of those countries in which Canadian legations are located. This statement was made in the House of Commons by Premier Mackenzie King. Russia, the prime minister stated, had enjoyed certain special diplomatic privileges which had been discontinued several years. The result of the discontinuance of these special privileges, Premier King stated, was that relations with Russia, diplomatically, were on the same footing, as with Austria, Italy and such countries. A Canadian desiring to go to Russia, the prime minister remarked, could secure his passport in Ottawa, and have it vised by Russian authorities.

Eastern Canada Interested

Ontario Grain Growers Plan To Enter World Grain Show

Toronto, Ont.—Eastern Canada grain growers have already started plans to enter the world grain show at Regina, still two years away.

A few smattering prize lists which have found ways into agricultural centres here have resulted in a flood of requests for more and these requests are being communicated to the Regina promotion headquarters.

Seven of the leading grain growers of Perth County, two of them consistent winners in Ontario competitions, recently declared at Stratford that they have already started developing seed for the world show. Middlesex farmers have also started organizing.

New Fuel Oil For 'Planes

Hartford, Conn.—A new device for an aeroplane motor which permits use of all grades of fuel oil has been successfully demonstrated by the Pratt and Whitney Aircraft Company. The device eliminates the usual carburetor and intake system of the gasoline engine by a new system of direct fuel injection.

Duchess Takes Up Aviation

London, England.—The Duchess of Bedford, who is 65 and an aviation enthusiast, made her first solo flight in her own baby 'plane at her home, Woburn Abbey, Bedfordshire.

Distinguished Visitors

Rt. Hon. Lord Eustace Percy, seventh son of the seventh Duke of Northumberland, and president of the Board of Education in the Baldwin ministry, accompanied by Lady Percy, is shown here on board S.S. Duchess of Atholl, at Saint John recently. The distinguished couple are on a visit to Canada and the United States, where Lord Percy will inaugurate a series of lectures at Yale University on Anglo-American relations.

Natural Resources Bill

First Reading Of Bill To Ratify Agreement With Saskatchewan

Ottawa.—The bill to ratify the agreement between the Dominion Government and the Government of Saskatchewan, transferring the unalienated natural resources of Saskatchewan to the provincial government was introduced in the House of Commons recently and given first reading. The only difference between this agreement and the one made with Alberta, Hon. Charles Stewart, Minister of Interior, explained, was a clause providing for submission of certain questions to the courts. This litigation will not delay the transfer of the resources. They will be handed over as soon as the agreement is ratified by parliament and approved by the Imperial parliament.

Miners Will Not Strike

Lethbridge Men Decide To Apply For Board Of Conciliation

Lethbridge, Alberta.—There will be no strike in the Lethbridge minefield. The result of a vote announced at a meeting of the miners was 278 for conciliation and 142 for strike action.

The miners will now apply for a board of conciliation under the Lemieux Act to consider their demands, which include a small increase in wages and recognition of the Mine Workers' Union of Canada.

SAYS BRITISH NAVAL POLICY IS DANGEROUS

London, England.—Great Britain's war-time first sea lord, Admiral Lord Wemyss, said recently that Great Britain's future as a maritime power was fraught with grave possibilities under the present naval policy and other policies of the government.

Making the presidential address at the institute of naval architects, Lord Wemyss pointed to the reduction of 46 per cent. in the British naval estimates as compared to 1914 "concurrent with an enormously increased national budget."

"Is this backbone of British industry and national defence," he asked, "to be sacrificed in order that doles and pensions shall be provided on a more magnificent scale to those who, in many cases, might be usefully employed in developing empire resources and helping to protect our interests overseas?"

"Let us hope that the reaction which must inevitably come sooner or later toward fuller realization of our naval requirements may find us with the power to act before our national resources in men, money and material are irretrievably lost through a policy of mistaken confidence and extravagant expenditure in unprofitable channels."

The suggestion was made in parliament recently that the admiralty should take opportunity of the presence in London of Dominions' naval delegates, to discuss the question of revising the contributions of the Dominions to Imperial naval defence. Hon. C. G. Ammon, secretary to the admiralty, said the question is more appropriate for the Imperial Conference.

H. Ramsbotham (Cons., Lancaster), who had raised the matter, insinuated the real reason for not discussing the question was that the British Government had "pinched" the contributions of those Dominions interested in the Singapore naval base, by announcing work had been slowed down on this base without saying anything about return of the money contributed. Mr. Ammon did not reply to this.

"While all the self-governing communities of the British Empire have an equal claim on the protective role of the navy, they take widely varying views of their obligations towards the cost of Imperial defence," remarked the Weekly Review, Truth, recently.

The statement was provoked by study of the memorandum on respective contributions of Great Britain and the Dominions, released by the first lord of the admiralty last week. This showed the expenditure per capita in Britain was $5.96; Australia, $1.83; New Zealand, $2.47; Canada, 27 cents, South Africa (white only), 22 cents.

An even more striking manner of expressing these inequalities is the proportion of expenditure on naval defence to the value of the import and export trade protected," Truth continues. "The moral seems to be that neither Canada nor South Africa think there is the faintest prospect of another naval war, and that it is only wasting money to provide against it."

NO DECREASE IN WHEAT ACREAGE NOW EXPECTED

Winnipeg, Man.—Acreage of wheat on the prairies of the west will not show a decrease this year, according to indications at present. This is the verdict of farm authorities in Manitoba, Saskatchewan and Alberta, as expressed to the Canadian Press. Spring rains, however are characterized as a generally necessary means of replacing depleted sub-soil moisture.

Forecasts of ultimately-decreased wheat-areas in the west are not confounded, nevertheless, by the opinions that acreage will remain "much the same." It is conceded on all sides that weather during the remainder of April, if adverse, may quite reasonably affect a cut in the expanse of territory seeded to grain.

While pleas for acreage cuts have been heard in several parts of Saskatchewan the wheat pool, which controls more than one-half of the province's wheat yield and as large a proportion of the entire prairie crop has made no such move to restrict sowing. Pool officials have gone no farther than to advise against sowing of land that is not at least in fair condition. They believe that this year farmers should not take a gamble which might be condoned in better years. they advise in the language of the farmer, that summerfallow be given the benefit of the doubt. President A. J. McPhail of the pool, has stated that the question is one for the individual farmer to decide.

Two locals of the United Farmers of Canada, Saskatchewan section have passed resolutions asking the parent body to advise that farmers of the province cut down on wheat acreage. Jellicoe local took the stand a week ago and Wilkie local has also expressed its opinion. The U.F.A. has announced no attitude on the matter, but it is recalled that President George A. Williams, a month ago, stated that Chairman Alexander Legge, of the United States Farm Board, had made a "sound proposal" when he stated that control of production offers the only solution for the surplus grain problem.

First advocacy of reduced acreage in Saskatchewan came from Mayor John W. Hair, of Saskatoon, six weeks ago. He claimed that the U.F.C. in annual convention might well advise that wheat-area seeded be cut down. No such stand was taken by the convention, however.

By the time seeding is under way generally, the season is expected to strike about the average starting-time, if not a few days early. Though scattered reports of sowing have been received from virtually all parts of the prairies, southern Manitoba and northern Alberta are probably the most advanced at the present time.

Little seeding has been done in Saskatchewan, where some 60 per cent. of the entire wheat crop of Canada is produced. Throughout the province, though, acreage will be sustained in confident anticipation of the required rains, in the opinion of superintendents of experimental farms at strategically located points.

Colonel Ralston Is Returning To Canada

Hon. Phillippe Roy Taking His Place At Disarmament Conference

London, England.—Col. the Hon. J. L. Ralston, head of the Canadian delegation to the naval disarmament conference, with Mrs. Ralston, have sailed on the steamship "Berlin" for Canada. The liner sailed from Southampton for Halifax, where it is due to arrive April 16.

Col. Ralston's place will be taken by Hon. Phillipe Roy, Canadian minister at Paris. Pressure of parliamentary duties and work in his department of national defence necessitates the return of the Canadian cabinet minister.

Will Attend Passion Play

Oberammergau.—Prime Minister Ramsay MacDonald of England, has ordered tickets for himself and family for the Passion Play to be presented here this summer.

New Post Office For Brandon

A permit for $130,000 has been issued to cover the erection of the new post office in Brandon, for which excavation work has begun.

Spain is preparing to take a national census next spring.

Judge Nation By Child Death Rate

Infant Mortality An Index Of Any Civilization

(Submitted By The Social Hygiene Council)

One of the best criteria of the civilization of a nation is the care which it expends on its infants. The [illegible] method of estimating this is by observing the infant mortality rate. This is usually computed [illegible] number of infants out of every 1,000 born who do not live until the end of the first year.

It is a common [illegible] that the rearing of children is instinctive with the human race. Nothing could be farther from the truth. The mother must be taught how to care for her child if the child is to have any sort of a chance of surviving the dangerous first year and of reaching a healthy maturity. Poverty may be an excuse in some quarters for not giving a child all that it [illegible]. But poverty is no excuse nowadays for not knowing what the child [illegible] and how to take care of it. Ignorance on the part of the mother is inexcusable, as there are health centres [illegible] the country to which [illegible] may go at [illegible] and which will send [illegible].

[illegible] ignorance, as I have [illegible] with poverty is [illegible] of a high [illegible] rate among infants. Poverty affects the child both before and [illegible] different ways. [illegible] parents [illegible] the proud [illegible] and when [illegible] under [illegible] because the mother [illegible] and unable [illegible] the infant sufficiently or because the child, if artificially fed, doesn't get enough of the right kind of food. Then too living conditions [illegible] are apt to be crowded and more or less unhealthy. Poverty may force the mother out to work, which is bad for herself and the child. A working mother is unable to nurse her baby and the infant is sometimes left at home in the care of some incompetent person, such as a small child or an ignorant older person.

The ally of poverty—ignorance, is usually helped along by meddlesome older persons who are more ignorant than the mother herself and who are sometimes superstitious. [illegible] known of the most preposterous remedies being used by an ignorant mother at the suggestion of some busybody of a woman, who perhaps learned it from her grandmother or perhaps invented it herself.

The mother should learn from her physician or from a competent nurse and if neither of these are available because of the mother's location in some inaccessible country district, then from the literature which can be obtained from a number of sources.

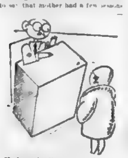
Children of ignorant mothers are rarely properly bathed, rarely get sufficient sunlight, enough fresh air or the right kind of food. They are nearly always treated as if germs were non-existent. Their bottles are sometimes filthy from a scientific standpoint.

A public health nurse once told me of a thing she saw one time. It is hardly believable. The nurse was paying her first visit to a poor family and it happened to be what the mother figured was the baby's feeding time. The mother was putting milk into a bottle which she carefully washed under the tap before putting the milk into it. The procedure was to fill a tumbler with milk and then pour it into the baby's bottle from that. As the nurse watched wide eyed a fly fell into the glass of milk. The mother calmly picked it out with her dirty fingers and went on filling the infant's bottle. Needless to say that mother had a few lessons in the preparation of feeding babies within the next few days.

A baby's food must be wholesome and pure. With a mother who is both poor and ignorant, such a standard is impossible. A mother who knows what she is doing but who is poor and unable to afford the proper surroundings, finds it hard to maintain the standards necessary if her baby is to grow up with an even chance [illegible].

A mother between the ages of twenty-five and thirty has the best chance of giving birth to a healthy child one which will be able to resist the dangers besetting it during the first year. Care of the infant should begin long before the child is born as the physical condition of the mother is of the utmost importance. If the mother is poor and undernourished or suffering from any of the complications of pregnancy, the child's chances of life are greatly lessened. If the mother has to work, she should arrange it that she has some rest before the birth of the baby. The death of weakly infants due to overwork and undernourishment on the part of the mothers, forms a great part of the infant mortality rate.

It is quite obvious the part that poverty plays in keeping up our infant mortality rate and in bringing children poorly equipped to maturity. Bad housing and poor sanitation are detrimental to the health of the child. Families that are forced to live in cramped quarters of one or two rooms cannot but suffer. There is a lack of fresh air and sunlight; there is dirt and filth tracked in from the street by many feet; and a very important consideration, a lack of proper storage space for food. Nearly always there is a complete lack of refrigeration. All these things tend to lessen a child's chances for life and in life. As long as our cities have slums the mortality rate will not be lessened. Great strides have been taken by the health authorities, but there is much work yet to be done.



"Before shooting your husband didn't you think of an amicable settlement?"

"I did think of divorce, but it is such a slow business." — Gutierrez [illegible]

W. N. U. 1835

The Shape Of Canada's Surface

North Pole Thirteen Miles Closer To Centre Of the Earth Than Surface Of Equator

It is not generally known that the surface of the earth at the North Pole is approximately thirteen miles closer to the centre of the earth than is the surface at the equator. In Canada the form of the surface is determined by the triangulation and traverses of the Geodetic Survey of Canada, Department of the Interior, which makes scientific investigations to determine the nature of the dip of the surface as it goes North so as to allow for the thirteen miles shortage in the earth's polar radius. The use of traverses in various parts of Canada to assist in determining the shape and form of Canada's surface, which is of course neither plane nor spherical, has resulted in much investigational research.

Proves Grading Pays

Certified Canadian Potatoes Bring High Price In States

Canadian potatoes made a good start for 1930 by taking a premium in the Boston market over the State of Maine product. A report received by the Fruit Branch of the Dominion Department of Agriculture from the United States market report service shows that P.E.I. potatoes selling in 90 pound lots got a price of from five to fifty cents more per unit than was paid for the same class of product from the State of Maine selling in a 100 pound bag. Every carload and cargo of potatoes shipped out of P.E.I. was government inspected and certified. Yes—grading does pay.

Quite Out Of It

An Irishman lay dying when the odor of cooking assailed his nostrils. Summoning his weeping daughter to his bedside he said:

"Nora darlint, ain't it doughnuts that I smell?"

"Right for ye, father," the girl replied.

"And would ye be asking your mother if I can have one before I die?"

The daughter delivered the message to mother in the kitchen and brought back this answer:

"Mither says ye cannot have one of them doughnuts, they're for the wake."

After Five Years

(Two old women, talking): "Well, you've got one of them ear things for your deafness at last. That's what I've been telling you to do for five years."

"Eh? That's what you've been telling me for five years, is it?"

Mrs. Flatt: "That wireless program isn't coming in any too well."

Mr. Flatt—"Then let's open another window and see if we can get it better."

Canada's Elk Preserve

[illegible] Ambitious Plans For Animal Park

The greatest elk preserve in Canada will shortly be located on the Queen Charlotte Islands, off the west coast of British Columbia, according to the plans announced by the Provincial game board.

Animals from Wainwright National Park, have been obtained as nucleus of the herd.

The elk reserve has been planned for some time by Bryan Williams, game commissioner, and one of the best known big game hunters and guides in Western Canada. As there are no predatory animals on the Queen Charlottes, it is believed that the herds will rapidly multiply, until in time there will be thousands of the animals on the islands. There is very little settlement there, the chief industries being fishing and logging, so the elk will not be disturbed, nor will they themselves be a menace to settlement.

Several additional shipments will be made from Wainwright later on, and it is proposed to capture some of the elk now on Vancouver Island, and [illegible] them to the Queen Charlottes. There are said to be about 250 elk in the Shaw Creek reserve in central Vancouver Island, but they are preyed upon by cougars and wolves.

Eventually, it is proposed to permit shooting of elk on the Queen Charlottes, but for several years, there will be rigid regulations against hunting of any kind there.

Useless Without Groove

Curvature In Pen Nib Holds Quantity Of Ink

All pen-nibs have a slit running to the point from a little round or oval hole which is cut in the middle of the nib where it begins to taper. Were it not for this slit and the fact that the whole body of the nib is curved, we should be unable to write. The curvature causes the nib to hold a considerable quantity of ink when it is dipped in the pot, and the slit causes the point of the nib to open into two sections when it is pressed upon the paper, and the ink between these sections is then left on the paper, forming a line or letter, as the case may be. Steel nibs also have two little slits in their sides or shoulders. These are to give greater flexibility to the nib. Good nibs, being softer, do not need these side slits.

Building Colony For Harvest

Some Essentials Beekeepers Should Look After In Spring

To gather a maximum crop of [illegible] the colony [illegible] exceedingly strong in bees at the same time as the major honey plants commence to secrete nectar. Furthermore, the majority of these bees must be of the right age to become gatherers at this particular time and to be of the right age, they must be produced during the eight weeks just prior to the honey harvest, which means during the spring and early summer. The spring is the most critical period of the year [illegible] the beekeeper because it is during this period that his colonies are usually at their weakest in bees, the bees lowest in vitality, short of stores, and at the same time are required to produce the largest amount of brood, says C. B. Gooderham, Dominion apiarist. Young bees cannot be produced in large numbers without (1), a good prolific queen to produce the eggs; (2) a plentiful supply of food to feed the oncoming generation; (3) sufficient room for the queen to reach her maximum egg production, (4) adequate protection, especially from cold winds, and (5) a force of bees strong enough to care for all the brood the queen can produce. It is up to the beekeeper then to see that these essentials are supplied. As soon as possible in the spring look over the colonies and replace all old and useless queens, supply each colony with enough food either in the form of honey or sugar syrup and see that there is sufficient room for the normal expansion of the brood nest. Bees wintered outside will have protection enough, but those wintered in cellars should have at least protection from the wind when they are moved to their summer stands. All colonies that are weak in bees should be united or have a two-pound package of bees added to them. Remember that every check in the spring brood rearing will mean less bees for the harvest.

Villager—"I like your preaching, vicar. I learn a lot from your sermons."

Vicar—"I'm very glad to hear that."

"Yes, until I heard what you had to say on Sunday I always thought Sodom and Gomorrah were man and wife!"

Manufacturing industries in Argentina are being developed.

Fish are said to sleep soundly.

Is It Good Business?

Getting Unnecessary Things For Which One Cannot Pay

Horace Greeley said: "Hunger, cold, rags, hard work, contempt, suspicion, unjust reproach are disagreeable, but debt is infinitely worse than them all. If you have but fifty cents and can get no more for a week, buy a peck of corn, parch it and live on it, [illegible] than owe any man a dollar." It would be interesting to know what proportion of the people today who believe in and are carrying out Greeley's philosophy. If one may judge from casual observations, the percentage would be small. How many are there who subject themselves to such teaching as this? The question which naturally arises is, is Greeley wrong or is the modern [illegible] of doing business wrong? It seems to be the prevalent idea to get a thing if you want it and pay after. A colored man was observed to eat his pie or cake first, then his meat, and after that his parsnips. When asked why he reversed the usual order he replied, "I might die before I got to the parsnips." So some people say "We [illegible] get what we [illegible] enjoy it, [illegible] pay for it later." Who gets the more enjoyment, the person who adopts this plan or the one who does without until he can make it his own? Should we make use of that which is not our own, or mortgage our future prosperity in order that we may possess? The question we want to ask ourselves is, is it good business methods?

Although we are a comparatively new country, and therefore have not [illegible] able to build up much of a financial reserve, would we not have been able to stand the stress and strain of the present day better had we not mortgaged our future earning power quite so much? Is there not a lot of wisdom in the thought, so strongly emphasized by Greeley, of keeping within your income? The great mass of the so-called middle class are in that class due to such care over expenditure, and is it not from this class that the financial leaders spring? They are the people who lend stability to the state, in every sense of the word, and under present conditions tide a people over a crisis. It might be a good idea if more of us adopted the Horace Greeley idea on finance.—Moose Jaw Times.

Degrees Of Courtesy

New Formulae For Conventional Signatures Would Be Helpful

Observer in the Observer (London, England): The "insincerity" of our conventional signatures will not, I fear, be cured by the new discussion of the subject. It may be difficult to discriminate between the degrees of courtesy of "Yours truly," "Yours faithfully," and "Yours sincerely," but not so difficult as to devise a new and perfectly truthful mode of greeting for every correspondent. Some people have tried it. James Howell, for example, who at different times declared himself in these forms:

Your entire friend.
Yours really.
Yours verily and invariably.
Yours in no vulgar way of friendship.
Your humble and hearty servitor.
Yours in the perfect'st degree of friendship.
Your whole.
At your disposing.
Yours, yours, yours!

But English is not really rich enough in adverbs and adjectives.

Then, to be quite honest there ought to be a set formulae for people you dislike, or do not care twopence about. Must we, in the interest of truth, sign ourselves "Yours indifferently," "Yours more or less," or "Not yours in any real sense of the [illegible]"?

Prairie Province Fires

Fires Fought Every Month Of Year In Manitoba and Saskatchewan

A remarkable feature of the 1929 forest fire situation in Manitoba and Saskatchewan was that fires occurred and were fought in every month of the calendar year.

During the 1929 forest fire year on the northern wooded fringe of the Prairie Provinces some precipitation occured; but for the most part the wooded sections of this region suffered severely from lack of rain and the consequent fire outbreaks.

An Irish salesman was trying his hand at selling iron window sashes, and in recommending them to the builders, he said:

"These sashes will last forever and afterward, if you have no further use for them, you can sell them for old iron."

A transparent leather has been invented in England for clothing and several other purposes.

The Widespread Use Of Radio

Even the Eskimos In Far North Are Proud Owners Of Sets

During the eleven months ended February 28, 466,117 radio receiving licenses were issued in Canada, an increase of over 100,000 from 1928-29. By March 31 the [illegible] will be around 480,000, and since it is estimated by the department that for every seven or eight sets licensed, one escapes the fee, the Dominion now boasts approximately half a million machines.

In these figures free licenses for the blind numbering 386 in the eleven months, compared with 472 in the whole of last year, are not included. Toronto sets most of the records for the [illegible]. With 86,324, it is the leading city. With a gain of 14,150 over last year, it shows the largest gain in the eleven months. Montreal runs along behind with 62,116. Vancouver holds third place, while Hamilton and Winnipeg are about a tie for fourth.

Ontario maintains its pronounced lead among the provinces. Five out of every ten radios in Canada are in this province. The Yukon and the North West Territories have 134 licensed sets to date this year, compared with 111 last year. The radio license inspector in that area is commonly the "Mountie." Many of the sets are owned by Eskimos.

You Know What You Get

Only Two Grades In Branded Beef, "Choice" and "Good"

When you buy branded beef bearing the red or blue brand of government inspection you know what you get. Much effective work has been done by the Live Stock Branch of the Dominion Department of Agriculture in respect to popularizing branded [illegible]; but the serious fact is that there is an acute shortage of beef animals which will measure up to the strict standards of the official grades. Most of the large retail stores, however, now stock one or both grades. There are only two grades in branded beef, "Choice" and "Good." The "choice" beef is in all cases designated by a red brand. This grade is necessarily limited in volume and represents the product of particularly high class well finished cattle. The "good" beef is identified by a blue brand and is the grade in greatest supply. It includes only beef which can safely be recommended as of good eating quality. Six months in operation finds the new brands gaining rapidly in popular favour, particularly because of the assurance of quality which the government stamp provides.

Canals Thickly Populated

Thousands Of Dutch Families Live [illegible]

The inland canals of Holland are almost as thickly populated as the waterways of China. Thousands of Dutch families live and die upon canal boats. Babies are born upon them, and many people never have any other homes. On a typical canal boat the freight cargo is carried in front, and the owner and his family live in the stern. In winter the boats are frozen tightly in the canals, but in summer they constantly move about from place to place.

Apple Trees For Prairies

After fifteen years of seed planting the experimental work of the Dominion Department of Agriculture has developed sixteen varieties of apple trees suited to the climatic conditions of the Prairie Provinces. Of these varieties two have been graded "very good" and four "good." Horticultural experts point out, however, that it will take several more tree generations to evolve the ideal species.

Small Boy (to visitor)—"Have you got a wife?"

Visitor—"No, sonny, I haven't."

Small Boy—"Then who tells you what to do?"

"This is my twentieth birthday."

"Strange, today is my twentieth birthday."

"Yes, but it is mine for the first time."—Esquella, Barcelona.

PRINCESS ELIZABETH

Marcus Adams, the great English photographer of children, sent this lovely study of Princess Elizabeth to Mr. Charles Ashley, president of the Ontario Photographers' Association, in response to a trans-Atlantic telephone conversation in which Mr. Ashley asked for the loan of some portraits of royal children to arouse interest in the contests being run by the Photographers' Association of America to discover the most attractive child in America and in Ontario, respectively. The little princess recently discovered, in Buckingham Palace yard, [illegible] every [illegible] the guardsman on sentry-go, he presented a[illegible] her. And before the nursemaid discovered the situation, had run the poor fellow nearly ragged.—Photograph by Marcus Adams, London, England.

The finest tea you can buy—Red Rose Orange Pekoe. Made from juicy, flavor filled leaves—three days in bud. Every package guaranteed. 78

RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good

In the best package—Clean, bright aluminum

Canada's Amazing Growth

Lord Willingdon Refers To Tremendous Development Within Last Few Years

Addressing a luncheon gathering at Victoria, B.C., recently, his excellency, Lord Willingdon, outlined the tremendous development he had witnessed in Canada during the three and one half years since he came here as governor-general, and outlined the possibilities of empire co-operation.

"I sincerely trust that in the near future, business men throughout the empire will get around a common table and put their heads together," his excellency said.

Canada's growth had been amazing in the past three and one-half years," his excellency declared. "Its water powers, its harbors, its public buildings and the commercial and business life had progressed rapidly.

"From Halifax to Vancouver I see signs of this development in all parts of the great cities," he said. "But the thing which surprised me about this country—I will call it our country—is that in the short space of 60 or 70 years and with less than ten million people, we have risen to fifth place in the world of trade and commerce.

"True enough we have had a slight setback in the last few months. But I do not think that this is a very serious thing. It is rather a warning that our business must be conducted on sound and healthy lines rather than hysterical methods and excitement."

"Some people at home and in this country," Lord Willingdon proceeded, "are alarmed about what they term the loosening of the bonds of empire—I am inclined to ask them 'cannot Canada be trusted? Has she not proved worthy of our trust during the Great War.'"

"Cannot I say with absolute confidence that Canada is as true, as loyal, and as sound as any part of the British Empire?" he asked.

"During public service in many parts of the empire I have found that trust begets trust and confidence begets confidence. I think the looser you make the practical bonds, the surer and firmer will be the sentiments which will hold us together in future years."

A Graceful Act

Sir Hubert Wilkins To Present 'Plane To Father Of Ben Eielson

Sir Hubert Wilkins stated at Hatton, N.D., that he would present Ole Eielson with a 'plane his son flew during Arctic research with the Australian explorer.

The 'plane will be a memorial to the father of Wilkins' pilot, Carl Ben Eielson, who lost his life in a flight of mercy in the Arctic, in which he had done so much exploring.

Ole Eielson said he would give the 'plane to the state or to the Eielson Memorial Association to be placed in a museum.

"John, you think more of that old radio than you do of me."

"Well, dear, I get less interference from it."

Australia Taxes Luxuries

And Import Of Certain Articles Is Forbidden Under New Restrictions

Premier Scullen, of Australia, has announced imposition of a 50 per cent. super-tax of luxury imports. Imports of some luxuries are absolutely forbidden under the new restriction, of others, it is limited.

The luxury lines on which the super-tax is to be imposed include all spirits, beverages, matches and piece-goods under the heading of textiles, felts, manufactures thereof, and attire other than piece-goods in knitted tabular form of cotton silk or containing silk and artificial silks, or being an admixture of wool and other fibres.

The tax, which came into force April 4, will apply also to umbrellas, refrigerators, inks, paints, printers' ink, glassware, perfumery, toilet preparations, artificial perfumes in concentrated form, synthetic natural and essential oils, lounges, picture frames, articles used in outdoor and indoor games, toys, precious stones, rolled gold, imitation jewelry stones, pearls, cinematographs, gramophones and records, rubber boots, motorcycles, motor cars and bodies and other vehicles, carts, cameras, cordage and articles of attire, including suits, overcoats, blouses, skirts and costumes.

Radio In Prisons

Has Proved Helpful In Influencing Minds Of Prisoners

A survey shows that radio has been made available to inmates of many American prisons, that its installation is under consideration by the managements of other prisons, and that where it is in use it has proved helpful to penal administration. This is not a case of pampering prisoners. It represents a hopeful effort beneficially to influence the minds of isolated human beings.

The majority of inmates of prisons, reformatories, houses of correction, and jails, eventually will be discharged to mingle freely with the life of the world. It is to the interest of society that the inmates' terms of imprisonment shall prepare them for normal existence outside prison walls. Wholesome occupation for the mind is as essential in prisons for the resistance of moral contagion as is wholesome food for the resistance of bodily disease.

Value Of Boy Scouts

Sir James Knox, British Prison Commissioner, stated the other day that he was sure if boys would join such organizations as the Boy Scouts or the Church Lads' Brigade on leaving school there would be vastly fewer criminals to deal with. And he was absolutely right. The boy who has interesting and wholesome occupations for his spare time isn't in much danger of ever becoming a problem anywhere.

In some species of the whale the throat is so small that an orange cannot be swallowed.

Constantinople and Angora, Turkey, have just been connected by a telephone line.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention.

One spoonful of this harmless, tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

World's Grain Exhibition

Regina Conference Will Be Of Inestimable Importance To Agriculture the World Over

After some discussion at a representative gathering in 1930, it was decided to hold a World's Grain Exhibition and Conference.

The desire to do so arose out of the unanimous opinion that one such effort should be made to bring together world authorities on agriculture, particularly those interested in field crops, and further to bring into open, friendly competition, grain and other seed from all parts of the world.

Hon. Dr. W. R. Motherwell, the Federal Minister of Agriculture, speaking at one of the preliminary conferences said, that in holding such an exhibition and conference there are wonderful possibilities for for stimulating interest in the improvement of cereal crops and in the dissemination of knowledge of how to improve agricultural conditions generally.

The capital city of Saskatchewan being in the heart of the largest area in Canada growing immense quantities of grain for export seemed to be the logical place for such a gathering, and it was therefore decided to hold a World's Grain Exhibition and Conference at Regina, from July 28th to August 6th, 1932.

It must not be inferred, however, that the selection of a Saskatchewan city indicates anything of a merely provincial nature. The Exhibition and Conference is national in character and world-wide in its appeal.

The undertaking is being supported by the Federal Government, every provincial government, and all of the great financial, industrial and agricultural organizations in Canada. Official invitations have been sent from the Dominion Government to all countries asking them to take part.

The Exhibition and Conference as its name implies, naturally divides itself into two parts. First, the competitions in the show ring, and second, the addresses and discussions of the conference program.

The cash prizes offered in competition are larger than have ever been offered before. The total amount of the prizes to be given for all kinds of seed is over $200,000. In most of the classes there are fifty prizes. In a few of the classes the number of prizes range from forty down to twelve. First prizes are very high ranging from $2,500 to $75. In the wheat section for example, the first prize in each class amounts to $2,500, the second, $1,500; the third, $1,000; the fourth, $800; the fifth, $700; and so on down to $50 for the fiftieth. In all of the six classes in the wheat section there are 275 prizes.

There are sections also with prizes in proportion for oats, barley, corn, rye, buckwheat, rice, millet, field peas, soy beans, flax seed, alfalfa, clover, grasses, sunflower, field root seed and garden vegetable seed.

The judging of the exhibits will be scientifically and carefully done during the summer of 1932, as all exhibits must be at Regina on or before April 1st of that year.

1932 may seem to be a long way off but when it is remembered that there is only the coming season and next to produce the seed the time may be very short indeed.

The Conference part of this world event will be of immeasurable importance to agriculture the world over.

Provision will be made to accommodate large audiences in the lecture halls. Experts in agriculture from all parts of the world will deliver addresses and read papers upon many subjects touching agriculture—such subjects as soils, physics, chemistry, bacteriology, culture, fertilizers, weeds, plant breeding and genetics, plant diseases, experimental methods, insect pests, marketing, financing, milling, baking, machinery, and many others. Opportunity will be given for discussion.

In addition to the educational value of the conference itself, the lectures, papers, and discussions will be printed in book form for distribution, thus preserving in permanent and convenient form the various facts and opinions for future reference.

As an additional educational feature, provision will be made for agricultural exhibits.

The whole programme is indeed ambitious; but even now there is much to indicate that this great World's Grain Exhibition and Conference will go down in history as the greatest thing of its kind ever held at any time, anywhere in the world.

The so-called chinch bug is only three-twenty-fifths of an inch in length, yet in one year did $60,000,000 worth of damage to crops in one American state.

True dyes are easiest to use!

Dresses, drapes or lingerie look new when they're re-dyed with Diamond Dyes. No spotting or streaking; never a trace of that re-dyed look. Just rich, even, bright colors that hold amazingly through wear and washing.

Diamond Dyes are the highest quality dyes you can buy because they're rich in pure anilines. That's what makes them so easy to use. That's what they've been famous for 50 years. 15 cent packages—all drug stores.

Diamond Dyes

Highest Quality for 50 Years

A Japanese Discovery

Doctor Says Long Eyelashes Are Sign Of Weak Vitality

Long eyelashes are considered to add to the charm of a face. But they are, according to a Japanese physician, a sign of weak vitality. This doctor says that consumptive children have lashes twice as long as those of healthy little ones. While a normal baby's eyelashes grow about an eighth of an inch during its first year, tiny sufferers from infantile diseases have at the end of twelve months lashes twice as long. These discoveries were made in a hospital attached to one of the Imperial Universities.

WARNING TO MOTHERS

Watch the Health Of Your Little Ones At All Times

No mother can expect that her child will escape all the ills to which babyhood and childhood are subject, but she can do much to lessen the severity of these troubles. The mother should be constantly on her guard to prevent childhood ailments, or if they come on suddenly as they usually do, to have the means at hand to relieve them. Thousands of mothers have found Baby's Own Tablets the ideal remedy for little ones thousands of mothers always keep the Tablets in the house as a safeguard against the sudden illness of their little ones.

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels; sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fever and make the cutting of teeth easy. The Tablets are absolutely guaranteed free from injurious drugs and may be given to the youngest child with perfect safety. They are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Helped a Lot

Two Irishmen were discussing the grave illness of a friend for whom the doctors had given up hope.

Said the first: "Phwat's the matter wid him, annaway?"

"Gangrene," said the other.

Said the first: "The saints be praised for letting him die wid the roight color."

Persian Balm. Cool and refreshing. Soothing and protective. The perfect aid to beauty. Unrivalled in its softening and beautifying effect on the skin. Imparts a fresh and fragrant charm to the loveliest complexion. Banishes roughness caused by weather conditions. Safeguards the skin and keeps it smooth, soft and flawless. Use it for the hands and face. Always results in the highest expression of beauty.

A Federal Responsibility

Argument In Favor Of Federal Aid For Transcontinental Highways

The prime minister is partly—and, Westerners believe, only partly—right when he tells the House that road building is a provincial responsibility. It could be proved by the bulwark of the Canadian constitution, the British North America Act, that road building is an affair for the provinces, just as the prime minister says. But the draftsmen of the act no more anticipated the coming of the automobile, than they anticipated, say, the entry of women into politics and parliament. Yet, while the market roads and the byways of travel are provincial responsibilities surely, if the transcontinental railways are the concern of the Dominion of Canada, why not transcontinental highways, in these days of universal auto travel? — Calgary Albertan.

Seville, Spain, will continue its international exhibition until June 30.

Corns INSTANT relief PUTNAM'S Corn Extractor

C.N.R. Has Heavy Programme For West

Plans To Spend $25,000,000 On Maintenance and Construction This Year

The Canadian National Railways will spend $25,000,000 on new construction, maintenance and general betterment work in Western Canada this year, according to a statement issued today by A. E. Warren, vice-president of the Western Region of the company. This figure is exclusive of the sums which will be spent on the Hudson Bay Railway, and it does not include the Canadian National's share of the budget for the Northern Alberta Railways.

As has already been announced, $9,000,000 will be used in the branch line building programme. This work constitutes this year's portion of the three year programme approved by the Federal Parliament in 1928, and most of the lines are located in Saskatchewan and Alberta. Two are being built in British Columbia. Altogether 12 branch lines are included in this year's western programme.

The balance of the money will be used on lines in the west now in operation, and on the two hotels which are under construction in Vancouver and Saskatoon. Relaying of steel, track maintenance and improvement, ballasting, track extensions, bridging, fencing, the erection of new buildings, water supplies and railroad facilities generally comprise the bulk of the work for which provision has been made. It is not possible at this time to particularize the various items in the budget since each item requiring a capital outlay has to be sanctioned by parliament before work can be commenced.

It can be said, however, that among other things, the company proposes to replace 270 miles of 80 and 85-pound steel with new 100-pound steel and to relay 100 miles of light track with 80 and 85-pound steel. In the programme for further strengthening track structure the installation of some 2,725,000 tieplates and 680,000 rail anchors is contemplated. Between 3½ and 4 million ties will be replaced, of this number about 15 per cent will be treated ties. A considerable amount of ballasting is also proposed.

The extension of forty passing tracks on trunk lines is proposed. This increased capacity will permit a more economical use of power. Provision is made for the construction of through sidings at 31 points in addition to existing passing tracks, thereby releasing the passing tracks entirely to train operation and so providing an avenue for a further speeding up of passenger and freight train schedules. Twelve loading track extensions are also projected, yard extension, improvement and rearrangement has been provided for at a number of points, the most important of which is Saskatoon where the extensive terminal changes which were begun last year will be proceeded with.

Together with the branch line programme already mentioned, the proposed work constitutes a heavy programme for the engineering forces. The branch line programme alone calls for the grading of 1780 miles of line; tracklaying on 155 miles; ballasting on 217 miles; the erection of 300 miles of fencing; 240 miles of telegraph line; 20 station buildings, 40 sectionmen's dwellings and 10 water stations including tanks and pumphouses.

The programme on the Hudson Bay Railway, which is being supervised by the engineering department of the Canadian National Railways for the government, is also extensive. Between The Pas and Mile 356, the original portion of the railway, a number of section buildings and employees dwellings have to be built and a certain amount of filling of embankments has to be undertaken.

It is expected that the progress to be made during this year on the various works will be sufficient to complete and equip the Hudson Bay Railway to a point which will permit of commercial business being extended beyond Mile 356 to Churchill. This, however, will depend to a considerable extent upon how early weather conditions will allow work to be resumed.

A Pioneer In Photographic Mapping

Canada was the first country to make practical use of photography in surveying on an extensive scale. Methods of photographic surveying were developed over forty years ago by the late Dr. Deville, Surveyor General, Department of the Interior, and large areas of the Rocky mountains have been so surveyed.

Canada's Lumber Industry

Of the $170,000,000 invested in the lumber industry in Canada, $56,000,000 is in British Columbia, $45,000,000 in Ontario, and $37,000,000 in Quebec.

Minard's is Best for Grippe.

"After Baby Came I Was Weak, Skinny, Gained 22 lbs."

"After baby was born I was very weak, skinny. Since taking Ironized Yeast feel fine. Gained 22 lbs." Mrs. Laura Benoit.

Thousands write new Ironized Yeast adds 5 to 15 lbs. in 3 weeks. Ugly hollows fill out. Bony limbs get graceful roundness. Muddy skin gets clear and rosy like magic. Nervousness, indigestion, constipation vanish overnight. Sound sleep, new pep from very first day.

Two great tonics in one—special weight-building Malt Yeast and strengthening Iron. Pleasant little tablets. Far stronger than unmedicated yeast. Results in half time. No yeasty taste, no gas.

So quit being skinny, tired, unattractive. Get Ironized Yeast from druggist today. Feel great tomorrow. Money back from manufacturer if not delighted with quick results.

Little Helps For This Week

"It is a good thing to give thanks unto the Lord, and to sing praises unto Thy name, O Most High."—Psalm 92: 1.

Seven whole days, not one in seven,
I will praise Thee,
In my heart though not in heaven,
I can raise Thee.
Small it is in this poor sort
To enroll Thee,
E'en eternity is too short
To Extol Thee.
—George Herbert.

I think we are not as thankful as we ought to be, we are lacking in the spirit of praise. We are far too much given to complaints and wailings, and I do not think these can please our Holy Father. If you are seeking to help another here, are heaping benefits on any one, it is not cheering to listen to a ceaseless tissue of lamentations. God expects His blessings to be acknowledged, both temporal and spiritual.

Archer Thompson Gurney.

Your Home Medicine Chest.—Among the standard household remedies that should always be on hand in your home medicine chest, none is more important than Dr. Thomas' Eclectric Oil. Its manifold usefulness in relieving pain and healing sickness is known by many thousands throughout the land. Always use Dr. Thomas' Eclectric Oil for relieving rheumatic and sciatic pains, treating sore throats and chests, coughs, burns, scalds, cuts, bruises and sprains.

Polite To Foreigners

A movement has been initiated at Dresden, Germany, to have the school children of Saxony taught to be especially polite and helpful to all foreigners. Hotel owners and others interested in the tourist traffic are behind the movement.

Minard's Will Stop That Toothache.

'Plane For Submarine

A seaplane with folding wings has been designed that can be borne in a special compartment in a submarine. It will carry a pilot and an observer and, in addition, it has space for a wireless set, seat-type parachutes, and a chart case. Its range is two hours, and it will be a valuable accessory as a scout for a submarine at sea.

Weak After Operation

"I was very weak after an operation. My nerves were so bad I would sit down and cry and my husband would not go out and leave me alone. Now my nerves are much better, thanks to a booklet that was left under the door. Lydia E. Pinkham's Vegetable Compound surely put me on my feet. I have taken eight bottles. My friends tell me I look fine. My sister has taken this medicine too."—Mrs. Annie Walton, 67 Stanley St., Kingston, Ontario.

Where World's Championship Was Won

THE centre of gravity in the hockey world shifted to Montreal with the brilliant record of "Les Canadiens" who, by their epic performance at the closing games of this season re-captured the Stanley Cup for Canada.

The large picture shows the crowded Forum at Montreal, now the hockey centre of the world, and incidentally the most modern of the Canadian arenas.

The odd looking cluster of horns in the centre of the roof is the Northern Electric Public Address System, a feature of the highly perfected organization necessary to deal with immense crowds.

The insert shows Howie Morenz, the star player of the Canadiens team.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION

DRINKING FOR HEALTH

The body of the average person contains about seventy per cent of water. It is important, therefore, that the individual see to it that a sufficient amount of water is supplied to his body.

It is not possible to say just how much water a person should use, because the amount varies, depending upon his occupation and the heat and moisture of the atmosphere in which he lives and works. Working out of doors on a hot day, a man gets rid of considerable quantity of water by the evaporation of water from the skin.

Generally speaking, most people do not secure a sufficient amount of water; either they do not drink enough water or other fluids, or they do not eat sufficiently of foods containing a high percentage of water.

Water is usually so easily and readily obtained that it is not generally appreciated. We are apt to think of it as only at those times when we are thirsty and there is none available. It is likely that many persons who now enjoy health would feel even better if they were to increase their fluid intake by developing the habit of drinking a glass or two of water before breakfast and between meals.

There is no objection to a moderate use of water with meals, but it is distinctly harmful to use water or any other beverage to wash down food. Drink should not be taken while food is in the mouth. Before drinking, any food that is in the mouth should be thoroughly masticated and swallowed.

Water acts as a food solvent. It is a most valuable acid in securing regular and complete elimination of body wastes. Water is also necessary for the regulation of body heat.

It is not sufficient to rely upon a sense of thirst as a guide. When thirst occurs it should be quenched but it often happens that many persons are only occasionally thirsty. For years they have not attended to the natural demand for water unless it were pressing, and so their sense of thirst is blunted. A daily water drinking routine should be adopted, regardless of the absence of thirst.

Like all good things, almost may do harm. If six glasses of water a day are good, it does not follow that eighteen are three times better. Excess is never desirable, and in those who suffer from a heart or kidney condition, excessive drinking of water may be definitely harmful.

No rule of hygiene is easier to obey than that of drinking sufficient water. There is no reason to overlook its regular practice.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College street, Toronto will be answered personally by letter.

CERIAL RUSTS — METHODS OF CONTROL

(Experimental farms note)

Investigations carried on by the Dominion Rust Research Laboratory, Winnipeg, in co-operation with the Dominion Laboratory of Plant Pathology, Saskatoon, have shown that rust is spread in western Canada by means of spores carried by the wind and that these spores are found to a height of a mile or more overhead. Moreover, there is very convincing evidence that the earliest infections to appear in western Canada arise from spores that have been carried in by winds from rust infected areas further south. Obviously then it is impossible to build any barrier, or impose any quarantine measure for their exclusion. There are, however, two possible methods of controlling rust, and the Dominion rust research Laboratory, of the experimental farms Branch, have done a good deal of work on both. One of these is by applying some toxic substance to the plants which will adhere to them for a considerable length of time, so that, when rust spores alight on the plants and germinate, they come into contact with the substance and are killed. Finely powdered sulphur has been found to give very effective control. The cost of the treatment is between $4 and $5 per acre. Quite satisfactory hand-dusters are available for testing small sized plots, and several manufacturers have made considerable progress in developing a type of machine suitable for large acreages. The other method is by breeding rust resistant varieties of commercially desirable wheats, or other cereals. By the plant-breeding method, it has been possible to transfer a high degree of resistance, amounting practically to immunity, to a number of very promising strains of wheat. In milling qualities all of these are equal to Marquis and several of them are superior. Breeding for rust resistance in oats is progressing and the prospects of developing strains of oats highly resistant to the most prevalent physiologic forms of oat stem rust are hopeful. On the other hand no oat variety has been found which possesses any marked resistance to the most prevalent physiologic form of crown rust of oats. To control this rust, resort must be made to sulphur dusting and the eradication of the buckthorn, a shrub, which serves to propagate this rust.

FUNNYISMS

A backwoods mountaineer one day found a mirror which a tourist had lost.

"Well, if it ain't my old dad", he said as he looked in the mirror. "I never knowed he had his pitcher tooke."

He took the mirror home and stole into the attic to hide it. But his actions didn't escape his suspicious wife. That night while he slept she slipped up to the attic and found the mirror.

"Hum-um," she said, looking into it, "so, that's the old hag he's been chasin."

Mr. Justwed: "This soup seems very thin. What did you use for stock?"

His Bride: "Why, you see, this recipe advises us to use the water food has been boiled in, so I used the broth from the boiled eggs."

This is an article from an English newspaper sent in by a reader.

The morning sun filtered in through the iron bars across the window of a small cell-like apartment, and fell across the haggard features of a man, sleeping on a low pallet bed. A sound of voices was heard outside the door "Is he awake yet"? said a stern voice. "No", was the reply, "Let him sleep a while longer, poor devil, it's his last chance." "I cannot" said the other ruthlessly, "duty is duty". Entering the room he vigorously shook the sleeper's shoulder. "Come," he said, "there" is only an hour left. Better brace up a bit lad." After eating breakfast the victim left the room with his guard. A few minutes later he entered a low stone building. With shoulders squared he walked fearlessly down between the rows of morbid spectators to meet his doom like a man. The marriage ceremony followed immediately after.

Local and Personal

Born—To Mr. and Mrs. J. O. Walker, on April 16th, a son.

Born—To Mr. and Mrs. Homer Schlegal, on Friday, April 18th, a son.

Miss Dorothy Baptiste is spending the Easter holidays in Edmonton.

It has been arranged that Miss Katie McAllister will be at the Ingram school for practice teaching, the week following Easter.

Miss Mabel Thompson returned home after spending some time at the home of her sister, Mrs. Carl Plake.

Miss Anna Watt of the University of Alberta visited the Secord home over the week end.

Mr. and Mrs. Stevens and Miss Armstrong visited Mr. and Mrs. R. Shiltin over the week end.

Misses Lillie and Bertha Lee of Edmonton, Miss McKinnely, Mickey O'Brien and Cafford Lee of Ryley were visitors at the Lee home over the week end.

Malion Kallal and Jim Mountsfield of Edmonton, visited the Kallal home over the week end.

Miss Eva Clutterham visited her home for the Easter holidays. She had her friend Miss Ada Torrence with her.

Mr. and Mrs. W. Somers, of Wetaskiwin visited the McLaughlin home on Friday.

Miss Edna Campbell who is attending high school in Edmonton is home for the Easter holidays.

Miss Ormsby, of Edmonton is visiting Mrs. Hammond for a few days. Miss Ormsby was a former school teacher here.

Miss Neva Woods and Robert Hapgood visited Robert's sister at Duffield during the Easter holidays.

Annie Swift and Arthur Biernes, who are attending high school at Calgary are home for the Easter holidays.

Mrs. Fred McHeffey who has been in the Royal Alexandra Hospital for the past two weeks returned home on Sunday. She is feeling much better.

Bennie Hobson who was in the hospital with pneumonia, returned home on Sunday.

Mr. Jim Warner, of the C. N. R. staff attended the first game between the Grads and the Toronto Lakesides on Saturday night.

The local curling club is being painted.

Gordon Jobb who was recently transferred to Rumsey Alta. was home for the Easter holidays.

Mr. A. Beirnes and son Arthur, motored to the city on Saturday.

Miss Clara Abbott and a girl friend visited her home during the Easter holidays.

D. E. Ball and family were visitors at the T. W. Taylor home last week.

Jim McKenzie of the Camrose Normal School was home for the week end.

Mr. and Mrs. Thompson and daughter, Irene, motored to the city on Monday.

Mrs. O'Hara left Tofield last week to join her husband in Peace River, where Mr. O'Hara has succeeded in getting a position as a bookkeeper.

The Club Cafe has recently acquired a new lot of paint. Bill Craig and Robert Bowick were the painters.

Mr. and Mrs. Fred Meadows are visiting their home during the holidays.

The W. A. wish to thank all for the generous support given last Saturday and regret that due to transportation they were unable to secure the Narcissus.

Tofield Oldtimer Passes Away

On Monday night April 14 the death of Samuel Bethel occurred at his home a few miles north of town. He was a real old timer of this district having been here since 1905.

Samuel Bethel was born in the county of Managhan, Ireland 1864. He came to U. S. A. at an early age and married Rosa V. Stohr in Pawnee city, Nebraska. He then came to Wetaskiwin in 1901 where he lived four years as a contractor. In Sept. 1905 he moved to the Tofield district taking a homestead five miles north of town. Mr. Bethel enjoyed good health until four years ago when he underwent a serious operation on his side. The next year he suffered the amputation of his left leg. From that time on he spent much time in the hospital, but previous to his death he had been home for a year.

He leaves to mourn his loss his wife, two sons and four daughters, Melvin and Hubert, of Tofield. His daughters Mrs. L. J. Wood and Mrs. W. E. Seale of Tofield, Alma, of High River and Myrtle of Cadogan.

Those who contributed flowers were: Women's Auxiliary, Lakeview Community League, Tofield, Mr. and Mrs. Thos. Jones and family, Tofield; Mr. and Mrs. T. E. Seale, Tofield; Lorett Ross, Tofield; Hilda Nomeland, Tofield; Mr. and Mrs. J. J. Clarke, Edmonton; The Shamper family, Edmonton; Tor, Marge and Kyle, Calgary; local manager and staff of A. G. T., High River; friends at High River.

CARD OF THANKS

Mrs. S. Bethel and family wish to thank all their many friends for their kindness and thoughtfulness during their recent bereavement.

TOFIELD ORGANIZES BRANCH OF CANADIAN LEGION

On Thursday evening, April 17th, a meeting was held in the town hall for the purpose of organizing a branch of the Canadian Legion of the British Empire Service Legion.

Mr. Geo. Hudson, provincial organizer was present and outlined the aims and objects of the Legion, he also gave a very stirring address on matters pertaining to the Legion.

The branch starts with a membership of twenty-two and they hope to soon double this.

The Legion hopes to tend to all the work of the returned men, also to take charge of affairs during patriotic celebrations, armistice and memorial days.

Will Chapman or A. B. Clutterham will be glad to give you any information in regard to the Legion and anyone wishing to join may get application forms at the post office.

The following officers were elected: President, Will Chapman; vice president, A. P. Harold; Sec-Treas., A. B. Clutterham. The executive are John Morton, Bert Lovell, Harry Borden, A. J. H. McCauley, and A. E. F. Cary.

NEW BUILDING BEING BUILT IN TOFIELD

On Monday morning work commenced on the foundation of the new bakery which is being built by Mr. Ruby of Calgary.

The store has a twenty-five foot front and is sixty feet long, adjoining the back is the bake shop which will have all modern appliances.

The building will be made of brick and will be a two story building, and the second story will be used for living quarters.

The interior will be as up-to-date as it is possible to make it. There will be an ice cream parlor, confectioneries and everything in the baking line such as rolls, pastrys, pies, cakes, etc.

Mr. Ruby comes here highly recommended as a baker of bread and pastries. He expects to have his store open and ready for business in the latter part of May.

The store is situated between the Jobb block and the hotel.

Mr. and Mrs. J. Carver were visitors in Tofield on Sunday.

Tennis Club Elect Officers

On Wednesday evening, April 16th, the Tofield tennis club held its annual meeting in the town hall. There were 22 members present.

The meeting opened with president R. W. Pincott in the chair. Mr. Pincott addressed the meeting outlining the prospects for the season, and explained what had been done in 1929. There had been no meeting last year and the club faced a deficit of about $45.00 all of which was owing to himself. Mr. Pincott was kind enough to state that the debt was in no way being pressed for payment and that if the fees were all collected this year the club would be out of debt this summer.

The minutes of the last meeting, which was in 1928, were read and passed unanimously.

The election of officers then took place and the following were elected: President, A. E. F. Cary; 1st vice president, J. T. Bulloch; 2nd vice president, Dr. F. F. Law; secretary-treasurer, R. B. Hapgood. Membership committee, H. McHeffey, B. Clutterham, W. B. Worton. Entertainment and tournament committee J. W. Chapman, R. W. Pincott, Mrs. F. F. Law, Mrs. A. E. F. Cary and Mrs. J. T. Bulloch. Grounds committee Dr. Simpson, S. Worton, and R. W. Pincott.

A discussion took place of raising the fees but it was decided to make no change. The fees set for 1930 are children in public school, $1.00, High school students $2.00, single lady, $3.00, single gent, $4.00, married couple $5.00, teachers ticket or monthly ticket, $2.00, family ticket, $7.00.

A hearty vote of thanks was given to Mr. Pincott as retiring president, who assured the meeting that his interest in the club would in no way be lessened.

The meeting adjourned.

EASTER CANTATA WELL RECEIVED

On Tuesday evening the choir of the Tofield United Church presented the Cantata, "The Thorn Crowned King". There was not as large a crowd present as was expected, but this was undoubtly due to the heavy snow storm making the roads very bad.

The Cantata was splendidly put on and showed many weeks of hard practice and it is to be regretted that more did not turn out to hear it.

The choir was assisted by Mrs. Mitchell A.T.C.M. of Edmonton who sang two solos and with Mrs. Brink sang a duet.

Part one of the programme was "The Crucifixion", and part two "The Resurrection".

The solos were sung by Mrs. Brink and Mrs. Mitchell.

The cantata soloists were Mrs. Rowe, Miss Marion Cooper, Mr. Roland Murray and Mr. Cary.

The cantata duetists were Misses Kendall and McCauley, Mesdames Brink and Firth; Messrs Brink and Murray.

The orchestra was composed of organ, Mr. A. J. H. McCauley; 1st violin, Mrs. Cary, 2nd violin, Mr. M. Lawson; 3rd violin, Mr. F. Dunn.

Mr. James Mather of Edmonton was the choir instructor.

U. F. W. A. NOTES

On Thursday, April 17th, the U. F. W. A. held a bridge party and shower at the home of Mrs. John Morton in honor of the season's bride Mrs. Frank Sherlock. The bride was the recipient of many pretty and useful presents, also advice on how to smooth the pathway of wedded bliss. Delicious refreshments were then served by the hostess.

We wish Mr. and Mrs. Sherlock much happiness in their new home in the Lindbrook district.

The U. F. W. A. will meet at the home of Mrs. Johnson Ferguson on April 24th. The roll call will be answered by "Some Funny Experience I have had." The paper "what is my duty as a member of the U. F. W. A." given by Mrs. Ferguson.

Ketchamoot Items

Mr. Allison is spending the Easter holidays with relatives in Edmonton.

Miss Mabel Yonnie, of Edmonton, is spending her Easter holidays visiting friends and relatives in our district.

Miss Mabel Lawson came home from Camrose Thursday evening for the Easter holidays.

Mr. and Mrs. H. Smith and infant daughter, Maxine spent the week-end and over Easter Sunday at the home of Mrs. Smiths parents, Mr. and Mrs. Geo. Lawson.

Misses Viola Lee and Hazel Sears were very ill the past week, the effects of vaccination.

Mr. A. Campbell of Tofield spent Easter Sunday with his daughter Mrs. Herman Lawson and family.

Mr. and Mrs. Chester Coombes and family and mother, Mrs. E. McMullen motored to Bawlf Sunday and spent the day with their daughter and sister Mrs. Archie Bruce and family.

Miss Marjorie Lee is spending the Easter holidays at her parental home.

Mr. and Mrs. Harrison and family motored to Edmonton Sunday of last week and spent the day visiting friends and relatives.

Miss Katie McAllister is spending a few days of her Easter holidays with her sister Mrs. Earl Carlisle.

Mrs. Herman Lawson entertained at a children party on Friday afternoon on the occasion of her daughter's 10 birthday, also Margaret Mitchell's 13 birthday. The girls present were Misses Marie and Evelyn Lawson, Kathleen Ingram, Ethel Coombes, Margaret Mitchell, Helen Schultz, Maud Wildman, Bertha Mitchell, Eileen Sterritt and Awburg and Angea Tollefson.

Beautiful Easter services were held at the school house Easter forenoon. A large congregation was present. Artificial flowers and potted plants gave an Easter setting. Appropriate hymns were sung by the congregation and duet by Mrs. Herman Lawson and Mrs. John Brown, "The Old Rugged Cross". Baptismal services were held two adults receiving baptismal rites and four children those were Mr. and Mrs. Maurice McGinitie's two children, received the names of Elizabeth Gail, and John Maurice, Mr. and Mrs. Leslie McGinitie's little daughter, Doree Irene, and Mr. and Mrs. John Brown's little daughter, Laura Ella.

SYNOPSIS OF "THE LONE STAR RANGER"

Buck Duane, is hunted by the rangers. After a narrow escape from a posse a stage coach passes and he catches a glimpse of pretty Mary Aldridge. A few moments later the stage is held up and he rides to the rescue.

It is disclosed in Val Verdes that Mary's uncle is the head of a gang of rustlers, and is known as Holt.

Duane goes to his secret hide out harassed by the constant pursuit of the rangers, where he finds their leader, Capt. McNally, offers him a pardon from the state if he will go after the Holt gang.

Buck meets Mary again and falls in love. Laramie, an honest rancher, comes to town because his cattle have been rustled. He tangles with Lawson, and is shot through the hand.

Laramie departs and Buck enters the saloon. He sees one of the stage coach robbers and places him under arrest.

Buck overhears their plans to raid Laramie's ranch that night. He rides hastily there but is too late Laramie has been murdered. Buck grimly follows their trail to the Aldridge house.

He finds the guilty men at the party. He is forced to shoot to save his own life. Mary reproaches him bitterly as a killer. He is trapped and unable to ride away.

The judge and his friends enter looking for Buck. Recognizing the Bowery Kid as one of the stage robbers, Mary denounces him. The judge sends them all away—and confesses to Mary that he is Holt. Buck now comes and take Holt to capt. McNally. Meanwhile, Lawson and his men plan to rob the bank the next morning. A gun fight ensues, during which Lawson and Buck shoot it out. Lawson dies and Buck is wounded. Mary runs to his side and tells him of her love.

Tea is a minor expense why not drink the finest

"SALADA" TEA

'Fresh from the gardens'

Catering To Tourists

Approximately twenty millions of dollars will be expended by the Governments of the three Canadian prairie provinces in the construction and maintenance of good roads this year, not to mention several more millions which municipalities will devote to other roads not included in the system of through Provincial highways and main market roads. It is a lot of money. It represents the largest single item of expenditure for any one service. It [illegible] at least ten dollars for every man, woman and child in Western Canada.

A very considerable portion of this vast sum is being expended on the assumption that, quite apart from the [illegible] our own people by reason of these good roads, they will be the means of attracting an ever increasing volume of tourist traffic from [illegible] and the States to the south, and that these visitors will bring much business and profit to our people through the purchases and expenditures they will make in this country. In a word, the avowed object of a goodly portion of this expenditure is to encourage visitors to tour the West.

Good roads, admittedly, are essential if we are to develop a large tourist business. But in themselves they are not enough. These prospective tourists can find good roads, possibly better ones than we can offer, much nearer home. If a fine highway over which they can speed in comfort and safety is all they are seeking for, They will come to Western Canada [illegible] a new, a virgin land. They come expecting something different. What is Western Canada going to provide?

Are we going to allow our highways to be disfigured, as they have been south of the international boundary line, by unsightly billboards and advertising devices of various kinds, defacing the landscape, obscuring the [illegible] our country has to offer, ofttimes confused by drivers with the legitimate road directions signs and an eyesore to all? Governments and municipalities can to a large extent control the placing of such signs on the highway right of way, but individual property owners must co-operate by refusing permission for the erection of billboards and the plastering of signs on private property and buildings.

Our cities, towns and villages should seek to make their respective communities attractive to the visitor, and special attention should be [illegible] to the approaches to the main roads leading into and out of [illegible] settlement. The smaller the place, the more important it is that the surroundings be right, because they are noted to a greater extent by visitors than is the case in larger centres.

Community spirit and enterprise should find expression in having all [illegible]

Strikes In Canada Decrease

With One Exception Last Year Most Peaceful Since 1902

With one exception, 1929 was the most peaceful year in Canadian Labor since 1902, the number of workers affected by strikes and lockouts falling to 12,924, and the days lost to 153,936. Steady progress toward happier relations between employer and employee has been registered now since 1922, the number of workers affected being as follows: 1922, 41,-050; 1923, 22,[illegible]; 1924, 32,494; 1925, 25,796; 1926, 24,142; 1927, 22,[illegible]; 1928, 18,238; 1929, 12,924.

The figure for last year was only nine per cent. of the 1919 total, the year of the Winnipeg strike. Toronto figured in three of the minor strikes of the year. The painters' strike involved 600 workers, and lasted 24 days, the time loss being 7,[illegible] working days. The plumbers' strike involved 400 workers, lasted 19 days, the time loss being 7,500 days. The plasterers' strike involved 300 workers for 12 days, causing 6,000 days' time loss.

Dry, Burning Throat Made Life Miserable

Have You These Symptoms?

"For three years I was seriously bothered by a bronchial cough. At night I would awaken with a dry irritable feeling in my throat. I couldn't cough up anything but very soon my throat got into quite an inflamed condition. Once I got CATARRHOZONE INHALER I was all right. I took it to bed and if an attack awakened me the inhaler gave me relief. Catarrhozone has restored me and I strongly urge every one with a weak throat to use it regularly." (Signed) J. B. Bonner, Reading.

Catarrhozone will not disappoint you. Get the complete $1.00 outfit; it's guaranteed. Small size, 50c. At dealers everywhere.

Catarrhozone
A Ten-Minute Relief!

ST. VITUS DANCE SUFFERER MADE WELL

Nerves Strengthened Through the Use Of Dr. Williams' Pink Pills

Time after time cases are brought to the notice of the public where sufferers from nervous troubles have been relieved by Dr. Williams' Pink Pills, where victims of St. Vitus Dance have been made well through the use of these pills after other medicines have failed to be of benefit. The reason for this is that Dr. Williams' Pink Pills act directly upon the blood [illegible] new, rich red blood and in thus banishing all impurities from the blood strengthen the nerves and make St. Vitus Dance impossible.

Mrs. P. Donnelly, Montreal, Que., is one more grateful mother who wishes to add her testimony to those already published. She says:—"My little girl, aged eleven, was a great sufferer from St. Vitus Dance. Several doctors prescribed for her without benefit. She was in the hospital for two weeks—still no benefit. I then saw an advertisement recommending Dr. Williams' Pink Pills for St. Vitus Dance [illegible]

Loss Is Unnecessary

All Baby Chicks Can Be Raised If Properly Looked After

"There is no sense in the idea so many people have, that you have to figure on losing a big percentage of your baby chicks," says P. F. Clardy, former president of the American Baby Chick Producers' Association, and for thirty-five years a practical poultry raiser. "Start with good vigorous chicks from healthy stock, properly hatched in modern incubators. Give them the right kind of care and food, protect them from chilly winds and rains and from vermin and rodents, and there is no reason why you should not raise practically every baby chick.

"In all my years of experience, I have found that, aside from the very important factor of starting with a quality of chick in the first place, the most important thing in poultry raising is to give the birds the care they are entitled to. A baby chick is a tiny bit of life, but how it will grow when it gets a good start!

[illegible]

Not Properly Qualified

Toronto Professor Says Universities Not Equipped To Study International Relations

Canadian universities are not sufficiently qualified for an adequate study of international law and international relations, Prof. Norman MacKenzie, of the University of Toronto, [illegible] the House of Commons committee on industrial and international relations. He knew of no university in Canada, he said, which had a library equipped for the intensive pursuit of these studies.

The [illegible] was considering a [illegible] sponsored by Miss Agnes MacPhail (Prog. South-east Grey), calling for the establishment of chairs and scholarships of international relations in Canadian universities. There was a field in Canada for improvement in this respect.

Prof. MacKenzie thought parliament might well consider aiding either by grants or other means.

If the libraries were available Professor MacKenzie thought, the studies would be developed by the universities and the students themselves. [illegible] suggestion he advanced was that competent professors and students in Canadian [illegible] be given greater opportunities to observe the operations of international business.

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

Preserving Historic Building

Alberta May Restore Old Fur House Built In 1795

Old Fort Edmonton, built 135 years ago inside an 18-foot stockade, may see partial restoration, according to the statement of Premier Brownlee in the Alberta legislature. The last building to be [illegible] down was the old fur-house, which until 1915, stood on the ground below the legislature. The proposal seems at present concerned only with [illegible] up a log structure two storeys high, identical with this fur-house, which goes back to the time when John [illegible]

New Industry For Canada

Eighteen Varieties Of Soybean Can Be Cultivated In Dominion

Canadian farmers are finding a new opportunity in the cultivation of the Soybean. During 1929 soybean oil and other products to a value of nearly $2,000,000 were imported by Canadian industries. Experimental work conducted by the Dominion Department of Agriculture shows that eighteen varieties can be successfully cultivated in Canada. It grows under essentially the same conditions as corn, and generally speaking, can be grown anywhere corn grows, and with about the same results.

Fresh Supplies In Demand.— Wherever Dr. Thomas' Eclectric Oil has been introduced increased supplies have been ordered, showing that wherever it goes this excellent Oil [illegible] its power on the people. No matter in what latitude it may be [illegible] its potency is never impaired. It is put in most portable shape in [illegible] can be [illegible] of breakage.

Recreational Resources of Canada Compose a Loadstone Which Draws Millions Of Visitors

Canada's recreational resources are a national asset of the first order. They compose the lodestone which each year draws millions of visitors to the Dominion and they form a source of wealth which annually adds a large and rapidly growing item to the national income. There are, in fact, few records in the annals of Canadian development more interesting or more remarkable than that of the rise to importance of the Dominion's recreational features. Today the returns from these assets [illegible] pace with those from such major factors as mines and forests.

Some idea of the extraordinary growth of holiday traffic may be gained from the records of touring [illegible] entering Canada in recent [illegible]. In 1919 the number of cars [illegible] Canada for touring purposes was 226,000 and during the ten years up to 1929 this figure had increased to 4,300,000. Aside from the phenomenal increase of motor tourists, railway and steamship lines each year add large numbers to the thousands who holiday in Canada. Tapping an even wider field than the automobile, these organizations have spread the Dominion's fame as a holiday land [illegible] throughout the world.

The most casual traveller crossing the Dominion from east to west cannot but be struck by the sheer diversity of Canada's natural features. First there is the rugged Atlantic shore, then the great system of inland lakes, seas in depth and size; next a thousand miles of rolling prairie; followed by the great barrier of the Rockies, rivalling the Alps in grandeur, and finally the sea, bathing with its warm waters the far flung Pacific coast. All these contribute to the glorious panorama of a transcontinental trip across Canadian territory.

The charm of the Maritime Provinces is not easily depicted. These provinces, Nova Scotia, Prince Edward Island, and New Brunswick [illegible]

[illegible] visitors, the fertile western plains with their endless miles of rippling grain present a scene of beauty and satisfaction to countless visitors. Beautiful summer resorts nestle on the shores of prairie [illegible] for the enjoyment of the sportsman few fields offer finer attraction [illegible] the hunting, in season, of prairie [illegible] birds.

For scenic splendour the Rocky Mountains have been declared by many experienced Alpine climbers to be unsurpassed. Majestic ranges scarred by age and weather, rear their summits against sky of purest blue or bury their snow-capped peaks in fleecy clouds. Glaciers and waterfalls, emerald tinted lakes and wooded valleys combine to entrance the eye and the enchantment is increased by the alpine air fragrant with the scent of pine and fir. The mountains [illegible] noted for their big game: bighorn [illegible] grizzly bear, Rocky [illegible] goat, elk, deer, moose, caribou, black and brown bear, and mountain lion.

Canada's Pacific coast, with its fiords and inlets, is a revelation to the tourist. Its moderate climate makes it an all-the-year-round playground for thousands, while its hunting, [illegible] and other sporting attractions [illegible] unexcelled on this continent.

Taking into account the scope, the variety and the steadily widening renown of the Dominion's recreational attractions, there is ample ground for the view that these natural assets will, through their direct and indirect commercial effects, prove to be one of the major forces of Canadian development in the next generation.

Grain Elevator For Churchill

2,500,000 Bushel Grain Elevator To Be Completed By September 1931

Tenders for a 2,500,000 bushel grain elevator at Port Churchill, the terminus of the Hudson Bay Railway, have been asked by the Department of Railways and Canals.

It is planned by the department to have this elevator completed by September 12, 1931, in time for the handling of next year's crop. As from 600 to 800 feet of deep water dock will have been constructed by that time, it will be possible to load ocean ships at the elevator.

It is planned to resume the regular weekly, if not twice-weekly train service between The Pas and Churchill, for the use of Canadian National Railway officials and those at work at the Bay terminus. As there is yet no provision for people other than those actually employed at Churchill, outsiders will at least be discouraged from going there.

Deadly Carbon Monoxide

Risky To Run Car In Garage Even With Doors Open

In view of the deaths which are being so constantly reported through the deadly carbon monoxide gas, it is worth while to draw attention to the warning just given by Professor Norman Hall, of Manitoba University. The figures he gives as to the danger of this gas are startling, as he finds that a mixture of five parts of it to 10,000 of air is very dangerous, but that one of 15 to 20 is absolutely [illegible]. The percentage which [illegible] be formed in a small garage in a few minutes is greater than this. One particular point is urged [illegible] the professor, that it is not safe to run the engine in a garage for any length of time with the doors open, for if the wind should happen to be blowing into it this would be tantamount to closing the doors.

Strange Blue Grass Thrives In Winter

Will Grow Under Adverse Conditions Without Cultivation

Experts from the United States Department of Agriculture predict that the strange winter blue grass discovered on an Oregon farm and believed by them to be the "lost grass" of Europe, may [illegible]tionize farming and dairying industries.

The story of the grass is a farm romance. Similar to grass which disappeared in Europe a century or more ago, it dies down in summer, when other grass is green, but thrives in winter, when food for livestock is low. It forms a perfect turf, even under the snow.

Because the experts found it will grow under adverse conditions, without cultivation, and will thrive in rainy regions, they view it as a solution of the problem of utilizing logged-off lands of the Pacific northwest.

Seeds for use in the Pacific north[illegible] will be sold exclusively in Seattle by the Children's Orthopedic hospital. The agency was a gift of Mrs. E. B. Henley, on whose farm the seed was found, and will be a source of permanent income for the hospital.

Yellow Journals In Shanghai

People Have To Be Circumspect To Avoid Publicity

The Chinese business or professional man who strays from the straight and narrow path usually reads all about his sins in the papers.

A survey made recently by military authorities indicates that there are more scandal sheets in Shanghai than any other city in the eastern hemisphere and probably in the world. One hundred and ten yellow tri-weekly newspapers are published in the Asiatic metropolis and are all devoted to printing news not fit to print.

To keep these pages supplied with information concerning the doings of Chinese who are in the spotlight, a large army of Chinese scandal mongers is constantly kept on the job. They appear at the [illegible]

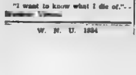
Has Sunless Winter

SUGARING TIME

You can't fool these two youngsters about this spring business. When there is a sound of preparations in the maple bush, the fragrant scent of burning hard wood and glint of sap pails, it's a sure sign that spring is here. Here we see "Jack" and "Jill" who didn't need to go up the hill, and furthermore, it isn't water.



"Why do you insist on a post-mortem examination after you are dead?"

"I want to know what I die of."

How To Order Patterns

The Present Market Condition Clearly Reflects Success Of Pool Says Professor Fay, of Toronto

Control Wolf Menace

Bounty Offered For Destruction Of Wolves In the North West Territories

The Department of the Interior, through its North West Territories and Yukon Branch, wages a continuous fight to control the ravages of wolves among the wild life of Northern Canada. Realizing the tremendous toll taken annually by wolves principally among the caribou, and the serious destruction caused along trap lines by the mutilation of the pelts of fur bearers caught in the traps, the Department has for a number of years been experimenting with various methods of control. The most effective scheme to date has [illegible] the increased [illegible] of $20 per wolf pelt put into effect in 1926.

Under the regulations the hunter or trapper [illegible] the wolf pelt and receives the bounty, the pelt becoming the property of the Department. In this the wolf is being made to pay for his own destruction as the money realized from the sale of the pelts at the fur auctions has greatly reduced the cost of the increased bounty system. Owing to the high prices which prevail in the fur trade for choice wolf pelts, not all of the pelts are turned in for the bounty, but the record of those on which bounty has been paid and which have been forwarded to Ottawa during the fiscal year ended April 1, 1930, shows that [illegible] wolves were killed in the last twelve months as compared with 1,-040 in the same period last year.

Japan Takes More Wheat

Half Of 1929 Import Was Purchased From Canada

Not only did Canadian-Japanese trade reach a new record in 1929, but Canada supplied Japan with one-half the wheat imported by that country.

[illegible]

The Time To Advertise

Greatest Need Is When Things Are Looking Bad

The Canadian people have confidence in the Wheat Pool and the present condition of the market clearly reflects the success of the Pool, says Professor C. R. Fay, of the economics department of Toronto University. Professor Fay has just completed a survey of the western grain situation and will shortly proceed to England to examine the status of the Canadian Wheat Pool [illegible].

"After my investigation I am a strong supporter of the Pool as it has functioned hitherto as a voluntary organization," he said. "There has been an attempt made in Saskatchewan to make it compulsory for farmers to sell their wheat through the Pool. I am strenuously opposed to that."

The fact that export trade was improving was another indication of improvement in the wheat situation said Prof. Fay. Considerable attention was fixed on the American winter wheat crop. However absence of rain there and only moderate improvements of exports have caused farmers to cease to worry on that score.

Talking over the general situation last year with both representatives of the wheat "trade" and the Pool, Professor Fay was convinced that North America had been most "bullish" in its wheat trading.

"Most emphatically the Pool was not holding out when the trade was selling," he said. "The Pool was offering wheat continuously all summer and fall at below Winnipeg prices in an effort to dispose of the wheat crop.

"But in order to compete with the unusual Argentine crop, it would have been necessary to sacrifice grain as low as 20 cents below the Winnipeg prices, which was unreasonable," he continued.

"The difficulty in 1929 was to move the limited quantity of high quality [illegible]

SUNDAY SCHOOL LESSON

APRIL 17

EASTER LESSON

Golden Text "He is not here; for He is risen." Matthew 28:6.

Lesson John 20:1-16

Devotional Reading Ephesians 1:15-23

Explanations and Comments

Mary Magdalene's Discovery Of the Empty Tomb. John 20:1. verse 1-2 The entrance to the tomb in which the body of the crucified Saviour had been laid (March 18:66 and the stone had been sealed in a groove at the base of the opening of the tomb Early on Sunday morning Mary Magdalene came to the tomb with the others as we see in the next verse indicates She found the stone removed All story she hastened to tell Peter and John John always refers to himself as "the disciple whom Jesus loved"). "They have taken away the Lord out of the tomb and we know not where they have laid Him" she cried

John's and Peter's Discovery Of the Risen Lord. verses 3-10 Peter and John ran first and, looking in reverently, saw wonderingly where the Saviour's body had rested, but beheld only the linen clothes in which it had been wrapped Then impetuous Peter rushed into the tomb and saw a wonderful thing the linen clothes which had served to shroud Christ's body were still there and the napkin, which had been about His head, was in another place Leisurely and orderly had been Christ's rising, and had others carried off His body, the grave clothes would not be left as they were Then John also entered the tomb, and the sight suffered him to believe that Christ was risen "What was it that John believed?" asks Jesus had risen? Surely this, but further than this he did not yet know that Christ's rising was a victory over death, an eternal conviction which then possessed the origin of his Gospel the source of a life of loving devotion for the Saviour. — W. E. Erdman

Mary Magdalene's Discovery Of the Risen Lord. verses 11-16 Mary, who had followed Peter and John back to the tomb, remained outside weeping bitterly Overcome with grief she saw two angels clothed in white and sitting where the body of Jesus had lain The Greek word for "angel" means "one who is sent with a message," and their message for Mary was, "Woman, why weepest thou" There was no cause for weeping but great cause for rejoicing The Lord had risen

Jesus Appears To Thankful him first to Christian hearts and had risen Mary's heart brought the Lord first to satisfy it," for he she "turned and beheld Jesus standing, But she did not recognize Him. The expression (Matthew 28:17, Mark 16:12; Luke 24: 16, 37 and John 20:14), speak of His form as altered. Mary's eyes, moreover, were filled with tears "Woman, why weepest thou, whom seekest thou"? Jesus questions

Supposing Jesus to be the gardener or garden-keeper, He the only one who would naturally be there at that hour Mary said to him, "Sir if thou hast borne Him hence, tell me where thou hast laid Him, and I will take Him away." Rose without a doubt that she had not mistaken Jesus name (verse 16)

Mary Calls and Jesus Answers. "Rabboni," Teacher, replied "It is an intimate word, but all the quick emotions of a life-time were enfolded That word It is Each the cross was forgotten, the tomb forgotten the mystery and fear Mary need could live again was unthought of "Master" Doing called to deep, and the testimony of the inner spirit dashed all into all contradiction. "I know that my Redeemer liveth."

Along the Frontiers in Manitoba

Manitoba May Develop Salt Water Fishing Industry

Manitoba, with Churchill as its seaport, has assumed the status of a Maritime province, and development of an extensive salt water fishing industry is one of the possibilities in the near future Hon. D. A. McKenzie, Minister of Mines and Natural resources, prophesied such an industry during an address in Winnipeg He had been informed by those qualified to speak that there was every reason to suppose that herring could be hatched on a large scale, with Churchill as the base for the fishing fleets.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it and you will never suffer from excess acid when you prove out this easy rule. Phillips Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy rule. Phillips Milk of Magnesia. Get it today—now.

Be sure to get the genuine Phillips' Milk of Magnesia, prescribed by physicians for 50 years in correcting excess acidity. Each bottle contains full dose. 15 cents—any druggists.

WHY SUFFER FROM YOUR LIVER?

Why be handicapped with sluggish liver when all the fact, ever well yellow tongue and that tired and languid feeling? That indicates a torpid liver

Herbaline, Dandelion and Belladonna quickly follows You must remember your liver, start the ink flowing with Carter's Little Liver Pills.

They also act as a mild laxative, purely vegetable, free from calomel and poisonous drugs, small, easy to swallow, and safe and certain. Ask for them if you are dissatisfied with any other liver pill. Insist on Carter's Little Liver Pills and get the original. Refuse substitutes. Small pill. Small dose. Small price.

Southwestern Are Anxious To Visit Canada

Opening Of Hudson's Bay Route from Bisa, Kansas, Interesting

Thousands of American tourists from the southern states will visit Canada this year as a result of the advertising given the Dominion by the Hudson's Bay Railway, stated E. A. McCallum, of Regina, who returned to the city after a three months' vacation spent in Mississippi and Alabama.

"Everywhere I found the greatest interest in Canada," he said. "I established that the seldom sulphate deposits in the Province of Saskatchewan contain over 100,000,000 tons of mineral hydrous salt. These deposits have been looked on as of great potential value not only to meet commercial requirements in Canada but because of the possibility of developing important export markets. One of the important uses in Canada is in the pulp and paper industry where the sulphate is used in preparing sodium sulphide or "salt cake" are used in the production of sulphuric or kraft pulp.

Seldom Sulphate Deposits

Over One Hundred Million Tons Of Mineral Hydrous Salts Found

Saskatchewan

As a result of investigation made by the Canadian Government Department of Mines, it has been established that the seldom sulphate deposits in the Province of Saskatchewan contain over 100,000,000 tons of mineral hydrous salt. These deposits have been looked on as of great potential value not only to meet commercial requirements in Canada but because of the possibility of developing important export markets. One of the important uses in Canada is in the pulp and paper industry where the sulphate is used in preparing sodium sulphide or "salt cake" are used in the production of sulphuric or kraft pulp.

Everybody Satisfied

Finally Used Dairy Reading Paper Never Before In Canada

The latest invention in a machine which is used from the printed page. This should prove a boon to the army of men who have to hurry to work in the morning They could get their morning paper, set the machine going while they shaved in the bathroom, time it to breakfast and let it run till they bid good-bye to their superior haircut at the front door, by which time they would have heard the chief news Then the paper could be left for the index of the household to read the shop advertisements, the social news, etc. The whole house would be satisfied—Montreal Gazette.

King Buys Stamp Collection

King George V. is now an ardent stamp collector, has purchased the famous Tapling collection of Australian stamps, which was awarded the gold medal at the 1926 international philatelic exhibition at Melbourne The price is believed to have been two thousand pounds The collection contains examples of all issues, many of which are unique.

Rubber Overshoes For Women

Lace Over Wings and Frosted Formation Of the

Overshoes for navy-blue a new method of keeping wings free of slushy ice were announced at Cornell University, Ithaca, N Y

They are a discovery to enter by an announcement as a result of "unusual taste" in the mid-west

The overshoes have over the fastened edge of the wing They are a thin layer of specially vulcanized rubber coating continually a colorless sol which is the secret of the process It is announced that the ice does not stick nor the oil "wrash off."

The [illegible] stone is insufficient and so the overshoes have a small bone under their stirring edge A slight pulsation of pump-driven air in the bone breaks the ice as it forms on the wing edge, and so prevents air from pressing the forming ice fast against the wing.

Children CRY for it

It may be the little stomach; it may be the bowels are sluggish. No matter what ails your child's tongue, do a safe and sensible precaution to give a few drops of Castoria. This gentle regulator of the little system soon sets things to rights. A pure vegetable preparation that can't harm a wee infant, but brings quick comfort —even when it is colic, diarrhoea, or similar disturbance.

And don't forget Castoria as the child grows older. If you want to raise boys and girls with strong systems that will ward off constipation, stick to good old Castoria; and give nothing stronger when there's any irregularity except on the advice of a doctor. Castoria is sold in every druggist, and the genuine always bears Chas. H. Fletcher's signature on the wrapper.

Recipes For This Week

(By Betty Barclay)

VANILLA DESSERT WITH CHOCOLATE SAUCE

1 package vanilla junket.
1 pint milk.

Prepare junket according to the directions on package. Let stand until firm, then chill.

Chocolate Sauce Melt 1 square unsweetened chocolate in saucepan, placed in large saucepan of boiling water Add 1 tablespoon melted butter, and when thoroughly blended, pour on gradually, while stirring constantly, ½ cup boiling water then add 1 cup sugar. Bring to the boiling point and let boil fourteen minutes ; teaspoon vanilla.

BAKER ECONOMY

Into a well-buttered pan put slices of raw pealed potatoes and a little pepper Then a layer of uncooked sliced ham Add another layer of potatoes and ham and pour on this cream sauce (1 tablespoon flour, 1 tablespoon butter, to 1 cup milk.) Sprinkle bread crumbs on top and bake in a moderate oven until brown and potatoes are well done. Serve hot. Just enough ham can be used to give the desired flavor, which has the advantage of making a little ham go a long way For picnics this can be baked at home in a heavy tin dish with a cover and reheated over hot water on a campfire.

Taxes for the relief of the poor have been levied in England since 1376.

Queen Victoria is the largest exporter of wheat among the countries of the world and the second largest exporter of flour, being exceeded only by the United States.

Elevator Operators Must Accept Grain

Storage Reservation Not Permitted Under Clause in New Act

Elevator operators are compelled to take in grain tendered by farmers when they have accommodation for it, under a clause in the new Grain Act, approved by the committee on agriculture and colonization. They are not to be permitted to reserve storage space for customers in advance, but must take in grain as it is offered as long as they have room.

Discussion of this provision raised the question of the discretion of the operator to refuse to receive damp or smutty grain. Some members of the committee thought they should not be required to accept grain unsuitable for storage, thereby tying up storage facilities and preventing the movement of good grain. This question was left to stand over until a section covering it could be prepared and submitted to the committee.

Lumberman Is Dead

Known as London's hardest-working woman. Mrs. Alice Tabrahenna, a widow, has just announced that she will retire, after 25 years of public life. In the morning she works as gymnasium in the office of the local Labor Party; in the evening she presides over the Edmonton Edmonton Committee or attends the Urban District Council, of which she is a member In addition she does all her own housework and cares for the children She says she needs a rest.

Where Canada Leads

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extremes of heat or cold, is permeable to ultra violet rays, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet rays, which do not penetrate ordinary glass.

THE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livest ock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

IMMIGRATION TO CANADA SHOWS BIG INCREASE

London, Eng.—Immigration to Canada has increased more than 25 per cent. during the past four years, although emigration to dominions generally has shown a considerable falling off since 1924, it was claimed in the House of Commons.

Hon. W. H. Smith, parliamentary secretary of the Board of Trade, in reply to questions said emigration to Canada had increased year by year, namely from 69,832 to 1926, to 86,580 in 1925, while Board of Trade figures showed the aggregate emigration to Canada, Australia, New Zealand and Australia had decreased from about 119,000 in 1926 to about 86 000 in 1925.

The colonial office also was questioned with regard to Dominion emigration. Dr. Drummond Shiels, parliamentary under-secretary, stating he would circulate detailed figures later. He gave the same figures as Mr. Smith for Dominion emigration generally, and explained that the figures also showed an annual increase.

Twelve Rescued From Sea

Voluntary Missionary and Family Among Those Saved

Panama City.—Stranded for seven days in a boat without food, the twelve been been east of Colon, J W Miller, of Jacksonville, Fla., and his wife and family, were rescued by an American were rescued by the Cuban gunboat "Patria" after they had been given starvation and exposure was imminent.

Miller and his family, the youngest of whom was seven months old, started out from Puerto Del Rey, Panama, for Colon, in a small motor boat Six days later they ran out of gasoline and the boat began to drift with the current.

Food, after that he watched for craft which might help him to get to Colon. There was no sail on the boat, but with a small flag he had with him, but was unable to make himself seen. The "Patria" sighted him at about three miles off Colon and brought the party on board.

The Millers are a family of "voluntary missionaries." They left Jacksonville in 1924 for a cruise through the West Indies, and in the course of their trip they founded the mission "Church of God" on the Isle of Pines, Cuba.

Keeping Up Record

World's Champion Egg-Laying Hen Still Leads In Production

Saskatoon. — Lady Victoria, world's champion egg-laying hen, is doing very well in her second year. When this Rhode Island Red pullet, who lives at the University of Saskatchewan, completed her first year of egg production, during the spring and it is now feared—unless the government steps in—the country must face a long and bitter winter without eggs and women who will not accept eggs at reduced prices. Because of the reduction and the employers who acting on the report of Lord McMillan, down such reductions would lead to the continued existence of the industry.

Today the General Trades Union congress appealed to its affiliated trade unions for financial assistance for the Yorkshire workers. The general council itself handed the list with a contribution of five hundred pounds, or about $2,435.

Plane Return Next Year

Says Don Fared Many Difficulties In Trial Over Speed Record

New York.—Kaye Don's first attempt to smash the world automobile speed mark on the sands of Daytona Beach is over but the dapper little Englishman will be back again, his motto will be back again, his motto will be back again, his motto

Exercise Needed To Keep Healthy

Information Necessary As In All Things However

There is a saying which everybody [illegible] as well as the [illegible] and no play [illegible] a dull boy. [illegible] quotations have [illegible] but like [illegible] they are [illegible] better rule in life [illegible]

[illegible] applies particularly to the amount of exercise we should inject into our daily programme. It [illegible] matter [illegible] exercise [illegible] constitution and [illegible] apt to lead [illegible]

[illegible] try to achieve [illegible] health habits which are [illegible] good health [illegible]

Now and then you may be induced by some energetic person to indulge [illegible] exercise which is altogether too strenuous for you. It is well to have a physician look you over before entering into anything which might by some chance result in physical impairment.

The importance of [illegible] of exercise for everyone [illegible] however [illegible] emphasized. The muscles of the body are made up of many strands and these strands are made up of very tiny fibres. [illegible] are again divided up into separate parts or segments and every one of these segments has its own blood and nerve supply. [illegible] is a very fine and intricate system, but we are absolutely dependent upon our muscles. Each muscle cord is attached to the bones, and if they weren't there the whole framework would collapse and we wouldn't be able to stand up. And the muscles are so constructed that they must be exercised often because the more work they do the stronger they become. As an example of how this acts, if a man were to tie his arm to his side and not use it for some length of time he would find when he released it that he could not use it whether he wanted to or not. In other words, he would not have given his muscle system enough work, and as a result of this inactivity the muscles forgot how to function. The best exercise one can get as a rule, is something one likes to do. Fortunate indeed is the man or woman who can play golf or tennis or swim or play almost any kind of game and get real pleasure out of it. But if we are not in a position to take part in this sort of recreation we are by no means dependent upon them. There are number of things one can do that are of a very simple nature and yet very enjoyable if we enter into them in the right spirit. One of these things is walking.

A great doctor once wrote that the best way to acquire a good complexion is to bury a pot of paint ten miles from your house and then walk out there every day to see if anybody had moved it.

Walking is undoubtedly one of the best forms of exercise [illegible] reach of any of us. It is an excellent plan to set ourselves to walk a certain distance every day and then to go about it in a business [illegible]. In order to get the [illegible] benefit from it we must carry ourselves properly. Few people know how to walk. They stroll. And there is a vast difference between the two forms of ambulation.

Here is the way to go at it. Wear comfortable loose clothing and select a destination two miles away. Allow yourself half an hour to [illegible] stretch and measure your [illegible] that you will arrive there [illegible]. Keep the shoulders back [illegible] up, chin tilted and swing the arms [illegible] as they teach you in the army. [illegible] a regular pastime in a [illegible] it is a nice day and it will [illegible] way toward putting [illegible] the cheeks of the walker.

"You strikers ought to work. A great man said work is the greatest joy of life."

"Yes, but I don't live just for my own pleasure."—Karikaturen, Oslo.

Cable Depression If Stored

Needed On Account Of Breakage Has Created Shortage

A world shortage on suitable deep sea cable is apparent following the serious demands [illegible] by miles of cable destroyed by submarine earthquake of November 18, according to C Berner, cable engineer in charge of the repair expedition aboard the Dominia, world's largest cable laying ship which recently returned to Halifax. The Dominia arrived from London after being more than two months at sea, and took aboard [illegible] and supplies before resuming her work.

So heavy the demand for suitable cable that the supply tanks at Gibraltar have been drained and the cable previously stored there is being brought to Halifax by the Norwegian freighter Tangen.

Operating in conjunction with the Lord Kelvin, the Dominia, under charter to the Western Union, repaired in 1910 New York-Bay Roberts cable damaged over a distance of about 170 miles.

Large stores of cable are not kept on hand because they depreciate faster than when in use, Mr Berner explained. Mr Berner was in charge of the laying of the high speed cable from Bay Roberts to the Azores in 1926, which is the fastest deep sea cable in existence capable of transmitting several thousand letters per minute. Specially designed, it was calculated that the cable must be 1,341.17 miles in length. The cable was [illegible] for even to the last inch, which is stated to be one of the most remarkable achievements in cable laying on record.

Absolutely no signs of foreign substance in the ocean's bottom nor any changes in soundings were reported by Mr Berner.

Equipment Is Adequate

Nature Gives Every Creature Means To Protect Itself

It is curious to note the different ways in which Nature equips her creatures in order that they may be able, to a certain extent, to avoid death. Any animal, even if it has never set eyes upon water before one, upon being thrown into the water instinctively swims. Even a cat, hating water as it does, at once strikes out and reaches the shore in safety no matter if it is but a few days old.

In the same way Nature has equipped some of the creatures that exist in water with protection against various things.

A strange case is that of a minute insect that exists in ponds—the arcella—which was recently a subject of investigation by Dr Bles of Cambridge University. It was discovered that this tiny insect is equipped with a means of saving its own life if by any chance it strays into too deep water for its comfort.

Immediately the arcella reaches water that has not enough oxygen to keep the insect alive a strange change takes place. A tiny hole in the creature fills with a kind of gas and at once the little insect is carried up to the surface, almost as if it were in a balloon. And so, in this way, this small creature, that would otherwise enjoy but a short span of life, goes about in comparative safety.

Attractive To Collectors

Pocket Dark Lantern Candlestick Was Very Compact

Flashlights, so necessary to the modern state of affairs, were probably the outcome of the early pocket dark-lantern candlesticks. Contrivances of many kinds were devised in bygone days for use as candle holders, but perhaps one of the most outstanding was the pocket dark-lantern candlestick. This candlestick was so designed that it was not too heavy to be carried by a lady, and although complicated in its arrangement when assembled was really compact.

The body of the lamp was of tin, cylinder shaped, five inches long and two in diameter, japanned black and trimmed with gold or yellow striping. A slightly rounded cover formed a hinge on top, on the inside of which appeared a double swinging hook. Two folding wire handles were placed at the back, and on the inside a piece of real tin with highly polished surface served to deflect the candle light.

An opening three inches long and covered by a remarkable slide of tin working on a hinge at the top allowed the light to shine forth or not at will.

Inside, holes were punched in diamond-shaped groups, for ventilation.

An automobile manufacturing plant has been started in Bombay, India.

The smaller the fish the more it strains the veracity of the angler.

Our Oriental Problem

What Can Be Done With Canadian Born Japs and Chinese

Our Oriental problem is primarily no longer one of exclusion on the frontier. It is becoming increasingly a problem of our own people, of Chinese and Japanese born in Canada, educated in Canadian public and high schools, and in everything but descent, more Canadian than Oriental. What are we going to do with these young people? There were practically five thousand of them in the schools of British Columbia last year. There are probably as many this year, or more. In Richmond, 600 out of 1,200 pupils are Japanese, and in two or three of the Vancouver schools there is quite a sprinkling of Japanese and Chinese bright youngsters eager, industrious, energetic.

It is suggested, from time to time by anti-Oriental organizations that the Orientals of British Columbia be bought out and sent back to the country from which they came. This plan, of course, is impracticable. But even if it were practicable it would not solve the problem of the second and third generation Chinese and Japanese. These didn't come from anywhere abroad; they were born here. In our schools we have imposed Canadian ideals upon them. All their associations and interests are here. In many cases they have no more relations with Japan or China than a second or third generation Canadian has with [illegible] at least they have adopted the Canadian standard of living. We have put these young people into our melting pot. We have done what we could to make them Canadians. Yet we refuse to accept them as Canadians. What are we going to do about them? One of these days they will be growing up and will want to know.

Placing the Blame

Modern Drug Store Evolved From Postage Stamp, Says Doctor

The drug store of the old days was a place where you could buy drugs and little else. Today it is a place where you can buy anything from fishing tackle to phonograph records. How did it happen?

Dr Logan Clendenning, writing in the American Druggist, believes that the humble postage stamp is to blame.

The public had a way of wanting postage stamps at very odd hours; and it began to discover that the drug store was apt to be the only place open. The druggist was forced to carry stamps. This got both druggist and customer used to looking on the drug store as a convenient place for emergency purchases, and the druggist gradually began to stock up with other things that people might want.

Out of it grew the drug store of today, an institution whose usefulness is measured by the fact that it sells fewer drugs than useful things that people need more.—Vancouver Sun.

Average Value Of Farm Lands

The average value of farm land, as a whole in Canada, improved and unimproved, and including buildings, is stated for the year 1929 to have been $37 an acre, in a report issued by the Canadian Bureau of Statistics.

To Save Eyesight

Ten Classes For Children Already Established In Canada

Preventive work in matter of saving eyesight of Canada's people has recently taken another step forward. New Brunswick is now carrying on a survey of the eyesight conditions of the school children of that province preparatory to organizing, if need appears, sight saving classes in certain schools. Miss Mary McLelland, M.A. (Oxon.), who has recently returned from a lecture tour in the Maritime provinces in connection with the preventive work of the Canadian National Institute for the Blind, outlined the enthusiasm by which the work is being received by medical and educational authorities.

New Brunswick has the distinction of having monthly health examination of all school children, not only in the cities but throughout the province, Miss McLelland pointed out.

It is estimated that one in every 500 school children in Canada have defective sight, usually less than one-third normal. Already there are ten sight-saving classes in Canada, four of which are in Toronto, one in Vancouver, two in Winnipeg, one in London, one in Hamilton, and one in Halifax. The success of the Toronto classes has demonstrated that children who would otherwise lose confidence by inability to keep up with other pupils regain their morale, while their sight is not further impaired by unsuitable study.

Due To Advertising

Orange Growers' Consistent Campaign Has Proved Worth While

It is not particularly gratifying to Canadians to be told so often, on good authority, that more oranges are eaten in Canada than apples. When an explanation is asked for this state of affairs, it is said that it is largely due to the persistent campaign that has been carried on by the orange growers of California. The astounding statement is made in the annual report of E. G. Dezell, the general manager of the California Fruit Growers' Exchange, that by spending $1,[illegible],000 in the advertising and merchandising of Sunkist products last season, the exchange obtained $[illegible],875,182 for a crop of oranges, lemons and grapefruit, so large that it would have brought disaster to the growers a few years ago. The demand was created by advertising, and then good salesmanship did the rest.—Brantford Expositor.

Would Label Butter

Regulations requiring packages containing butter to be marked with the name of the country in which the butter was made are being considered by the Dominion Government, Hon. Charles Stewart, acting minister of agriculture, so informed the House of Commons in reply to a question from H. B. Adshead (Labor, Calgary East.)

British Drink Most Tea

The British breakfast table accounts for the great bulk of the world's tea consumption, last year's importation figures show that, aside from tea-drinking in the countries of production, Great Britain alone consumed 62 per cent. of the world's supplies, and the British Empire as a whole 70 per cent.

Where the Horse Is Missed

Millions Have Disappeared From U.S. City Streets In Decade

The recent (United States) government figures showing a [illegible] gone from farms of [illegible] horses and mules during the past year illustrates a [illegible] which undoubtedly has had an important bearing on the surplus [illegible] and low price of the [illegible]. Back in 1919 the work [illegible] amounted to 26,[illegible] horses and mules. The January, 1930, estimates places the [illegible] at only 18,782,000. This disappearance of 7,874,000 [illegible] of work [illegible] farms has been accompanied by a [illegible] decrease of approximately one and a half billion dollars.

There are no accurate figures concerning the disappearance of horses and mules from cities and towns during this period, but that the reduction has been far more [illegible] and rapid than in rural districts should be apparent to anyone who recalls conditions a decade ago. Some estimators have placed this loss of work stock from city streets during the past ten years at two and a half million head, thus pushing up the grand total disappearance of horses and mules during the past decade to the ten-million head mark. Ten million head of work stock would consume between fifteen and twenty million tons of hay and approximately three-quarters of a billion bushels grain. Agriculture has therefore lost—and the oil industry has captured—a market demand which, were it now available, would undoubtedly send farm prices soaring.—The Country Gentleman.

From a Different Angle

Fruit When Reckoned By Weight Is Not So Expensive

Very often the housewife will get a better idea of the actual cost of a certain food, by figuring it in some other form. For instance, oranges at sixty cents a dozen may seem very high, but if you weigh a dozen and find they are costing about fifteen cents a pound, they appear very low-priced indeed, particularly when you consider that you are paying several times this much per pound for such foods as butter, steak and cheese.

As most of us eat too much of the acid-producing foods like meat, fish, bread and eggs, and not enough of the alkaline foods like oranges, apples, cabbage, carrots, celery and spinach, it is well to know this little trick of figuring price. The money saved by getting four pounds of steak instead of six will go a long way toward taking care of fruit cups, salads and light desserts for a day, and a little careful figuring will enable any woman to set a more evenly-balanced table than she does, at even less than she is spending for food today.

Phone System For Ships

A telephone system, which in addition to the usual inter-communication system found on ships for use of the personnel, connects all first class cabins, is one of the features of the installation on the three new steamships, "The Prince Henry," "Prince David," and "Prince Robert," which are being placed in service on the Pacific coast by the Canadian National Steamships.

To most of us Easy Street seems to be marked "No Thoroughfare."

New Art Of Diamond Cutting

Work Has Been Speeded Up By Ingenious Mechanism

For centuries the art of the diamond cutter was considered a special talent which must be developed by years of training. Today, diamonds are cut with the aid of ingenious mechanism which has greatly speeded up the work while producing the most brilliant gems in history. The machinery which is revolutionizing the ancient art is for the most part the creation of American ingenuity.

It no longer requires a diamond to cut a diamond. Formerly there was no way of dividing a diamond except by splitting it along the line of cleavage. Diamonds are now sawed into pieces at any desired angle. The hardest of stones are sawed by means of a very thin disk of phosphor-bronze, revolving at a very high speed. It takes a day to cut through a single carat. One worker directs a dozen such saws. It is very delicate work, for a stone may be shattered and ruined if the saw strikes a flaw in the gem. The danger is anticipated by listening intently to the humming note of the saw, which sounds a signal of danger when a flaw is approached.

Diamonds are now reduced in size by turning them in a lathe like a piece of wood. The tool used in turning is tipped with a diamond. In this way skillful workmen can reduce the size of stones quickly and accurately, saving the slow and laborious work of splitting and polishing followed in the past. Incidentally, the by-product or "waste" in the form of diamond chips and dust is very carefully collected.

One of the most important labor-saving devices used in diamond-cutting is the mechanism which determines the angles of the facets of the gem. The diamond cutters of the past cut the facets by slowly rubbing two diamonds together. Later the work was done by holding the stone against a rapidly revolving disk. The angle of the facet was determined by the judgment of the diamond cutter who became expert from long experience. The new tool is equipped with a dial which makes it possible to cut the facet with scientific accuracy. The diamonds cut by the new methods reveal all the latent beauties of the stone and are, doubtless, the most beautiful ever cut in the long history of the art.

From the Inside

People In Broadcasting Stations See Strange Things

Karl K. Kitchen, writing in New York Sun, says: "A friend of mine was being shown through one of the larger broadcasting studios. As he watched an orchestra preparing for its program he stood with his back to one of the announcer's desks, and at the same time overheard him telling his audience:

'... when the gong strikes it will be exactly 8 o'clock Eastern Standard time ... this correct time comes to you through the courtesy of the Black Clock Company.'

My friend turned to see the announcer as he struck the gong and he almost swallowed his tongue when he saw that the timepiece from which that personage was waiting to gauge the gong strike was one of the well-known dollar variety."

A Typographical Error

In an announcement of the revival at the Church of the Brethren, made in the Kansas Herald, the linotype spoiled a perfectly good compliment by misplacing one letter. The sentence should have read: "He believes in a happy religion and lives it." But the linotype made it, "He believes sin a happy religion and lives it." Can an apology ever fix it?

Housewives of New Zealand are using American vacuum cleaners.

A single palm tree has produced as many as 4,000 dates.

"You don't recognize me? What about the debt you owe me?"

"Er—I don't 'recognize' the debt either."—Buen Humor, Madrid.

VISIT CANADIAN UNIVERSITIES

A greater mutual understanding of educational facilities in Great Britain and Canada will result from the visit to this country of 16 headmasters of English Public Schools. They crossed the Atlantic on the Canadian Pacific Liner "Duchess of Bedford," and will visit the leading Canadian Universities. The picture shows them on board the ship on arrival. They are from left to right, sitting: W. H. Fyfe, M.A., Christ's Hospital, F. B. Malim, M.A., Wellington, Dr C. Norwood, Harrow; F. Fletcher, M.A., Charterhouse; J. Talbot, T.D., M.A., Haileybury. Standing: Kenneth Lindsay, M.A., Oxon. and H. H. Hemming, M.C., McGill, hon. secretaries of the party, A. B. Sackett, M.A., Kingswood, J. Bell, M.A., St Paul's; S. R. Gurner, M.C., M.A., Whitgift Grammar School, G. C. Turner, M.C., M.A., Marlborough; Rev. V. P. Nevill, O.S.B., M.A., Ampleforth. G. W. Olive, M.A., Dauntsey, M. L. Jacks, M.A., Mill Hill; G. Robertson, M.A., George Watson's College, Edinburgh, representing Scottish Schools; H. Grose Hodge, M.A., Bedford; W. M. Gordon, Wrekin College, Salop; D. L. Miller, Manchester Grammar School.

Red Rose Orange Pekoe Tea is truly economical. A half pound makes almost as many cups as a full pound of cheap tea costing 50c to 60c. 79

RED ROSE TEA "is good tea"

Has Status Of Maritimes

Hecla Map Of the National Topographic Series Is Issued

"When I want to sense the world as a living organism," said the president of a university, "I look at a map."

A map is not a mere display of colors and outlines. It represents things, and people, and possibilities.

It is not a ragged, bizarre splotch of wash blue that occupies a fourth of the centre of the 5,800 square miles of the provisional edition of the Hecla Map of the National Topographical Series, but the heaving waters of Manitoba's great Lake Winnipeg with shores alternating in woods, marshes and bold, rocky promontories, with wooded islands and here and there a fishing village or a lighthouse standing out to guide the shipping.

Over the southerly portion, west of the lake, black lines over marshes, woodlands, meadows and hills represent the toil of the surveyors who laid out the country ahead of settlement. Small black dots, numerous on this particular part, are inadequate expressions for happy homes filled with sturdy children, and for busy farmsteads surrounded by stocked pastures, or for schoolhouses, churches, post offices and other community centres.

It was about 1876 that the Icelandic settlers, spreading out fan-shape to the north and west along the shores of Lake Winnipeg from Gimli, on the Selkirk mapped area, reached the mouth of Icelandic river on the south centre of the Hecla map, about 90 miles north of the city of Winnipeg. Here the village of Riverton sprang up, the nucleus of a district of fishermen-farmers, which now is the terminus of the Winnipeg Beach Branch of the C.P.R.

[illegible] in the river valleys west of [illegible] Winnipeg is, for the most part black clay loam, deposit from ancient Lake Agassiz, which at one time covered a large part of Manitoba. These more fertile river valley lands rise to stony ridges which support stands of mixed timber. In several places roads follow them as, for instance, the road shown on the map from Rosenburg to Fisher River Indian Reserve.

West and northwest from Icelandic river, settlement gradually drifted some 30 miles to the Fisher river valley along which the Grosse Isle branch of the Canadian National Railways now runs to Hodgson, 107 miles north of Winnipeg. Some of the peaty swamps, particularly in the southerly districts, have been drained and converted into fine haylands and even, in some cases, to fields where grains are grown. The surveyor who reported on this territory states that the draining of those shallow open swamps often cost less per acre than does the clearing of bush-covered areas. Settlers find a ready market in Winnipeg for the cordwood obtained from the timber cleared. A wealth of wild flowers contributes to the profits of beekeeping, a hive yielding as much as 110 pounds of honey a year.

The northwesterly region of the mapped area, drained by the Mantagao River, supports a few ranchers, and development is in about the same stage as the southerly area was in the '70's.

Lake Winnipeg forms the western boundary of the Pre-Cambrian formations so that the fourth of the map lying east of the lake displays different characteristics from the westerly portion, partly exemplified in, for instance, Bloodvein River with its numerous falls and rapids, in contrast to the sluggish rivers of the tract west of the lake. A peculiarity of the easterly expanse, as may be deduced from the map, is that the highest land with the largest timber lies next the rivers, with wooded swamps farther back.

Street Names In London

Many Changes In Short Distance Confusing To Visitors

A revolt over street names is brewing in London. It is caused by the many, many names which, in picturesque London, often clutter up a single mile of thoroughfare.

Shopkeepers in sections frequented by foreigners and other transients, find they often lose business because of the bewilderment of a stranger unaccustomed to looking for a shop on a street with many names.

They are agitating for street name mergers, in the interest of simplicity, and convenience, and better business.

At present, one can find Baker Street by walking south along Park Road until it becomes Upper Baker Street. After being Baker Street again, for a few blocks, it becomes Orchard Street, then Audley Street, then Grosvenor Square, and finally South Audley Street.

Baker Street, however, is only a mild example. There is Oxford St., so important among the shopping thoroughfares of London. Yet Oxford Street is not the half of it, nor even the tenth of it.

A stroll along this thoroughfare really should begin several miles to the west, where it bears the sporting name of Goldhawk Road.

After a while, the street signs indicate it would rather be known as Bush Green; but it tires of that very quickly, and becomes Holland Park Avenue, then Notting Hill High St., then Bayswater Road, then Hyde Park Terrace, Hyde Park Place, and finally Oxford Street again.

After scintillating as Oxford St. for a while, however, it calls itself New Oxford St., but quickly becomes Holborn, then Holborn Viaduct, then successively Newgate Street, Cheapside and Poultry.

Later, it is Fenchurch Street, then Aldgate, Whitechapel High Street, Whitechapel Road and Mile End Road.

Gifts To Mark Anniversary

Cameras To Be Given Away To Twelve-Year-Olds

A plan to give more than a million cameras to children whose 12th birthday falls in 1930 has been announced by the Eastman Kodak Company through its founder, George Eastman.

The gifts are to mark the 50th anniversary of the first photographic patent granted to Mr Eastman. Five hundred thousand of the cameras are to go to children in the United States and "a further number" to Canadian children.

Mr Eastman is a bachelor.

Lesson Was Finished

Little Pat had been up for an examination in Scripture, but had failed utterly, and relations between him and the examiner had become somewhat strained. The examiner asked him if there was any text in the whole Bible he could quote? He pondered a moment, then said:

"And Judas went out and hanged himself."

"Is there any other verse you remember?" asked the examiner.

"Yes," said Pat, "Go thou and do likewise."

There was a solemn pause, and the class was dismissed.

There are millions of people in China who have never seen nor eaten rice.

When Baby Comes

If you cannot nurse him turn to Eagle Brand, the leading infant food since 1857.

A Wonderful Home

Home Of London Financier Serving Sentence For Fraud Is Magnificent

One of the most amazing houses that London has ever possessed is coming under the hammer. It is the mansion in Stanhope Street, Mayfair, which Clarence Hatry, the financier who was recently sentenced to fourteen years' penal servitude for forgery and fraud, furnished to his own whim. First and foremost, there [illegible] wonderful in number [illegible] decoration. On the top floor is the swimming bath, 36 feet long, a vast chamber all made of marble and lighted on the reflected flood system. All over the rest of the house are other bathrooms. The principal one is in black and white marble from floor to ceiling, with marble seats warmed from underneath. The second bath is also marble, with steps leading down to it. The rooms are magnificent. One called "The Stanhope Arms," is decorated as a Tudor inn in old oak, with an Elizabethan fireplace. The billiards-room, also in old oak, has old glass windows draped in rich red curtains, and hidden lights are reflected from the ceiling. The Queen Anne study is wainscoted in French walnut, while the winter garden has been described as a "sonnet in Ionic columns, pylons and lattice work, which, by its clever perspective design, gives an effect of hidden distances, an illusion which is heightened by many mirrors. A gymnasium is on the lines of a ship's cabin, with portholes and built-in [illegible], and there is a rock-garden on the roof.

Benefits Of Fresh Air

French Doctor, Ninety-Eight, Says It Is Secret Of Fresh Air

Every healthy man and woman ought to live to be 100 years old according to a French doctor, who can at least claim the right to speak on this subject as he is himself ninety-eight.

Centenarians are wont to attribute their longevity to their indulgence in or abstention from this or that article of diet, but this veteran finds the secret of his long life in plenty of fresh air and exercise.

Though few of us can normally expect to reach our hundredth birthday, we can all benefit by this sage advice.

[illegible] conditions make for more and more concentration of population and factories in and around our large cities, and that unfortunately has meant for many the sacrifice of open air life. But, while we do not wish to be a nation of fresh-air fiends, sensible town-planning and regulations against pollution of the atmosphere by smoke or noxious fumes can at least enable us to make the most of the healthful benefits of sunshine and fresh air.

Strangled With Asthma is the only expression that seems to convey what is endured from an attack of this trouble. The relief from Dr. J. D. Kellogg's Asthma Remedy is beyond measure. Where all was suffering there comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is worth many times its price to all who use it.

New Land Map

The Department of the Interior has issued a new edition of a land map which shows at a glance the number of quarter sections of Crown land still available in each township. The map also indicates Dominion Land Offices, existing railway facilities in each district and provides the customary information regarding cities, towns and villages.

There is one way only for a man to be master in his own home.

But he has never discovered it.

YOUNG WIFE STRENGTHENED

After Taking Lydia E. Pinkham's Vegetable Compound

Bancroft, Ontario.—"When I first took Lydia E. Pinkham's Vegetable Compound I had been married about a year and my strength was leaving me on account of my condition. I was only 19 and it was my first child. My mother told me I needed something to steady my nerves and a girl chum told me to take the Vegetable Compound. I am so thankful I did because it strengthened my whole system and now I feel perfectly well and have a sweet little baby boy."—Mrs. J. B. Stalker, Bancroft, Ontario.

Paintings Are Carefully Kept

Canadian War Memorial Pictures In Fire Proof Room at Ottawa

When construction of a new national gallery building is undertaken, provision will be made for the proper housing and display of the Canadian war memorial pictures. This was the answer given by Hon. J. C. Elliott, K.C., Minister of Public Works, in the House of Commons to a question raised by Col. Thomas Cantley. The Canadian national war memorial pictures, except those which now adorn the walls of the Senate chamber, are stored in a fire-proof storage room, specially prepared under the supervision of the National Gallery officials, in the Auditorium Building in Ottawa.

The pictures, said Mr Elliott's answer, are completely protected from any damage due to dampness or any other unfavorable atmospheric conditions. They are not, at present on view, but can be examined by special arrangement.

The pictures referred to have an estimated value of over $1,000,000. They were acquired by Lord Beaverbrook's committee during the war and presented by that body to the Canadian people. They are paintings, etchings and pastels of every phase of Canadian war effort, undertaken by many of the most outstanding contemporary artists. For the past ten years the collection has been stored from view due to lack of suitable accommodation.

KEEP THEM HAPPY BY KEEPING THEM WELL

It is natural for children to be happy, active and full of fun. When they are fretful, fussy and disinclined to play you may be sure something is wrong. Almost invariably that something lies in the digestive tract.

It is to meet the need for an absolutely safe corrective of childhood ailments that Baby's Own Tablets have been designed. They gently regulate the stomach and bowels and thus drive out constipation and indigestion; break up colds and simple fevers and allay teething pains. Concerning them Mrs. W. E. Forsyth, Dover, N.B., writes:—"I would not be without Baby's Own Tablets as I know of nothing to equal them for fretful, fussy babies who are troubled with colds or sour stomach."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Was Money In Pocket

How Ikey Turned Bad Investment Into Paying Proposition

Abe owned a well known race horse, for which Ikey offered him $10,000. Abe accepted the offer and a cheque, promising to send the horse next day.

Overnight, however, the horse died. But Abe could not bear to lose his bargain, so he cashed the cheque and sent the horse on.

He heard nothing further, and did his best to avoid Ikey. Unfortunately the day came when they met face to face. Abe took the bull by the horns and asked Ikey what had become of the horse.

"Vell," said Ikey, "ven I found it was dead, seeing that everyone knew vat a vonderful horse it vas, I raffled it and twenty-five people bought tickets at $500 each."

"But," said Abe, "didn't anyone [illegible]?"

"Only the man who von it," replied Ikey, "so I gave him his money back."

Gardening For the Blind

The British Guild of Blind Gardeners urges gardening instruction for all sightless children. Blind gardeners can prune fruit trees, sow seeds and thin out vegetables.

The Manitoba hydro electric power development program for 1930 calls for an expenditure of $2,000,000 on extending transmission lines into rural areas.

Douglas' Egyptian Liniment is without a rival. Stops bleeding instantly. Cauterizes wounds and prevents blood poisoning.

Mrs Williams: "Oh, Jane, however did you go and break the vase?"

Jane—"I'm sorry ma'am. I was accidentally dusting it."

Minard's is Best for Grippe.

Future Of Television

Great Possibilities Are Foreseen By Earl Of Clarendon

The Earl of Clarendon, former chairman of the British Broadcasting Corporation, foresees "staggering possibilities" for television.

He says, "When it is possible to present a stage play or a national event such as the Derby on a small screen which a family or perhaps a small audience in a hall can see then television will go like wildfire."

While we have some distance to travel before that goal can be achieved enough progress has been made to suggest that it may be attained within the next few years.

Little Helps For This Week

"God is our refuge and strength, a very present help in trouble."—Psalm xlvi 1.

Console thyself with His word of grace,
And cease thy wail of woe,
For His mercy never an equal hath,
And His love no bounds can know.
Lean close unto Him in faith and hope;
How many like thee have found
In Him a shelter and home of peace
By His mercy compassed round!
—John Greenleaf Whittier.

Where but in Thee have we a covert from storm, or shadow from the heat of life? In our manifold temptations Thou alone knowest and art ever nigh, in sorrow Thy pity revives the fainting soul, in our prosperity and ease it is Thy Spirit only that can wean us from pride and keep us low.—James Martineau.

Minard's Will Stop That Toothache.

Will Be Paying Guest

Graf Zeppelin To Pay For Use Of Lakehurst Naval Base

The Graf Zeppelin hereafter will be a paying guest when it visits the United States. During its forthcoming stay the German ship will be quartered at a rate of $2,000 a day in the big "hotel" at Lakehurst, N.J., naval base.

Other items on the bill include $3,000 for preparing the base, $1.00 a day for keeping the base in readiness, dating from the hour of the expected arrival, and $50,000 insurance. A deposit of $15,000 covering all charges, will be exacted. It will be the first time the government has ever levied a bill against any foreign aircraft for accommodation at a U.S. naval base.

Judge—"You admit smashing the chair on your husband's head."

Accused: "It was not my intention!"

J.: "[illegible] to strike your husband?"

A.—"Yes—but I did not want to [illegible]"

Treat Colds 2 Ways With One Treatment

Rubbed on throat and chest, Vicks does two things at once:

(1) It is vaporized by the body heat and inhaled direct to the inflamed air passages, and

(2) It stimulates the skin like an old-fashioned poultice and "draws out" the soreness.

VICKS VAPORUB

Two-Way Television

Speakers See Each Other Through Device On Telephone

The curtain veiling the telephone of the future was jerked aside in the first practical demonstration of a two-way television by the American Telephone and Telegraph Company.

Users of the device described as the "iconophone" looked each other directly in the eye as they conversed two and one-half miles apart.

It was a demonstration of the progress in approaching the day when it is hoped to be able to see the person at the other end of the telephone lines.

Minister, Run-Down In Health, Gains 7 lbs. in 3 Weeks

Rev. W. H. Taylor writes: "After a 7 weeks' revival campaign I was entirely run-down and losing flesh rapidly. I decided to give Ironized Yeast a 2 weeks' trial. After 3 weeks I found my strength returning and the tired feeling gone. In 3 weeks I had gained 7 lbs. and was myself again."

Imagine just 3 weeks to change from a "skinny" tired person to a strong well-filled-out man or woman. Ugly hollows vanish. Broomstick limbs become round and chubby. Tired feeling disappears. Blemishes [illegible]

Only when yeast is Ironized is it more effective, for iron is needed to bring out the weight-building and strengthening values of Yeast. Pleasant-tasting tablets. Safe for everybody. Never cause gas or bloating, no harmful drugs.

Go to any druggist today and get a full size treatment of Ironized Yeast. If after this generous trial you are not delighted your money back instantly from manufacturer.

4 "HEALTH WARE" Utensils you Should Have in Your Kitchen!

McClary Enameled Ware Kettles, 89c to $4.00.

McClary Enameled Ware Sauce Pans, 30c to $1.40.

McClary Enameled Ware Double Boilers, 85c to $4.00.

Firestone
GUM-DIPPED TIRES

Kingman News

Mr. A. Brunsum returned on Tuesday from Seattle, Wash., where he spent the winter.

Dan Scramstad, of Edmonton was a business visitor here on Tuesday.

Thor Grahn and C. F. Sealund motored to Camrose on Thursday.

Mr. and Mrs. A. Asp and family spent good Friday with friends in New Norway.

Mrs. Hillman, of Edmonton is visiting with Mr. and Mrs. Jack Erickson for a couple of weeks. Mr. Hillman joined them for Easter.

Mr. and Mrs. Pete Scramstad were dinner guests at the home of Mrs. Ray Molvik on Good Friday.

Miss Julia Johnson of Coronation spent the week end with Mr. and Mrs. L. Ergn.

Mr. and Mrs. P. Petersdn of Red Deer were dinner guests at the home of Mr. and Mrs. E. Erickson on Friday.

On Friday the junior baseball nine of Kingman defeated the Camrose boys in a game of baseball by the score of 17-5.

Mr. and Mrs. J. Erickson of Red Deer and Lily Erickson of Edmonton spent Easter at their home here.

Simon and Alice Simonson, May Welsh and Irene Horte motored to Edmonton on Saturday to attend the Grad - Lakeside game. They returned on Sunday evening.

Mr. and Mrs. E. Erickson and Mr. and Mrs. J. Erickson were the guests of Mr. and Mrs. Thor Grahn on Saturday evening.

Mr. and Mrs. T. Grahn and family motored to Hay Lakes on Sunday.

Mr. and Mrs. Oscar Thompson and family motored to Armenia on Sunday.

Mr. and Mrs. Jack Erickson and Mr. and Mrs. Hillman visited with Mr. and Mrs. W. Hartarbon on Sunday.

Miss Ester Rodonosky, of Edmonton, spent Easter with her parents here.

Lakeshore

This community was greatly shocked on Tuesday morning of last week to learn that Mr. Samuel Bethel had passed away shortly before midnight on Monday night, April 14th.

Mr. Frank Sherlock and Miss Dorothy Walker stole a march on their friends when they were quietly married at the manse in Tofield on Saturday, April 12th. They will shortly move to their farm some eight miles west of town. Their many friends wish them a long and happy married life.

Mr. L. Graham returned on Monday last week from Ashmont and Edmonton where he had been attending the spring show at the latter named place. Mr. Graham's daughter, Mildred succeeded in winning second prize in the childrens [illegible] competition besides several prizes in other competitions with her fat calf.

J. J. Clark, of Edmonton attended the funeral last week of the late Mr. Bethel.

Quite a number of Lake Shore ladies attended the shower for Mrs. Frank Sherlock at the home of Mrs. Merton on Thursday.

ROSS CREEK NEWS

What a change in the weather. Between rain and snow we hope to have moisture for the crops yet.

Miss Isabel Maitland spent the week end at the Snyders home. We were all glad to welcome Isabel back again.

Mr. and Mrs. L. Strand motored to Calahoo on Sunday.

The annual meeting of the ladie's aid was held at Joe McLachlans on Thursday after noon. There were sixteen ladies present. Mrs. Borstand was elected president; Mrs. Wiltsen, vice president and Mrs. Strand secretary. A very enjoyable afternoon was spent by all.

The Jacobson family made a trip to the city.

The teachers, Miss A. Price and Miss R. Robinson are spending the Easter holidays at their homes.

Mr. and Mrs. Ed Bailey were visitors at the Andy Olsons on Sunday.

Oscar Pederson was a patient in the Lamont hospital a few days. We are all glad that he is able to be home again.

Miss Grace Woods was a visitor at the Sampson home last week.

Miss Dorothy VanBuskirt had a bad attack of pneumonia. The last report she was doing nicely.

Mr. and Mrs. Robert Swan of Lamont were visitors at the McLachlan home this week.

LINDBROOK

The recent "sample" of moisture was very welcome and just the stuff to "give us" Encore! Jupe Pluve.

Mr. J. Wonnacroft had the misfortune to lose a stack containing eleven tons of hay by fire last week. This fire swept onto his place from the outside carried by the high winds.

Mr. Walter Kortzman of the C. N. R. staff here has been transferred to Viking. He has also been ill with quinsy the last week but is O. K. again now.

Seeding is general here now, although no one seems to be putting in the usual acreage to wheat. In fact we have never seen less optimism in the spring as this year since we lived in Canada; and now the cream prices keep gradually falling and we can hear of a flood of cheap New Zealand butter coming in so that looks as 1930 isn't going to be a good year to commemorate.

Mr. Edwin McCaw of Coronation paid a visit to his parents Mr. and Mrs. McCaw, of Lindbrook.

Mrs. Ross who recently been housekeeper at Mr. and Mrs. Wodencrofts, has left to keep house for Mr. Homer Pollock.

We hear that little Alphonse Fontaine infant son of Mr. and Mrs. W. Fontaine, of Lindbrook is ill, but to date have no details, we hope it is nothing serious and that the "petit enfant" will soon be O. K. again.

The residents of the Lindbrook and district were treated to a sight seldom seen nowadays only in the movies. This was the real genuine covered wagon or prairie schooner on trek. Preceded by a bunch of horses herded by riders dressed in approved style, several wagons full of agricultural impediments, household effects etc., followed behind. This was the original prairie schooner the rear of the cavalcade being brought up by a herd of cows, calves etc. This was the real thing and not staged by a movie director. The party left Castor Alta., somewhere around the 15 of April and are treking to the Peace River Country where they will spend what is left of the summer and also next winter. Next Spring they intend going on further to Hudson's Hope and squatting there on land which has not been surveyed. If this isn't advancing the frontier of civilization what is? We wish them the best of luck on their long trip and may luck attend their efforts on arrival at the promised land.

Local and Personal

Miss Minnie Wood, of Edmonton visited her home over the week end.

On Sunday last the Ryley and Tofield Oddfellows attended divine service as a body.

Miss Loretta Ross was a visitor to the city for a couple of days last week.

Mr. Harris, of the McLaughlin Hdwe. motored to Viking on Sunday.

Mrs. F. Griswold was taken to the Royal Alexandria Hospital one day last week, where she underwent an operation for appendicitis. She is doing as well as can be expected.

Mr. and Mrs. Rollins of Viking visited the Wood home over the week end.

Arthur Beirnes returned to Calgary on Saturday where he will resume his high school studies.

Miss Audrey Jobb returned to Provost to resume her teaching.

Mr. and Mrs. F. O. Ball of Edmonton were in Tofield over the week end.

Miss Annie Swift returned to her school in Calgary last week.

Mrs. Hooper of Lindbrook visited friends in Edmonton over the Easter holidays.

Mr. J. Hannan of Camrose was a visitor in town this week.

The W. A. will meet Wednesday, May 7th at the home of Mrs. J. Latourneau at 2:30 p. m.

In the obituary notice of S. Bethel, the names of three flower donors were inadvertantly omitted. They were: The Family; Mrs. Henry Wood and family; Mrs. Murray and family, Edmonton.

W. S. Stutzman has recently completed a large water reservoir which will become a part of the new garage which will be built in the immediate future. The reservoir is 12 feet deep, nine and a half feet in diameter and will hold 200 barrels of water. It has brick walls and bottom cemented over, and the water will be used for washing cars and general garage work.

Mr. Ruby, the new baker, is now having his oven built. It is of modern design and built of brick.

CAMROSE EDITOR CALLED BY DEATH; GREATLY HONORED

F. J. Slight Was Prominent in Business and Social Life of Community.

CAMROSE, Alta., April 23—Frederick John Slight, one of Alberta's prominent members of the fourth estate died at his home town Monday in the prime of his career. He was editor of the Camrose Canadian and prominent in the business circles of the town.

Mr. Slight had been ill for several months.

Last midsummer the condition of his health became such that he sought a course of treatment at Harrison Hot Springs, B. C. No permanent benefit resulted, and his condition continued to grow worse. A few weeks ago he was taken to St. Mary's hospital, Camrose, for the second time during the period of his failing health. Besides his widow he is survived by three small daughters, Hattie Marion, age three; Lorna and Carol, twins, two years of age; two sisters, Mrs. R. Fuller and Mrs. Lyfield, live in the Camrose district.

WEST BOUND PLANE FORCED DOWN AT TOFIELD

On Friday of last week the west bound mail plane piloted by W. R. Ashton was forced down at Tofield on account of heavy fog. It was several hours late, having previously been forced down at Lloydminster on account of heavy snow storms.

He passed over Tofield flying very low at approximately 7:30 p. m. But when reaching Cooking Lake the fog was so dense that he had to turn back and land. He landed in Art Young's field just north-west of town.

The mail was forwarded on to Edmonton via the train and the plane stayed here for the night. He took off for Edmonton Saturday morning about 11:30.

ACTING PREMIER ANNOUNCES DATE; PARTIES PREPARE FOR CAMPAIGN; NOMINATION DAY SET FOR JUNE 9

A provincial election will be held in Alberta on Thursday, June 19th.

Hon. George Hoadley, acting premier, made this announcement Thursday morning on behalf of premier Brownlee, who is at the coast. The official statement follows:

"In keeping with its promise during the recent session that if an election were to be held this summer ample notice would be given, the government today announces its decision to hold an election this summer with polling day fixed for June 19th.

"The government confidently believes the agreement for the transfer to the province of its natural resources will be ratified at the present session of the Dominion house. This agreement, following the completion last year of the sale of the northern railways brings to a close the last of the major problems facing the province in the past nine years.

"In selecting the personnel and determining the policy of the administration of the natural resources, a new set of problems of no less importance faces the province for the next few years.

"From an administrative viewpoint therefore, this year marks the close of one and the beginning of another era and is an appropriate time for an appeal to the people.

"The people are entitled to say to what government they wish to entrust the responsibility of administering the natural resources and in order to allow the administration an undisturbed term in assuming this task, considers it advisable that an election should be held at once."

Premier Brownlee is to return from Vancouver next Monday and it is likely that he will shortly afterwards issue an election manifesto.

In the last provincial election four years ago, A. M. Matheson, U.F.A. candidate was elected over J. D. Hannan, liberal, and A. Fraser, conservative, for this constituency.

Interviewed by the Mercury, Mr. Hannan stated he would not be a candidate in this election, and at time of writing it was not known who would be the liberal standard bearer. Two names have been mentioned, Mr. Harry White, of Mundare and Mr. H. Stewart of Holden. It is most likely Mr. Matheson will be renominated by the U. F. A. but we have heard no mention of a possible conservative candidate.

Actual nominations for all parties will no doubt be made at an early date.

FIRST FORTNIGHTLY CROP REPORT

(Issued by the Department of Agriculture, Province of Alberta, April 26, 1930.)

Telegraphic reports received by the Department of Agriculture indicate that in the southern part of the province from 40 to 75 per cent. of wheat is sown. Over all of the southern area moisture is sufficient for germination and over a large part is abundant. In the central sections of province, reports indicate seeding of wheat to be from 25 to 75 per cent. completed with sufficient moisture for germination but no reserve. Most of this area has received some moisture during the month of April and on April 24 and 25, snow and rain fell over a large area of the eastern part of the province.

In the Peace River district, heavy rains north and south of the Peace on April 24th, have delayed seeding for several days. Very little grain has been sown north of the Peace while to the south more than half of the area has been seeded. It is estimated that there is an increased crop area in this district of 25 per cent. and that moisture conditions are the best in twenty years.

There is not likely to be much decrease in the acreage sown to wheat throughout the province. There will be, however, and increase in acreage of coarse grains making a considerable increase in the total acreage sown. The small acreage of winter wheat sown has suffered severely from winter killing.

Live stock is reported to have come through the winter in fair condition.

News Of Our Neighbors

Bardo

Mr. and Mrs. George Hendrickson, Mrs. Jevning, Mrs. Moen and Mrs. Hanbodal attended the Women's Missionary Federation Conference, held at Camrose, last Friday.

Mr. and Mrs. O. Flaaten and Miss Hannah Jensen of Edmonton visited at the Jensen home during the week end.

Miss Betsy Ness returned to her home here from Edmonton, on Saturday. She has been attending the University of Alberta.

Miss Esther Ness is practice teaching at Grand Fork's school this week.

Miss Marvin Lundberg, of New Norway, has taken Mrs. Hendrickson's place as teacher in the lower room at Bardo.

Born.—To Mr. and Mrs. Harvey Brenneman on April 27th, a daughter. Congratulations.

Mr. and Mrs. T. Horte, and Mr. A. Johnson and Miss Inga Johnson, of Kingman visited at the Steen home on Sunday evening.

The Bardo choir gave an Easter Cantata on Sunday afternoon. In addition to the Cantatta several other selections were sung by the choir and ladies' chorus. Mr. M. Stutsman also gave a very interesting talk. A very large crowd was present.

Ketchamoot Items

The regular monthly meeting of the M. A. S. will be held next Wednesday, May 7th, at the home of Mrs. G. W. Sears. A cordial invitation is extended to all.

Miss Marjorie Lee returned to her school near Wainwright the latter part of the week.

Miss Jean Dickson of Edmonton one of our former teachers, was the guest of Miss Fawcett over the Easter holidays, also visiting other friends.

Mr. W. Allison spent the week end in Edmonton.

Mr. and Mrs. Mel Myers and little daughter Vivian were Sunday guests at the Sears home.

Mr. J. H. Ingram, son Will, and daughter, Kathleen visited at the T. D. Ferguson home Sunday.

The Wm Lee, Lawson, Carlisle families, Misses Fawcett, Hazel Sears, Harold Schultz and Stanley Sears attended the Easter Cantata at the Bardo church on Sunday afternoon, and enjoyed it very much.

Mrs. W. K. Mitchell, sons Iven and Sam, visited at the McMullen home Sunday afternoon. Miss Edna Campbell who is attending school in Edmonton spent the Easter holidays at the parental home.

Mrs. Clifford Graves and family motored up from Calgary one day last week and spent a few days visiting Mrs. E. McMullen and Paul McMullen, Mrs. Graves brother

Mr. and Mrs. Geo. Lawson entertained the Young People of the Community at their home Friday evening. Rev. and Mrs. Gordon were also present to help outline a program for a young people's meeting. Nothing definite was decided, but an enjoyable evening was reported by all. The meeting this week will be held at the Schultz home

Mrs. Harold Smith and little daughter returned to their home in Camrose Monday, after spending a week at the parental home

Miss Mabel Lawson returned to her school at Camrose Sunday evening.

Mr. Donald McCowan met with a very painful accident on Monday of last week, he was picking up roots in the field when pulling on one it flew up and struck him in the eye.

Mrs. McCowan took him to Edmonton to an eye specialist. Fortunately the sight was not injured, and we are hoping the eye will soon be normal again.

John Anderson had some dental work done in Edmonton on Monday

Mr. and Mrs. M. D. Stutzman and family and Mr. and Mrs. Jack King and family were dinner guests of Mr. and Mrs. J. Dettwiler.

SYNOPSIS OF "CLARA BOW IN THE WILD PARTY"

Clara and her "gang" of eight school-mates at an exclusive girls' school get all excited over a new professor, Fredric March, and sign up for his class. They find out that he is serious and intends to make the students work hard. He and Clara clash the first day.

A few weeks later Marceline Day head of the student body, excludes Clara and her gang from a costume ball because their dresses are too daring. The girls then go to a roadhouse. While there they are insulted by Ben Hendricks, jr., drunken braggart. Clara stalls him while the gang escapes. Hendricks tries to carry Clara to town in his car.

March intercepts this move. There is a fight. March rescues Clara. They realize that they are in love.

Joyce Compton, college snooper, sees March bring Clara home. The next day March "bawls out" Clara in class. Clara is hurt. She walks out.

Clara persuades Shirley O'Hara, her studious room-mate, to attend a house party a week later. It is a wild affair. Shirley falls in love, genuinely, with Jack Luden at the party.

On the same night Hendricks shoots and wounds March for revenge. Clara goes to March's study and renews her love. Joyce, the busybody sees the meeting.

Joyce steals and turns over to Marceline Day a letter from Shirley to Jack. Clara learns of this, and to protect Shirley, tells Marceline that the letter is her own, not Shirley's.

Clara resigns from college, packs her trunk and starts home. March however boards the train and goes with her. He, too, is through with college.

BOWLING RESULTS

Cause For National Gratification

Profound satisfaction will be felt by the people of Western Canada, in common with the rest of the world, in the successful outcome of the Five Power naval conference in London, England. That satisfaction is all the greater and the feeling of relief more pronounced because of the many predictions freely made during the progress of the conference that its results would be nil, and quite abortive in the realization of the hopes in which it was conceived.

Because there were many conflicting viewpoints to be reconciled, many difficulties to be [illegible] conference ran on month after month the pessimists told an anxiously awaiting world that nothing would be accomplished because nothing could be; that the nations were still so suspicious of each other that they were afraid to disarm in even the slightest degree, that the old game was still being played with each nation trying to get some advantage at the expense of others.

But with the signing of an agreement by the three greatest naval powers and acceptance of a portion of the agreement by the next two naval powers the dire prophecies of the pessimists have been proven foundationless. Instead the splendid optimism, the unfaltering patience and courage of Ramsay MacDonald have triumphed and a great forward step taken along the road to permanent world peace.

After a world war lasting more than four years, why should people have become discouraged and foreseen failure because a period [illegible] months was required in discussion of the many knotty problems confronting the naval conference before a solution was found?

The British Commonwealth of Nations, the United States of America and the Empire of Japan have found themselves whereby they undertake to [illegible] their naval armament and expenditures and voluntarily impose [illegible] themselves. The number, size and armament of ships of war [illegible]. And who a few short years ago would have imagined it possible [that] five powers agree that information will be given to each by all the [others] [of] every ship it is building, in replacement of [illegible] [out]dated ships. This is not preparation for war, but for the maintenance [of] peace.

But the great achievement of the conference is not to be found so much [in] the actual reductions decided upon, or the limitations of nations voluntarily assumed, as it is in the established fact that the policy of friendly consultation between nations has been given an impetus which will undoubtedly grow. This more than anything else must fill the world with [hop]e for the future.

[The c]onference has also established beyond all possibility of dispute that, [no] matter how far the leaders of a nation may be prepared to go in the [ma]tter of disarmament, they can only proceed as far as public opinion at home will support them in going. [illegible]

Discovery Of Danish Farmers

Sale Of Milk By the Foot Is a Possibility

Milk will shortly be on sale by the foot, following important experiments of a Danish firm.

It has been found that when the natural water is withdrawn from cows' milk the remaining pulpy substance can be rolled into sheets similar in appearance to paper.

Special machines have been made to carry out this rolling process on sanitary lines, and the milk becomes so highly concentrated that it is a food in itself.

When required in liquid form it is simply dissolved in boiling water and its strength gauged by the amount of water added.

OWES HER HEALTH TO PINK PILLS

This Weak Anaemic Woman Now Rejoices In Health and Strength

It is a scientific fact that nearly all the ills that afflict women are due to poor thin blood. This anaemia is the one cause of low spirits and languidness, the poor appetite, breathlessness and aching backs that make life a burden for so many women. But suffering women could banish all these miseries by taking Dr. Williams' Pink Pills, for it is a known fact that these pills create an abundance of new rich blood. Their wonderful reputation is based on that. Proof of these statements is given by Mrs. L. Deschenes, La Tuque, Que., who says: "Before I began using Dr. Williams' Pink Pills I was in a badly run down condition. [illegible]"

Do Your Ears Buzz With Loud Noises?

This is an infallible sign of Catarrh, and if not checked may result in partial deafness. The simplest remedy is CATARRHOZONE—inhale its soothing vapor a few times daily, and it prevents Catarrh from spreading. Head noises, buzzing and ringing in the ears are soon corrected by CATARRHOZONE. Nasty nose-discharges are stopped. Sore, inflamed crusts are healed. Sickening mucous which drops back from the nose to the stomach is done away with. Headaches depart. The breath is purified. You will be free from colds, coughs, sore throat and catarrh if you use CATARRHOZONE. Two months' treatment $1.00, small size, 50c. At all dealers.

Boosting For Canada

Many Cities In Britain Have Held "Canada Week"

There has not been much said in Canadian newspapers about the city of Bristol's "Canada Week," and the event should have been taken more notice of than it was.

Bristol is a city of 400,000 people. It has just had a "Canada Week," which consisted of a campaign for the buying of goods made in Canada. Pages of newspaper advertising space, posters, window displays of Canadian merchandise and other forms of publicity were given to our products, and the cumulative results must have meant the selling of many thousands of dollars worth of goods, besides the value of introducing lines of Canadian goods to Bristol purchasers for the first time.

Millions Dedicated To Humanity's Service

Huge Sum Set Aside By Mayo Bros. For Medical Education and Research

The millions of dollars that Doctors William and Charles Mayo have made through their world-famous clinic at Rochester, Minn., will not go to their families when the two great surgeons die.

Instead this money—the "holy money," as the brothers call it, now totalling in the neighborhood of $13,000,000—will be dedicated to humanity's service through the Mayo Foundation for Medical Education and Research, affiliated with the University of Minnesota.

Meanwhile the two brothers have put themselves on "salaries" which do not amount annually to nearly half of their incomes. All of their incomes above these salaries goes to the foundation, to train surgeons for the future.

Dr. William Mayo was asked on what basis he and his brother have fixed their charges.

"That, too, was something my brother and I discussed long," he said. "When money began to come in and pile up so fast it frightened us, we had to meet that problem. The thought of reducing fees generally had to be dismissed. We could not pauperize our own profession. There are thousands of physicians and surgeons who need the income from what are becoming accepted as standard fees.

"But we could do something that we did. We scaled the fee in accordance with the patient's means. [illegible]"

Major Developments In Canada's Air Mail Service Attracting Great Attention

Canada, with her vast area and widely scattered population, is advantageously situated to derive the greatest benefits from the development of internal air mail service. The great distances which separate the principal urban centres and the steady and broad-fronted advance in settlement and development serve to render postal communication by air peculiarly valuable in the Dominion. In addition, the Post Office Department of Canada has entered into a reciprocal arrangement with the United States postal authorities whereby Canada may take full advantage of the extensive United States air mail services connecting with points in Mexico, the West Indies, and Central and South America.

The establishment of Canada's official air post services is of comparatively recent date, but the conveyance of mail matter by air within Canada has been an actual fact for over ten years. In the early days of mail transportation by air, the Post Office Department, as a temporary measure, gave permission to the operating aviation companies to carry letters, entirely at the senders' risk and subject to a small fee ranging from five cents to twenty-five cents per letter in addition to the regular postage. This fee was retained by the operating company. The successful operation of numerous "sticker" services demonstrated beyond question the essential practicability of air mail transport in the Dominions, for these services were conducted in many cases under considerable operating difficulties, although not on hard-and-fast schedules.

Civil aviation in Canada assumed proportions in 1927 which justified the Post Office Department in utilizing the facilities available for the fast transport of mails, not only to remote areas but between the larger centres of population. Services of the latter type had of course to be arranged [illegible]

[It is in the] country however, that the most valuable work of Canada's Air Mail Service has been carried out. Until recently the remote settlements along the north shore of the St. Lawrence River, on Anticosti and the Magdalen Islands in the gulf of St. Lawrence, and along the sub-arctic reaches of the Mackenzie River have been almost cut off from the outside world during the winter months. Communication was necessarily by dog team and other primitive methods until the recent dramatic change to swift aeroplanes reduced the duration of mail trips from weeks to hours.

The establishment of contract air mail service in the Mackenzie River District—the most northerly of all air mail services—in December, 1929, attracted world-wide attention. The route from McMurray, down the Athabaska River, along the south shore of Great Slave Lake, and down the mighty Mackenzie River is nearly 1,700 miles long. Hitherto, in winter months dog teams had been the sole means of conveyance and the volume of mail was correspondingly small being limited to letters and a few newspapers. The total amount for Aklavik in the winter of 1928-29 was less than two hundred pounds. Contrast this with the remarkable conditions obtaining on the advent of air mail facilities. Ten thousand pounds of mail were carried on the first flights, over a thousand pounds alone for Aklavik at the mouth of the Mackenzie. The chief remaining routes are those which penetrate the rich mining areas of Ontario and Manitoba, i.e., Red Lake, Kississing, and Bissett. They are the principal mineral areas served by air mail in Canada.

The development of flying fields and provision of lighting facilities, not to mention the constant improvements in aircraft which may be expected during the next few years, will undoubtedly do much to facilitate [illegible]

Still In Experimental Stage

Difficulties Have Cropped Up In Connection With Battery Brooders

A recent report of the Dominion Experimental Farm would indicate that another much heralded innovation in the poultry industry is not destined to any great success. During the past two or three years, the battery system of brooding chickens has gained some prominence in Canada, the principle being that of raising chickens in a uniformly and correctly heated room in metal batteries. These batteries are simply crates placed one on top of the other with a wire floor and equipped with troughs for water and feed. Beneath the wire floor are papers to catch the droppings and which are easily removed and burned.

The advantages of such a system are quite obvious. It is really a factory of mass production of chickens. One man can look after a large number of the babies and the wire floors make for complete sanitation. Temperature and fire risks are eliminated, spread of disease is minimized, and the feed and water troughs, which are placed outside the wire walls of the compartment, are easily kept clean.

But some difficulties have cropped up and it would seem from the report that they are serious ones. In the first place, a temperature that suits day-old chicks is too high for the older brothers. Some considerable trouble has developed from chicks getting caught in the wire floors as might be supposed, and last, but not least, it was found that from four to six weeks is the oldest that [illegible]

Canadian National Parks, With Wonderful Scenic Beauty, Form a Great National Asset

The coming season promises to be one of great tourist activity so far as the national parks of Canada are concerned. Officials, both of the Department of the Interior and of the railways, report an unusually large number of requests for information and advance bookings. Large numbers of inquiries have also been received in the department from motorists in practically every section of Canada and the United States, and even from Mexico. The majority of these ask for the shortest routing to Canada's national parks, a description of the different attractions, the accommodations and particularly the facilities for camping.

A comparative analysis of the various applications shows that by all odds the strongest appeal of the parks is their scenic beauty and wilderness quality. An extract from one expresses the demand of many: "I want to visit the parks containing the prettiest mountain scenery as I want to camp out in the wilderness, fish and go mountain climbing." Some of these letters reveal that the writers know almost nothing of Canadian geography. They have heard a rumour of the greatness of the national parks of Canada and they write to ask where they are and how they can get to them. Apparently it has come to be accepted in the minds of the travelling public the continent over that national parks represent the finest examples of magnitude, power, and beauty in natural scenery, in a setting of unspoiled primitive conditions and their name is now sufficient guarantee of their attractiveness.

Visitors to the national parks come with varied needs, some seeking health, others mere recreation, but the majority are impelled by a desire for rest and freedom. Whether they realize it or not they are usually seeking a way of escape from the increasing complexity and routine of our highly mechanized competitive life into a world of peace, solitude and inspiring beauty. In the face of the majestic grandeur of the Rockies, the enchanting loveliness of such places as Lake Louise, the Yoho Valley, Maligne Lake or Mount Robson, a man is lifted out of a pre-occupation with his purely personal problems into a kind of deeper satisfaction and healing of mind passing, as has been said, "through wonder into joy."

This in the final analysis is perhaps the strongest appeal of the national parks. They supply something which answers to a universal craving, a hunger innate apparently in every human being and which must become more deeply felt as population increases and conditions of life on this continent grow more artificial and restricted. Already the world over there is a recognition that our present mechanical development may sweep original conditions everywhere away. That is, perhaps, one reason why the recent [illegible] of Hon. Charles Stewart, Minister of the Interior, that he hoped the time would soon come when there would be a national park in every [illegible] [illegible] [illegible] that the change which will probably come about in Canada during the next hundred years will be enormous. While Canada is already leading the world in the reservation of areas for national parks, it is [illegible]

U. S. Board Announces Plan To Take Our Money At Current Rates

The Federal Reserve Board of the U. S. has issued the following official statement [illegible] on Canadian currency:

"The Federal Reserve Board announces that a plan has been worked out at the suggestion of the Department of [illegible] and will be put into operation for handling Canadian currency deposited with federal reserve banks [illegible] of the [illegible] charges incurred by [illegible].

"[illegible] Canadian currency brought into the U.S. by travelers has frequently ranged as high as 1% and sometimes even as high as 10 per cent at places remote from the border line. This is regarded as excessive and has given rise to some feeling in Canada, especially as U.S. currency is generally accepted at par in Canada.

"The Federal Reserve Board has taken the subject up with the federal reserve banks and they have agreed to offer their facilities to member banks for the collection and conversion of Canadian paper currency into [illegible] at the current rates of exchange. The federal reserve banks [illegible] absorb the cost of shipping Canadian paper currency from the federal banks to their respective federal reserve banks but will [illegible] the actual exchange charges and [illegible] shipping charges [illegible] from the federal reserve banks to the points of conversion into U.S. currency. The average cost during the past three years of converting Canadian paper currency into U.S. funds, including both exchange and shipping charges has averaged less than 1 per cent.

"This method of handling Canadian currency by the federal reserve banks will, it is hoped, result in substantial reductions in the cost of collecting this currency. The board feels that if member banks cooperate in this matter by extending a similar service to their customers, Canadian tourists travelling in this country will find American merchants willing to accept Canadian currency at or near par."

Best Market For United States Goods

For Second Consecutive Year Canada Has Headed List

Canada was shown by the Chamber of Commerce of the United States to have been the best market for United States products during 1929, for the second consecutive year and also the principal distributor of foreign products in the United States.

An analysis, based upon Department of Commerce statistics showed that Canada's purchases of United States products totalled nearly $1,[illegible],000,000 and were 18.1 per cent of the total exports. They were larger by $32,786,000 than in 1928 when Canada, for the first time, became the major buyer from the United States.

Douglas Fir Timbers Improved By Age

Experiments Show Gain In Strength After Fifty-Five Years' Service

Douglas fir timbers gain in strength after 55 years of service according to F. M. McAllister, professor of mechanics at the University of Oregon.

Professor McAllister has just completed an investigation of the timbers taken from the Haydon Bridge, a structure erected near Eugene in 1874, and has found them to be in an excellent state of preservation. The Haydon Bridge was of the old covered type and it is the professor's conclusion that Douglas fir can be preserved in sound structural condition for at least half a century by the simple expedient of keeping it covered from the weather and providing a free circulation of air.

More than 200 tests on machines which exert from 30,000 to 200,000 pounds pressure were made on the old timbers. For basis of comparison, similar tests were made on both green and seasoned pieces of the same size. The average strength was found to be in excess of the average strength of new timber in green condition while in most cases it was well above the average for unused timber that had been air dried for two or three years.

Professor McAllister's report stated that the tests proved conclusively [illegible] the [illegible] defects in [illegible] on the small clear pieces proved that the quality of the wood [illegible] does not deteriorate with age.

One of the surprise features of the experiments was the high strength in compression parallel grain. This was found to be slightly more than double the corresponding strength of the new airdried timber and about 24 times that of new green timber. Out of twelve old beams tested not one failed first in compression and only five of the 54 small beams broke after sustaining very high stress.

In the tests of other new bridge stringers made by the United States Forest Service, approximately three-fourths of the whole number failed in compression.

Cannibals Turning To Football and Cricket

Natives Of Solomon Islands Greatly Interested In Sports

Cricket and football have taken the place of murder and cannibalism as the national outdoor sport of the Solomon Islands.

Dr. C. E. Fox, in charge of the native education on the islands, has just returned to Auckland, New Zealand, with the news that the natives are beginning to forget their barbarous pastimes and to live a more orderly life.

"Solomon Islanders make very good footballers, even though they play bare-footed," said Dr. Fox. "They are very skilful at passing and remarkably fast.

"Cricket is our national game, however," Dr. Fox added. "I do not think you will find brighter cricket in any other part of the world. We play matches of two innings a side, and the time limit is two and one-half hours. Con[illegible] is lost and there [illegible] as playing for a [illegible] In one match 36 runs scored [illegible] one stroke.

"The ball was hit into the sea, and [illegible] leg who objected strenuously [illegible] chasing it, was finally thrown into the water by the other members of his team, in order to retrieve the ball. The batsmen, meantime, were steadily piling up the runs.

"On one occasion the ball was hit into a tree which was cut down by the fieldsmen. The rules of lost ball and [illegible] bounds do not apply when there are 22 enthusiastic Solomon Islanders on the field. They are magnificent fieldsmen and can catch any sort of ball with ease. Their bowling, too, is very accurate, but their batting is naturally, rather unpolished. It is interesting to watch the batsman take centre. This is regarded as a form of ritual, for as soon as it is done, the batsman promptly steps back a bit [illegible] and prepares to hit at everything."

Prince (in hotel): Twenty-five francs for peaches! They must be scarce this year.

Excavation of Trajan's Market Place in Rome has been completed, and altogether 150 stores have been found in the ancient shopping centre.

Clean Your Seed

Results Obtained More Than Pay Farmer For Trouble

"As thou sowest, so shalt thou reap" wrote Cicero centuries ago and Biblical and mundane authors have kept this maxim of nature ever before us, and the moral is—"you may not always be able to sow the best of seed, but you can always sow clean seed."

Not only is it a well known fact that clean seed is a most effective method of weed control but experimental work by the Dominion Department of Agriculture, and the Canadian Seed Growers' Association shows that clean seed pays.

There is really no excuse for a farmer not planting clean seed because if he has not the time and means for doing it himself there is, or can be, available to him competent means of cleaning his seed.

The cleaning of seed is a practice which has been followed ever since man first began to plant, the methods ranging from the primitive to the ultra-modern. We are most of us familiar with the primitive practice of holding a measure of grain or seed shoulder-high and letting it drop to the floor, the breeze carrying the chaff along with it, leaving a pile of seed at the feet of the cleaner. We are also familiar with another primitive practice of float-testing many types of seed, particularly mangel and sugar beet.

The ultra-modern seed cleaning methods range from the governmental seed cleaning plants at Moose Jaw serving a part of the prairie area, to the adaptation of screens and sieves in the fanning mill.

The cleaner the seed the better its quality and while you may not be able to afford No. 1 clean seed always, you can afford, and will be more than repaid, to see that the seed you use is clean.

Poultry Will Fly

European Exhibits For Congress Will Travel By Air

Quite abreast of the times exhibitors at the fourth World's Poultry Congress, are already arranging an aeroplane conveyance for fancy birds which will be shown in the live stock exhibition, and which they desire to have arrive at the Congress in the pink of condition. Leading air services are making arrangements to deliver birds from points in Continental Europe to the Crystal Palace as soon as the Congress officials are ready to take delivery.

To find themselves really up in the air will give the elite of the poultry world who travel in this way something really worth while to crow and cackle about.

Loss Is Heavy

Twenty-six million dollars is the price paid by farmers and poultry raisers for loss through diseases in poultry flocks annually according to recent estimates. Most of this loss is caused by the internal parasite and according to F. C. Elford, Dominion Poultry Husbandman, much of it is preventable. A good deal of it, he points out, can be eliminated by keeping young chicks away from adult birds and on absolutely clean soil.

Holland Plans Produce Airport

Delft, Holland, will establish a farm produce airport. From it will be shipped fresh vegetables, fruits and flowers, for which the district is famous, to leading cities of Europe. Large amounts of fresh fruit, early vegetables and cut flowers have already been successfully transported by 'plane.

Give Chicks A Fair Show

If Kept In Separate Pens Results Are More Effective

The baby chick becomes a laying pullet in about five months, but only with proper handling and when given an even break.

W. A. Brown, chief of the poultry division of the Dominion Live Stock Branch, emphasizes one thing essential to the development of pullets which will begin to lay when egg prices are good; that is, give them a fair show. By this he means that they must be kept separate in pens by themselves where they will not be robbed by older birds of the foods provided especially for, and so necessary to, their proper growth and development.

Poultry records show that the time-honored practice of letting chicks run with old hens does not pay and that to get effective results in respect to pullets for egg production complete separation must be provided.

To allow chicks to run with the older hens either at large or in a common pen is the biggest mistake the farmer or poultryman can make, Mr. Brown observes. It was the repeated failures in farm practice in this connection which led to a special investigation as to its cause. The study of the problem began in the separation of a mixed flock which was giving poor results. The old layed-out hens were discarded and each age-group and type were penned separately. One immediate and surprising result of this separation was that egg production from the smaller number of selected hens remaining very soon rose above the total egg production of the mixed flock.

Another thing which was found from this particular experiment was that birds did best when grouped in separate pens in classes of their own age and kind. There are certain well defined stages of development in the chick, the pullet, and the hen, and where all are allowed to run together none function as they should but when separated into age and type groups feeding can be controlled and regulated with direct regard to the needs and condition of each hen.

On every farm where it is desired to have laying pullets early in the season when the price of eggs is particularly attractive, one safe rule to apply is to put baby chicks in a pen by themselves and keep them separate throughout the season. Properly fed and looked after they will become laying pullets weeks before they would were they allowed to remain in the mixed barnyard flock, and incidentally they will mature for utilization as dressed poultry if desired, much earlier than would otherwise be possible.

Canadian Roses For China

Bushes Numbering Thirty-Five Varieties Shipped From British Columbia

Three hundred British Columbia rose bushes, numbering 35 varieties, have been shipped to the British Legation at Peiping, China, to adorn the already famous gardens. The bushes were contributed free of charge by three nurseries: H. M. Eddie & Sons, of Sardis, the B.C. Nurseries, of Vancouver, and the Layritz Nurseries, of Victoria. The bushes were carefully assembled and packed at Victoria under the supervision of E. W. White, district horticulturist, the Provincial Government paying the freight and packing charges.

Australia's coal strike has continued for several months.

Turn Loss Into Gain

Growing Demand For Dairy By-Products Is Increasing Revenue

Dairy production in Canada is slowly forging ahead, but along new lines. The Dairy and Cold Storage Branch of the Dominion Department of Agriculture, report an increasing demand for what might really be termed the by-products of the dairy industry. Dairy production in Canada heretofore has been expressed largely in terms of butter, cheese and cream. The production of butter and cheese shows a decline in volume, while "miscellaneous factory products" and "milk consumed fresh or otherwise" show a big increase, and it is this increase which is responsible for the net gain in dairy production during the past five years of over $12,000,000. More fresh milk and cream are being used today than ever before, ice cream continues to grow in popular favor, and there is a striking increase in the amount of milk which is being processed for sale in evaporated, condensed, concentrated and powdered form.

A Musical Feature

Treat Provided For Visitors To World's Poultry Congress

By a happy coincidence, 1930 is the triennial festival year, and visitors to the World's Poultry Congress, will have the unique opportunity of attending a performance of the "Messiah," which will be given during the Congress week. An orchestra and choir of 2,000 voices will be in charge of Sir Thomas Beecham, who has offered his services as conductor as a free gift. Under his direction the performance will be a contribution of the first importance, and will afford an unusual opportunity for visitors to the Congress to hear one of the world's most famous composer's works rendered on a scale and in volume which alone begins to interpret a real masterpiece of music.

Only One Name Allowed

Practice Of Giving Middle Name Once Forbidden In England

The practice of giving a middle name to children was unknown in England before the period of the Stuarts, and it did not become at all common until Georgian times. There was, in fact, a law on the statute books forbidding parents to give more than one name to their children. The same conditions prevailed in North America. Not a single member of the Mayflower had a middle name and there are only three among the signatures to the Declaration of Independence. The first five Presidents of the United States had one Christian name only.

Extending Hydro System

Extension of the provincial hydro system to all main centres of the province within the next three years is the aim of the Manitoba Government, as outlined by Hon. D. G. McKenzie, administrator of the power system, calling for expenditures of $3,000,114 which includes $902,008 for transmission lines and $220,000 for farm services.

Made Fortune In Year

Achieving notoriety as the producer of the war play "Journey's End," Mr. Maurice Brown, who was unknown in theatrical circles a year ago, has purchased the Globe and Queen's theatres in the West End of London for $1,000,000. This sum is a portion of the profits made from the play.

Hornsey, England, has banned the use of loud speakers and phonographs in stores.

The Prevention Of Sickness

Periodic Examination Would Save Great Numbers Of Lives

In the Province of Ontario, one person out of every three dies ahead of his time, and at that, Ontario is no worse in this regard than the other provinces of Canada. Better in fact than some of them.

Professor Winslow of Yale University states that 20 per cent. of all deaths in the United States Registration Area, could be postponed. An analysis of Ontario statistics shows that in this province 34 per cent. of all deaths could be postponed. And these statistics are official, and the analysis is that of competent health officials.

It's shocking to walk along the street knowing that every third person you meet has death leaning affectionately over his shoulder. Such wastage would not be permitted in industry. What causes this gigantic wastage of human life? The answer is, just plain, human thick-headedness.

If one person in every three was killed ahead of his time in a railway crossing accident such a public hue and cry would go up that within a year, grade-crossings would be eliminated, regardless of expense. But our one-out-of-three loss is not so dramatic as that. It is brought about by the stealthy ravages of disease, and therefore it isn't noticed. For people have not yet learned that many of the diseases that kill their children, their husbands and wives and friends, could be prevented.

An inconceivable amount of sickness and premature death could be eliminated if people could be induced to get thoroughly examined, regularly, by their physicians. There is an enormous amount of incipient diseases of many types which, being neglected in early stages, result in serious disability demanding hospital care and often resulting in death.

One of our leading public health authorities says: "Sickness costs Canada $311,000,000 annually. The loss of future earnings through premature death is conservatively estimated at one billion dollars a year."

Diphtheria kills 1,200 Canadians every year, while 12,000 other Canadians suffer from this disease but recover.

Yet science offers you a toxoid treatment to make you and your children immune to diphtheria. This disease is a frightful child-slayer. Have you taken advantage of toxoid to protect your children, or may they be among the stricken 12,000 during the next twelve months, or possibly among the doomed 1,200?

Typhoid fever killed 1,100 people in Canada in 1927. Yet typhoid fever is absolutely preventable by means within the reach of everyone.

Tuberculosis—8,000 people died of tuberculosis during 1927. Yet we have cut the death rate from this scourge in half, during the past 25 years, and we can absolutely eliminate it with adequate health machinery.

Cancer—early treatment (which is assured to anyone taking the trouble to undergo an annual or semi-annual physical examination), guarantees success in curing cancer, in many cases.

Venereal diseases—the organized and successful attack that this country is making upon venereal diseases is an utterly convincing proof of the progress that can be made in disease-control when all forces of the state combine in a necessary undertaking.

Japan's Oldest Temple

There is still standing in Nara a Buddhist temple, Horyu-ji, the oldest in Japan, built more than thirteen hundred years ago, but built of wood, probably the oldest wooden structure in the world. It is filled with priceless art treasures. Its mellow-toned bells seem to speak of romantic memories of long ago, of the days when Nara was at the height of its glory, and when men of genius were laying the foundations of the nation's art and literature.

Nitrates used in making fertilizer are among the most important by-products from coal.

"You don't wear your glasses now?"

"No need with the present women's fashions."—Lustige Blaetter, Berlin.

CANADA'S REMARKABLE ADVANCE IN MINERAL PRODUCTION

During the thirty years embraced by the period 1900-29 inclusive, the annual value of Canada's mineral production has on no fewer than sixteen different occasions surpassed all previous marks. While the effect of the upward trend of prices must be taken into account, especially as regards the war period, this record is nevertheless a remarkable illustration of sustained growth. It stamps the mining industry as a foremost force in the march of Canadian development during the twentieth century.

The sheer increase in value from less than $65,000,000 in 1900 to well over $300,000,000 in 1929—is amply impressive in itself. But the manner in which it has been attained is no less notable. There has been a great advance in variety of output. At the opening of the century gold and coal were the only two large items of Canada's mineral production, whereas the Dominion's present-day mining industry owes its magnitude not only to coal and gold, but to copper, nickel, lead, silver, zinc, asbestos, and, in short, to perhaps as wide a diversity of resources as any count[ry] affords to mining enterprise.

People who prize the finer things of life usually demand Red Rose Orange Pekoe Tea. A money-back guarantee with every package.

RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good

In the best package—Clean, bright aluminum

International Affairs In Canada

Valuable Information Given To People By League Of Nations Society

Agencies which endeavor to develop an informed public opinion on international affairs in Canada, particularly at this time when that subject is such an engrossing study and when Canada almost over night has discovered herself on the stage of world events, should be given the attention of every thoughtful man and woman. Noteworthy among these is the League of Nations Society which is making its appeal for renewal and increase of membership. In the aid that it is able to give to the schools and colleges for the teaching of League affairs and the new world organization that the League represents, its encouragement of model assemblies in the universities and even in schools; its efforts to provide informative speakers to groups throughout Canada and perhaps above all, the publications and literature that it distributes to its membership and others interested, it is performing an important service. It is gratifying to hear that increased public support is now indicated. In its appeal this year to individual responsibility rather than committee responsibility for the securing of new members it is trusting to an awakened public consciousness. The returns to the member are many times the contribution the member need make.

One of the difficulties that organizations such as the Association of Canadian Clubs, the Canadian Institute of International Affairs or the Canadian Problems Society is to arrange suitable organization in the small centres of the Dominion. A feature of the last annual report prepared by Lt.-Col. C. F. Meredith, who directs the Society from his office at 381 Wilbrod Street, Ottawa, is that developments of 1929 indicated an increased membership in the smaller places.

When discussing before the Committee of Industrial and International Relations of the House of Commons the agencies that are under consideration here, Dr. O. D. Skelton, Under-Secretary of State for External Affairs, in the Government of Canada, said: "Perhaps above all, so far as its widespread influence in this particular field goes, we have the League of Nations Society. It is a very efficient and far reaching organization which does its best to reach the children in the schools and the adult citizens, endeavoring not only to inform them but to rouse their interest in League affairs."

When the annual meeting of the Society was held recently in Ottawa, the guest of honor at the annual luncheon was His Excellency, Viscount Willingdon, Governor-General. His Excellency spoke very feelingly of the work the Society is doing and made a profound impression. He said:—

"There are two great matters of importance to keep vigilantly before the people. Memories are short and one, too often, forgets. But—and this is my first point—you must never allow people to forget the horrors, tragedies, sorrows and sacrifices of the last war or fail to remind them that if war breaks out once more the development of science has been so great that war will be beyond human control such as to constitute irreparable disaster, not only to civilizations, but to victor and vanquished alike. And secondly, you must impress on the youth of the Dominion the necessity for patriotism and love of country—not the patriotism of the old days, for if I am to put it to you figuratively the greatest patriot in the old days, was the man who, if he was strong enough knocked the other man down and took away most of his clothes, but the patriotism of the man who wishes to see the administration of his country conducted on the highest ideals of freedom, of justice, and to live on friendly terms with his neighbors all round him.

"Thus, I say to you, go on with the good work you are doing, because Canada is bound to become increasingly influential in the pursuit of peace as the years pass. Work and strive and strain for peace so that the young people growing up may never see the horrors of war and that those gallant sons who paid the supreme sacrifice for us all, may know, wherever they are, that their sacrifice has not been in vain."

Picture of Health Now

"In May and June I was badly rundown and had faint spells until it was a drag to do my work. In July and August I [illegible]'t seem to pick up so I decided to try Lydia E. Pinkham's Vegetable Compound because I saw it advertised. I took two bottles and now I am the picture of health. I feel fine, do all my work and milk two cows. If any woman writes, I will certainly answer her letter."—Mrs. George R. Gillespie, Pennichy, Saskatchewan.

Lydia E. Pinkham's Vegetable Compound

Bad Year For Icebergs

But Ice Patrol Has Reduced Danger To Minimum

This year promises to be exceptional for icebergs in the Atlantic. Bergs were reported off the Grand Banks as early as the third week in January, when the Ice Patrol was still in winter quarters.

If this promise is fulfilled it will be another link in the chain of evidence which supports the theory of a nine-year cycle.

It was observed that in 1903 bergs were very numerous. In 1912 the Titanic and other ships met their doom owing to the unusual quantity of ice in the Atlantic. In 1921 heavy ice appeared early in the steamship lanes, and bergs were observed as late as August.

But even if 1930 does produce large quantities of ice, the danger to shipping is not likely to be any greater. Since the formation of the Ice Patrol not a life has been lost as a result of a ship colliding with iceberg.

After the Titanic disaster, when the great ship split her keel on an iceberg and sank with 1,160 people, the maritime nations agreed in conference to finance an ice patrol. America provides three coastguard cutters for the work. The expense of their upkeep is met by the nations using the Atlantic steamship routes, and is apportioned according to the tonnage operated.

Great Britain is the largest single contributor, her share of the total expense being 30 per cent.

The three cutters engaged relieve each other at 15-day intervals. Early each year the first cutter for duty leaves winter quarters in Boston and proceeds to the Grand Banks of Newfoundland. If no ice is found there the cutter proceeds northward.

Mozart learned the harpsichord in his fourth year; in his fifth composed a concerto, and performed before emperors and kings at the age of six.

A Swiss scientist declares that fish are not deaf and dumb. He says in the depth of the sea they make a humming sound which contains a certain amount of harmony and gayety.

Customers Are Scattered

Time and Weather Are Broadcast From Eiffel Tower

When you set your watch by ship's time on the Atlantic Ocean you are taking the sayso of the Eiffel Tower like as not.

The world's tallest timekeeper measures 984 feet from the ground to the crow's nest which furnishes time and [illegible] reports to ships at sea.

Up in the tiny tower room, frequently hidden from Paris by clouds and mist, a crew of busy men operate the radio sending apparatus. Their neighbors are experts of the meteorological bureau which is [illegible] powerful barometers, aerometers and pulvometers.

The weather men live in a world of their own. Their pals are other weather observers at faraway points in the north, the east, and the south. Their customers are the ships at sea and agencies which need to know today what the weather will be tomorrow.

A thousand feet below lies Paris, almost as remote from their daily lives as London across the Channel. They can reach the foot of the tower by fifteen minutes descent by foot and elevator. They can telephone London as quickly as they can talk with Paris.

If they want something to eat or drink the tower restaurant is five hundred feet below, halfway between earth and their perch in the sky.

Gustave Eiffel—whose name is pronounced in French like the letter F—used to live in one of the topmost apartments in the [illegible] built. He was a bridge builder by profession, but people in general think of him only as the man who built the Eiffel Tower.

He did it in spite of some opposition, as an attraction for the 1889 exposition.

It paid for itself the first year in gate receipts. Stockholders still make good dividends on their investment.

Engineers say it is good for many decades to come. Its slant is constantly checked and corrected by hydraulic apparatus which allows the legs to be lifted.

Moreover the tower is so constructed that it could lean at a 45 degree angle without tumbling for its centre of gravity is only a few feet from the ground.

Individual Traffic Cops

Push Buttons On Paris Street Corners Regulate Motor Traffic

M. Jean Chiappe, head of the Paris police department, plans to make every Paris pedestrian his own traffic "cop."

An ingenious signal has just been installed at one of the busy corners in Paris whereby a person wishing to cross the street can press a signal halting all the automobile traffic.

The buttons are placed on either side of the street on the electric lamp posts. By merely giving the button a push a red signal is flashed from a traffic light forcing all motorists to stop. The signal remains lighted 15 seconds in which the pedestrian must scurry across the street.

In order that irate pedestrians will not keep the red signal up all the time the police have regulated the instrument so that it will not flash red for at least 45 seconds after it is extinguished. If this apparatus proves successful the police hope to install the instruments on all corners where no regular traffic officers are stationed.

Does Not Always Work

Rich People Who Dress Poorly Sometimes Get Shabby Treatment

That the poor must dress smartly while the rich can dress as they like is a suggestion not borne out by the recent experience of one of Britain's richest men, who was turned away from a London hotel because he looked shabby. As a matter of fact, his income is about £8 a minute, and the wage-bill of his domestic staff over £300 a week. Well known on the Scottish golf links, he has been pulled up, more than once by club colleagues who have noticed that the soles of his boots have seemed desirous of parting company with the uppers.

Life annuities are being sold by the Japanese government.

CORNS RELIEVED instantly! PUTNAM'S Corn Extractor

Don't "Dose" Headache

Rub forehead and temples with Vicks; also melt in hot water and inhale the vapors.

This clears the head and usually brings quick relief, especially in those cases which so often accompany colds.

If headaches come too often, consult a physician.

VICKS VAPORUB

Using Automatic Pilots

British 'Planes Make Long Flights With Robot Control

The entire squadron of British night bombing aeroplanes, fitted with "robot" electrical controls, has flown continuously as far as 400 miles without human pilots taking charge. Routes from South England to Scotland have been followed, with automatic pilots, actuated by radio from the ground, in complete charge, and the aeroplanes brought safely to a predetermined destination. The automatic landing is accomplished by means of a weighted wire, which, as soon as it comes in contact with the aerodrome, causes the aeroplane to "flatten out" and glide in with the engine throttle back.

HEALTHY CHILDREN ALWAYS SLEEP WELL

The healthy child sleeps well and during its waking hours is never cross but always happy and laughing. It is only the sickly child that is cross and peevish. Mothers, if your children do not sleep well; if they are cross and cry a great deal, give them Baby's Own Tablets and they will soon be well and happy again. The Tablets are a mild but thorough laxative which regulate the bowels, sweeten the stomach, banish constipation, colic and indigestion and promote healthful sleep. They are absolutely guaranteed free from opiates and may be given to the new-born babe with perfect safety. You can obtain the Tablets through any medicine dealer at 25 cents a box, or by mail, post paid, from the Dr. Williams' Medicine Co., Brockville, Ont.

Maxims Treasured By King

Are Hung On Library Walls At Buckingham Palace

Maxims treasured by the King and hung by him on the walls of his library and business room at Buckingham Palace, were quoted by Sir Charles Fergusson, Governor-General of New Zealand, at a school which he visited during his farewell tour. They were, "Teach me to be obedient to the rules of the game. Teach me to distinguish between sentiment and sentimentality, admiring the one and despising the other. Teach me neither to proffer nor to receive cheap praise. If I am called upon to suffer, let me be like a well-bred beast that goes away to suffer in silence. Teach me to win, if I may; if I may not win, then, above all, teach me to be a good loser. Teach me neither to cry for the moon nor over spilt milk.

A Real Asthma Relief. Dr. J. D. Kellogg's Asthma Remedy has never been advertised by extravagant statements. Its claims are conservative indeed, when judged by the benefits which it performs. Expect real relief and permanent benefits when you buy this remedy and you will not have cause for disappointment. It gives permanent relief in many cases where other so called remedies have utterly failed.

Idea Is Alright

But People Should Build Foundation Under Air Castles

"If you have built castles in the air, your work need not be lost; that is where they should be. Now put the props under them," said Henry David Thoreau. Helen Keller says we [illegible] realize our ideals, but we can always [illegible] realities, and our ideas must be practical if we are to make a religion of them and live by them. Phillips Brooks expressed a high ideal in these words: "We reduce life to the pettiness of our daily living. We should exalt our living to the grandeur of life."

The people of the Middle Ages believed that certain words possessed magical powers.

Britain claims to have the finest gold-beaters in the world.

Use Minard's for Burns.

Where Children Broadcast

Alberta Red Cross Gives Interesting Program Every Week

In a certain broadcasting studio in the capital city of Alberta, there has been an unique broadcast in which the artists were quite young children. CJCA, The Journal, Edmonton, has for many years kindly donated its station to the Alberta Red Cross for one hour weekly. This period has been popular with the country people, especially with groups of women's service clubs, such as the Women's Institute and the U.F.W.A.

Programs consist of health talks, Red Cross news, dramatic sketches, etc. By special permission the program was turned over for an afternoon to a Junior Red Cross Branch of Grade Six pupils from Norwood school.

These young people gave an interesting feature in the presentation of a regular monthly meeting, with the young president in the chair, and the usual procedure of business, etc.

The entertainment period included a pageant of health, citizenship, and happiness, entitled the Red Cross Junior. This little play was composed for the occasion of the presentation to Canada of a beautiful banner from the British Juniors to Canadian Juniors during a visit to England of Miss Jean Browne, the National Director of Junior Red Cross in Canada. The clear young voices of the Juniors rang over the ether with splendid power, and the unusual broadcast of these twenty young Albertans was listened to with much interest by the many friends of the air.

Where Fate Steps In

People Who Come Through Serious Danger Caught By Simple Accidents

Not long ago William P. Scott, survivor of more than 200 parachute jumps and said to be the champion of the navy at this form of sport, received a fractured skull and other serious injuries near Washington. In a parachute jump? Not at all. In an ordinary automobile accident. Thus once more we see the scurvy tricks that Fate reserves for men who tempt her too much. Oscar Palmquist of Bridgeport, Conn., who found himself in the Atlantic Ocean after the Titanic went down, and who swam about for hours before he was picked up by a rescue ship, drowned a few years ago in a pond six feet deep. Edward Whymper, first man to climb the Matterhorn and conqueror of peaks all over the world, broke his collar bone when he slipped and fell while mounting the steps of a lecture platform. And Wallingford, we seem to recall, after swindling the world out of dollars, finally went to jail because he had forgotten to deposit funds to cover a $100 check.

That is the trouble with Fate, she doesn't come out into the open and fight fair with the weapons that have been chosen. She sneaks up and delivers a foul blow from behind. No doubt that is why she is so terrible.

Apples Bring High Price

Cold storage of McIntosh Red apples promises to make this variety a popular winter apple. British Columbia "Macs," are bringing the highest prices of any apples on the New York markets at present.

Campers Carry Minard's.

A Valuable Table

Isaac Feather, of Emaus, Pennsylvania, owns a library table built of 3,000 blocks of wood. The inlaying includes mahogany, walnut, red cedar, oak, poplar, and white pine wood which has been seasoned for more than 100 years. The designs include stars, diamonds, circles and semi-circles. Feather, a bricklayer, worked on the table in his spare time for a year.

Japan now has 37,000,000 postal savings depositors.

PAINS

No matter how severe, you can always have immediate relief:

Aspirin always stops pain quickly. It does it without any ill effects. Harmless to the heart, harmless to anybody. But it always brings relief. Why suffer?

ASPIRIN TRADE MARK REG.

Little Helps For This Week

"Giving thanks always for all things." Ephesians 5. 20.

Whatso it be, howso it be, Amen!
Blessed it is believing not to see.
Now God knows all that is; and we
[illegible]
Whatso it be.
God's will is best for man, whose will
is free;
God's will is better to us, yea, than
ten
Desires, whereof He holds and weighs
the key;
He knows all want; allots each
where and when—
Whatso it be.
—Christina G. Rossetti.

Thou alone knowest what is good for me. Thou alone art Lord of all; do therefore what seemeth to Thee best. Give to me or take from me, conform my will to Thine, and grant that with humble and perfect submission and in holy reverence I may be disposed to receive the orders of Thy eternal providence, and may equally adore every dispensation which shall come to me from Thy Hand.—Pascal.

Nurse Gains 7 lbs. In 2 Weeks With Yeast and Iron

"I am a nurse at the hospital," writes Miss Martha Burns, "and I want to let you know that I am glad to recommend your Ironized Yeast.

"It gave me a good appetite. I got strong and gained 7 pounds in 2 weeks. I could write all day about how much good Ironized Yeast did me. You would be surprised at the strength I gained in 3 or 4 days."

People everywhere are amazed at the wonderful benefits of Ironized Yeast. Many write they were doubtful when they started. But after taking it regularly for only 3 or 4 weeks they gained 5 to 15 pounds. Ugly hollows fill out. Skinny limbs become gracefully rounded. Blemished skin gets clear and beautiful.

Only when Yeast is Ironized is it more effective—for Iron is needed to bring out the weight-building and strengthening values of Yeast. Pleasant tablets in a handy bottle. Never cause gas or bloating. Safe—no harmful drugs.

Go to any druggist today and get a full size treatment of Ironized Yeast. If after this generous trial you are not delighted, your money back instantly from manufacturer.

Sheep Industry Growing

Although the sheep industry of the East Kootenay is still in its infancy, it is growing yearly in volume and prospects are for further expansion this year. The dry atmosphere, wide free ranges and the entire absence of disease are said to be special recommendations to the farmers to run small bands of sheep.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying a reliable remedy—Mother Graves' Worm Exterminator.

Prize For Wheat

The Saskatoon Board of Trade is offering a prize of $250 to the farmer in the district who produces the best wheat to be exhibited at the [illegible]

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate with no bad after-effects. Once you learn this [illegible], you will never deal with excess acid in the [illegible] way. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

MILK

Milk is the most important food for young children. The child may have milk as a drink, or on bread [illegible]. Milk is also used in [illegible] custards and puddings. Milk is a liquid, but it should not be thought of as a beverage, as something to drink in place of water. Liquids are necessary and desirable, and most of our foods contain a large percentage of water. Milk is a food containing about twelve per cent of solids. These solids are the very best food substances.

The most attractive home in the neighbourhood

HAPPY is the woman who by chance hears her home referred to as "the most attractive in the neighbourhood!"

Very often the difference between an ordinary house and one which excites instant admiration is merely a matter of paint. Your house ... painted as you know it should be painted ... will achieve new beauty and charm. You will take added pleasure in it; your children will be glad to call it "home."

B-H "English" Paint and other allied B-H products enjoy an unsurpassed reputation for beauty of colour and uniformity of shade ... for purity ... for economy. Let us supply you with everything you need for painting this spring!

TOWN OF TOFIELD
NOTICE

PUBLIC NOTICE is hereby given that the Council of the Town of Tofield passed a by-law numbered 290 on 22nd of April, 1930 approving and confirming a certain franchise agreement made between the town of Tofield of the first part and Calgary Power Company Limited of the second part and authorizing the Mayor and Secretary-Treasurer to execute the same on behalf of the town.

The said franchise agreement was embodied in and made a part of the said by-law.

A synopsis of the said agreement with the Calgary Power Company Limited is as follows:

The Town agrees to grant the Company a sole and exclusive 10 year franchise for the manufacture and supply of electric energy within the limits of the town.

The Company will have the right for the duration of its franchise to erect and maintain at its own expense all poles, wires and other materials used in its business in the town.

The Company agrees to furnish electric light and energy to the town on or before the 30th day of November, 1930.

Alternating current at 110 volts (2 wire service) is to be supplied for lighting and heating purposes and at the option of the Company either 3 phase alternating current at 220 volts and at a normal frequency of 60 cycles per second or single phase alternating current at 110 volts (2 wire services) or at 110 & 220 volt (3 wire service) at a normal frequency of 60 cycles per second is to be supplied for motors.

Where reasonably warranted transformers will be installed. The variation in the voltage supplied will not exceed 6 per cent. The town agrees to purchase from the Company all the power it may require during the term of the franchise and the Company is to maintain and keep in good repair and operation a complete system of all night street lighting, consisting of at least fifteen lamps which will be replaced by the Company when necessary, and to be of not less than 250 candlepower.

The price payable for the service are:—For each lamp not exceeding 250 candle power $3.00 per month; for each lamp over 250 candlepower but not exceeding 400 candlepower, $3.90 per month; for each lamp over 400 but not exceeding 600 candlepower $5.10 per month.

If any additional street lights are required which involve any extension of more than 250 feet, then an additional charge will be made of 20c month for each 100 feet in excess of 250 feet.

The maximum rates chargeable by the Company during the term of the agreement shall be as follows:—

(1) Domestic Service, available only for lighting, heating, cooking, domestic power and other uses, in houses and apartments used exclusively for residential purposes.

Service charge of $1.50 per month together with an energy charge on the following basis:

First 30 kilowatt hours per month—10c per kilowatt hour.

Next 20 kilowatt hours per month—10c per two kilowatt hours.

All over 50 kilowatt hours per month—10c per three kilowatt hours.

With a minimum monthly charge (including service charge) of $2.30 subject to prompt payment discount of 30c making $2.00 net per month.

(2) Commercial Service, available for all purposes where other rates do not apply.

Service charge of $1.50 per month for first 500 watts of installed capacity and 40c per month for each additional 250 watts, or portion thereof, together with an energy charge on following basis.

First 100 hours' use of installed capacity—10c per kilowatt hour.

All over 100 hours' use of installed capacity—10c per two kilowatt hours.

With a minimum monthly charge (including service charge) of $2.30 subject to prompt payment discount of 30c making $2.00 per month net.

(3) Power Service (alternating current) available for motors and commercial heating apparatus such as tailors' irons, coffee-urns, hot water heaters and stoves in commercial establishments.

Service charge of $1.00 per month per kilowatt ampere (K. V. A.) of installation (one motor horsepower or one kilowatt in electrical heating apparatus to be considered equivalent to one (K. V. A.) together with an energy charge on the following basis:

First 100 kilowatt hours per month per K. V. A. of installation—10c for 2 kilowatt hours.

All over 100 kilowatt hours and up to 200 kilowatt hours per month per K. V. A. of installation—10c for 3 kilowatt hours.

All over 200 kilowatt hours per month per K. V. A. of installation—10c for 6 kilowatt hours.

With a minimum monthly charge (including service charge) of $2.30 subject to prompt payment discount of 30c making a minimum net charge of $2.00 per month.

When the total revenue derived by the Company from the sale of electric energy within the town exceeds $6000.00 in any calendar year, the service charge shall be reduced by 10 cents per month and a like reduction shall be allowed for each additional $1000.00 of total revenue derived for the Town until a minimum service charge of 50c per month shall have been reached.

Churches take the domestic service rate and the commercial rate for the energy consumed.

All accounts except for street lighting are subject to a discount of 10 per cent calculated on dollars only if paid within ten days of date of rendering, with a minimum discount of 30c. All accounts will be payable in the town.

Should the Company's rates on the Calgary and Edmonton line be decreased then all things being equal the rates in town shall be correspondingly reduced, in case present water power rentals or taxes be increased, then the electric energy rates may be increased commensurately.

All motors shall be supplied by the Company free of rental charge.

The cost of all connections from the distribution system to the consumer shall be borne by the Company. The Company may require a deposit of a sum equal to twice the actual monthly minimum charge. If any account remains unpaid for more than 30 days after date of rendering the Company shall have the right to disconnect the service and remove the meter. There will be a reconnection charge in all cases except for the Curling and Skating rinks. The agreement is subject to the provisions of the Town Act and the Public Utilities Act. If the Company unreasonably defaults and continues to do so, in the observance of its convenants to be performed, then the town has the option to avoid and determine this agreement at any time and to purchase the holdings of the Company in the Town and to operate same.

The Company undertakes to indemnify the town for any damage arising out of the negligent construction or operation of its works and will submit plans of its distribution system within the town for the required approval of the Council. The town understands that the Company is a licensee of a Dominion Water power right and is subject to the laws and regulations concerning such rights. With such modifications or alterations as may be subsequently agreed upon; this agreement at the expiration of ten years may be renewed as provided in the Town Act 1927.

The Board of Public Utility Commissioners has approved of the by-law and the agreement of which the foregoing is a synopsis.

I hereby certify the foregoing to be a true synopsis of a proposed by-law of the Town of Tofield, which has been introduced and which will be finally passed by the Town Council within four weeks from the assent thereto (if such be given) by the Burgesses, and I further certify that Thursday, the 22nd day of May, A. D. 1930 at the Town Council Chambers, Main Street, has been fixed as the time and place for taking the vote of the Burgesses on said proposed by-law and further that the Poll therefore will be open between the hours of 10 o'clock in the fore noon and 7 o'clock in the afternoon.

Dated at Tofield this 29th day of April, A.D. 1930.

MASSEY-HARRIS DISC TILLAGE TOOLS
Modern agriculture is depending upon up-to-date machinery to lower operating costs and to increase profits. To meet this demand New Type Disc Tillage Implements have been developed.
For 1930 Massey-Harris Discs include a complete line of the latest styles in sizes for use with horses and tractor. They have many exclusive features that make them easy to handle and effective in operation, doing thorough work in high and low spots.
Built to give maximum cutting and pulverizing action, Massey-Harris Discs get the seed bed into shape quickly. Strong frame construction assures good service, and levers and controls are designed for convenient, easy operation.

TOWN OF TOFIELD
NOTICE
PUBLIC NOTICE is hereby given that the Council of the Town of Tofield passed a by-law numbered 290 on 22nd of April, 1930 approving and confirming a certain franchise agreement made between the town of Tofield of the first part and Calgary Power Company Limited of the second part and authorizing the Mayor and Secretary-Treasurer to execute the same on behalf of the town.
The said franchise agreement was embodied in and made a part of the said by-law.
A synopsis of the said agreement with the Calgary Power Company Limited is as follows:
The Town agrees to grant the Company a sole and exclusive 10 year franchise for the manufacture and supply of electric energy within the limits of the town.
The Company will have the right for the duration of its franchise to erect and maintain at its own expense all poles, wires and other materials used in its business in the town.
The Company agrees to furnish electric light and energy to the town on or before the 30th day of November, 1930.
Alternating current at 110 volts (2 wire service) is to be supplied for lighting and heating purposes and at the option of the Company either 3 phase alternating current at 220 volts and at a normal frequency of 60 cycles per second or single phase alternating current at 110 volts (2 wire services) or at 110 & 220 volt (3 wire service) at a normal frequency of 60 cycles per second is to be supplied for motors.
Where reasonably warranted transformers will be installed. The variation in the voltage supplied will not exceed 6 per cent. The town agrees to purchase from the Company all the power it may require during the term of the franchise and the Company is to maintain and keep in good repair and operation a complete system of all night street lighting, consisting of at least fifteen lamps which will be replaced by the Company when necessary, and to be of not less than 250 candlepower.
The price payable for the service are:—For each lamp not exceeding 250 candle power $3.00 per month; for each lamp over 250 candlepower but not exceeding 400 candlepower, $3.90 per month; for each lamp over 400 but not exceeding 600 candlepower $5.10 per month.
If any additional street lights are required which involve any extension of more than 250 feet, then an additional charge will be made of 20c month for each 100 feet in excess of 250 feet.
The maximum rates chargeable by the Company during the term of the agreement shall be as follows:—
(1) Domestic Service, available only for lighting, heating, cooking, domestic power and other uses, in houses and apartments used exclusively for residential purposes.
Service charge of $1.50 per month together with an energy charge on the following basis:
First 30 kilowatt hours per month—10c per kilowatt hour.
Next 20 kilowatt hours per month—10c per two kilowatt hours.
All over 50 kilowatt hours per month—10c per three kilowatt hours.
With a minimum monthly charge (including service charge) of $2.30 subject to prompt payment discount of 30c making $2.00 net per month.
(2) Commercial Service, available for all purposes where other rates do not apply.
Service charge of $1.50 per month for first 500 watts of installed capacity and 40c per month for each additional 250 watts, or portion thereof, together with an energy charge on following basis.
First 100 hours' use of installed capacity—10c per kilowatt hour.
All over 100 hours' use of installed capacity—10c per two kilowatt hours.
With a minimum monthly charge (including service charge) of $2.30 subject to prompt payment discount of 30c making $2.00 per month net.
(3) Power Service (alternating current) available for motors and commercial heating apparatus such as tailors' irons, coffee-urns, hot water heaters and stoves in commercial establishments.
Service charge of $1.00 per month per kilowatt ampere (K. V. A.) of installation (one motor horsepower or one kilowatt in electrical heating apparatus to be considered equivalent to one (K. V. A.) together with an energy charge on the following basis:
First 100 kilowatt hours per month per K. V. A. of installation—10c for 2 kilowatt hours.
All over 100 kilowatt hours and up to 200 kilowatt hours per month per K. V. A. of installation—10c for 3 kilowatt hours.
All over 200 kilowatt hours per month per K. V. A. of installation—10c for 6 kilowatt hours.
With a minimum monthly charge (including service charge) of $2.30 subject to prompt payment discount of 30c making a minimum net charge of $2.00 per month.
When the total revenue derived by the Company from the sale of electric energy within the town exceeds $6000.00 in any calendar year, the service charge shall be reduced by 10 cents per month and a like reduction shall be allowed for each additional $1000.00 of total revenue derived for the Town until a minimum service charge of 50c per month shall have been reached.
Churches take the domestic service rate and the commercial rate for the energy consumed.
All accounts except for street lighting are subject to a discount of 10 per cent calculated on dollars only if paid within ten days of date of rendering, with a minimum discount of 30c. All accounts will be payable in the town.
Should the Company's rates on the Calgary and Edmonton line be decreased then all things being equal the rates in town shall be correspondingly reduced, in case present water power rentals or taxes be increased, then the electric energy rates may be increased commensurately.
All motors shall be supplied by the Company free of rental charge.
The cost of all connections from the distribution system to the consumer shall be borne by the Company. The Company may require a deposit of a sum equal to twice the actual monthly minimum charge. If any account remains unpaid for more than 30 days after date of rendering the Company shall have the right to disconnect the service and remove the meter. There will be a reconnection charge in all cases except for the Curling and Skating rinks. The agreement is subject to the provisions of the Town Act and the Public Utilities Act. If the Company unreasonably defaults and continues to do so, in the observance of its convenants to be performed, then the town has the option to avoid and determine this agreement at any time and to purchase the holdings of the Company in the Town and to operate same.
The Company undertakes to indemnify the town for any damage arising out of the negligent construction or operation of its works and will submit plans of its distribution system within the town for the required approval of the Council. The town understands that the Company is a licensee of a Dominion Water power right and is subject to the laws and regulations concerning such rights. With such modifications or alterations as may be subsequently agreed upon; this agreement at the expiration of ten years may be renewed as provided in the Town Act 1927.
The Board of Public Utility Commissioners has approved of the by-law and the agreement of which the foregoing is a synopsis.
I hereby certify the foregoing to be a true synopsis of a proposed by-law of the Town of Tofield, which has been introduced and which will be finally passed by the Town Council within four weeks from the assent thereto (if such be given) by the Burgesses, and I further certify that Thursday, the 22nd day of May, A. D. 1930 at the Town Council Chambers, Main Street, has been fixed as the time and place for taking the vote of the Burgesses on said proposed by-law and further that the Poll therefore will be open between the hours of 10 o'clock in the fore noon and 7 o'clock in the afternoon.
Dated at Tofield this 29th day of April, A.D. 1930.

Returning Officer

WEDDING

On Wednesday, April 23rd, at the United Church Manse, Miss Mary Napier was united in marriage to Mr. Herbert Spilstead. Both parties are well known throughout the town and district and carry with them the best wishes of a host of friends. After their honeymoon trip they will reside on the bridegrooms farm in this district. Rev. Gordon officiated

EDITORIAL

DURING THE past ten years the Mercury has at different times offered the suggestion that a memorial be erected in town to perpetuate the memory of those Tofield heroes who made the supreme sacrifice in the great war. This paper also, some two years ago offered the suggestion that the piece of land lying immediately north and east of the station be converted into a small park. Now, from one of our valued subscribers comes the suggestion that the two foregoing ideas be combined and that the park be made and the memorial placed therein. The suggestion, which is Mr. J. W. Cookson's, is an excellent one and the Mercury is wholeheartedly in favor of it. The land in question is owned by the Canadian National Railways, but it is anticipated that no difficulty would be encountered in having it donated to the town for such a purpose. Located as it is at the rail and road gateways of Tofield, when properly prepared it would tend to make the first impression of new comers and visitors to Tofield pleasant—and first impressions are lasting.

For the first time in many years, Tofield has a live branch of a returned soldiers organization, the Canadian Legion. This body, in co-operation with and supported by all other public bodies and town and country people should be able to not only perpetuate the memory of our illustrous dead but also make what is now a barren piece of land, a beauty spot.

As it is necessary for someone or some body of people to make an initial move in matters of this kind, we suggest the Council discuss it, and if deemed wise, the Mayor call a public meeting where the necessary committees could be appointed.

With approach of both provincial and dominion elections live interest in politics is already being displayed. Primaries are being held and in a short time candidates will be chosen. Both Liberal and U. F. A. political camps are active and political news will soon be breaking fast. So far, the interest in this constituency centres around the U.F.A. and Liberal parties, we having heard no mention of a conservative candidate yet. As in the past, unless something very unusual or important turns up the Mercury will be independent, and will give all parties the best service possible at their meetings.

Incidently, it will be of little interest to readers to learn that the editor's personal political leanings are towards the Conservative party. This, however, means absolutely nothing as far as the Mercury or public is concerned.

Hannan and Carver Elevator Completely Destroyed

At six o'clock on Thursday morning as the section men were going to to work on the tracks they noticed smoke emerging from Carver and Hannan's grain elevator which was located just east of town. He immediately gave the alarm and in a short time the fire bell was clanging. Fire chief Lerbekmo had the chemical auto truck at the scene of the blaze in a short time but the fire had gained such headway that it was impossible to save the structure. To onlookers the fire appeared to be of inside origin the inside being a blazing inferno before the blaze appeared on the outside. The first outside blaze appeared at the top of the building. An attempt was made to save the office building and power plant, but the heat was too intense. When the elevator collapsed the burning pile fell almost on top of the office building. The loss is estimated at approximately $15,000 partly covered by insurance.

The elevator contained about 4000 bushels of oats and 250 bushels of wheat.

The elevator was in charge of Mr. George Bassett, who was working on Monday. He stated to the Mercury that he was quite unable to account for the blaze. He only elevated a small amount of grain on Monday and everything was in order when he left.

The elevator was erected only two years ago and was of modern construction. We understand it was partly owned by Hannan and Carver and the Maiden Elevator Company.

U. F. W. A. NOTES

The U. F. W. A. met at the home of Mrs. Johnson Ferguson on April 24th. Mrs. Ferguson read a paper on "What is our duty to the U. F. W. A." and Mrs. Burchard read the monthly bulletin on "Beautification and Horticulture". It was decided to hold a membership contest and Mrs. Peter Lee and Mrs. T. E. Seale were elected captains. Lunch was served by the hostesses, Mrs. Ferguson, Bighand, Lee and Munro.

Next meeting will be on May 8th at the Municipal building. Roll call will be answered by "Tempting dishes for the invalid" and Mrs. T. E. Seale will give a paper on "Linen and its care".

NOTICE

A special meeting of the U. F. A. will be held in the Town Hall on Saturday, May 10th, at 8:30 p. m. for the purpose of choosing eight delegates to represent the local at the nominating convention at Vegreville May 17. It is urgent that all interested in the U. F. A. attend.

[illegible]

Mr. and Mrs. John McGinitie and Mr. and Mrs. Maurice McGinitie motored to the city on Monday.

Mrs. T. D. Ferguson and little son spent a few days with Mrs. Ferguson's parents, Mr. and Mrs. J. H. Ingram.

Miss Pearl Gray of Lakeshore, spent a few days with Mrs. W. A. Mitchell.

Born—To Mr. and Mrs. J. Appleby on May 1st, a son.

Miss Fawcett, Mr. A. F. Schultz and daughter Helen visited at the Appleby home Sunday afternoon.

Miss Lillian Carlisle assisted Mrs. R. Eide a few days last week. Mr. and Mrs. Eide have moved over to the mine.

The girls are getting their basketball grounds ready for the summer on Mr. Burne's farm.

Mr. and Mrs. Welch, of Rabbit Hill spent Saturday night at the Fred Sutton home and visited on Sunday at the Henry Sutton and W. K. Mitchell homes.

A jolly time was had by the young people at the Schultz home Friday evening. Singing, reading, stunts, etc. occupied the fore-part of the evening, after which it was decided to hold their meetings monthly for the summer months. The following officers were elected: President, Martin Lawson; vice pres., Miss Fawcett; sec.-treas., Viola Lee; organist, Hazel Sears.

Mr and Mrs. Joe Harrison sr. and Mr. and Mrs. R. R. Harrison, of Lamont visited at the Harrison home Sunday.

AMISK CREEK

Several from here attended the funeral of the late Mr. Andrew Killam which was held in the Norwegian Lutheran church last Sunday. Mr. Killam passed away at the Vegreville hospital.

The ladies' aid held their monthly meeting at the home of Mrs. I. C. Olson last Tuesday. Many visitors and nearly all the members were present.

Mr. and Mrs. N. Sand and daughter from Edmonton visited with friends and relatives in the district last Sunday.

R. O. Berg and I. Annabo motored to Mundare last Friday to get some wheat ground.

Mr. and Mrs. I. C. Olson, Mrs. E. A. Moen and Mrs. P. O. Flaaten motored to Camrose and attended the Women's Missionary Federation conference held there April 29th.

Mrs. I. H. Olson visited her daughter Mrs. J. Blackburn at Lavoy last Sunday.

We are glad to report that Mr. and Mrs. O. C. Blackburn are out here on the farm again. Mr. O. C. Blackburn underwent a serious operation recently.

Mr. and Mrs. Jarrard are now residing on the Olson farm which they have rented. Their little boy having started to school. We welcome them to our neighborhood and hope they will like it here.

The West Helps the East

The reduced volume of wheat production in Western Canada last year, coupled with the serious tie-up in grain shipments owing to the absence of a profitable export market, has at least had the effect of opening the eyes of Eastern Canada to certain facts which formerly they did not realize or at all events were loth to admit did exist.

For a long period of years, even in fairly recent years, the opinion was voiced throughout the eastern portion of the Dominion that the West imposed quite a drain on the East, that the East was taxed to provide immigration, transportation and other services for the West and for which the East received inadequate return.

Now, apparently, this view is no longer held, for we find such an outstanding Ontario paper as Toronto Saturday Night, which more or less reflects the financial viewpoint of the city in which it is published, featuring an article which opens with the following paragraph:

"Behind the dark curtain of wheat, the emphasis which has been placed on failure of the last crop to move, the controversy over marketing methods with the resultant propaganda, is to be found the true economic value of the Canadian West. A clear and unbiased examination of the facts, the facts alone dissociated from the passions aroused by factional ... east and west alike. Upon such knowledge only can ... the manufacturer in his commitments for the summer and ... months of the year be founded. There is no disputing the fact that the ... prosperity and a curtailed volume of trade rests upon the ... purchasing power."

The admission of recognition contained in that last sentence is certainly refreshing and welcome to the people of Western Canada. Its recognition by the East must undoubtedly mean the rapid development of a better understanding between the vast sections of the Dominion which lie to the east and west respectively of the Great Lakes. And such better understanding is vital to the welfare of Canada.

The second fact which the experiences of the past twelve months have brought forcibly to the attention of the whole country is that the volume of freight traffic provided for our two great transportation systems by the grain shipments of the prairie provinces is an important, yea, a vital factor, in maintaining their net profits at a satisfactorily high figure. Not so long ago the railway managements contended that rates for western grain ...

Western Representatives:
HUNTER-MARTIN & CO., REGINA, SASK.

Expect National Livestock Policy Recently Formulated Will Greatly Aid Industry

Involving the appointment of a committee of three, and federal appropriation of $1,000,000, a national livestock policy has been formulated by the Canadian livestock co-operative organizations, following the recent all-Canada agricultural conference in Ottawa, it was announced by W. D. Mackay, president of the Canadian Livestock Co-Operative.

It is proposed that the committee of three, comprising a representative of the livestock co-operatives, a representative of the federal department of agriculture and a third to be chosen by these two, have the direction of the national policy, which will involve the construction of two demonstration abattoirs, one in eastern Canada and one in the west.

Location of the western plant has not been decided yet, but there is ... possibility it may be built in Regina.

The purpose of the policy is to enable producers to secure information in regard to processing, distribution and marketing, as well as production, so that not only will costs of processing be determined, but also grades may be established on a proper basis for both live animals and meat products. "It is the intention," said Mr. Mackay, "to cover all phases of the industry from producer to consumer. There are serious defects in production as well as in processing, distribution and marketing."

The policy outlined is the aftermath of the Ottawa conference in March between representatives of the federal and provincial departments of agriculture and of the livestock co-operatives, when a resolution was adopted requesting the federal department, in association with the co-operatives, "to investigate the reasons for the fluctuation in prices of livestock and livestock products and endeavor to construct ...

[illegible]

For the same period total marketings of Canadian cattle have declined 163,000 head, and hogs, 160,000.

"The seriousness of the trend can readily be grasped when the importance of the livestock industry to agriculture and the importance of agriculture to the national welfare is considered. Because of the relationship between agriculture and industry the problem is of as great interest to the city man as the farm resident, and it affects the welfare of eastern Canada just as it does that of the west.

"Moneys have been expended for research and laboratory work in connection with other commodities, and it is just as imperative that similar assistance be given to the livestock industry, at present a declining national asset. If steps are not taken to put it on a parity with other industries, all industry will suffer.

"Under present conditions the producer is afraid to increase his production. It is essential he receive some assurance that his ... will not be met by greater losses."

The vaults of the Bank of France now hold more than one-sixth of the gold reserves of the world. France stands second in this respect only to the United States. Her present reserves exceed those of Germany, Italy and Britain combined.

So far this year there have been 29 forest fires break out in British Columbia. The extent of the conflagrations [illegible] limited, however, with resultant damage comparatively light. There were 49 outbreaks during the same period last year.

The body of Robert Bridges, poet laureate of England, was cremated at Golders Green with such secrecy that even the closest friends of the family were unaware of it. The poet's widow and daughter were among the few who were present. There were no flowers.

En route to Mayfair, Saskatchewan, where they have purchased land, Louis Nadeau, accompanied by his family and a brother and sister, arrived at North Portal from Chicopee, Mass., in a truck fitted up as a home. They are returning Canadians and made the whole trip by motor.

Industry Growing In Value

The value of the mining industry to Manitoba is strikingly shown in a report of the Manitoba Chamber of Mines, which shows expenditures for the year 1927-28-29 as follows: 1927, $1,533,619; 1928, $4,653,182; 1929, $12,302,926. The wages item shows expenses in 1929 to have been eleven times as great as in 1927.

NERVES WERE BAD
Could Not Sleep
Tired All Day Long

Miss Florence Coutier, Bark Lake, Ont., writes: "I was troubled with my nerves, could not sleep at night and felt tired all day long.

"A neighbor came in to see me [illegible] morning and advised me to take

MILBURN'S HEART [illegible]

"The first box did me good and after the sixth box I was able to go back to my work."

Price, 50c a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Endured Years Of Hardships

Austrian Soldier Returns Home, But Is Now Italian Citizen

From the little village of Campi, near Trento, Italy, August Lorenzi, 38, departed 15 years ago as an Austrian soldier to fight the Russians. He has just now returned after years of hardships to find himself an Italian citizen, because his village, by the fortunes of war, became Italian. Lorenzi was captured by the Russians in 1914. He was sent to Semipalatinsk, then to Tomsk, Samarra, Tambov and [illegible]. He was made [illegible] until the [illegible]

Then he farmed out to a miller with whom he was working at the time of the revolution in 1917. The Bolsheviks sacked the town and burned the mill. Lorenzi fled at night. He passed several years of intense misery until in 1921 he became a farm hand. It was not until the following year he was able to send a letter to his relatives in Campi. He [illegible] know that the war was over.

[illegible] next year despairing of ever being able to leave Russia, he married the daughter of a farmer. In 192[illegible] the authorities at Campi, through the Italian ambassador at Moscow, began to exert influence to allow him to return. But the Soviet government, because he had married a Russian, withheld his passport for four years. At last they let him go with only eight dollars and a few articles of clothing.

Winnipeg Newspaper Union
Fashion

(By Eva A. Tingey)

YOUTHFUL AND CHARMING

All Tingey models are created in Paris and sketched by her there. The patterns are made and adapted for American women in New York by American patternmakers.

Juniors and their debutante sisters will love this smart little frock. It has box pleating to finish the skirt and swish jauntily about.

The sections giving such a professional effect are merely tucks, and these can be omitted if preferred. Returning to the box pleats again, you will note that these are large enough to keep well pressed quite easily.

While the collar and cuffs of the original model in scarlet reps were of cream wash silk (the in red silk), they would also be very effective in self material or in spotted and printed designs. Navy and white is always stunning for such models too, while greens, light blues, etc., are nice.

Besides reps, crepella, kasha, granite, fine serge, broadcloth, etc., are good.

This pattern may be obtained in sizes 14 to 20. It is ready for immediate delivery. It is hand cut.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Canadian Pacific Offer Attractive Summer Tours

Is your vacation anytime between May 15th and September 30th? If so, why not take one of two very interesting tours—at reduced rates offered by the Canadian Pacific? Consider first the Eastern Tour and what it has to offer. It will enable the tourist to visit Ontario — with it's famous lake resorts, Old French Canada with it's picturesque "habitants," and the Maritime Provinces — with the interesting fisherfolk and their equally-interesting craft. The tourist may travel to these places entirely by rail, or may choose to travel some of the way over the cool waters of the Great Lakes on a great white Canadian Pacific Great Lakes Steamship.

Various Ontario resorts at the lakeside provide fishing and bathing and, in fact, all summer sports. Niagara Falls, the beauty of which attracts so many people from all parts of the world, is only one of the many other salient features of this tour. One may on this eastern excursion, visit Old French Canada. There the traveller will see the many picturesque Catholic shrines that are scattered along the shady Quebec country roads — the "habitants" rolling past on their quaint wagons drawn by oxen. In Montreal the visitor will be awed by contrasts. There, drawn up at the dock, is the latest ocean liner, a product of the new world, whilst almost under its very shadow is the Bonsecours Market, where the French "habitants" sell their farm-produce just as do their relations in the old land. Then again the excursionist may resolve to pass as far as the Maritime [illegible] as far as St. Andrews where golfers and artists meet. In proportion to its size there are more magnificent homes and more prominent visitors in St. Andrews than any other town in Canada.

There is Digby, Nova Scotia—the fishing centre; Parrsboro, the Eastern Gate of Nova Scotia; Yarmouth and Weymouth, two more shipping centres and Old Orchard, Maine — a famous bathing resort.

PACIFIC COAST

Another fascinating excursion is that to the Pacific Coast. This allows of opportunities for the excursionist to see the majestic scenery associated with the Canadian Rockies, to see beautiful Lake Louise, to enjoy a round of golf over the famous course at Banff Springs, or to stay a week or so the the Emerald Lake Chalet enjoying the fresh mountain air and the scenery that is offered. One of the chief features of this tour in the nature of a side-trip, is a twenty-four hour motor detour which takes the visitor by way of the famous Banff-Lake Louise region, through the Kicking Horse Pass to the Yoho Valley, perhaps the most glorious and varied motor trip that has ever been offered on this continent. Then on by train through picturesque British Columbia with its multitudinous industries to Vancouver. After Vancouver, Victoria, the capital of the province renowned for its scenic resemblance to the Old Country. At this city, the famous Colwood Golf Course, the Dominion Astronomical Observatory with the second largest telescope in the world, and Butcharts sunken garden, are the chief attractions. At Victoria, two famous excursions are offered — a ten day cruise to Alaska and a seven day cruise of the West Coast of Vancouver Island. To those whose vacation period is short, the famous Canadian Pacific "Trans-Canada Limited" will prove valuable for speedy travel. It is equipped with de luxe all-steel sleeping cars, solarium lounge, women's lounge and bath, men's bath, smoking room, buffet with soda fountain, observation lounge and a valet service. It is finer and faster than ever, and the equipment of each train entails an investment of over a million dollars.

Canada Large Exporter Of Gypsum Products

Has Developed Trade With Thirty-Five Other Nations

A European trade conference dealing solely with Canadian gypsum products is scheduled to open in London, on April 30th, says R. E. Haire, head of Gypsum, Lime and Alabastine Canada Limited, who points out that, "in three years' time trade in Canadian-made gypsum products has developed with 35 other nations and has increased so rapidly that the company has now become the largest exporter of the materials in the world."

Dairy Production Higher

According to L. A. Gibson, provincial dairy commissioner, the winter dairy production in the province of Manitoba for the first two months of 1930 has been the highest in the history of the province, an increase for January of 6.9 per cent. and February 6.4 per cent. over 1929.

Germany's New Idea

A novel experiment in prison life in which "high grade" prisoners will be given two weeks' vacation a year, permitted to accept work from outside employers and given a share in the management of the prison, is about to be tried out in Germany.

Captain Franz Romer paddled a rubber boat from Lisbon, Portugal, to St. Thomas, Virgin Islands, 2,944 miles in 58 days. He was without escort and did not know how to swim.

New York University Given Valuable Papers

Early English Legal Documents Date Back 700 Years

A collection of more than 400 Early English legal documents, some of them dating back 700 years, has been presented to New York University by Judge Moses H. Grossman in the name of Frederick Brown, real estate operator and philanthropist.

Among the collection is a 12-foot parchment "pipe-roll," made of a series of skins sewed together and originally kept in a metal tube. It records that a sheriff, Richard Pyle of Southampton County, collected Crown revenues in 1628 "from the Jews for protection from being defrauded from the knights," and "from the knights for license to defraud the Jews."

Recipes For This Week

(By Betty Barclay)

CREAM OF POTATO SOUP

4 medium potatoes.
2 slices onion.
2 strips bacon.

Wash, peel, cut in cubes, and cook potatoes in enough water to cover until tender. Rub through a strainer. There should be 2 cups mashed potatoes and liquid. Add this mixture (left-over potatoes may be used) to 3 cups of thin cream sauce (3 cups milk, 3 tablespoons flour, 3 tablespoons butter). Season to taste. Add 2 tablespoons chopped parsley before serving.

A different flavor may be obtained by adding catsup, leeks or celery instead of onion. Cut leeks or celery in very thin slices crosswise and cook in with the potatoes.

KIDDIES DELIGHT

2 cups milk.
3 eggs.
4 tablespoons sugar.
1 teaspoon vanilla.
¼ teaspoon salt.
Few grains nutmeg.
Few grains cinnamon.

Beat the eggs until very light. Add the sugar, salt, vanilla and spices, then the milk. Stir till the sugar is dissolved, then beat well. Serve cold.

To carry away static electricity from oil trucks, iron chains that dangle to the ground are fastened to the frames.

SUNDAY SCHOOL LESSON

MAY 11

JESUS ACCLAIMED AS KING

Golden Text: "Hosanna to the Son of David. Blessed is He that cometh in the name of the Lord. Hosanna in the highest." Matthew 21:9.

Lesson: Matthew 20:29 to 21:46.

Devotional Reading: Hebrews 1:8-12.

Explanations and Comments

Preparations For the Triumphal Entry, 21:1-6. When Jesus and the crowd with Him approached Bethphage, on the Mount of Olives, not far from Jerusalem, he sent two disciples on ahead to make preparations for entering the city, bidding them find in the village an ass tied and a colt with her which they were to loose and bring to Him. If the owner objected they were merely to say "The Lord hath need of them," and he would send them. The horse was the symbol of war; the ass the fitting symbol of the Prince of Peace.

The Triumphal Entry, 21:7-11.—The disciples followed instructions and brought the ass. They put their loose [illegible] robes upon it for Jesus to sit upon, and the multitude with them spread their garments in the way [illegible] branches [illegible] the [illegible] spread them down for Jesus to travel over. "Some have ridiculed the idea of spreading branches on the road as offering incredible obstructions and dangers; and yet the orthodox custom in Russia, in a funeral procession, is to spread the route with branches of fir."—W. A. Grist. Because of John 12:13, it has been generally supposed that the branches were palm branches, although John only mentions the fact that the people came out from Jerusalem to meet Jesus bearing branches of palm. We know from Revelation 7:9 that palms were carried as symbols of victory and rejoicing.

John tells us that many people, excited by the news of the raising of Lazarus (which he records), hurried from Jerusalem to meet and do honor to Jesus, while following with Jesus was this other multitude of Galileans on their way to Jerusalem to keep the Passover. Both crowds united in crying, "Hosanna to the Son of David."

Canadian Literature

Efforts Of Our Writers Should Receive Loyal Support

The Sherbrooke Tribune says: "Many a man will pay fifty or seventy-five cents for some trashy American magazine, because he cannot make up his mind to buy a single Canadian book. Often enough, moreover, these are the very people who on every possible occasion proclaim their patriotism and their attachment to the things of their own country. Either they are utterly insincere, or their taste is pitiably deformed. The very real efforts of our writers to endow our country with a rich literature, solid and diverse in character, deserve better treatment than this."

Physicians have stated that a cough or a cold that lasts more than three weeks merits a general physical examination.

England obtained the pattern for her early churches from missionaries from Italy.

Some men make a specialty of getting into trouble.

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Others contain calomel and dangerous mineral drugs, which remain in the system, settle in the joints and cause aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect.

Avoid lubricating oils which only grease the intestines and encourage nature's machinery to become lazy.

A purely vegetable laxative such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleansed and constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red pkgs.

Important Letters Now In Dominion Archives

Canada Has Most Of Letters Signed By Sir John A. MacDonald

[illegible] signed by Sir John A. MacDonald has been added to the voluminous collection of his papers gathered together by Dr. A. G. Doughty, curator of the Dominion archives. It is an affidavit signed by Sir John on October 6, 1834, upon his appointment as a poll clerk in the Upper Canada election in [illegible] county. He was 19 years old at the time.

With the receipt of this letter, the Dominion archives now houses most of the important letters written by the first premier of Canada. Among the papers is the first draft of the British North America Act, in Sir John's handwriting.

Parachute Opens Itself

Was Pronounced Success In Test At Curtiss Field Recently

An automatic parachute which opens of its own accord after a jump, was demonstrated successfully at Curtiss Field by John Ranger, a professional parachutist. Ranger, his hands tied behind him, jumped from a plane at 2,000 feet. He landed safely in a tree.

So pleased was Ranger with the 'chute that he said he would jump from 20,000 feet with one. It was invented by John Ruby.

Would Rotate Building Stones

Suggesting that the various Canadian stones be used in rotation on projected Federal buildings, the Industrial Development Board of Manitoba has devised a plan to lay before the Dominion Government in which it is urged that future plans for building operations take into consideration the possibility of having various Canadian stones used in rotation, including the Manitoba Tyndall stone.

One of the attractions at Cannes, France, is a woman who lives on ground glass in a glass cage.

The world produced 1,222 million barrels of crude oil in 1928.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE
THE ORIGINAL GLASS SUBSTITUTE
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

MANY CHANGES ANNOUNCED IN NEW BUDGET

Ottawa, Ont.—Hon. C. A. Dunning, in his first budget speech announced:

Sales tax reduced from two to one per cent.

Downward revision of the tax brought in the last year on the sale and transfers of stock.

Duty on New Zealand butter increased one cent to four cents a pound.

Trade agreement now in operation with New Zealand will be terminated on October 12.

Trade agreement with Newfoundland to be announced soon.

Long list of tariff changes.

Increases in the general tariff on steel plate and structural steel, with duty lowered under British preference.

A countervailing duty to make Canadian tariff same as country of export on certain commodities, including certain vegetables, eggs and grain.

Ottawa.—An estimated surplus of $44,007,000 for the fiscal year 1929-30 was announced by Hon. C. A. Dunning, Minister of Finance, in his budget speech.

Together with this announcement came the important statement that "numerous and complex" changes in tariff rates are provided for.

Summarized briefly, the Minister told the House that the present budget tariff proposals involve, under the general tariff, increases in rates on 34 items and decreases on 46; under the intermediate tariff, increases in rates on 25 items and decreases on 96, and under the British preferential tariff, increases in rates on 11 items and decreases on 270. When the revision is completed, the Canadian customs tariff will consist of 1,188 items, of which 580 will be free under the British preference.

The changes proposed, the Minister [illegible] will have the effect of greatly [illegible]sing the British preference in the Canadian market.

The scene as Mr. Dunning made his statement to the House of Commons and the Dominion of Canada was tense with dramatic interest. On the floor of the House nearly every seat was filled. Galleries were packed. For weeks the word had gone forth that this would be the most far-reaching budget in a decade. It was referred to as "an election budget" — the pronouncement on which the government proposed to stake its political life. Long before the bells throughout the parliament buildings summoned members to their seats, impatient crowds gathered outside the public and private galleries of the Commons' chambers. Many women were there. They waited while the usual routine of prayers was gone through. Then the doors were thrown open and they flocked into the galleries.

Must Take Livestock Industry Seriously

Or Canadian Farmers Will Lose Business, Says Cattle Man

Winnipeg, Man.—Canadian farmers must look to their livestock producing as a serious industry or they will have it taken away from them, declared Col. H. A. Mullins, former member of Parliament for Marquette and one of the best-known cattle men in the Dominion here.

Just as big packing companies in the United States have undertaken to raise their own cattle, Canadian firms will be forced to do the same thing if farmers fail in this respect as they have done heretofore. In Montana, Col. Mullins said, abattoir companies are feeding 32,000 hogs and nearly 3,000 cattle.

Noted Barrister Dead

Ottawa, Ont.—Eugene Lafleur, K.C., one of Canada's most distinguished barristers, died here April 30, from pneumonia. Mr. Lafleur was prominently connected with most of the largest litigations which Canada has had in recent years. He was to have acted as the Dominion's representative on the board of arbitration which is to investigate the "I'm Alone" dispute with the United States.

Radio Stations To Fight Fires

Port Arthur, Ont.—To aid in forest fire battles, two radio stations will be operated from advantageous points in the Thunder Bay district this season. Communication will be established between observation towers and the chief ranger's headquarters.

Ramsay MacDonald Has Talk With Australia

Twelve Thousand Miles Bridged By Beam Wireless Service

London, England.—On April 30, in the cabinet room at No. 10 Downing Street the telephone rang promptly at 8.30 in the morning and Prime Minister Ramsay MacDonald, conning some papers in his usual chair at the head of the table, lifted the receiver and said: "Hello, is that you, Scullin?"

Thus was inaugurated the first direct beam wireless telephone service between England and Australia. The Labor Premier of Britain conversed with the Labor Premier of Australia, James Scullin, over a distance of 12,000 miles, and the chat went on for 13 minutes. The two premiers discussed Empire problems. The forthcoming cricket test matches between England and Australia in England and when they were likely to come together.

Though oceans and continents lay between them, each could hear the other distinctly. Others in the cabinet room had the benefit of hearing the conversation through earphones. The whole conversation was clear throughout. Premier Scullin's voice travelling through the air from the other side of the world, was only a trifle fainter to the listeners here than was Premier MacDonald's.

"I hope the day is not very far off when we shall have the physical distance between us by air passage too," Premier MacDonald said.

Good Market In Orient For Apples

British Columbia Growers May Build Up Big Business

Victoria, B.C.—Plans for invading Oriental markets with British Columbia apples are being shaped by the provincial government through the marketing branch of the department of agriculture, following the receipt of advices from Hon. Herbert Marler, Canadian minister to Japan, pointing to the possibilities of this business. A large market awaits the B.C. fruit in Japan and China, Mr. Marler said, and the department is anxious that the fruit industry take advantage of these opportunities.

The impression made by experimental shipments from here to large markets like Hong Kong, has been excellent, Mr. Marler stated, and should enable Canadian growers to sell large quantities there in the future.

The department is also anxious to promote the shipment of canned B.C. fruit and vegetables to the Orient, and Mr. Marler believes that a large business in this line can be built up. The need of extensive advertising to compete with huge American exports is stressed. Officials of the department will confer with the fruit, vegetable and canning industries in an effort to take advantage of these possibilities in a big way.

Studying Canadian Railway Methods

Reorganization Of Their System Planned By Soviet Officials

Winnipeg, Man.—Six officials of the Soviet Republic arrived in Winnipeg to study the methods and the facilities of the Canadian National Railways with a view of producing a complete reorganization of railroad practice in Russia.

"Traffic has increased to such an extent in recent years that we find ourselves unable to cope with present needs and consequently we must reconstruct our whole railway system," said D. E. Sulimoff, Vice-People's Commissioner for Ways of Communication of the Soviet Republic, who is heading the committee in its investigations. "We are particularly interested in the heavier track, the stronger motive power and the yard facilities, none of which are found in any European country."

Manitoba Seeding Nearly Done

Winnipeg, Man.—Seeding of wheat is about 80 to 85 per cent. finished in Manitoba and present prospects are favorable for early sowing of the entire grain crop, according to a summary issued recently by the Manitoba department of agriculture. A large number of farmers have all their wheat sown and are proceeding with the planting of their other crops.

Delegates From Canada

Montreal.—A thoroughly representative group of Canadian business men will leave for London, England, May 16, to attend the Federated Chambers of Commerce of the British Empire conference, starting May 28.

PRIME MINISTER PROPOSES NEW FISHERIES POST

Ottawa, Ont.—Prime Minister Mackenzie King has given notice of a motion providing a salary for a new Minister of Fisheries. Another motion standing in the name of the Prime Minister on the order paper declares that it is expedient [illegible] be a new Department of Fisheries. The salary of the Minister of Fisheries is set at $10,000, which is identical with that of the other Cabinet ministers.

The impression prevailing in political circles is that creation of the new portfolio will give Prince Edward Island representation in the cabinet. Since 1926, that province has been without ministerial representation, but it is recalled that at the time of the formation of his last cabinet, four years ago, the Prime Minister intimated that a minister from Prince Edward Island would be added. It is stated, however, that the government is considering the question whether to give the province representation through the new department of fisheries or through another department by the shuffling of portfolios.

Hon. J. E. Sinclair and R. J. Jenkins, both Liberal members for the dual constituency of Queens, and A. E. MacLean, Liberal member for Prince Albert, are mentioned for Cabinet appointments.

Another name prominently associated with the appointment is that of Dr. Cyrus MacMillan, a professor at McGill University and formerly of Prince Edward Island. Dr. MacMillan was a member of the Atlantic Fisheries Commission.

Creation of a separate department of fisheries with a minister and a deputy presiding at its head was recommended by the Duncan Royal Commission, which investigated conditions in the Maritime Provinces back in 1925 and 1926. About a year ago, W. A. Found was appointed as Deputy Minister of Fisheries to carry on such duties under the Minister of Marine and Fisheries, Hon. J. A. Cardin. Under the proposed legislation Mr. Cardin will devote his ministerial energies to marine.

Another legislative proposal bearing on fisheries is for the transfer to the new department of fish oils, used for manufacturing purposes, tempering of steel and the like. This task is now being performed by the Department of Agriculture under The Inspection and Sale Act.

It is contemplated also to increase from five to seven the number of appointments which may be made by the minister of fisheries to the Biological Board of Canada.

The purpose of the change is to give an additional representative to the fisheries industry of both British Columbia and the Maritime Provinces.

A Royal President

London, Eng.—The Prince of Wales has consented to become president of the Professional Golfers' Association, succeeding the late Earl of Balfour. The Prince always has taken a great interest in golfing and besides having held the royal and ancient captaincy has been captain at various times of several metropolitan clubs.

DEFENDS MARSHALL FOCH

Raymond Poincare, former premier of France, has taken up the pen to defend Marchal Foch against the criticism of Clemenceau's "Grandeur and Misery of Victory."

Japan Chooses Vancouver

First Trade Commissioner Arrives To Open Office At Canadian Port

Vancouver, B.C.—Japan has appointed its first trade commissioner to Western Canada in the person of Masao Suma, who has arrived in Vancouver to open an office here from which he will seek to stimulate Japanese trade with Western Canada and the Northwestern States.

"There are busy ports in the American part of my territory," Mr. Suma said, "but the fact that the Japanese government has selected Vancouver as the site of the office indicates the importance that my country attaches to the growing trade with this port."

Japan now has diplomatic, consular and trade representation in Canada. The trade commissioner will work in co-operation with the consular service, Mr. Suma said.

The volume of trade between Canada and Japan has increased twentyfold in the past 20 years, the new trade commissioner said.

Last year Canada's imports were $13,000,000, and her exports to Japan were $42,000,000, making a total volume of trade of $55,000,000, or twice as much as in 1919.

Britain To Establish Flour Regulations

Minimum Percentage Of Domestic Flour Required For Each Loaf

London, England.—The British Government has definitely decided to establish regulations requiring a minimum percentage of British wheat flour in every loaf, milled in Britain, according to the agricultural correspondent of the "Daily Express" to-day. The newspaper adds the minimum will be varying, not a fixed figure and that the government's policy will shortly be published in the form of a governmental "white paper."

May Amend Foods and Drugs Act

Ottawa, Ont.—Hon. J. H. King, minister of pensions and national health, introduced a bill to amend the Food and Drugs Act in the House of Commons recently. This provides for analysts who are employed by the provinces or municipalities, and who are not members of the department staff to be designated "Dominion Analysts" while so employed.

AN INTERESTED SPECTATOR

This photograph shows Stanley Baldwin (left), former prime minister of Great Britain, smoking what looks like a "Dawes pipe," with the Cambridge coach, watching the Cambridge crew train at Putney, Eng., in preparation for the classic Thames boat race, which was won by the light-blue of Cambridge.

Manufacturing Is Increasing On Prairies

All Three Provinces Are Sharing In Rapid Development Of Industry

Winnipeg, Man.—Progress of the manufacturing industry of the prairie provinces during the past year was testified to by C. E. Harvey, of Winnipeg, retiring chairman of the prairie division of the Canadian Manufacturers Association, at the annual meeting here.

Mr. Harvey said many new factories came into production on the prairies last year, the value of products produced in 1930 totalled more than $340,000,000 and all provinces — Manitoba, Saskatchewan and Alberta — shared in the development.

Saskatchewan, famed as a wheat producing area, can now also lay claim as a manufacturing province of importance, said Mr. Harvey. Last year the manufacturing industries of the prairies distributed a pay-roll of more than $75,000,000 and the general public are rapidly coming to the realization that factories have a definite value to the community. Industrial workers created a "home market."

Amendment Was Defeated

Move For All-British Beer Voted Down In House

London, England.—The Conservatives lost their fight in the House of Commons for all-British beer. They had two amendments to the beer tax resolutions of the budget. One would diminish the increased beer duties proposed under the budget. The other would give a rebate on beer made from home-grown malt hops. But the chancellor of the exchequer was obdurate. He would accept neither.

Under a combined Liberal-Labor vote the first amendment faced an adverse majority of 131. The second found an adverse majority of 125.

DISCUSS BONDING OF COMMISSION GRAIN BUYERS

Ottawa.—Methods of protecting farmers from defalcations of commission grain merchants were discussed in the House of Commons Committee on Agriculture. It was pointed out that elevator operators were fully bonded to protect persons who stored grain with them. In the case of commission merchants protection to the same extent was not af[illegible].

The question was raised during a discussion of the new Grain Act by Hon. H. H. Stevens (Cons. Vancouver Centre), who thought there should be some provision in the act for the bonding of commission merchants.

E. B. Ramsay, chairman of the Board of Grain Commissioners, thought commission men might be put out of business if they were required to put up higher bonds than now.

Doubt as to whether commission merchants served any useful purpose was expressed by E. J. Garland (U.F.A., Bow River). He said the business was dying out, and wondered if the services performed by these men to the trade compensated for the losses sustained through their occasional defalcations.

The commission men were an important factor in competition with elevators, said Mr. Ramsay. Their operations acted as a curb on the tendency of elevator companies to increase their charges.

In this case, Mr. Garland said it might be a good thing to raise the bonding requirements. Then those commission men who were able to make a profit from the business could still carry on and the farmers would be protected.

Strict penalties are provided in the new Grain Act for breaches of its provisions respecting commission merchants. A penalty of not more than two years imprisonment or a fine of not more than $5,000 on indictment is provided for any person who buys, sells or arranges for the weighing, inspection or grading of western grain for reward without a commission merchant's or grain dealer's license.

Some discussion arose about this section, particularly a clause placing the burden of proof of innocence on the accused. Some members thought this was too severe and Mr. Stevens objected on the ground that it conflicted with the general principles of British jurisprudence. The committee has almost completed its routine review of the act. Many difficult and contentious sections have been left over and will be taken up at later sittings.

RESOURCES BILLS HAVE BEEN GIVEN SECOND READING

Ottawa.—Legislation for the return of the natural resources to the Prairie Provinces has moved forward rapidly in the House of Commons. Following the presentation of the budget, the bills respecting Alberta and Saskatchewan passed through the committee stage and were given second reading.

It then took up the bill providing for the transfer of the Peace River block and the railway belt in the province of British Columbia to the provincial authorities which received similar treatment.

Most of the debate took place in connection with the Alberta bill and the Saskatchewan legislation passed with little discussion.

The discussion centred around an amendment to the Alberta bill designed to give that province certain rights contained in the agreement with the province of Saskatchewan which were not embodied in the agreement with Alberta.

The Alberta agreement for a Royal commission to investigate the financial relations between the province and the Dominion since 1905 in order to determine what sum should be paid the province, Hon. Lucien Cannon, solicitor general, explained.

The government of Saskatchewan wanted this investigation carried further back to 1870, the time of the taking over of the Northwest Territories by the Dominion. In addition it wanted the courts to determine the validity of restrictions placed on the province in connection with education. By the amendment these rights were extended to Alberta.

Hon. R. B. Bennett suggested that following the ratification of the agreements parliament should pass an act to give full effect to the transfer which would take place when Imperial legislation was passed.

Hon. Ernest Lapointe, Minister of Justice, said the government would take the matter into consideration and would do everything necessary to carry out the agreements.

Praise For Universities

Colleges Of Canada Have Greatly Impressed British Headmasters

Edmonton.—Glowing praise for the universities of Canada and that of Alberta in particular was offered by headmasters of English schools who visited Edmonton, at a dinner given by the provincial government in the honor.

Speakers during the evening stressed the wonderful opportunities which await British boys who come to Canada to finish their education under Canadian conditions and the important part such youths might play in the building of Canada.

The dinner was featured by the meetings of former British school pupils with the headmasters, the dinner having been primarily arranged to allow such renewing of acquaintances.

Premier Brownlee extended greetings of the provincial government to the visitors.

Livestock Ranch For North

Company Interested Has Applied To Ottawa For Lease Of Land

Prince Albert, Sask.—Prairie interests planning to expend $300,000 in establishing a livestock ranch northeast of Big River, have applied for a lease on a third of a township in the vicinity of that town, it was revealed by L. G. Patterson, Dominion lands agent. He stated the area has been inspected by those behind the project and found to be ideal for livestock ranching.

Included in the livestock which it is intended to raise are sheep and Angora goats, Mr. Patterson has been informed. The application for a lease has been forwarded to Ottawa. The names of those behind the scheme have not been divulged.

Returning To Canada

Montreal.—More than 2,000 French-Canadians who have been domiciled in the United States have made plans to return to Canada, according to Monsignor J. H. Prud'homme, Bishop of Prince Albert, Sask., who has been in Montreal.

Duchess Completes Trip

London, Eng.—The Duchess of Bedford, 64-year-old aviation enthusiast, completed a round trip to Capetown when she landed at Croydon airport April 20.

Czecho-Slovakia exported $1,617,000 worth of pencils last year.

Local and Personal

Born—To Mr. and Mrs. J. Appleby on May 1st, a son, John Keith.

Mr. F. O. Bell and son Darel was in town over the week end.

Many Tofielders motored to Edmonton on Monday to see the basketball game between the Grads and the Chicago Taylor-Trunks. Among those were, A. B. Clutterham, Eva Clutterham, Mr. and Mrs. McLaughlin, Mr. and Mrs. Calvert, Frank Wood, Mr. and Mrs. Sam Johnson, Nova Wood, Bob Hopgood and others.

On Friday evening at 6:30 p. m. sharp the first baseball game of the season will be played when Tofield and Ryley meet on the local diamond.

The local C. N. R. staff have got their court into shape for playing. After considerable rolling the court is in good condition for playing. We understand that they have placed their court at the disposal of all paid up members of the Tofield Tennis club and in return for this the club are issuing complimentary membership tickets to the C. N. R. staff to play on their courts.

CAMROSE NORMAL DEFEATS TOFIELD BASKETBALL TEAM

On Friday evening last the Tofield boys basketball team motored to Camrose to play the Camrose Normal and were defeated by the score of 45-34.

The game was played on the Normal floor which is very small and to a certain extent handicapped the Tofield players. It kept the teams bunched together and combination between the Tofield players who are used to a much larger court practically impossible.

The players making the trip were: Bert Swift, Jack Cookson, Bube Hetzler, Art Francis, Frank Dunn, Sid Worton and Willie Worton.

THE STORY OF "THE RIVER PIRATE"

"Sandy" is tossed out of a ship chandler's shop and lands at the feet of Marjorie Caxton.

The boy hurls a marlin-spike at the bully who has ejected him from the shop and, although Marjorie intercedes in his behalf a policeman takes him to jail.

The girl goes home to her father Jerry Caxton, a detective, who refuses to intercede for the boy.

Marjorie reads that Sandy has been sentenced to the reform school and writes him a note of sympathy.

He arrives at the institution, where "Gerber", a guard, takes him to the loft where "Sailor Frink," an older inmate, works at his trade as a sailmaker.

It develops there is a warm bond of understanding between the giant sailor and Gerber.

Because Sandy learns to do Frink's work, the prison board paroles the older man, who discloses to Sandy a plan to help him escape, which he does, with Gerber's assistance.

Frink awaits him in the car, whisks him away and, after outwitting police officers, they reach the river docks of the big city.

Frink meets "Shark" and a river captain in a restaurant, where the latter promises to purchase stolen ship materials. Later Caxton appears and questions them about Sandy's whereabouts.

Frink, Shark and Sandy open a ship chandlers shop as a blind to conceal their piracy and when Caxton calls there and is on the verge of acquiring evidence of their guilt he and Frank stage a fist fight which lands them both in a hospital.

Caxton threatens Shark and he promises to tip the officer off the next time his partners stage a robbery.

Although Marjorie has revealed her love for Sandy, she refuses to marry him because she fears her father will object. After she hears Shark "snitch" to the detective, she attempts to dissuade him from ordering a police raid, failing, follows him to the warehouse.

There, after a pistol battle, Frink is shot down, but persuades Caxton to let Sandy escape, promising to "take the rap for the kid".

The story ends with Caxton consenting to Marjorie's marriage as Frink receives another reform school sentence and promises to "go straight" after he "does the stretch".

Local and Personal

Mr. McLaughlin and Mr. Miller of Unity visited with Mr. Leach this week.

Mrs. Shaw and daughter, Miss Meadowcroft and Miss Armstrong of Edmonton were visitors at the home of Mr. and Mrs. R. Skitch on Sunday.

Miss Erickson of Edmonton who has been visiting the Glover home returned home on Monday night.

Miss Annie Hobson was home from Coronation over the week end.

Mrs. L. Scott and Mr. F. Griswold motored to the city on Sunday to see Mrs. Griswold who is in the hospital there.

Mrs. McLaughlin, Mrs. Bissett and Mrs. Calvert motored to the city one day last week.

On Thursday, April 24th, Miss Helen E. Jubb, daughter of Mr. and Mrs. E. Jubb, of Tofield, was united in marriage to Mr. Andrew MacCallie. The ceremony took place at Saskatoon. Miss Jubb who spent practically all her school life here, enters the realm of matrimony accompanied by the best wishes of a host of Tofield and district friends.

Mr. D. Martin of Oklahoma, U.S.A. is visiting with his aunt and uncle, Mr. and Mrs. C. Fry. He left Oklahoma on Thursday April 24th at noon and arrived here on Wednesday afternoon, April 30th, covering well over 2000 miles in a model T Ford. This is his second visit to Tofield having visited here some four years ago.

A very enjoyable evening was spent at the Jacobs' home on Friday last when a number of Esther's friends pleasantly surprised her. The occasion being her birthday. The evening was spent in playing games and singing songs. At midnight a delicious lunch was served and the young people left all reporting a good time.

A quiet wedding took place at the Tofield United Church Manse on Thursday April 17th, when Miss Annie Margot Johnson of Ferintosh and Mr. Edward Hall of Whitford were united in bonds of holy matrimony. Rev. Thom Gordon officiated. Mr. and Mrs. Edward Hall are residing in Tofield.

COMMUNICATION

Editor, Tofield Mercury
Dear Sir;

In respect to your able editorial of last weeks issue re war veteran's memorial and small park, I would like to say that I had no idea when I spoke about the matter to you that you would mention my name, but it is a worthy cause and something that ought to have been attended to long years ago, but better late than never. I will be proud to work and do all I can to further the project, now I would like to make a few suggestions. I believe the veterans of the Boer and great war have reorganized lately and formed a rather strong body of men and of course every man of them will be willing to do all in their power to perpetuate the memory of fallen comrades of the great war. I think they and relatives of those gallant boys who paid the supreme sacrifice should get together and decide where the cenotaph and memorial tablet should be placed surrounded by a plot of land to be made park like and all dedicated to the brave heroes of the two wars, the next move would be the securing of the said plot then it should be plowed and cultivated this summer to be in good shape for laying out and planting next year but there would be nothing to hinder going ahead this year and building the memorial. The war veterans Legion might appoint committees to direct the work, outsiders could be appointed to canvas for contributions of work and cash and let everyone who is in sympathy, work with a good will to see this is made something that the town of Tofield and district may be proud of. Others might air their views on this belated but important object. Thanking you for space.

Yours Sincerely
J. W. Cookson.

WEED CONTROL PROGRAMME

The Alberta Department of Agriculture has now completed its plans for the weed control programme of 1930.

Under the Field Crops Branch the Province has been divided into fifteen districts. In each of these districts a Field Supervisor will be stationed. His duties will be to co-operate with weed Inspectors appointed by municipal Councils, and the enforcement of The Noxious Weed Act.

Farmers of the Province are urged to avail themselves of the services of these men. There office centres are being advertised in this issue.

The Watchful Eye Saw

Some of the ladies collecting for a game of "Bowls" at Bert's parlors.

Bill Chapman and Oliver Letourneau rushing in opposite directions to the municipal offices.

Jas. Rogers and John Chapman on main street talking over the coming election. Elgin Seale and John Morton doing the same.

Bissett and Cory entering the stock exchange building.

Fred Griswold delivering a load of peepers to the express office.

Fred Imler gassing in the back lanes with Harold Hicks.

Bert Calvert and Lem Abbott doing a black and white skit.

Bill Hay burning the road to the [illegible].

"Lorry" Scott giving "Jhon Marie" an airing on main street.

U. F. W. A. NOTES

The U. F. W. A. met at the municipal building on May 8th. Delegates were chosen to represent us at the annual convention at Vegreville by nominating a candidate for the forthcoming election.

"Linen and its Care" was the topic of an excellent paper given by Mrs. T. E. Seale.

Mrs. Warr Provincial President and Mrs. MacNaughton District Director are to be with us at the next meeting, which will be held at the women's Institute building on Wednesday, May 21st, at 2 o'clock sharp. Ministik and Bardo locals are cordially invited to attend.

Roll call is to be answered by "Our favorite flower, and why." Mrs. J. Francis will read a paper on "The Sunny Side of Life." Will members please bring their luncheon cloths.

A new edition of the U. F. W. A. Cook Book will be published shortly. If you want one please tell the secretary.

W. STUTZMAN ERECTS GREASING PALACE

In connection with his filling and service station W. Stutzman is this week completing the work on a greasing palace. The building which is of concrete foundation, frame and corrugated iron, is 30 x 50 ft. It will be used chiefly for washing and greasing cars, a large cistern having recently been installed or rather excavated. A certain amount of minor repair work will also be done.

HARRY A. WHITE CHOSEN AS LIBERAL CANDIDATE FOR THIS CONSTITUENCY

On Saturday last at an enthusiastic Liberal convention held at Vegreville Harry A. White, barrister of Mundare was chosen as Liberal candidate in the forthcoming provincial election for the Vegreville constituency. He was chosen by the narrow margin of one vote over A. T. Stewart of Holden, the votes being 46—47.

J. D. Hannan, candidate in the previous election was also nominated but he stated he did not think it was proper to allow his name to go before the convention as he had left the constituency.

Mr. Hannan addressed the meeting at some length, infusing confidence and enthusiasm into the convention.

It was pointed out that the situation was not the same as that which confronted the Liberal party four years ago and the opinion was expressed that when the ballots were counted on June 19th, the Liberal ranks would be greatly swelled in the provincial house. Each of the speakers referred to a noticeable falling away from the almost solid rural support which the government had previously enjoyed.

"Alberta has allowed Premier J. E. Brownlee to usurp the offices of the government and centre them on one man—himself," Mr. White stated. "Your member has no more authority in the house than I have, nor have any other representatives. It has boiled down to a one man government entirely and even the members of the cabinet have little to say."

Officers of the Vegreville Liberal Association were elected as follows: T. Kjosness, honorary president; A. Stewart, Holden, president, Mr. Primrose, Vegreville, secretary.

The fullest support was offered to the candidate by Mr. Stewart and he urged the strong gathering to bear in mind the necessity of going into the campaign with determination to win.

Among those attending the Liberal convention at Vegreville on Saturday were: Mesdames McCauley, Firth, Swift, Kendall, W. Chapman, E. W. Rogers, A. Innes, Cory and the Misses Clement. Messrs McCauley, Jas. Rogers, W. Chapman, J. Chapman, C. Swift, Cory, Campbell, E. Kallal, Craig, and Kendall.

BANK OF MONTREAL DISTRIBUTES EXCELLENT BOOKLET

One of the most interesting and useful booklets published in recent years is now being distributed by the bank of Montreal. The booklet which numbers over 70 pages of text matter and illustrations deals with the canning of meats, vegetables and fruits. With the aid of this book the town and farm housewife can greatly increase the variety of the family menu, the attractiveness of her table and the general health of the family. It deals exhaustively, yet plainly, with the different systems of canning meats, fruits and vegetables and is really a splendid booklet for the housewife to possess. We are indebted to Mr. Rowe for our copy and he informs us the bank has a number for distribution. The Mercury cannot too strongly urge the housewives of this district to procure a copy. It is distributed free.

TECHNICIANS TRANSFORM BRIGHT DAY INTO NIGHT

One of the most brilliant pieces of work ever done within the confines of a motion picture studio was recently accomplished at the Paramount studio in Hollywood. Technicians turned the brightest California day into a black night, and what's more, kept it that way.

The work was done for "The Docks of New York" starring George Bancroft showing at the Variety theatre on Saturday.

Inasmuch as almost all of the action of the play is done at night, it fell to the lot of the technicians to prepare a set in which no outside ray of light would be permitted to enter. The set was built on one of the massive stages and transformed the scene to a honky-tonk inn located along the waterfront of New York. A huge black canvas hung all around the set, and the actors and technicians toiled for several weeks with only a ray of light from a large spotlight flooding the scene.

On many occasions the actors saw the light of day only upon going to work in the morning. They were kept on the set long after the sun had set, when emerging, stepped right out into a real night.

Bancroft's new starring picture is one of the best he has ever done to date. The story is an original one from the pen of John Monk Saunders, who wrote "Wings" and "The Legion of the Condemned."

He is supported by an able cast including Betty Compson, Baclanova, Clyde Cook, Mitchell Lewis and Gustav von Seyffertitz among others.

The C.G.I.T. are holding a silver tea and sale of home cooking on Saturday, April 17th. The proceeds going towards the girls camp expenses. Come and help the girls.

CADET ANNUAL INSPECTION

The annual inspection of Cadet Corps 635 Tofield, took place at the school grounds on Thursday May 8th.

Capt. R. L. Mitchell (P. P. C. L. I.) of Military District No. 13 was the inspecting officer.

Twenty-eight Cadets were on Parade, and the various movements in Rifle and Squad Drill were very pleasing to Captain Mitchell. The Signal Squad scored an even 90 per cent. Lieutenant Horace McHeffey had charge of the Parade, with Sergeant Jack Swanton in command of No. 2 Section, Corporal Blake Clutterham had charge of the Signal Squad. Corporal Ray Martin Head Marker.

A very pleasing part of the programme was the presentation of the 1930 Button to Sergt. Jack Swanton on target shooting, this cadet shot a total of 184 out of 200 and was closely followed by his brother Al, these boys had to shoot six targets before Jack won out.

At the request of Captain Mitchell and by kindness of Principle J. T. Bulloch the cadets were given the balance of the forenoon off. The inspection closed by cheers for the King.

Reports and equipment were reported to be in fine shape.

The cadets have been in charge of A. B. Clutterham for some time, and their excellent showing is largely the result of his energy and zeal in the performance of his voluntary duty.

NEW APPOINTMENT

R. G. McNEILLIE

Prominent among the spring promotions of Canadian Pacific Railway officials was the appointment of R. G. McNeillie, as assistant passenger traffic manager of eastern lines, with headquarters at Montreal. Mr McNeillie, who was general passenger agent, at Winnipeg, for eight years, left at the end of April for the east, his new appointment becoming effective May 1.

Mr McNeillie entered the service of the Canadian Pacific Railway in 1901, as a stenographer in the general passenger department, at Winnipeg, becoming chief clerk in 1905. In that year he became acting district passenger agent at Nelson, B.C., and district passenger agent at Calgary, in 1910. He was promoted in 1913 to the position of assistant general passenger agent, western lines, with headquarters at Winnipeg, becoming general passenger agent in 1922.

Before his departure for Montreal, Mr McNeillie was remembered by the members of the passenger department from the head of the lakes to Field, B.C., and at Minneapolis with a handsome liqueur set, with cut glass decanters and glasses, and a wardrobe suit case, the presentation made by C. E. McPherson, who is now acting in an advisory capacity to the passenger department.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Pleased With Tour

British Headmasters Enthusiastic Over Reception Accorded Them In Canada

The party of English headmasters, who have been touring Canada, returned to Toronto enthusiastic over the reception tendered them throughout Canada and confident that the tour would result in the right kind of English boy being sent to Canada.

Dr. Cyril Norwood, chairman of the party, said that after studying Canadian educational methods, they would advise "quality immigration."

"We shall not advise our boys to come to Canada, unprepared, without money, expecting to find posts waiting for them," said Dr. Norwood. "We shall tell them there are excellent universities, and that after leaving them they must make opportunities for themselves." Dr. Norwood believes that members of the Nordic strain are easily assimilated into the country, but that the flow from central Europe should be stopped.

Asthma Doesn't Wear Off Alone. Do not make the mistake of waiting for asthma to wear away by itself. While you are waiting the disease is surely gathering a stronger foothold and you live in danger of stronger and yet stronger attacks. Dr. J. D. Kellogg's Asthma Remedy taken early will prevent incipient condition from becoming chronic and saves hours of awful suffering.

MacDonald's Message To McGill

Turns To Scriptures For Advice To University Students

Premier Ramsay MacDonald drew inspiration from the Scriptures when asked to pen a message to McGill students through the medium of the McGill Annual, which is dedicated to him.

"I write this looking over the rural grace of Chequers Park, but with McGill in my mind," Premier MacDonald states in his message. "You ask me for a few words more for the students. [illegible] over thy hand findeth to do, do it with all thy might.'"

Worms are encouraged [illegible] conditions of the stomach [illegible] ols, and as a subject [illegible] Powders will alter these conditions almost immediately and will sweep the worms away. No destructive parasite can live in contact with this medicine, which is not only a worm destroyer, but a health-giving medicine most beneficial to the young constitution.

An order was made recently, at Blackpool, Eng., for the payment of a debt of $80.94, at the rate of six cents a month, which will require more than 80 years to clear up the account.

Elevated playgrounds about 14 feet above street level are proposed for the use of children in New York's crowded tenement districts.

Can "Good" Be Accomplished By "Force"?

Through the ages as man has struggled upward from his caveman state to his present condition of semi-civilization—for it requires only a hurried glance through the columns of any daily paper any day to prove that man is not yet fully civilized—he has carried with him the brute instinct to try and accomplish things by force rather than by persuasion, instead of trying to win support to his views and convictions he has tried to force it. The more civilized the better educated man becomes the more does he rely upon appeals to reason instead of having resort to force. None the less the state of the nations today and our tendency to resort to the power of legislation and law to enforce opinions upon others, reveals how largely we still depend on force to govern our everyday affairs.

The question therefore naturally arises: Has any definite lasting good ever come to humanity through the coercive action of force? [illegible] a single instance in the whole range of human history where [illegible] has been the [illegible] and sole agency in changing the mental attitude, the belief, the convictions, or the conscience-sense of any one normal intelligence? Without reserve one may venture to say "No" to both questions.

There is profound truth in Butler's couplet: "He that complies against his will is of his own opinion still." One may be persuaded to change one's mind, to take a different viewpoint, to espouse another belief, to modify or discard a long held conviction, to give conscience a new direction, and through it all to act differently, the action being either good or bad according to the prevailing general opinion, but it is sincerely to be doubted that force, no matter what its form or its avowed purpose, ever has or ever will bring about the only thing, a change of mind and heart, that is necessary to produce a new line of action. Without the voluntary conversion of the individual mind and heart, that is of thought and conscience, there can be no reasonable expectancy of bringing about definitely, permanently and dominantly a new condition, social, economic, political, ethical, or moral. All our social reformers, our political leaders, our legislators, would do well to ponder this thought and pay closer heed to the lessons of experience and history.

If we would study impartially the action of unloosed force directed with the ostensible purpose of producing eventual good, we may turn our eyes toward Russia today. True, the conflicting reports coming out of the country [illegible] to draw conclusions with a certain reserve, yet there is evidence of what appears to be authentic to warrant the present view that the Soviet Government of Russia is using compulsion in the fullest meaning of the term to impose its minority, compactly organized will upon the unorganized great majority of that vast country.

The Communists may tell us, as well as some three-fourths of the people of Russia, that persuasion through "propaganda," is their chief agency for the building of a "New Russia," but it is propaganda backed by armed force, by secret police, by studied cruelty, and by unrelenting terrorism. Putting the most charitable construction upon the Soviet's methods for the complete communization of Russia, they are trying to do what they consider to be good practically altogether by the exercise of force. A marvelously organized minority seeks to compel a helplessly disorganized majority to accept without question its views as to what is best for the political, social, economic and moral well-being of the whole.

[illegible] tells us that this cannot be done. Reform by force lasts just so long as the force which brought it about is strong enough to maintain it. Force not only invites opposition, but generates it. [illegible] late the opposing force becomes the more powerful and we have another clash of forces, more disturbance and confusion, reaction or perhaps some more compulsory reformation. But we cannot say confidently that out of it all has come a single definite step of progress. Force is the antithesis of cooperation, and without the voluntary co-operation of all the interests involved there can be no genuine progress.

What is true of Russia just now would be equally true of any other country or state or community. No matter how desirable the proposed or initiated reform may be, force if applied to it eventually will defeat it. Without the voluntary and earnest co-operation of a pronounced majority of all concerned even unquestioned good is not likely to be achieved. And surely no intelligent person would be content with "forced good."

Canada Has Barred Importation Of Parrots

First Outbreak Of Parrot Fever Is Reported From British Columbia

Canada will declare immediately an absolute embargo on the importation and transportation of all birds of the parrot species as a result of representations from the British Columbia Department of Health, which is now engaged in systematic efforts to stamp out parrot fever.

Meanwhile, Dr H. E. Young, provincial health officer, and his department, are engaged in a systematic campaign to confine the outbreak of parrot fever to a few cases around [illegible].

They have been in telegraphic communication with United States authorities to secure the latest possible information on the subject.

"This is the first outbreak of this disease, so far as we know in the history of Canada," Dr Young said.

"The health department here has records of all parrots brought to Canada from the Orient in recent months, and is endeavoring to ascertain their present whereabouts so that they may be examined."

WAS RUN DOWN AND VERY WEAK

Too Little Blood the Trouble

Mrs. Jas. A. Haughn, Bridgewater, N.S., writes:—"I was badly run down and very weak. So much so I could scarcely do my housework. My nerves were affected, my indigestion poor, I had continued headaches and could not get a restful night's sleep. Different remedies failed to be of benefit and I was growing discouraged. One day, however, I saw an advertisement of a case similar to mine which had been relieved by Dr. Williams' Pink Pills, so I decided to try them. A few weeks' use of the Pills fully restored my health and now my household duties are a pleasure instead of a torture."

Mrs. Haughn's whole trouble was that she had too little blood. Dr. Williams' Pink Pills were of aid to her because they renewed and purified her blood and that good blood promoted good health, for where good blood abounds disease cannot exist.

You can get these Pills from any dealer in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Protecting Wild Geese

Manitoba Airman Fined Ten Dollars For Chasing Them

For disturbing the peace of Manitoba wild geese by chasing them in an airplane, Philip Osler was fined $10 and costs by Magistrate R. M. Noble in provincial police court.

Game Warden Durant told the court that Osler had worried thousands of the birds, during the close season, when, in his 'plane, he pursued them between Romer and Meadows.

He was told to advise his aviator friends to cut out the sport.

In the last ten years the Canadian Pacific has spent $100,000,000 on new vessels built in British yards.

The British Guild of Blind Gardeners urges gardening instruction for all sightless children. Blind gardeners can prune fruit trees, sow seeds and thin out vegetables.

Rules From Middle Ages

The expression, "The weakest goes to the wall," dates from the Middle Ages. In those days churches lacked pews, and the congregation stood on the rush-strewn floor of the nave throughout the service. Along the wall ran a low stone seat, which was used by the aged and infirm. The seats which gave rise to the expression may still be seen in some churches.

Mothers Value This Oil. Mothers who know how suddenly croup may seize their children and how necessary prompt action is in applying relief, always keep at hand a supply of Dr. Thomas' Eclectric Oil, because experience has taught them that this is an excellent preparation for the treatment of this ailment. And they are wise, for its various uses render it a valuable medicine.

Love not only "makes the world go round," but makes many a human inhabitant of the world go straight.

A BABY REMEDY [illegible]

Over Thirty Million Dollars Invested In Industries Using Clay From Canada's Deposits

Canada is fortunate in possessing resources in many types of clay employed in the manufacturing industries. In a list of 35 lines of manufacture in the Dominion, clay of one type or another appears among the supplies for 30 of them. It is used in large amounts in the making of such materials as cement, paper, and textiles. It is even used as a portion of food and oils. Its greatest use, however, is in the so-called clay-working [illegible] and a half tons of various types of clay enter into the composition of the products each year. These industries represent an invested capital of over $30,000,000 and employ almost 5,000 men.

These types of clay differ greatly in physical properties such as color in the natural and burned state, plasticity, strength when dry and burned, shrinkage, vitrification range and refractoriness. The clay used in the clay-working industries are classified according to the purposes for which they are adapted. For example, there are pottery clays, including china clay or kaolin and ball clay used in the compounding of porcelain, stoneware clay for making vitrified ware, and earthenware clay for making the more porous earthenware, refractory clays capable of withstanding very high temperatures used for the manufacture of firebricks, sewer pipe clays which produce a dense impervious body capable of taking a salt glaze for the making of sewer pipes and similar products, and brick and tile clays and shales for the manufacture of structural brick and tile and farm drain tile.

The pottery clay cannot be said to be plentiful so far as distribution is concerned but there are a number of deposits of importance, particularly of china clay in Quebec and British Columbia, of ball clay in Saskatchewan and of stoneware and earthenware clays in Nova Scotia, Saskatchewan and Alberta.

Fireclays are graded according to their refractoriness or the temperature which they can withstand in service, ranging from low heat duty. The high heat duty or high grade fireclays are of rather rare occurrence in Canada but the lower grades are of broader distribution. With the exception of Prince Edward Island and Manitoba, all the provinces of Canada are known to possess deposits of fireclay though some of the deposits are too remote from the markets to be of immediate value.

In the manufacture of building brick and structural and drain tile, common surface clays and shales are used and, to a lesser extent, low grade fireclays. Canada has immense resources of such clays and shales suitable for making good quality brick of a wide range of texture and color, distributed through the nine provinces, and there is ample evidence that good use is made of them. Close observers of conditions in Canada and the United States are struck by the greater proportion of brick structures, especially dwellings, in Canada.

In the ceramics laboratories of the department of mines which were established for the testing of clays and as an aid to the clay-working industries, a staff of engineers and assistants is engaged on various investigations bearing upon the problems of manufacture. Subjects of general interest to groups of ceramic manufacturers are investigated in detail, and technical advice and assistance in minor problems are freely given to individual manufacturers. The objects constantly being worked for are the improving and cheapening of the processes of manufacture and the aiding of the industry to produce better and wider ranges of wares.

The value of [illegible] has recently been demonstrated through the successful outcome of an investigation of the drying of brick made from a certain type of clay very common in the prairie provinces. Bricks made from this clay are very difficult to dry without cracking even when the utmost care is exercised. A process was worked out and placed in operation in a plant with the result that the drying time was reduced to less than half, the drying loss practically eliminated and the finished brick greatly improved in quality. At this one plant a saving of many thousand dollars was effected. The process which is applicable to many plants has since been adopted by several.

Fashion

(By Eva A. Tingey)

[illegible]

All Tingey models are created in Paris and sketched by her there. The patterns are made and adapted for American women in New York by American patternmakers.

A frock of exceptional smartness is this, yet one that is not at all difficult to carry out. The little bolero jacket is separate from the main dress. The latter is adjusted by shoulder straps.

Note how effectually the skirt section takes the curved line of the bolero, the greatest fulness of the shaped skirt fitting into a point as shown.

Mid blue crepella-like woolen made the original of this chic model. Lightweight tweeds, jersey, reps, and material of a similar type are all suitable.

The belt can be of self tissue or leather, as preferred.

Edges can be finished with several lines of stitching, bias bindings, or braid.

Good colors are most blues, greens, reds, beiges, and tiny checks or spot effects.

This pattern may be obtained in sizes 16 to 20, and 34 to 40. It is ready for immediate delivery. It is hand cut.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Applicant: "Yes, Your Honor."

Judge: "And you want the court to change it to Pullman. Now just tell me what you want it changed for?"

Applicant: "Well, Your Honor, to tell the truth, it was my wife's idea. She got to thinking that we ought to have the same name that is on our towels."

Mobby: "It is a mouse. I must get a trap tomorrow."

"A trap? I might forget it and get caught myself."—Pages Gaies, Yverdon.

Will Boost Grain Show

Co-Operation Of British National Farmers' Union Is Promised

Stressing the fact that residents of the Old Country were "out for cheap food" and promising co-operation of the National Farmers' Union in giving publicity to the World Grain Exhibition and Conference to be held in 1932, Warner Baxter, Birmingham, England, past president of the Union, addressed a meeting of the Regina Board of Trade held in the Hotel Saskatchewan under the auspices of the agricultural division of the Board.

Mr. Baxter stated co-operation of the National Farmers' Union of Great Britain in boosting the World Grain Exhibition and Conference to be held in Regina, in 1932, would be forthcoming, and said that, through the 130,000 members of the union, the publicity through the Old Country would reach [illegible] possible exhibitor.

If assurance was given that exhibits sent over to Canada for the exhibition in Regina would be given a good display, he said that there was no reason why a [illegible] number of exhibits should not be shown at the grain exhibition.

Quality Is Assured

People Can Depend On Government Inspected Fruit and Vegetables

The buyer of food products more than anyone else today must know that he is getting the quality he buys. The shipping point inspection service of the Fruit Branch of the Dominion Department of Agriculture has established the confidence of the "trade," from producer to consumer, in the reliability of the government certificate. From a modest 2,839 carloads inspected five years ago, the federal inspection service last year inspected 25,700 carloads of fruit and vegetables, an increase over the preceding year of 9,261 cars. More than that, the inspection service, having created confidence in quality and developed uniformity, has made inspected fruits and vegetables really popular on the larger markets, and in the export market premium prices [illegible]. The federal inspection service is a neutral determination of quality standard between buyer and seller established by certificate.

Must Grow More For Less

Reducing Production Costs Is Present Problem For Farmer

"Lower costs are necessary in farm production in Canada" is the view expressed by E. S. Hopkins, Field [illegible] partment of Agriculture. "In an era of low prices the only avenue of escape to the farmer is for him to strive to reduce his production costs still farther." Among the ways in [illegible] are the production of heavier yields per acre through better farming practices, the use of more labor-saving machinery. In these days of growing competition in both the domestic and export market, the farmer who would succeed must grow more for less, and at the same time produce a quality which will sell better in the market than the competing product.

Jean: "Why do you always take two boy friends about with you?"

[illegible]: "I find it useful to carry a spare!"

A VIRGINIA QUEEN

Sue Pollard, lovely daughter of Governor Pollard, of Virginia, who has been selected queen of annual Shenandoah apple blossom festival.

First Class Equipment Pays

Enables Farmer To Increase Production At Lower Cost

The three important factors in the cost of producing crops are land, labor and capital, and the human labor factor is the only one which is higher today than it [illegible] years ago, a statement prepared by officials of the Dominion Department of Agriculture shows. Field husbandmen therefore, stress the importance of making the hired man's wages count by supplying him with first class equipment so that wherever possible he may be able to do literally two days work in one. This is where modern farm machinery comes in. Eastern Canada crops take 20 hours labor per acre to harvest. Western Canada crops harvested with horse-drawn outfits take 11 hours labor per acre, and harvested with the use of the new combine-harvester the labor cost is only 2.5 hours per acre.

May Own Sugar Plantations

Princess Mary's Second Son Is Line To Inherit Property

Princess Mary's second son, the Hon. Gerald David Lascelles, who is now five years old, may become the owner of sugar plantations and other property in Barbadoes, West Indies, under the will of his grandfather, the late Earl of Harewood, of Harewood House, Leeds. The earl left unsettled property of the gross value of $286,000, with net personality $283,-386. He left the plantations on trust for his son, the Hon. Edward Cecil Lascelles, and heirs in tail male, whom failing, to Princess Mary's son and his heirs in tail. Mr Edward Lascelles is married, but has no children.

A Logical Conclusion

The pretty young kindergarten mistress had been telling her pupils all about the winds, their power, different effects and so on. "And, children," she went on, enthusiastically, "as I came to school this morning on the top of the bus something softly came and kissed my cheek. What do you think it was?"

"The conductor!" cried the children joyously.

Rock asphalt is being extensively used in rebuilding worn out pavements.

Western Farmers Living Up To Their Reputation For Optimism and Work

Insects Have Their Uses

Harmful In Some Ways, Are Protection In Others

Through years of investigation, scientists have found that insects although harmful in some respects greatly protect the garden plant from some of its worst enemies.

Following are some of the beneficial qualities of bugs and insects:

Lady bug beetles feed on plant lice and scale insects, in all stages.

Hornets feed entirely on insects.

Frogs and toads feed largely on insects and slugs.

Lizards live on small beetles and insects.

Garden spiders feed on large flies, moths, etc.

Wasps are generally beneficial because predatory on other insects, which they use as food for their larvae.

Ground beetles feed on insects that go underground to pupate.

Bees are used as pollenizers and are indispensable to plant life.

Tree crickets feed on plant life.

Dragon flies feed on all insects.

Higher Standard Of Living

Statistics Show Average Canadian Family Is Buying More

The purchasing power of the Canadian public is demonstrated by the average increased consumption in Canadian homes of meat and poultry, indicating a higher standard of living, according to the Dominion Bureau of Statistics. The per capita consumption of beef, pork, mutton and lamb increased from 156.14 pounds in 1926, to 157.81 pounds in 1929, consumption of poultry increased from 10.12 pounds to 11.26 pounds per person, and consumption of eggs from 30.59 dozens to 30.87 dozens. The average Canadian family consumed in 1929, over nine-tenths of a beef, over two and a half hogs, and over four-fifths of a sheep or lamb, in addition to seven fowls, three-quarters of a turkey and approximately half a goose and half a duck.

Predicts Larger Farms

Machinery Will Make This Possible Says Alberta Man

Addressing the Canadian Club of Winnipeg, A. E. Ottewell, registrar of the University of Alberta, predicted much larger farms in Western Canada in the near future, making large use of mechanized labor. As an instance of present and future trends he said that C. S. Noble, of Nobleford, Alberta, had in 1929 harvested 50,000 acres of wheat, yielding 30 bushels to the acre, with a combine harvester and thresher at the rate of one acre in 7½ minutes running time.

A ship's surgeon says that seasickness is "simply acetonaemia." Why should he say "simply"?

There are about 530 muscles that have to do with the moving of the human body.

A. E. Warren, vice-president of the Western region of the Canadian National Railways, reports that both farmers and business men of the prairie country are more hopeful than was the case a few months ago. He comes to this conclusion after completing his latest trip through the West. Mr Warren remarks that "with his usual courage the prairie farmer is not permitting market prices and discouraging reports to interfere with his work," and says that except in isolated cases, the acreage being seeded this year is not being reduced. "Conditions favorable to the crop exist for the moment and the rural atmosphere may be described as quite cheerful."

As suggesting an improvement in economic conditions in Canada generally Mr Warren's observations tend to bear out what his "chief," Sir Henry Thornton, has just remarked in New York. Sir Henry reports that business activity in Canada is steadily increasing and that normal conditions may again prevail by August. It is also of interest, in connection with Canadian conditions, to note the decision of the Federal Reserve Board of the United States to facilitate throughout the republic the acceptance of the Canadian dollar at par.

Western farmers are doing their full part in Canada's nation-wide effort to right herself after one or two [illegible] to injure though far from imperil, her economic fabric, these lying in partial crop failure and the stock market crash of last year. Western farmers are doing this in their own interest and in the national interest. And they are doing it in the main by "sawing wood" and maintaining their [illegible] fulness. The man who keeps pegging away at his job, who keeps a stiff upper lip, and who carries a smile usually emerges successful, eventually, if not immediately. These are among the attributes and virtues of the average Western farmer, and these things explain why these days he is working overtime on the land with his seeding. Far from permitting himself to be consumed with worry over last year's setback, he is concerning himself with the present and the future and working with commendable and inspiring industry, hope and faith to turn them to account. The psychology of the prairie farmer is a standing rebuke to pessimism.—Regina Morning Leader-Post.

An Expensive Luxury

Duke Of Westminster's Yacht Is Elaborately Fitted Up

If you are looking for a nice little yacht for the coming season, you may be interested in the offering of the Duke of Westminster, who wishes to sell his "Flying Cloud," in which he recently cruised the Mediterranean. The vessel contains a ballroom, a large dining room, eight [illegible], three sitting rooms and a smoking room. They have many antiques. Each cabin has a four-post bed, and is furnished with antiques. The walls are hung with oil masters. The vessel's tonnage is 1,105 and her length 191 feet. She carries a spread of white sail covering 11,500 feet, when all set.

Makes Landing Safer

A simple yet effective device has been installed on a few aeroplanes in England which aids them in landing on dark nights. Beneath each wing a small searchlight is fitted with the beams of light converging. The distance at which they cross each other, forming a large patch of light, is known to the pilot, so as soon as he sees the light on any surface he knows how far he is from the ground.

Stenographer: "Bob dear, when we are married, will you continue to give me flowers every day?"

Clerk: "No. I'll give you a box of seeds and you can grow your own."

"Where is Peter?"

"In the cloakroom looking for his hat."—Gutierrez, Madrid.

Giant Rudder on Huge Truck

Sixty-seven tons of steel forged into a rudder to steer the 40,000-ton "Empress of Britain, Queen ship of the Canadian Pacific Atlantic fleet, was recently conveyed on the world's largest truck over a hundred miles of highway between Darlington, England, and Glasgow, Scotland, in seven days. The rudder which is 21 feet 9 inches by 39 feet 2 inches, could not be taken by railroad, and was transported on a 14-wheeled vehicle carrying a telephone at the rear from which directions were called to the driver. Heralded by Automobile Association scouts, and shepherded by police, long stretches of the road had to be closed to other traffic while it passed and in certain areas telegraph poles had to be shifted temporarily. In some villages on the route there was a clearance of only 1½ inches between the rudder and the walls of the houses. The rudder was delivered to the "Empress of Britain" ready to be placed in position.

No Good For Transportation

Proving Speed Of Racing Car Is Of No Importance

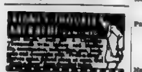
Kaye Don, British speed maniac, has failed in his effort to drive the Sunbeam Silver Bullet at a speed faster than Major Segrave's Daytona Beach record of 231 miles per hour. If he had succeeded in his attempt, there would have been no occasion to cheer. What possible good would it do science or the business of transportation to have anybody drive a motor vehicle 231 miles per hour or faster? An airplane conceivably may go that fast some day. Air permits of high speed, but we shall never have vehicular routes capable of handling traffic at nearly four miles per minute.

The racing car with which Kaye Don has been challenging the record is a freak, the nature and operation of which demonstrates how impossible any such speed is for transportation utility. The driver has to peer through a telescope sight to see four miles ahead the spot where he will be at the next minute in his headlong dash. If Kaye Don had succeeded it would have been as important as though he had climbed the side of the new Chrysler building in New York barefooted or ridden over Niagara Falls in a baby carriage and no more important.—Brandon Sun.

A Wise Choice

Good health is most desired by Thomas Edison, he said, when he was asked what he would choose if offered any one thing in the mental, material or spiritual worlds.

Chinese women are now playing a leading part in the reconstruction of China. They are interesting themselves in politics, in commerce, in moral and social welfare, in hygiene and in all patriotic movements.



Regrets Remove Of Hon. Vincent Massey

New York Times Pays Tribute To Canadian Minister In Washington

The New York Times pays a striking tribute to Hon. Vincent Massey, Canadian Minister in Washington, whose promotion as High Commissioner at London was announced recently.

The Times states:

"If Mr. Massey had not as Canada's first minister in Washington represented her with such distinguished success, he would doubtless not have been soon transferred to what a loyal Britisher must consider an even higher post. His going will be felt as a loss not only by Washington, where he and Mrs. Massey have been most popular, but also by the country at large, for no one among all the members of the diplomatic corps has been more sought and honored by cities, universities and learned societies as a speaker on high occasions.

"Mr. Massey has shown practical sense in dealing with the complexities of border relations in commerce and politics. It has been remarked of a cultivated Englishman that he is either an Aristotelian or a Platonist. Mr. Massey is both in the sense that he is an Aristotelian, as shown by his business and war record, and a Platonistic idealist, as evidenced by what he had done for art in varied forms."

Fashions

(By Eva A. Tingey)

VERSATILE AND GRACEFUL

All Tingey models are created in Paris and sketched by her there. The patterns are made and adapted for American women in New York by American patternmakers.

Today's model is equally suitable for the matron or younger woman. It is both slimming and graceful. It is built on wrap-over lines with pleated trims of its own material. These, by the way, should be picot edged before pleating. With some materials the selvage can be used for the bodice and wrist frills.

This style looks stunning made up in Bordeaux red marocain.

Fairly heavy georgette, crepe de chine, satin, and thin wool georgette are other suitable tissues.

Small-patterned materials can also be chosen, but women rather heavier than they would wish, should shun large designs. Shiny materials, such as very glossy satin, will augment rather than reduce bulk. Mat or dull surface tissues are most slimming.

This pattern may be obtained in sizes 16 to 20, and 34 to 42. It is ready for immediate delivery. It is hand cut.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Will Walk Across Canada

Manitoba Man Wants To Prove Modern People Can Stand Hardships

The stigma of weakness which has fallen on this generation is presently to be lifted by Aime Joyal, of St. Boniface, Manitoba. He is going to take a bottle of water from the Atlantic Ocean near Halifax and empty it into the Pacific at Vancouver, walking the distance between these cities, to prove that men of today can stand any hardships their forefathers could bear, and [illegible] also some they never had to meet. He expects to make the trip in ten months.

Aime Joyal is the son of Jean Baptiste Joyal, son of a pioneer family, descendant of Mary Ann Gaboury, who was the first white woman to penetrate the west beyond the Great Lakes, Aime Joyal declared. The grandfather of the ambitious hiker was Jean Baptiste Lajimodiere, a trapper on the Red River, who once walked from Regina (then Fort Douglas) to Montreal and back with papers from the settlers of the district to Lord Selkirk. His equipment was a gun, a hatchet and a blanket, and he had to avoid all the posts along the way because the papers he carried were detrimental to the interests of the North Western Trading Company, then at war with the Hudson's Bay Company in the Red River Valley. They wished to prevent him from executing his errand, Joyal says.

DEAFNESS
Buzzing Head Noises
CAUSED BY CATARRH

Nine case in ten are due to Catarrhal inflammation. Based on the experience of others who have been relieved of troublesome buzzing in the ears you can count on the effective action of Catarrhozone. No medicine to take — you breathe the healing vapor of Catarrhozone through a small pocket inhaler and derive results quickly. Catarrh of the middle ear is routed out. Hearing improves. Head noises cease. Catarrh in the nose, throat, ears — wherever located, yields to Catarrhozone. You can purchase a two-months' treatment for $1.00, or a smaller size for 50 cents, at any druggist.

Explosion Solves Problem

Accident In Chemical Laboratory Discloses New Substance For Phonograph Records

An explosion has shown how to make phonograph records that bend like paper. This blow-up, in a Columbia university chemical laboratory, came queerly enough, not from expansion, but from sudden contraction. It led to the discovery of a new substance, durium, that produces a phonograph record as flexible as paper, but so hard that it does not scratch or break under a hammer blow.

The "accident" was no lucky break, but the climax of years of work that began with the idea of a New York manufacturer, Joseph Reilly. Reilly's business included electro-plating, the process that hardens a thin film of copper into forms that print words and pictures. By some process, he dreamed of making phonograph records. After spending $200,000 without success, he consulted Dr. Hal T. Beans, professor of chemistry, at Columbia. Beans said the scheme was all but "impossible," but he was willing to experiment with it.

He believed the secret of the process to be in certain synthetic resins [illegible] harden when heated. He cooked nearly 800 tubes, but none hardened [illegible]. Then, as the heat penetrated another tube, one day, there was a sharp hiss, and some of the liquor shot to the ceiling. The resin had hardened at explosion speed. The riddle was solved.

Heavy paper is coated with this resin from three to five one-thousandths of an inch thick. The touch of a hot form instantly transforms it [illegible] an indelible record.

Where Superstition Was Useful

Superstition has its uses as was shown in New Guinea. For years the natives refused to be vaccinated. Sir Herbert Murray, Lieutenant-Governor of the territory, finally called in the native chiefs and told them that a big devil-devil was coming to destroy them. Their only hope of escape, he said, was to have the government charm branded on their arms. The natives immediately flocked to the government clinic.

Thomas A. Edison says that the people of this world don't know a millionth of 1 per cent. about anything. In that event we might as well knock off and call it a day.

Houses built of chemically treated glass are said to be cheaper and warmer than those of wood or stone.

To clean greasy pots and pans

Just use a teaspoon of Gillett's Lye in about a gallon of cold water* and you have a mixture that will instantly clean even the greasiest pots and pans.

GILLETT'S LYE
HAS HUNDREDS OF DAILY HOUSEHOLD USES

It cleans and disinfects sinks, drains and closet bowls ... effectively removes old paint ... cleans floors, etc., etc.

Send for our booklet on household cleaning. It will show you the many ways Gillett's Lye can be used in your home to make cleaning easier.

*Lye should never be dissolved in hot water.

Recipes For This Week

(By Betty Barclay)

"CHALLENGE" LEMON PIE

Here's another lemon pie, which is simply delicious, but necessitates unusual care and attention. It challenges your ability, so we call it "Challenge" Pie.

Beat yolks of 3 eggs very light. To this add juice of one lemon and rind of 2 lemons, 3 tablespoons hot water, ½ cup sugar and a large pinch of salt. Cook in double boiler until thick. Have whites of eggs stiffly beaten, add ½ cup of sugar to them and fold into cooked mixture. Fill pie shell that has been previously baked, place in oven and brown.

CREAM OF ASPARAGUS

Wash each stalk of asparagus carefully with a vegetable brush to remove all grit. Then cut in small pieces (using all but the very tough parts). Cook, covered, until the asparagus is tender, in enough water to cover. Add salt to taste just before the asparagus is done. Allow 2 cups cooked asparagus and cooking water to 2 cups medium cream sauce (2 cups milk, 4 tablespoons of flour, 4 tablespoons of butter). Season, and serve hot.

Note:—The less tender part may be cooked longer and put through a sieve. (If desired, the tops may be used for salad.)

In Free Russia

Land, Livestock, and Implements Belong To the Community

Frequently one wonders why communists who enjoy all the privileges of liberty, stability, protection and progress in Canada do not go to Soviet Russia, which they claim to admire so much. An explanation of the collective farming policy, printed in Pravda, official soviet publication, explains that the land, live stock and implements belong to the community, which means that so far as the individual is concerned they belong to nobody. The farm workers get from 46 kopecks (22½ cents) to 1 ruble 20 kopecks (60 cents) per day of ten hours. Out of this they must buy their food and clothing and pay their trade union dues.

New Steamship Arrives

The "Princess Elizabeth," latest addition to the Canadian Pacific coastal fleet, arrived at Victoria after a [illegible] trip from Scotland. She will go on the Vancouver-Victoria run. The "Princess Elizabeth" is 351 feet in length and cost $1,200,000 to build. She has berths to accommodate five hundred passengers.

The true natural pearl comes from the Indian Ocean, the Persian Gulf, Central America, West Indies, Australia and the Japanese Islands.

DO YOU SUFFER WITH HEADACHE?

So easy to get quick relief and prevent an attack in the future. Avoid bromides and dope. They relieve quickly but affect the heart and are very dangerous. They are depressing and only give temporary relief, the cause of the headache still remains within.

The sane and harmless way. First correct the cause, sweeten the sour and acid stomach, relieve the intestines of the decayed and poisonous food matter, gently stimulate the liver, start the bile flowing and the bowels pass off the waste matter which causes your headache. Try Carter's Little Liver Pills. Druggists 25c red pkgs.

SUNDAY SCHOOL LESSON

MAY 18

JESUS TEACHING IN THE TEMPLE

Golden Text: "Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind. This is the great and first commandment. And a second like unto it is this, Thou shalt love thy neighbor as thyself."—Matthew 22:37-39.

Lesson: Matthew 22.1 to 23.39.

Devotional Reading: Psalm 15.

Explanations and Comments

The Pharisees' Question About Tribute, chapter 22:15-22.—Then [illegible] to Christ's [illegible] plainly a warning to [illegible] (Matthew 21:45), the Pharisees took counsel how they might ensnare Him in His talk, hoping to lead Him on to say something which they could report as treason and thus secure from the Roman Governor a death sentence for Him. They took counsel with the Herodians, whom they hated, but their common hatred of Jesus was stronger than their mutual hatred. The Herodians were the court party, a political party that came into existence with the rise to power of Herod the Great. Their [illegible] was to have a Jewish kingdom established under the Herodian dynasty. The Pharisees were the strictest religious sect among the Jews, and were bitterly opposed to Roman rule. They were looking for a Messiah who should be their earthly king and free them from Roman domination.

Pharisees and Herodians together came to Jesus and began their attack with a preamble which meant that the question they were about to propose was a dangerous one to answer, but they knew He was not afraid of consequences. The words were intended to conciliate Him and put Him off His guard, but it was nevertheless a fine tribute to Jesus from His enemies when they said that He was true, that He taught the truth, and was fearless in His preaching of the truth.

Since He was such an one as they said, they wanted His judgment on a matter of controversy: Did He deem it lawful to give tribute to Caesar? If Jesus answered that it was lawful to give tribute, the people would turn against Him; and if He said it was not lawful, He could be charged with treason. Jesus saw through their purpose and exclaimed, "Why make ye trial of Me, ye hypocrites?" Jesus could always see the insincerity of the would-be flatterer.

Then Jesus asked for a coin, the tribute money. They brought Him a denarius, a coin worth about eight pence half-penny, as the Bible margin tells us.

"Whose is this image and superscription?" Jesus asked. They must perforce answer, "Caesar's." "Render, therefore, unto Caesar the things that are Caesar's," returned Jesus. "And unto God the things that are God's," Jesus solemnly added.

When Florence Nightingale was asked the secret of her life, her reply was, "I have worked hard, very hard, that is all; and I have never refused anything to God."

Ice-Skating In Vienna

Vienna, Austria, boasts one of the largest artificial outdoor ice-skating rinks in the world. The sport is enjoyed there throughout the year. The rink accommodates eight thousand persons. The huge machinery which makes the ice is almost as much of a wonder as the rink itself and has served as a model for other similar purposes.

The worn-out paper money returned to the Treasury Department at Washington, D.C., each year, is turned into paper pulp from which is manufactured fine writing paper, cardboard and shoe counters.

The government leases 51 offices and buildings in Ottawa, paying annual rents of $791,150, says a return tabled in Commons. National Defence Department takes most of the housing space.

First Aerial Traffic Cop

Low Stunt Flying In California Made Appointment Necessary

California boasts of having the first aerial traffic cop. His appointment became necessary because of a plague of low stunt flying, which is not only dangerous to the [illegible] but to houses and property, as well as causing untold loss to film companies. In the midst of his "stunting" the aviator will suddenly hear the blast of a siren, and see approaching a fast black-and-orange [illegible] the police badge. The new "cop" will not only look after stunters, he will do all he can to avoid aerial congestion, which is becoming a serious matter in California. Other well-known public services have already "taken the air," especially the fire brigade. Forest fires are located by 'plane, and at the aerodromes in England fire and first-aid 'planes are always ready for an emergency.

[illegible]

Honor Given To Canadian Author

Royal Empire Society Awards Gold Medal To Dr. C. W. New

It is [illegible] that the Royal Empire Society, formerly known as the Royal Colonial Institute, has for the first time awarded its gold medal for the best book of the year of outstanding imperial interest to a Canadian. The recipient of the honor is Dr. Chester W. New, professor of history of McMaster University, and the work thus honored is his volume entitled "Lord Durham, a biography."

Dr. New's biography is the first authoritative historical survey of the life of the first Earl of Durham, who was governor-general of Canada in the period immediately following the Rebellion of 1837, and who was a prominent figure in the fight for the development of democracy in Great Britain and self-government in Canada.

A Cardboard Church

One of the oddest churches in the world, that at Benoni, about 20 miles from Johannesburg, S.A., is to be moved from its present site. This church is constructed entirely of cardboard and beaver board, and was sent from England about 20 years ago in sections. It has been extensively used and has proven efficient.

THE MERCURY, TOFIELD, ALBERTA

WIDER BRITISH PREFERENCE IS BEING SOUGHT

A sub-amendment to the budget made its appearance from the Progressive group. Moved by W. R. Fansher, Progressive, Last Mountain, Sask., it reads as follows:

That all words after "it is of the opinion that" in the amendment in the 10th line thereof be struck out and the following substituted therefor:

"The government having definitely adopted the principle of increased protection, modified only by certain extensions of the British preference, it is to be regretted that more effective consideration has not been given to the position of agriculture and labor, but that, on the contrary, the changes made in the iron and steel schedules will result in an increased cost in respect to all structural work and the machinery of production, and further, that the best interests of Canada would be served by a more substantial increase in the British preference, particularly as affecting textiles and other articles of a similar character, together with a modification or abandonment of the regulations requiring a 50 per cent. Empire content which have largely nullified the effect of any preference given.

"That a much larger proportion of our revenues should be provided for through direct taxation, more especially through the Income Tax.

"We further wish to state our conviction that these and other changes in our fiscal policies are not of themselves a solution of our modern economic problems but that effective encouragement should be given to the development of co-operative principles, having regard to production, distribution and the utilization and control of credit."

Mr. Fansher asserted that the regulation which requires that there be 50 per cent. [illegible] and workmanship in certain commodities in order that they may obtain the benefits of the preferential tariff, was making it harder and harder for goods to come into Canada from Great Britain.

Aviator Makes Heroic Flight

But Failed In Effort To Save Life Of Wounded Boy

Edmonton, Alberta.—An heroic 160-mile trip by 'plane from Grande Prairie to the bush-covered Sturgeon Lake area 80 miles to the eastward, and return, failed to save the life of a 17-year-old boy who was accidentally shot, according to meagre reports just received in Edmonton. The name of the youth is at present unknown.

Flying Officer Spadbrow, of the forestry patrol at Grande Prairie, dared unknown dangers in a desperate effort to reach the wounded youth, and after dodging and twisting between trees, finally landed his machine a mile and a half distant from the boy's home. The lad was brought over the intervening distance in a wagon, across a corduroy road. He died while the 'plane was speeding toward Grande Prairie.

Increase In Savings

Bank Deposits For March Showed Considerable Advance

Ottawa, Ont.—Savings deposits in Canadian banks increased by $15,575,817 during the month of March, according to the bank statement issued through the Department of Finance. At the end of March, savings deposits held by the banks totalled $1,455,211,597. There was a decrease during the month in the amount of call loans held outside Canada by the banks, and an increase in the amount held in Canada.

Will Make Tour Of Dominion

New York.—Hon. J. E. Fenton, Australian Minister of Trade and Customs, who arrived here recently, after attending the London Naval Conference as Australian delegate, will travel through Canada on his return trip to the commonwealth. He will visit Eastern Canadian cities and then journey westward, reaching Vancouver, May 24, sailing from Victoria, on the liner "Aorangi," May 28.

U.S. Naval Program Bill

Washington.—A naval building program costing the United States approximately one billion dollars and designed to bring parity with Great Britain within 10 years, is contained in a bill to be introduced by Chairman Britten of the naval affairs committee.

Expect Premier King Will Be Candidate

Prince Albert Liberal Association Working On That Assumption

Prince Albert.—From Dr. G. A. Robertson, president of the Prince Albert Federal Liberal Association, it was learned that the organization is [illegible] on the assumption that Prime Minister W. L. Mackenzie King will again run in this riding.

"The premier," Dr. Robertson stated, "had assured us that as long as we want him, he will be the Liberal candidate for this constituency. Practically all the polls have already forwarded resolutions of confidence in Mr. King to us. A convention will be held only as a matter of form but the date has not yet been decided upon."

Conservatives in the riding are holding a nominating convention here, June 3, and among the names mentioned as probable candidates is that of George Braden, well-known Rosthern Conservative. D. L. Burgess, MacDowall, who [illegible] Premier King at a previous election is also mentioned.

Harry Davis, unofficial leader of the Labor element in Prince Albert, when asked recently if his [illegible] contemplated taking an active part in the coming election, declared that such was not the present intention but that they were gathering their strength for the next provincial fight.

Many Are Seeking Broadcasting Licenses

Majority Not Likely To Be Considered Until Election Is Over

Ottawa, Ont.—More than 200 applications for broadcasting licenses have been submitted to the Department of Marine, which department has charge of radio services. The great majority of these will likely be held in abeyance until after the general elections, it was intimated by departmental officials. Some of the more extensive projects may be authorized but the others will have to wait.

One of the applications which may be granted very soon is one from the Canadian Pacific Railway for permission to erect three high powered broadcasting stations, one in Montreal, one in Toronto and one in western Canada, at a point to be selected later.

The general impression on Parliament Hill is that the committee selected by the House of Commons to consider the recommendations of the royal commission that investigated broadcasting, will not proceed in view of the impending dissolution. Students of the problem think the elections will give an opportunity to crystallize public opinion either for or against public ownership and in the meantime the report will be allowed to stand over.

"Wop" May Visits Ottawa

But Distinguished Aviator Slips Away Without Seeing Officials

Ottawa, Ont.—Slipping through the city so quietly that officials of the Department of National Defence, who [illegible] waiting for him, did not know [illegible] he had actually been here, Captain W. R. "Wop" May, Edmonton, recently awarded the McKee trophy as the Canadian having contributed most to the cause of aviation in 1929, paid a brief visit to the capital on May 6.

Since the award of the trophy was announced, air officials have been anxious to get in touch with the noted flier, to inform him of his success. Had Col. J. L. Ralston, Minister of National Defence, been aware the winner of the trophy was in the city, his departure would undoubtedly have been delayed in order that formal presentation might be made to him of the great honor he takes back west.

May came down onto the Ottawa River, opposite Rockcliffe aerodrome, in one of the new Bellanca monoplanes just purchased by the Airways Company of which he is chief pilot. After refuelling and having a brief chat with mechanics during which he spoke rather bashfully of his success in being awarded the prized trophy, May took to the air again, bound for Sudbury, Ont., and eventually Edmonton.

Heavy Liquor Shipments

Vancouver, B.C.—With the cancellation of licenses for export liquor warehouses effective June 11, as provided for in Federal Legislation, heavy shipments of liquor from Vancouver to Europe have been made during the past two weeks. Recently the steamship "Pacific Pioneer" took 21,150 cases of bonded liquor back to the United Kingdom and the motorship "Drechtydyck" carried 700 cases.

Elimination Of Weed Seeds Is Discussed

Proposition Made To House Of Commons By G. G. Coote

Ottawa, Ont.—Elimination of weed seeds from feed oats and barley was proposed before the agriculture committee of the House of Commons by G. G. Coote (U.F.A., MacLeod). He wanted the establishment of feed grades of these grains free from weeds and believed weed seeds could be cleaned out of oats and barley.

The difference between the grades of feed oats and of seed oats in the present schedules of the Act, it was explained, is that feed oats might be frozen. Other members of the committee considered the suggestion impracticable. The matter was left over for further consideration.

BRITAIN WOULD CONSIDER LAND SETTLEMENT AID

The Pas, Man.—The British Government is ready to consider any feasible project to promote land settlement in the Carrot River Valley, according to a letter received by town officials from the secretary of state for dominion affairs.

The Carrot River Valley lies to the southwest of The Pas, and includes land in both Manitoba and Saskatchewan.

The letter from the overseas department points out, however, that settlement aid from England would necessarily be subject to certain conditions, such as the Empire Settlement act of 1922, and financial support from either the Federal or Provincial Governments or both. The letter also points out that the British Government does not contemplate purchase or ownership of land in Canada for settlement purposes.

The communication from the British Government says in part that "consideration by His Majesty's Government in the United Kingdom of any such scheme of settlement and development must necessarily be governed by the provisions of the Empire Settlement act of 1922 which empowers the secretary of state, in association with the government of any part of His Majesty's dominions or with the public authorities or public or private organizations either in the United Kingdom or in any part of such dominions, to formulate and co-operate in carrying out agreed schemes for affording joint assistance to suitable persons in the United Kingdom, who intend to settle in His Majesty's overseas dominions, provided that the contribution of the secretary of state shall not in any case exceed half of the expenses of the scheme.

"Subject to the above conditions His Majesty's government in the United Kingdom would be prepared to give careful consideration to any concrete proposals for promoting land settlement in Canada by migrants from the United Kingdom, provided such proposals were approved and recommended by, and preferably received a financial contribution from, His Majesty's government in Canada or from the provincial government."

The secretary was instructed by council to forward a copy of the letter to the Minister of Natural Resources in Winnipeg, and also to the Premier of Saskatchewan.

AWARDED SCHOLARSHIP

Miss Katherine Pines, student at Ontario College of Education, Bloor St., Toronto, who has been awarded an Ontario government scholarship of Sorbonne University, Paris.

Preference Is Re-Established

[illegible] Preference To Returned Soldiers

Canberra, Australia.—The Labor Government of Australia has, in the face of strong public opinion, moderated one of its ordinances passed in favor of the trades union movement.

Prime Minister James Scullin announced the government was reverting to the former regulation which gave first preference to returned soldiers on government work contracts, and second preference to trades unionists.

The recently-announced decision of the government to abolish the preference to ex-soldiers unless they were also trades unionists, roused a storm of indignation, and veterans' organizations all over Australia were commencing to organize a campaign to fight the government's action.

To Broadcast From Dirigible

Story Of Flight Of R-100 Will Be Given Direct From Airship

London, England.—It was understood here that the Canadian National will broadcast the story of the flight of the R-100 direct from the dirigible.

When asked regarding the above despatch, E. A. Weir, director of radio of the Canadian National Railways, stated that details of an agreement to broadcast the story of the flight were underway and that the broadcast would be carried over the Canadian National network throughout the Dominion, direct from the airship.

Walking Across Canada

Montreal, Que.—With a knapsack on her back, Hon. Katherine Trevelyan, daughter of Right Hon. Sir Charles Philips Trevelyan, Minister of Education in the British Government, arrived in Montreal on board the Cunard liner "Alaunia." Alone she has set out on foot on a walking tour of Canada as far west as the Rockies, and intends if possible to get through to Vancouver.

Bill Given Third Reading

Ottawa.—After a tempestuous hour in which there were four roll call divisions, the House of Commons gave third reading to the bill to establish divorce courts in Ontario. The vote on the third reading stood, yeas 100, nays 53.

TRAIN TELEPHONE NOW A FACT

The Canadian National Railways, which first made possible the reception of radio concerts on board a moving train, an invention which many first class railroads have since copied, have achieved another mechanical triumph by perfecting the first two-way system of telephone communication in the world with moving trains. The system has been put into public service by the company on "The International Limited," which covers the 334 miles separating Montreal and Toronto in 360 minutes, the fastest train in the world traversing a like distance.

The photograph shows Sir Henry Thornton, Chairman and President of the Canadian National Railways, inaugurating the telephone service from "The International Limited" while the train is travelling at 60 miles an hour. At the train switchboard is J. C. Burkholder, Chief Engineer of the Canadian National Telegraphs, who developed and perfected the train telephone system.

Plan Important Survey Work

Far North Area To Be Mapped From Air

Edmonton, Alberta.—Aerial surveys of the far north, inspection work by three field parties under direction of the Department of the Interior, opening of a branch office at Fort Smith, and the transfer to that point of staff from Winnipeg and The Pas, have been announced here.

An aeroplane base is to be established at Fort Resolution, arrangements having been made by the Department of the Interior with The Royal Canadian Air Force. This will be utilized to facilitate important survey work which will be carried out by the Federal Government.

These steps to increase staff and services in the far north are being undertaken by the Department of the Interior in view of the enlarged operations of exploration companies and prospectors.

Exhibiting At British Fairs

Canada Taking Part In Eighteen During Present Year

Ottawa.—Canada is participating in 18 exhibitions and trade fairs in Great Britain during the present year, in addition to the British Industries Fair which was recently held at the Olympia Building, London, England. Most of these exhibitions are being held under the auspices of the Empire marketing board and will enable Canadian produce to be exhibited in most of the industrial centres of England, Scotland and Ireland. In addition, Canada is actively participating in the six months' International Exhibition at Antwerp, which opens on April 26.

Request Will Be Considered

C.N.R. May Make The Pas Divisional Headquarters

The Pas, Man.—The request of town officials that The Pas be made the headquarters for the Canadian National Railways lines in northern Manitoba, will receive active consideration, according to advices received from the department of railways and from Sir Henry Thornton, C.N.R. president.

A letter received by the town clerk states that the minister of railways will make enquiries in the matter, and will keep local officers advised of developments.

CIVIL RIOTS IN INDIA REPORTED TO BE SUBSIDING

London, England.—As suddenly as they had flared up India's civil disobedience disorders subsided. From a widely flung storm of violent encounters Mahatma Gandhi's campaign of resistance to the government simmered down to a few widely separated incidents.

The worst of these, costing nine lives, occurred at Chittagong, which was also the scene on April 18, of a battle in which two Europeans and several natives were killed.

Again at Calcutta armed police were compelled to act. A mob raided the police station, smashed in its iron gates and there was checked. Several police officers suffered injuries and 25 arrests occurred.

Simla reported officially that four deaths had occurred in recent riots. In the civilian hospital 86 persons were treated. To this number were added 18 police injury cases.

Advices from Delhi stated that patrols of cavalry, infantry and armored cars were being maintained there.

The arrival of V. J. Patel at Bombay, and his pronouncement for a widespread boycott against British goods was the outstanding development in that district. Despatches did not indicate how Mahatma Gandhi's followers would accept this [illegible].

The comparative quiet in Bombay was broken only by an early onslaught of a mob upon textile workers who sought to prevent reopening [illegible].

The government continues to avoid any utterance which might tend to inflame the native mind. Moderate Indian opinion, it was stated, continues to support the government.

There was a hopeful forward looking attitude for the proposed round-[illegible].

Thus far the government forces have emerged with only one fatality, the killing of a British citizen in Peshawar. This was pointed to as a matter for congratulation as well as an indication of the prompt action taken by the authorities.

MINISTER WARNS AGAINST LOWER GRAIN ACREAGE

Wheat producers of Canada have nothing to gain by cutting down production, [illegible] Minister of Trade and Commerce told the House of Commons committee on agriculture. The committee was considering the new Grain Act and the minister took advantage of the occasion to [illegible] the grain situation.

The Canadian problem, he said, [illegible] production. Recent experiences he said, had shown that high-priced wheat encouraged the use of substitutes in European countries. Through the application of chemical treatment European millers were now able to make a fairly good flour out of low grade wheat.

Canada, said the Minister, produced the best wheat in the world and by scientific methods could produce wheat more cheaply than any of her competitors. A high price put this country in a poor position but a declining price put it in a stronger position.

The object of the grain act was to regulate the weighing and handling of grain so that whatever the world price might be the Canadian producer would get the greatest possible return. Mr. Malcolm was optimistic about the future. He said Western Canada faced the coming year with an excellent administrative body, the Board of Grain Commissioners, with the best grain act it ever had and with the best spirit of co-operation ever experienced.

Pioneer Flying Trip

New York Aviator Will Try Out [illegible]

Saint John, N.B.—An eight to ten-day pioneer flying trip between Saint John, as the eastern base and Moscow, Russia, via Alaska and the Bering Straits, will be made late this fall or early in the spring of 1931 by George E. King, of New York, a representative of the Junkers Corporation. The flight will be made of establishing a northern air route connecting Asia with the United States and Canada in a commercial way.

Mr. King, who was here recently looking over the local possibilities in the event of such a trade route, said Saint John was an ideal eastern terminal. He could not say definitely whether he would make Saint John or Moscow the starting point in the pioneer flight planned for during the month of November next, or March, 1931. The direction of the flight and the starting point, as well as the time of departure will depend on the nature of the weather prevailing at [illegible].

Canada Is Confident

President Of C.P.R. Sees Good Future For Business

Montreal, Que.—General confidence throughout Canada is unshaken by [illegible] which has developed the present situation the country's strength has been effectively proven and the future is not to be viewed with any degree of apprehension, in the opinion of E. W. Beatty, chairman and president of the Canadian Pacific Railway, as declared to the shareholders of the company at the annual meeting held here.

While a number of factors, particularly the failure to market Canadian grain, have slowed up freight traffic, it is felt there is nothing of a fundamental character to prevent the return of normal business conditions within the next few months.

Election Likely In July

Ottawa.—A July election seems now assured. Premier King announced that as soon as the legislation on the order paper with some minor additions could by agreement with Opposition parties be adopted he would dissolve or prorogue parliament and permit the people to choose their representative to the Empire Economic Conference in London, England, in September.

Takes Heavy Toll

Auckland, N.Z.—Infantile paralysis is taking a heavy toll of natives in the Solomon Islands, and on the Santa Cruz group more than 80 deaths have occurred in recent weeks. Most of these cases have been isolated and several new hospitals have been established to take care of the epidemic.

Great Britain's wealth is estimated at $112,000,000,000, and that of Germany at $67,000,000,000.

China Developing Resources

Will Be Needing Sons Now In Canada, Says Dr. Hsieh

"The new China is calling her sons home and within 20 years there will not be one Chinese left in Canada," declared Dr. Teyhi Hsieh in Windsor Ont. Dr. Hsieh is a graduate of Cambridge and for years was the only practising Chinese lawyer in England. He was at one time the Chinese consul-general to Australia, later a delegate to the opium conference in Geneva, and now is acting manager of the Chinese Trade Bureau in Boston, represents the Williamsport Institute of Politics, and is a representative of the National Chung Hua News Association of Shanghai. Dr. Hsieh traced the history of China as a republic, telling of the strides made since she had been liberated from the yoke of the Manchus. "The Chinese in Canada," he said, "have been looked upon with disfavor. They have been accused of living on a pittance and sending all their money to China. It must be remembered that, in order to enter Canada before the Exclusion Act, a Chinese had to have $500. He also had to pledge $2,000 to the Manchus before he could leave China. Thus he was $2,500 in debt when he landed here and there was also probably a family to keep at home. In cases where Chinese have their families here, and have had no debts to pay in China, they have been known for their [illegible].

"China has awakened and resources are now being developed. We need leadership [illegible] and that is why we are calling our sons home. Do not look down on the Chinese laundryman and restaurant keeper. They are not that by choice. In [illegible] they are political fugitives, the highest type of Chinese, and it is these who will be the leaders in the new China. Canada has taught them how to make a living. They will go back to China and teach the Chinese how to live."

Mining Developments Will Aid Manitoba

Industries Will Receive Great Stimulus, Says Hon. D. G. McKenzie

The Honourable D. G. McKenzie, Minister of Mines, speaking at the recent annual meeting of the Winnipeg Board of Trade Mining Bureau, stated that Manitoba industries will receive tremendous stimulus from mining developments. In 1929 alone with development just getting under way, more than $12,000,000 had been expended in the province for supplies and wages, he said. At Gypsumville, Manitoba, approximately 13,000,000 tons of gypsum were exposed and deposits of coal in the Turtle Mountain district were estimated at 160,000,000 tons. The cement industry [illegible] was meeting the requirements of the market extending from Dryden to Moose Jaw, Saskatchewan, and in 1929 production [illegible] barrels, valued at $1,645,084.

Explains New Instrument

A microscope that, by use of ultra-violet rays, photographs the interior of a living cell, was explained to members of the National Academy of Sciences at Washington, by Francis F. Lucas, of the Bell Telephone Laboratories. Lucas said the new instrument was expected to prove valuable in the study of such diseases as cancer, which are believed caused by [illegible] cell abnormalities.

An Old Type Canoe

An Iroquois canoe, made of a single sheet of elm bark and said to be a good sample of the type of canoe used by the Six Nations before the advent of the paleface, has been placed on exhibition at the Rochester municipal museum. The canoe is said to be the only one left of those actually made by the Iroquois who ceased making them early in the nineteenth century.

"This is freshly baked bread so don't drink water after it."

"Don't worry about my drinking water, ma'am." — Nagels Lustige Welt, Berlin.

Wonderful Museum Built By Ringling

King Of Tented World Finds Outlet For Artistic Ideas

Circus profits have helped to build one of the world's finest art museums in Sarasota, Florida, winter home of John Ringling, king of the tented world, and connoisseur of art. It is to be opened to the public next winter.

While lions roar at the winter quarters of the circus, in one section of Sarasota, over the way along the shores of Sarasota Bay, a majestic building presents the circus man's other side. The building and its art treasures, estimated to have cost $20,000,000, form the nucleus of what may become the United States greatest art center.

Only art critics and distinguished visitors from America and Europe have been admitted to the John and Mabel Ringling art museum, so far Ringling has refused to allow general inspection of the treasure house until it is complete in every one of the niceties he finds necessary from that side of his nature, which is art.

Near the museum, the circus magnate plans a great art school where students will be only a few hundred yards from works of the masters. The museum takes its name from Mr. Ringling and his late wife, whose death intensified his determination to build what, he has told intimate friends, will become the art center of the United States.

The museum is of striking beauty, a reproduction of the Doge's palace. The entrance is a great archway. Wings extend 400 feet on either side. Eighty-eight sculptures adorn the space between the rim of the building and the patio. Here are sunken gardens, statues, fountains and fine Caribbean pines. Columns of the patio are of the twelfth and fifteenth century, brought from Italy. Exact reproductions of Father Tiber and Father Nile from the Vatican flank the Angelo statue and close the cloister from the southern end.

Beneath the dome of this quiet-nooked museum, there is being built a crypt in which will be laid the bodies of its patrons — Mabel Ringling, who has preceded her husband in death, and the one-time circus wagon driver whose shrine is beauty—John Ringling.

A Wonderful Limousine

Built For Shah Of Persia Is Last Word In Elegance

The man who brags about his automobile may feel less boastful when he learns that a new limousine has just been built for the Shah of Persia along these lines.

Body—White, striped with gold.

Fittings—Gold throughout including headlamps, radiator and hubcaps.

Upholstery—Champagne-colored silk with hand embroidery.

Rugs—Imported Russian wolf hound fur.

Accoutrements—Cigarette case and lighter of solid gold encrusted with diamonds, jeweled crests decorating doors and panels.

Improves On Alarm Clock

Sleepers not easily aroused by the ringing of an alarm clock now may also use a light to get themselves up. A German clock manufacturer has devised an alarm clock with electric light bulb attached, so arranged that when the alarm rings, the light is switched on automatically. The light is on an extension cord and may be placed so it shines in the slumberer's face.

"What do you think of the present situation," a politician was asked.

"Don't bother me," he answered. "This is no time to think, I've got to talk."

Forecast Crops By Sun Spots

Nova Scotia Professor Believes Old Astronomers Used This Method

Was Joseph, in his prophecy of the seven fat years, and the seven lean ones, a class A-1 prophet, or was he merely in possession of astronomical information which, wonderful as it may seem, told him that a seven year period of good crops, to be followed by the same period of lean ones, was at hand? Such is the question raised by Professor Richard Hamer, Dean of Physics, at Acadia University, Wolfville, N.S. Professor Hamer states that it is not at all impossible that at the time of Joseph, students of astronomy, the oldest of sciences, might have been sufficiently advanced to know of the apparent effect of sun spots on the crops, and to prophesy their recurrence.

During the past few years, Prof. Hamer has made a study of sun-spots, and of the apple crops in the world-famous Annapolis Valley, during the years when the spots were plentiful, and when they were few. His study has led him to believe that when the spots are at their maximum in number, there is a large crop of only fair quality. On the other hand, when the spots are at their minimum, the crop, while small, is of excellent quality, and a good return to the farmer is secured.

By the furtherance of such research, he states, it may be possible to forecast with reasonable certainty, the quality and size of the crop in any given year, thus enabling the farmer to devote his time to the activities which will bring him the greatest return. For example, during a season in which the crop will probably be of poor quality, the farmer would devote his time more to field crops than to his apples.

Sun-spots, which are huge tongues of flickering flames, extending thousands of miles from the surface of the sun, seem to have an appreciable effect upon the weather, the rainfall and the ultra-violet spectrum, according to Prof. Hamer, and these conditions, of course, greatly affect the crops.

Beef Grading Policy Expanding

Consumers Appreciate Knowing Quality Of Meat They Purchase

Six months in operation finds the Beef Grading Policy of the Dominion Department of Agriculture expanding rapidly from coast to coast. Not only are all the larger packing houses "branding" beef, but consumers generally are beginning to appreciate the advantage of buying "Red" and "Blue" Brand beef because of the excellence and dependability of quality assured by the government brand. Every important cut on the beef carcass is stamped by the brand, and the customer can tell at a glance that the quality ordered has been delivered. "Branded" Beef is particularly popular where beef counts. All the better class shops now carry it, and the others are only awaiting consumers' demand to stock it.

One-Man Jazz Band

Jazz players of Hungary are alarmed over the new invention of Francis Szabaros, a Hungarian musician, by which one man, playing the keys, can produce every sound known to jazz band players. Szabaro recently received a letter signed "Desperate Jazz Players, Hungary," threatening a bomb explosion at his home, if he does not stop the manufacture of the apparatus.

There is an alabaster mine in Italy that has been worked continuously since it was opened by the Etruscans more than 2,000 years ago.

First Electric Telegraph

Was Invented By Sir Francis Ronalds In 1816

Who was the inventor of the electric telegraph? Most people would hesitate over the answer, and if you asked further when it was invented, they might be reduced to mere guessing. Recently, however, a portion of a copper cable, used in the earliest experiments in electric telegraphy, was presented to the Science Museum at South Kensington. It had been buried in the ground for well over 100 years. It was in 1816 that the electric telegraph was invented, and the inventor was a famous meteorologist, Sir Francis Ronalds. He offered the invention to the Admiralty, but their reply was that "telegraphs of any kind are now totally unnecessary, and that no other than the one now in use will be adopted." The telegraph "now in use" was a semaphore telegraph. Ronalds' invention was of real practical use, though it took rather a long time to transmit messages. This would, doubtless, have been remedied had he continued to work at the idea, but the Admiralty's reply discouraged him, and he turned his attention to other subjects.

Greenhouse Heated By Natural Hot Springs

Fresh Vegetables Available In May Near Nome, Alaska

Fresh spring vegetables, a rare event until the first boat arrives late in June, says an item from Nome, Alaska, will be the novelty offered there in May from a greenhouse heated by natural hot springs right under the Arctic Circle. Baker Hot Springs, seventy-five miles north of Nome, consists of seven bubblers from the earth at the foot of Sawtooth Mountain, fifty feet above sea level. Several boil out at a temperature of 160 degrees Fahrenheit winter and summer. Water from them runs through a 320-acre tract suitable for farming, of which about fifty acres were planted last year to root crops and hay. G. D. Schofield, lessee, last fall erected a greenhouse over one spring, and prospects point to cucumbers, onions, radishes, lettuce and tomatoes. On all sides of the hot springs lie ages-old ice to an unknown depth.

Unavoidably Detained

Woman Had Good Excuse For Selling Old Magazines

There is an alleged small mission in the wilds of Illinois whose welfare workers suffer to the stage of martyrdom to help further the worthy cause.

Just recently an elderly woman visited a bank in Woodstock, Ont., selling a monthly magazine for 15 cents just "to help the girls and boys of the mission." She found many sympathisers. When she left the bank one of the purchasers glanced at the paper—it was an August, 1929, issue.

Overtaking the woman he asked for an explanation. Her explanation was unhurried as she looked her customer right in the eye. "I've been detained by snow and rain." Then she plodded on her way.

Registered Seed Not Demanded

Registered seed is not demanded of Canadians exhibiting at the World Grain Exhibition and Conference, as there are many countries which do not register seed grains. There are also some varieties, such as Reward wheat and Gopher oats that are not eligible for registration in Canada, it is said, though there are expected to be numerous exhibits of these two varieties of grains.

"Way back yonder the cry was the full dinner pail. Now, everybody is happy if the gas tank is full.

Construction Is Simple

Snow Knife Only Tool Eskimos Use In Building Igloo

Along the ice-bound northern shore of Canada, live a race of men—the Eskimo—who have achieved a simplicity in architecture that vies with the most radical in history. Dotted here and there within the Arctic circle, are snow-houses, called igloos, whose first designer must have been a man of rare genius.

Architecturally, the Eskimos can point only to the igloo as an achievement, for virtually no other building is used by the dark-haired, dark-skinned wanderers of the north. Part of the year is passed in the tupek, or sealskin tent, but this shelter is abandoned as soon as frost and wind have rendered the snow hard enough to be cut into building blocks.

But the igloo, hemispherical little snow hut, is an oddity that borders on the marvelous. It is probably the only sturdy structure—unless, perhaps in the tropics—that is constructed with a single tool from material available anywhere in the Arctic. The necessary implement is the snow-knife, about 15 inches long, and the material used is ordinary, everyday northland snow.

Nomad nature of the Eskimo, no doubt, occasioned the simplicity of construction of the cozy little dwelling places. Just two men are needed to build an igloo. From firm snow, wind-swept and frost-hardened, the blocks are sliced with the snow-knife. The blocks measure some 2½ feet by 18 inches, and are 10 inches thick.

Foundation-laying for an igloo comprises laying a series of blocks, inclined slightly inward, in a 12 or 15-foot circle. By skilful use of the snow-knife, the blocks are fitted closely together. Then one of the constructors takes his place within the circle while his mate bears new snow blocks from the pile, prepared nearby.

A second tier of blocks is placed, with great nicety, upon the foundation row, sloping somewhat more inward than the first. Just as carefully, a third tier is laid, with still greater inward inclination, row after row is added until the igloo's roof arches gracefully over the builder's head. Finally, only a small aperture at the top remains, into this set the finishing keystone block, cut wedge-shaped and edged gently into position.

Before the latter stages of the building have been finished, however, it is necessary for a hole to be cut in the side wall, near the base. Through this aperture are slid the blocks which make up the upper tiers of the igloo, for at this stage the structure is too high for the worker on the outside to hand the snow-blocks conveniently to his companion. A finished igloo dome is 8 to 10 feet high.

Inside the Eskimo residence, a snow-block floor of about 2½ feet in thickness is laid. It covers the entire floor with the exception of that portion adjacent to the aperture in the side wall, which is shaped in a quasi-Gothic arch, about 3 feet high and two feet wide. A porch is constructed to shelter the doorway from the wind, and an 18-inch-square window of sliced-down ice, is set into the wall.

With this, the architecture of the igloo is completed—and Mrs. Eskimo sets about furnishing the new apartment. She spreads willow mats on the snow floor, and places on them a bedding layer of deerskin. It is also the lady of the family who mounts on the dome of the igloo and plugs with small wedges of snow, the interstices between the blocks. When whale-oil lamps are flickering within and a square of snow is pulled up in the doorway, an igloo is a cozy spot even if winds are high and temperatures low.

Museum At German Airport

Machines Dating Back To First Fliers Are Exhibited

Aeronautics from the earliest beginnings to the present time, are included in displays at a new aeronautical museum, at the Berlin-Tempelhof airport, in Germany. Among the exhibits are several original machines, dating back to the first attempts at flying. These include those of the Wright brothers, the first powered 'planes, such as those produced by Grade, and the formerly well-known Rumpler "Taube." Models of post-war craft are shown and a special section is devoted to the construction of airships.

New Roofing Material

The Canada Gypsum Company's plant, at East Calgary, is now turning out "zonolite" which, it is claimed, mixed with [illegible], makes a roofing material that is as fireproof as asbestos, lighter than cork, frost proof and having scarcely any expansion or contraction.

Profit In Turkeys If Care Is Taken

Cannot Be Successfully Reared In Close Confinement Or With Other Fowl

Turkey breeding is not the difficult undertaking that is generally supposed, when the breeding stock and poults are properly handled. Essentials to success in turkey breeding are: Clean soil, mature stock for breeding, good foods properly fed to both mature and young stock, free range and above all the keeping of the turkey flock away from other barnyard fowls, writes A. G. Taylor, of the Central Experimental Farm, Ottawa.

Soil that is contaminated with the droppings of fowls of any kind is not desirable soil on which to rear turkeys. If it is impossible to have soil which has not previously been used for poultry keeping make sure that the land has been ploughed and thoroughly cultivated. A desirable soil for turkey raising is one that is light and porous in texture—sand or gravel being desirable. Low lying land or heavy clay soils should be avoided, especially for the raising of poults.

Breeding stock should be well matured, especially the females. Good yearling birds are preferable to any other age. Well developed cockerels may be used to advantage, but should be bred on mature females. Avoid using males which are overgrown and also the use of females which are over standard weight, as they frequently break many of the eggs at hatching time.

Feeds for turkeys should be made of sound grains, and in no case should shrunken grains be used or grain that has become mouldes or heated in any way. Avoid overfeeding, as much loss in turkey raising is caused by digestive disorders. Suitable grains are oats, cracked corn, wheat, barley or buckwheat. Variety is recommended. Mashes of the above grains can be used and should be fed in self-feeding hoppers, so that the birds can help themselves. Feed the grains and mashes from hoppers or troughs and avoid allowing the turkeys to eat their food from the ground, as this is a frequent source of contamination. Poults should be fed regularly and in this way avoid the possibility of the birds over-feeding. Good mashes, finely ground, fed in the dry state are recommended in a commercial way. The feeding of finely chopped hard boiled eggs and stale bread crumbs for the first few days is highly recommended.

Young turkeys may be hatched naturally or in incubators, and brooding may be carried on in either the natural or the artificial method.

Protection should be afforded the young birds until they are at least two weeks old, after which time they may be allowed more freedom.

The turkey is, strictly speaking, a farmer's fowl, and cannot be successfully reared in close confinement. While it is possible to keep poults in a small space and still make rapid growth, cheap gains are only possible on free range.

Find Business Good

Approved hatchery men find business good this year, the field staff of the Poultry Division of the Dominion Department of Agriculture report. They also report that the sale of hatchery chicks follows the weather very closely; when the weather is good sales are good. "Approval" is making rapid headway and increased egg production for the big winter market is predicted.

Due To Superstition

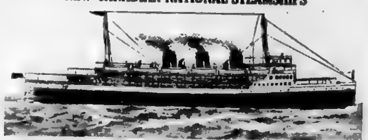
When the great plague visited England in 1665, all sorts of cures and drugs were taken. Among others, smoking was believed to be a preventive. Consequently the children were made to smoke. One historian states: "The boys at school were never whipped so much in all their lives as they were for not smoking."

"An ounce of veronal for my mother-in-law."

"I can't let you have poison. Have you a prescription?"

"No, but here is a portrait of my mother-in-law."—Lustige Koiner Zeitung, Cologne.

NEW CANADIAN NATIONAL STEAMSHIPS



An artist's drawing of one of the three new turbine steamers which the Canadian National Steamships are having built at Birkenhead, for use on the Pacific Coast between Vancouver, Victoria, Seattle, northern British Columbia points and Alaska.

The steamships are to be called SS. Prince David, SS. Prince Henry, and SS. Prince Robert. They will be 384 feet 6 inches long and 57 feet wide with a maximum load draft of 16 feet 6 inches. They will carry 334 first class, 70 third, and 1,500 deck passengers. The accommodation will include 20 de luxe rooms with twin beds, bath and shower, and 30 rooms with single bed and shower baths.

The ships will be fitted with wireless broadcast receiving apparatus with loud speakers for the entertainment of passengers, and telephones will be placed in each room. There will be cargo space of 45,000 cubic feet with an additional 4,270 cubic feet of insulated cargo space, as well as accommodation on the main deck for 30 automobiles.

Work on the new ships is now proceeding and they will be put in service for the summer season of 1930.

Alberta Flier Wins Mckee Trophy

Award For Meritorious Service In 1929 Goes To "Wop" May

W. R. "Wop" May, intrepid flier of Edmonton, Alta., is 1929 winner of the McKee Trophy, awarded annually to the pilot who renders the most meritorious service to the advancement of aviation in Canada. Announcement that Col. J. L. Ralston, Minister of National Defence, as trustee for the trophy, had approved of its award to May, has been [illegible].

In addition to performing pioneering work over Western Canada air mail routes during 1929, "Wop" May made several sensational flights on errands of mercy. On January 1, of that year, he flew an open aircraft from Edmonton to Fort Vermilion in stormy weather to carry diphtheria anti-toxin for the Alberta Department of Health, which was engaged in fighting an epidemic of diphtheria there.

A month later he made a flight for a similar purpose to Westlock, Alta., other means of transportation being absolutely at a standstill, and in March another flight was made under difficult conditions for the same purpose.

Further flights on similar errands of mercy were made by him to Alberta Beach from Edmonton, carrying a tank of oxygen for a patient desperately ill with pneumonia; to Carcajou to bring out to Edmonton for medical attention a mentally deranged woman, her new born baby and a doctor, to Keg River for a similar purpose and to Vegreville to bring out a patient suffering from a [illegible].

During the month of December May flew almost 5,000 miles over the Mackenzie River air mail route between McMurray and Aklavik. He was responsible for the organization and supervision of the first mail service under contract with the post office department for the conveyance of mail from McMurray north to the scattered settlements, reaching as far north as the Arctic Ocean. No aircraft had ever previously been flown to the Arctic coast.

Old Engine Still In Use

Claimed to be the oldest passenger engine still on active duty at Ryde, Isle of Wight, a locomotive owned by the Southern Railway has travelled 1,500,000 miles in 66 years and maintains a regular run on the line between Brading and Bembridge.

Daughter Is Stronger Now

"My daughter Catherine is fifteen years old. She was very irregular, often sick at her stomach and had to stay in bed two or three days at a time. One of your booklets was sent to us by mail so I got her a bottle of Vegetable Compound. Catherine has been taking it regularly and she is gaining in weight and every way. I told the neighbors and four other girls are taking it with good results."—Mrs. Clarence Jenkinson, Box 14, Thornloe, Ontario.

Lydia E. Pinkham's Vegetable Compound

From Shopkeepers To Store Kings

How Some Of London's Great Shops Started

Two pigs with "Lipton" painted on their sides, drawing a scarlet cart, a young man in a hosiery shop selling wire hairbrushes at 1s. 9d. while another shop nearby was selling them at 2s. 6d.—these are among the interesting and unusual things you discover when you probe into the romance of great London shops.

A. W. Gamage, the founder of the famous Holborn store, resigned from the board of directors owing to a breakdown in health a week before his death, and that is a reminder of the years of struggle and enterprise that led him at last to riches and commercial power.

There have been fifty-two of those years since the time when, with a capital of £35, augmented by the small savings of a young partner, Albert Gamage opened his little shop [illegible].

There is Charles Digby Harrod, who in 1849 opened a small grocery shop in Brompton Road.

He was bold even then—he actually had two assistants—but his premises suffered from a disadvantage. They stood at the end of a long garden, and customers had to walk an inconvenient number of yards to reach the door of the shop.

So, Mr. Harrod grew bolder, and sank all his money in building a new shop level with the street. He prospered at once—and continued to do so for forty years, until, in 1889, he sold out to a company for £140,000 in cash, and retired.

That was the beginning of the great Harrods of today.

Harrods today controls the business of D. H. Evans, of Oxford Street, another of the pioneers.

The firm was started in 1879 with an insignificant capital, but [illegible] ambition. Evans had been a draper's assistant; like Gamage, he had saved money, and, unlike most shopkeepers of his day, he had the preposterous courage to enter into rivalry with Whiteley, then just beginning.

And Mr. Evans, as a result of working seventeen hours a day, began to make money. He made so much that he was able to buy up four shops and employ twenty assistants.

In 1894 the firm was turned into a limited company. Evans retired and on the foundations that he laid there now stands a business with more than half a million pounds in shares, and a staff of 1,200.

Then there are those great multiple provision stores, Sainsbury's.

The world is familiar with the rise of the firm of Lipton's—how Sir Thomas Lipton, as a boy, worked for half-a-crown a week, went to America at seventeen in an emigrant ship, and returned to Glasgow to develop his father's small business until it grew into a concern with branches all over the kingdom.

But from among all these there is one business achievement that stands out by its contrast — and that is Selfridge's.

All the others, started small and became great. Selfridge's has the distinction of being the only London firm founded by a millionaire on the grand scale from the start.

Canadians Should Be Confident

A front page editorial of the Brantford, Ontario, Expositor recently, pointed out that business depression was largely hysteria and psychological. There is a great deal in that view. When war broke out, people in certain countries began putting their money into socks and not letting it work for the general good. This habit, of course, only aggravates conditions for a time until confidence is restored. And there should be no lack of confidence in the present day in the future of this country. Canada should never be sold "short."

Eldon, the smallest parish in Hampshire, England, has a church, three cottages and a population of twelve.

France is the chief source of the lavender flowers used in manufacture of lavender water.

Medals For Outstanding Bravery

Awards Made By Royal Canadian Humane Association

In recognition of her outstanding bravery in the Four Mile Lake tragedy, near Hanley, last August, Elizabeth Haraldson, youthful heroine of the episode, has been awarded a bronze medal by the Royal Canadian Humane Association. Word of the award was received in Regina in a despatch from Hamilton, Ontario, where the Board of Investigating governors of the Association met.

Parchment certificates for bravery were also awarded to Oscar F. Trask, Marion Trask, C. A. Trask and John C. Trask, who figured in the rescue work at Four Mile Lake.

Others awarded parchment certificates are: Robert Campbell, Vancouver; George Maynard and Austin Masomy, Ocean Falls, and C. Kneesham, High River, Alberta.

At its meeting recently, the Royal Canadian Humane Association awarded nine bronze medals and 22 parchment certificates, two of the medals being sent to Saskatchewan, along with five of the parchment certificates.

The second recipient of a bronze medal in this province is Lawrence C. Marlow, Halbrite, for his bravery in rescuing Evelyn B. Peterson from a burning building and for saving Henry Cohen from drowning. Hartley Smith, Halbrite, who assisted in the rescue of Achen, receives a parchment certificate.

Other recipients of bronze medals are: Alexander F. Milne, Winnipeg milk salesman, for the rescue of six children from a burning house; Joseph From, Nanaimo, B.C., for the rescue of Jos. Edmund Corlett and Mrs. John Corlett from drowning; Constable Thomas Smith, Ocean Falls, B.C., for the rescue of two men from drowning; John C. Davidson, East Kildonan, Man., for rescue of party of four from drowning.

In Sunny Alberta

Children In Red Cross Hospital Benefit By Sun Bath

Where the lordly Saskatchewan flows through the capital city of Alberta, you will find evidences of the new heliotherapy which is restoring strength and beauty to white faced children.

Every sunny morning, when the rays of healing flood the world with warmth and light, there is great commotion in the children's wards of the Red Cross Hospital. Orderlies are busy with the large cots while nurses superintend the babies beds, as the procession of little sun-worshippers wends its way to the wide porches and verandahs. Here the children lie all the sunny hours of the live-long day, drinking in health at every pore. Passers-by stop and glance with interest at the little patients browning in their sun-bath, which means so much after a winter indoors. For indoor treatment, is found in the Red Cross Ward, a quartz-lamp room that even on dull days the little sick ones may receive sun-treatment by lamp. From the Kinsmen's Club of the city of Edmonton this generous gift was donated and much benefit is derived from this wonderful new invention.

Urge Health Examinations

Resolutions passed by the Canadian Social Hygiene Council, in annual conclave, at Toronto, recommended the adoption of the principles of periodic health examinations as a means of prevention of disease by early detection and that an educational campaign be directed to stir up public opinion in the project, and development of the country health unit, regard being given to local conditions of each province.

Persian Balm promotes daintiness, charm and beauty. Magical in its effect on the skin. There is nothing like it for creating and preserving a lovely complexion. Cooling, caressing, it soothes and relieves all roughness caused by weather conditions. Delicately fragrant, it enhances the most finished appearance. Makes the skin rose-leaf in texture. Truly a peerless toilet requisite for every discerning woman.

Old Hen: "Let me give you a piece of good advice."

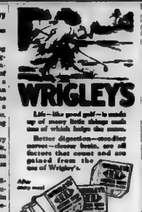
Young Hen: "What is it."

Old Hen: "An egg a day keeps the ax away."

Base Ball

Baseball players use Minard's for stiffness, strained ligaments and bruises. They also recommend it as a rubdown.

MINARD'S KING OF PAIN LINIMENT



WRIGLEY'S

Life—like good golf—is made up of many little things each one of which helps the score.

Better digestion—steadier nerves—clearer brain, are all factors that count and are gained from the use of Wrigley's.

After every meal

India's Caste System Not Breaking Down

Is Strong As Ever Among Orthodox, Says Missionary

"For public service in India," engraved on the back of an imposing-looking medal, bearing the King's insignia, is, in brief the story of Dr. Margaret MacKellar's 40 years' sojourn and medical work in the Empire of the East, and of a king's recognition of a lifetime of devotion. It is the Kaiser-i-Hind Medal, second only to the Victoria Cross, and was pinned on Dr. MacKellar by Sir Michael O'Dwyer. It is awarded regardless of creed or color, and was, in this case, presented mainly for outstanding work during famine and plague.

But there is another medal of which Dr. MacKellar, a gracious modest, little lady, with a very large heart, overflowing with India's need, is scarcely less proud. This medal is of pure gold and has four gold bars attached, one for 25 years of service, because such medals are given only to those who have served in India for a quarter of a century, and the other three denoting five years each. It was presented at the diamond jubilee of the Presbyterian Church in Canada, which met in Montreal, in 1924. The last two bars were added recently.

Dr. MacKellar is a graduate of Queen's University, and she celebrated the 40th anniversary of her sailing from Halifax for India on May 2, this year. Forty years ago her dedication service was held at Ingersoll.

"The caste system is not being broken down in India, and never will be, for, although caste is not recognized by the Christians, it is as strong as ever among the orthodox," the missionary said. "There are no less than 17 different cook-houses in connection with the hospital, so that women of different castes may have their food prepared separately.

In the sunlight on one side of the street walks the high-caste man, and in the shadow of this side slinks the low and outcast. There are 22,000,000 who are literate to some degree, but that is only 22,000,000 out of 320,000,000.

Campers Carry Minard's.

Had Excellent Idea

South Carolina Editor Expected To Profit Two Ways

Robert Quillen must have thought he could kill two birds with the one stone when he ran this ad. in his unique Fountain Inn, S.C., Tribune:

Free Rooster Saturday

Some weeks ago I bought a white Leghorn rooster. Tobe Garrett says he is worth $25, but the rascal crows at 3 a.m. and I don't get to bed until after 12. Being waked at 3 makes me sore. So I'm giving him away Saturday to somebody who pays a year's subscription. You may be the one to get him. If only one person pays his subscription, he gets the rooster. If two pay, we'll draw. If a dozen or more pay we'll draw.

[illegible]

Two important conventions are to be held in Wolfville, Nova Scotia, during June—that of the Canadian Seed Growers from the 19th to 21st of that month, and that of the Canadian Seed Testing Association a week later. As regards the second unit, it is the first time that the Maritimes have been chosen for its convention.

Radio-telephone conversation which was held recently between New York and Sydney, Australia, by way of London, a distance of 18,000 miles, is said to be the longest on record.

Teach Blind Children Physical Training

Unable To See Instructor Boys Follow Commands Easily

Blind children, handicapped by their lack of sight, have overcome many obstacles imposed by nature but probably one of the most important achievements to their credit within the last year is their triumph in the realm of physical training, an insight into which was given at a class conducted by H. C. Patterson, physical director of the Central Young Men's Christian Association, at Montreal.

Unable to see their instructors, the boys followed the commands with the practiced ease of their more fortunate brothers who can see, and it was explained that, as a result of the carefully conceived plan for training these children, it was possible to lead them in certain exercises, the object of which is to help them increase their physical fitness. Similar results have been obtained with deaf and dumb children.

GIVE CONFIDENCE TO YOUNG MOTHERS

A simple and safe remedy for the common ills of babyhood and childhood should be kept in every home where there is either a baby or a young child. Often it is necessary to give the little ones something to break up a cold, allay fever, correct sour stomach, and banish the irritability that accompanies the cutting of teeth.

Experienced mothers always keep Baby's Own Tablets in the home as a safeguard against the troubles that seize their little ones so suddenly and the young mother can feel reasonably safe with a box of these Tablets at hand and ready for emergencies.

Baby's Own Tablets are a mild but thoroughly laxative that act without gripping and they are absolutely guaranteed free from opiates or other harmful drugs. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Splendid Record

Lifeboats stationed around the coast of Britain and Ireland, manned by volunteer crews, have saved 63,187 lives in little more than a century, an average of eleven lives a week.

Worms feed upon the vitality of [illegible] and endanger their lives. A simple and effective remedy is Mother Graves' Worm Exterminator.

On July 11, 1905, a special Santa Fe train, chartered by Walter Scott, wealthy miner, completed a run from Los Angeles to Chicago, 2,265 miles, in 44 hours, 54 minutes. The run was made purely as a bit of sport.

Use Minard's for Burns.

The sea of matrimony is very rough. That is why one voyage is usually enough.

"I Was Skinny and Tired. Now Peppy. Gained 11 Lbs."

"Had tired feeling, no pep. But Ironized Yeast gave me pep, much stronger. Gained 11 lbs. Boils and pimples disappeared." — Mack Laltoria.

Amazing new Ironized Yeast adds 5 to 15 lbs. in 3 weeks. Changes "skinny" weak body to strong, well-developed form all admire. Blotchy skin gets clear and rosy like magic. Nervousness, indigestion, constipation disappear overnight. Sound sleep. New pep from very first day.

Two great tonics in one — special weight-building Malt Yeast and strengthening Iron. Pleasant little tablets. Far stronger than unmedicated yeast. Results in ½ time. No yeasty taste. No gas.

Don't be "skinny," weak, unattractive. Get Ironized Yeast from druggist today. Feel great tomorrow. Money back from manufacturer if not delighted with quick results.

Little Helps For This Week

"Whosoever will come after Me, let him deny himself, and take up his cross and follow Me."—Mark viii. 34

The cross is not so hard to bear
Since I have learned to say,
O Lord, I walk not anywhere
Unless Thou lead'st the way.
—S. R. Leroy.

Both above and below, which way soever thou dost turn thee, everywhere thou shalt find the cross, and everywhere of necessity thou must have patience if thou wilt have inward peace, and enjoy an everlasting crown. Thomas A Kempis.

To repel one's cross is to make it heavier.—Henri Frederic Amiel.

Coal mines of France have orders for more coal than they can produce.

EVERY BIRD LOVER should have this new revised edition of — Brock's Book on Birds—replete with 242 pages of valuable information on the care and feeding of cage birds also enlarged (16 pages) of practical advice on the treatment of bird diseases.

Every Bird Lover Should Have This Book

Keep FIRE at Bay with GYPROC

FIRE seldom visits houses having Gyproc Wallboard ceilings, partitions, walls and sheathing. On the contrary Gyproc has saved many homes.

This pioneer Canadian fire-safe gypsum board has a new Ivory coloured finish this year that makes decoration unnecessary (when panelled). It is just the thing to use for making extra rooms in the cellar or attic.

Quickly erected, inexpensive, structurally strong, Gyproc Wallboard gives permanent fire protection.

Your dealer's name is listed below. Ask him today for full information or write for interesting free book, "Building and Remodelling with Gyproc."

SAFER

Firestone
GUM-DIPPED TIRES

HERE'S good news for you — Firestone Tires are even safer, tougher, and stronger than ever before! Greater non-skid life — deeper, quicker action tread — more contact with the road — more rubber between the plies. These new advantages give you even more mileage and greater safety.

And only in Firestone Tires do you receive the advantages of Gum-Dipping — the EXTRA process by which every cord is saturated with rubber to eliminate internal friction — the greatest enemy of tire life.

Specify Firestone Gum-Dipped Tires on your new car or make your present car a better one by equipping with Firestones. See the Firestone Dealer today — he serves you better and saves you money.

LINDBROOK

Wheat seeding is about completed here now and some oats have been seeded, but we need moisture or else with the seeding completed so will all the rest be and when one looks at the the tone of it that has been passing over this last week and refusing to fall, one wonders what is wrong with this neck of the woods.

The pastures are not coming along as they should either, and the water supply promises to be a problem too this year, add to that Sir a ... teefat. Oh boy ain't it a Grand and Glorious Feeling?

The lamb crop here this year seems to be good tho' and the price of cattle is keeping up, so all is not lost as yet.

Mr. A. F. Silvgrasides is away on a visit to Edmonton.

Mr. Silversides has installed a new combined cash register and adding machine in the store here.

We nearly had a bad catastrophe here the other day when a light truck driven by a South Side Chinaman who was buying chickens throughout the country tipped over the creek bridge. It seems that he was an amateur driver and the truck an old one minus power and with poor brakes, a bad combination in these hills. The truck backed down the steep approach and tipped over the embankment. Luckily he escaped. Mr. Homer assisted by Mr. S. Lumb got him out with a team and he proceeded on his way to the city. We would like to know how he fared, anyway he must of made it or there would have been an inquest.

A female dog owned by Mr. Gou... fostered a baby rabbit here when her own offspring was taken from her, it seems strange but is well authenticated.

The bungalow on the store property has been rented to Mr. Ivor Nore, who has moved in with his wife and child. Mr. Nore is working on the C. N. R. here.

Mrs. A. Sponde spent the week end in Edmonton.

KINGMAN

Mr. and Mrs. Noah Dettwiler and family of Lyman, Colorado have been visiting friends and relatives here for a few days. Mr. Dettwiler's health has improved much.

Mr. C. R. Blychert had some dental work done in Camrose on Tuesday.

Mr. and Mrs. Ed. Tollefson and C. O. Pedersen are visiting at Cold Lake for a few days.

T. J. Rognens was a business visitor in Edmonton on Tuesday.

Mr. and Mrs. Gimbles of Edmonton and Mr. and Mrs. W. McIntosh were dinner guests of Mr. and Mrs. W. Hartschen on Sunday.

Mr. and Mrs. C. Simonson were Camrose visitors on Saturday.

Mrs. J. Carsson of Yahk, B. C. is visiting with Mrs. E. Erickson for a few days.

Mr. A. Asp visited in Mottahow over the week end.

Mr. and Mrs. C. R. Blychert visited with Mr. and Mrs. K. Shaalen on Sunday evening.

Miss G. County, Miss M. Lansbury, Miss Ina Lovegren and Miss Irene Horte hiked from Camrose to Kingman on Saturday evening. Facing a heavy wind, they were extremely tired when they got here, they visited with Mr. and Mrs. Thor Horte over Sunday.

Mr. and Mrs. N. Bergen of Wetaskiwin visited with Mr. and Mrs. Thor Grahn over the week end.

Mr. and Mrs. E. Erickson visited with Mr. and Mrs. W. Simonson on Sunday evening.

Mr. and Mrs. S. Simovitch of Round Hill visited at the home of Mr. and Mrs. P. Rudnunsky on Sunday.

Local and Personal

Mr. F. Wood was a visitor to the city one day last week.

Paul Thompson, junior in the local branch of the Bank of Montreal is enjoying a two weeks holiday.

Mr. Herbert Martin recently of Tofield now of Edmonton, was a visitor to town on Sunday.

The junior C. G. I. T. had a very successful silver tea on Saturday and they wish to thank all those who contributed or in any way helped to make the tea a success.

On Friday and Saturday, May 30 and 31st and Saturday afternoon the Variety Theatre are giving their patrons a real treat, a seven reel feature a one reel comedy and the first two reels of the new serial "Tarzan the Mighty" will be shown. A special price is set and this is 25c for adults and 10c for children. This is your chance to see a good picture at a low price.

Miss Eva Clutterham who is on the staff of the Bank of Montreal in Chipman is on her holidays. She visited her parents here over the week end and on Monday morning left for Edgerton.

Mrs. F. Griswold returned from the hospital on Sunday where she underwent an operation for appendicitis. She is now feeling much better.

Mr. Pat Gladue returned home from the hospital on Monday morning where he recently underwent an operation for appendicitis. He is now fully recovered.

Mr. J. Bigelow who has been one of the night operators at the C. N. R. station has been removed to Unity Sask.

Miss Loret Ross was a visitor to the city one day last week.

On Monday evening the junior boys basketball team played the senior team. It was a hotly contested battle and resulted in a win for the seniors.

Mrs. Paradis of Edmonton was in town on Tuesday of this week.

The tennis courts are now all being used and are in good shape. If they are to be kept in good shape we must have money, so now would be a good time to pay your fees.

Owing to Saturday being a holiday and a large number of people will be away on that day the Variety Theatre has arranged to show their picture on Friday night as well as on Saturday, so that those who are following the serial will be able to see the last episode.

A reception will be held in the Women's Institute Rooms on Tuesday, May 27th, at 8 p. m. under the auspices of the Holy Trinity Church and W. A. to welcome Rev. G. W. Wilson who has been recently appointed here for the summer. It is hoped that all Anglicans will make a special effort to attend and thus accord him a hearty welcome.

OBITUARY

Lydia Swartzendruber Yoder, daughter of George and Mary Swartzendruber was born October 28, 1858 in Johnson Co., Iowa; died near Tofield, Alberta May 16, 1930; age 71 years 6 months and 20 days. She united with the Amish Mennonite Church at the age of 16 and remained faithful to the end. She was united in marriage to Levi D. Yoder January 31, 1878. This union was blessed with ten children, all of which she leaves to mourn her departure. These are George, of Hartville, Ohio; Mrs. J. E. Swartzendruber, of Tavistock, Ont.; Ray, of Carthage, New York; David, Jacob, Henry, John, Ezra, Vernon and Mrs. Joe E. Kauffman, all of Tofield, Alberta.

Her husband preceded her in death April 11th, 1916, also two step daughters and three grand sons. She also leaves 26 grandchildren, 11 great grandchildren, 3 sisters, 3 brothers, 1 aunt, 1 uncle and many other relatives and friends. Her death was a shock to the community. Death was due to heart failure.

She lived in Iowa until the year 1912 when she moved with her family to Tofield, Alberta. She was of a peaceful, quiet disposition, devoted to her family and church, a friend to all who knew her, and by whom she will be greatly missed.

Funeral services were conducted at the Salem Mennonite Church on Sunday afternoon.

Messrs J. King, H. Brenneman, D. Roth, M. Roth, E. Stauffer, J. Stauffer acted as pallbearers.

Interment took place in the Salem cemetery.

Vegreville U. F. A. Choose Matheson

Annual Convention Pledges Support To Former Government's Policies

VEGREVILLE, May 19 — The U.F.A. nominating and annual convention held in Vegreville, Saturday named A. Matheson, present sitting member for the constituency, to represent it in the impending election. Mr. Matheson won the nomination easily over his only other opponent, T. E. Seale, of Tofield. The names of other probabilities which have been spoken of around the constituency were not mentioned as it was conceded that Mr. Matheson's following was too strong for anyone else to attempt to assail his position.

The morning session of the convention was occupied with the election of a chairman and a secretary for the meeting and with the discussion of very routine matters. The afternoon session was opened by the report of the resolutions committee. One of the main items of the report was regarding the supplementary revenue tax.

A resolution dealing with the severity of the Tax Enforcement act was brought before the convention but was defeated.

A storm of protest arose over the resolution that the U. F. A. employ especially trained field men to supervise organization of new locals. The contention of the committee was that this work would be better done by these men than by the untrained directors who have now charge of the work. The motion was lost.

The usual resolutions showing confidence in the government and pledging the support of the delegates to the candidate were passed.

The following are the delegates from the Tofield locals:

Ladies: Mrs. A. N. Booth, Mrs. Peter Lee, Mrs. J. Munroe, Mrs. T. E. Seale, Mrs. J. W. Warner, Mrs. T. R. Murray.

Gentlemen: J. W. Warner, T. R. Murray, W. W. Hill, T. E. Seale, G. Abernethy, Chas. Ingram, Johnstone Ferguson, P. O. Moline.

There were also a large number of visitors.

TENDERS WANTED FOR BREAKING

Tenders will be received up to June 1st, for the breaking of fifty acres, located six miles north of Tofield. For further particulars apply to:—

L. H. GRAHAM, Tofield

CARD OF THANKS

The Kauffman and Yoder families of Tofield desire in this manner to express thanks to their relatives and friends for expressions of sympathy shown during their recent sad bereavement.

Harry A. White
Liberal Candidate for the Electoral Division of Vegreville

LIBERAL CANDIDATE A "SELF-MADE" MAN

Herewith the Mercury presents a brief, but accurate, sketch of the life of Harry Arthur White, Liberal candidate for the Vegreville Division. It presents nothing sensational to many westerners who have had to go through the same mill as Mr White and who grade as he does, as first class Canadians, who from humble beginnings have attained places of influence in their respective communities. But there is more to it than that. In these days, children demand either from their parents, or from the state, privileges to make their way easy for them. Yet success was never attained by ease or waiting for somebody else to bring it to you and lay it at your feet. Mr. White has been reasonably successful but he worked for it as all others have to do.

He was born at Madoc, Ontario, in 1893. Like many, if not most, successful men, he picked out a farm on which to be born. His first school experience came in the ordinary way of every farm boy in Ontario, namely at the little, single roomed rural school, where the over-worked teachers in Ontario at that time were paid the striking salary of from $300 to $500 per year. (Read that and weep you teachers that start off at $1000 and do less than one half the work today.)

On completing his high school course, his thoughts turned westward and he came to Alberta, busted but full of urge to make something of himself. This was in 1912. Eventually he entered the University of Alberta and graduated with two degrees, Art and Law. Fixing upon law as his profession, he came to Mundare in 1918 with 90c in his pocket. He opened an office and waited for clients, who soon recognized his abilities and gave him plenty to do. His first client was J. D. McAllister the well known Mundare merchant.

He has continued the practice of law at Mundare to date with noted success. In 1919 he was elected to the Mundare school board and is still a trustee. In 1927 he became mayor of Mundare and is in that position at present.

As a lawyer, Mr White probably does not win all his cases—no lawyer does. But whether he is for the plaintiff or the defendant, the opposing counsel knows that he has been in a real battle, before the case is concluded and judgment given.

In politics he has been consistently Liberal. His views are positive and he never hesitates to express them forcibly. One may not always agree with an uncompromising attitude on public questions, but it is nevertheless worthy of respect and attention in these days when so many are straddling the fence and afraid to express themselves one way or another.

It may be of interest to note that Mr White earned with his own hands at hard manual labor, every cent of money necessary for his high school and university courses.

The Farm For The Farm Boy?

Every once in a while some pulpman or philosopher comes along with a few suggestions on how to remedy the ev ils with which agriculture is supposed to be afflicted and frequently winds up with a prevention against the whole great issue which is "Keep the boy on the farm."

My old uncle's gr'at he all right of the itinerant sales lever fully acquainted with the actual volume of the country which he conducts surveys from the window of the bottoms of the industry about which he descants so easily and freely and the trend of the times, about which he may, or may not be a bit astray. If he were he would be entitled to be heard with all the respect the cross-paper reporters that he has nothing to say on the subject today."

Now, in this case I keeping the boy on the farm is a new one, and I think a good many angles to it some of which are well worthy of a little reflection by the individual before he decides whether the boy should be kept on the farm and if so how to go about it.

The first question that naturally arises is "Should the boy be kept on the farm?"

This query opens a great realm of speculative thought and examination long before the second answer "How is it to be done?" can be satisfactorily dealt with.

It can be said at the outset, without fear of contradiction, that not all boys are fitted for life on the farm physically or temperamentally, despite the fact that the farm affords an outlet for the expenditure of a wide range of talents. To try and bind such youths down to a life with the soil is akin to shipping a consignment of finned vents and fur coats to the negroes of Equatorial Africa, and about as useful.

And what about agriculture itself? Does agriculture need, and can it offer suitable rewards and satisfaction to, all the boys who are born on the farms of Western Canada?

Here again is a question which has an important bearing on the problem of taking care of the future of the rural youth. Fifty years ago a single farmer could only raise enough produce to feed a handful of people. Today with the use of hard, mechanized and highly powered implements, one farmer can feed a host and the trend in the direction of increasing the productive power of the individual in the realm of agriculture is neither receding a halt nor a swing in the other direction.

If science combined with improved business management, is going to continue to widen the scope of the individual engaged in agricultural production, the time may come when a very considerable proportion of the lads reared on the land will have to look elsewhere for a vocation.

Then, even more than to-day the question of determining the fitness or otherwise of the rural boy for bringing forth the fruits of the earth, will assume a greater importance. As has happened in other industries in the field of time and change those best adapted by nature and preparation for agriculture will be those who will stay with the industry, and they only. The others will find other fields more suited to their talents and inclinations.

If the foregoing diagnosis of the trend of the times is correct, it is very fortunate that the Western Canadian provinces have within their borders an infinite variety of resources awaiting the application of the initiative and courage bred in our youths for their recovery and conversion to the service of mankind.

It is also fortunate that coincident with this tendency to reduce the man power on the farms a marked development is taking place in industrial life in the west which along with the development of the resources already referred to, will afford an ever widening outlet for the energies of young manhood.

Progress has always been marked by evolutionary changes of this kind broadly they being described as such but this is evolution to try to stem the forward march. The wise attitude is to try and discover what present day trend is leading to the future and take advantage of the opportunities that may afford.

These are questions as to no doubt are receiving serious consideration by those responsible for the conduct of education in rural districts and those who attend it is not content with taking things as they are for granted but are looking for the best and making adjustments which the uncertainty of the times may dictate.

Will Study Canadian Method

Soviet Government Interested In Dr. Barnes' Ice Destructor

In Howard P. Barnes is planning to go to Russia, for a two years' stay, if satisfactory arrangements can be made to take care of his Canadian interests he while there. A commission has been appointed by the Soviet Government for the study of Dr Barnes' method of ice destruction and his personal appointment by the engineers in charge has been announced.

As Dr Barnes now occupies only an honorary professorship at McGill University, Montreal, there will be no difficulty in that quarter, but he has a research institute of ice engineering in Montreal, and the appointment of a principal to replace him there is a duty that must precede his departure

In Different Form

A diamond, a lead pencil, and a piece of coal are made of the same stuff. These three things are really carbon in different forms, and are just as much one as hot, liquid water and water vapor are the same thing, and as that liquid brings almost food very delicious, and yet actually, they are just one and the same thing in different forms.

Steps Planned For This Year

Gun Men Plans To Watch Arrow Shafts Unused

It looks as if 1930 is going to distinguish itself as a year of amazing events.

Never in are just a few of the things that somehow men and women are planning to do during the summer.

Fly an engineless glider across the Irish Sea from Holyhead to Dublin.

Cross Niagara on a miniature submarine.

Walk blindfold around the top of one of the tallest buildings in Britain.

A young airman Mr Alec S. Tinfford of Birmingham, is to attempt the daring-do feat of flying a glider across the Irish Sea. He has already had some desirable experience in gliding on water boats

The man who is hoping to cross the channel on water boats is Mr J Maynard, who has invented an ingenious device consisting of a pair of secondary shoes attached to the tops of two air-tight bags, which he inflates with a bicycle pump. To help him in his 21-mile stroll across the ocean he will use a pole attached to another inflated pair. He will obtain refreshment from a floating quick-lunch counter in the shape of a converted army tank channel.—From Pearson's weekly.

PEOPLE "ALL NERVES"

What To Do If You Find Yourself In This Condition

The sort of thing that specialists call nervous exhaustion is a very common condition caused by over-work and worry, according to them. The sufferers find themselves tired, low-spirited and unable to keep their minds on anything. Any sudden noise startles and they are apt to become violently excited. They cannot sleep well at night, and are unable to concentrate. Such a condition is indeed painful.

Doctoring the nerves with medicines is a terrible mistake. The only real nerve tonic is a supply of good red blood. Therefore the treatment for nervousness and run-down health is Dr. Williams' Pink Pills, which promptly build new, rich, red blood. The revived blood strengthens the nerves, improves digestion and new strength which come after a course of these pills will delight every sufferer.

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr Williams' Medicine Co., Brockville Ont

Preparing Eggs For Storage

In new and up-to-date cooling egg-preserving plant at the Pacific Coast Terminals, Limited is now in operation, preparatory to the large demand regarding them at the rate of 300 cases a day

Miller's Worm Powders not only destroy the worms, but by their action on the nerves, tend to their action on the correct such troubles as lack of appetite, biliousness, and other internal disorders that the worms create. Miller's Worm Powders lend the matter what condition their worms may be in, they will do so. Treatment as soon as the treatment begins.

Something New In Business

Resting exercuats has proved a successful business. A story at at East Ham, London, England, during the recent chilly weather. The rate for use of the garments in the neighborhood of four cents a day, and a small deposit is required. Many use the garments for only one day.

Could Hardly Live For Asthma,

writes one man who after years of suffering has found complete relief through Dr J. D. Kellogg's Asthma Remedy Now he knows how soothem has been his wonderful. This medicine remedy gives sure help. It is effected with medicine in small doses or vague it brings the help so long needed. Every dealer has it or can get it for you from his wholesaler

Value Of Timber Increased

Special timber cruises to establish the true value of timber holdings and the transfer from "sold land" to the timber land categories of certain areas in British Columbia have increased the assessed value from $18,-422,977 in 1927, to $25,81,970 in 1928.

First-Aid

For cuts, burns and aches, foot troubles, colds and bruises, and for all household emergency purposes, Minard's stands "at the ready."

MINARD'S KING OF PAIN LINIMENT

24 Hours Ends COLDS

You can send the soothing vapor of the pine woods, to the cause of your cold by inhaling Catarrhozone.

Little drops of healing balsams are distributed through the whole breathing apparatus in two seconds.

Like a miracle, that's how Catarrhozone works in bronchitis, catarrh, colds and irritable throat. You simply breathe its healing, fragrant vapor, and every trace of consumption and disease flies as before fire

Catarrhozone

Over-a-Million Sold!

In Canada Alone Last Year

No trace of the disease remains after Catarrhozone is used—no more trouble to clog the nostrils—no more headache and burning eyes. Two months' treatment (guaranteed) costs $1.00; smaller sizes, 50c, at all dealers.

A Blind Soldier-Lawyer

South African War Veteran Proficient Performer On Cornet

Those who know him well never think of Colonel Lorne W. Malley, retired hero of the South African War veteran as sightless. Colonel Malley, long known in the British and Canadian Legions as Trooper Malley, is an active law practitioner at Iroquois, Ont.

His ploughings take place largely in the cornfield, and one results that the first crop he handled was as defendant in a murder trial there.

When Colonel Malley returned home from England after his Colonel Commission minister of militia, named him a post in the Royal Military College. He was joined as a recruiting officer throughout Canada during the Great War

Then he decided to study law, on the advice of his friend, the late Sir Hon. Mr. Osler, of Toronto. The colonel read law hard, passed his exams, which usually takes three years, and the Ontario Law Society called the blind commissioned and scholar to the bar. He decided to live in pretty quiet, which to know from youth, and bought a fine old stone residence and garden in the village of the Hon. Lawrence River at that place, changes in which he directed himself.

Conquers Curry Minard's.

Resting Place Of Statesmen

Lord Balfour's desire to be buried on his own estates recalls the variety of attitudes statesmen have adopted towards sepulchres in Westminster Abbey Bonar Law, a Presbyterian, like Gladstone, is interred Anglican, both rest in the Abbey alongside the Kings and Queens, and Disraeli, Canning all of the Ernstine type Disraeli preferred a country church, and Pitt, who to know from youth, and bought a fine old stone residence and garden in the village of the Hon. Lawrence River at that place, changes in which he directed himself.

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an effective, yet harmless, way to relieve the stomach acidity for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to rid the excess acid. The stomach becomes sweet the pain departs. You are happy again in five minutes.

Don't depend on crude methods. Simply buy a 25c bottle of genuine at all the years of searching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Prince Park In Banks

Washington State Indeed Celebrates Centenary Yesterday

Thirty thousand acres, similar to the state of Washington, have authorized ten cents each while their tourists have given twenty-five cents each. Lowered the purchase of 50 acres of land on the United States side of the border for the establishment of an international park at Blaine, on the International Boundary. The Trades and Labor Council at Vancouver were told by a visiting delegation from Bellingham, Washington, of the donations. It would be the first international park in the world, the delegates said, urging that an equal amount of land be provided on the Canadian side.

"If the same interest is taken on the Canadian side as on the United States side," it was stated, "the project will be a great success."

It was suggested that an annual celebration might be held by both countries at the park on the second of July each year.

Around the Corner

Since the stock market crash last October, many new results that the first crop he handled was as defendant in a murder trial there.

When Colonel Malley returned home from England after his Colonel Commission minister of militia, named him a post in the Royal Military College. He was joined as a recruiting officer throughout Canada during the Great War

Then he decided to study law, on the advice of his friend, the late Sir Hon. Mr. Osler, of Toronto. The colonel read law hard, passed his exams, which usually takes three years, and the Ontario Law Society called the blind commissioned and scholar to the bar. He decided to live in pretty quiet, which to know from youth, and bought a fine old stone residence and garden in the village of the Hon. Lawrence River at that place, changes in which he directed himself.

For Scalds Or Burns.

Dr Thomas' Eclectric Oil is a standard remedy for the prompt treatment of scalds and burns. The healing power of this oil soothes the pain and aids a speedy recovery. Mothers find it also an excellent remedy for all manner of skin troubles, and for sore throat, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house is available, saves many a doctor's and vexation anywhere.

A New Motor Discovered

"Driver's head" is a well known disease. Rough roads, requiring constant steering of pedals and controls, are responsible for the trouble which can be very painful. Doctors and chauffeurs suffering from the new ailment are recommending that best seals of some soft material should be provided by motor manufacturers, particularly for racing cars

Why suffer needlessly

Why suffer needlessly" Douglas' Egyptian Liniment brings quick, sure relief to scald feet, soft corns and bunions. Inflammation Removes proud flesh.

Can Supply Canada's Needs

An investigation made by the Canadian Government Department of Mines shows the sodium sulphate deposits in Saskatchewan containing over 100,000,000 tons of natural hydrous salt, enough to supply the Dominion's requirements and to furnish a surplus for export. One of the chief uses in Canada of this "salt cake" is in the production of sulphine or kraft pulp.

If you do only what you're compelled to do, you're a slave, and the way to set yourself free is to do what you are not compelled to do.

Biggest Floating Elevator

Rosetta, France, now has the largest floating elevator ever constructed, it having been delivered by a German company, for reparations account. Weighing nearly 3,100 tons, the device is designed to empty dredger barges, and deposit the material on land, to be filled in. It consists of two large barges, between which is suspended an endless chain, carrying 47 buckets, each capable of holding about 380 litres.

For a vermicide an excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

In early Saxon marriages, the father of the bride delivered one of her shoes to the bridegroom who touched her head with it in a symbol of his authority

The preliminary note dates back to 2,100 years before the birth of Christ and was invented by the Babylonians.

BUDGET ADOPTED BY MAJORITY OF TWENTY-EIGHT

Ottawa, Ont.—The final budget of the 16th Parliament of Canada passed the House of Commons by a majority of 28 votes. Two members of the Conservative Party and one member of the U.F.A. group voted with the government.

Supporters of the government lined up solidly behind the fiscal proposals brought down by Hon. C. A. Dunning, Minister of Finance, May 1st.

The vote stood:

For the budget, 134.

Against the budget, 28.

Opposed to the budget were the members of the Conservative party with the exception of Finlay Macdonald, member for Cape Breton, South, and T. E. Simpson, member for West Algoma. Both of these Conservatives expressed considerable satisfaction with the budget which they favored these provisions of the budget which they considered advantageous to the maritimes, and consequently they supported the government.

L. W. Johnstone, Conservative member for Cape Breton, North-Victoria, had previously announced that he favored provisions of the budget which he considered advantageous to the iron and steel industry. Being paired, however, he did not vote. L. D. Ietsif, U.F.A. member for Leduc-Beaver, Alberta, supported the budget.

Crowded galleries listened to many of the stirring scenes which fastened the last budget debate. Particularly after six o'clock the house has packed with the sub-committee and abandoned in the afternoon, when was suffered by the Progressive group and the Conservative opposition respectively.

The sub-amendment, sponsored by W. R. Motherwell, Conservative, Moosomin, Sask., was smoved under by a vote of 177 to 18. He came support came from the Progressive, U.F.A., and Labor groups in the house.

The Conservative spokesmen, which was moved by Hon. R. B. Bennett Opposition leader, met with a similar fate by a majority of 40 votes. 13 Labor members stood: For the amendment, 06; against, 134.

May Increase Salaries

Postmaster-General Will Try To Secure Higher Pay For Postal Workers

Ottawa, Ont. — Further attempts will be made to find a way to increase the salaries of postal employees, Hon. Peter Veniot, postmaster-general announced officers of the United Postal Employees of Canada after a conference extending over three days. Mr. Veniot said that he had no previous attempts to secure increases for the men have been unsuccessful owing to decisions of the civil service commission, but consideration would be given to alternative methods of attaining the desired result.

Indian Flier Receives England

Croydon, England. —The Parsee Indian flier, R. B. Tata, arrived by aeroplane alone from India, after a nine-day flight in an eleven cylinder Puss moth machine. He said: It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet the pain de-

Pay Tribute To Explorer

Oslo. Norway.—Norway recently paid official tribute to Dr Fridtjof Nansen, whose sudden death occurred May 13. The Storting, or legislature, held an extraordinary meeting at which President Hambro voiced the country's praise of the great explorer and humanitarian The Storting's effort to pay the explorer's funeral costs was accepted by the Nansen family.

Naval Parley Was Costly

London, England.—Cost of the London naval conference to the British public funds was almost a thousand dollars a day. Figures made public show the complete expenditure was £17,800 (about $63,000), or an average of £183 (about $916) daily for a period of 91 days.

Plans Are Questioned

Ottawa, Ont. Proposed construction of a cold storage plant and fish wharf at Vancouver by the Vancouver Harbor Commissioners is the subject of a series of questions placed on the order paper of the House of Commons by Hon. H. H. Stevens (Conn., Vancouver Centre).

W. N. U. 1020

Delegates To Labor Conference Named

Substitutes Have Been Announced By Hon. Peter Heenan

Ottawa, Ont.—Gerald H. Brown, assistant deputy minister of labor, and Dr. W. A. Riddell, Canadian advisory officer resident at Geneva, will be the two official Dominion Government delegates to the 14th annual meeting of the International Labor Congress meeting at Geneva, on June 10 next.

Mrs. R. P. McWilliams, of Winnipeg, has been named to accompany them. Eastern Canada men as technical advisors to the official delegation. Announcement of the selections was made here by Hon. Peter Heenan, Minister of Labor.

Major J. H. Reid, chairman of the British Columbia division of the Canadian Manufacturers' Association, is to attend the congress as representative of the employers of labor while Tom Moore, president of the Trades and Labor Congress of Canada, will represent the workers.

Aviation Valuable To Canada

Move Development Is Urged By Sir W. H. Boyle

Saskatoon, Sask.—That Canada will gain more by the development of the aeroplane and radio than any other country in the world, was the statement issued by Dr. R. W. Boyle, principal of the physical science division of the new national research laboratories at Ottawa.

He emphasized the value of the aeroplane and radio in bringing together the north and the south which with its wide stretches of uncongled territory would remain isolated and inaccessible without the aid of these two developments of science. Boyle said that particular attention was being paid to aerial photography and the research department at Ottawa.

Workers' Bill For Debate

Measure Has Been Referred To House of Commons

Ottawa, Ont.—A measure respecting employment of Canadian workmen on government contracts and interests was referred to the House of Commons by the committee on industrial and international relations.

The sponsor of the bill, Dr. J. J. H. Cousin, (Liberal, St. Ann), informed the House that the measure was of serious interest to labor, especially in the City of Montreal. In brief the purpose of the bill, he proceeded, was to provide that there should be no age limit in respect to Canadian workmen seeking employment on government contracts.

Will Holiday In Europe

Successful Western Farmers Going Back For Short Time

Toronto.—Forty-five farmers, mostly from Alberta, and made up of Ukrainians, Finns and Central Europeans, have arrived here on their way to Europe. Travelling in ten automobiles, men, women and children, some of the latter barely remembering the land of their birth, they are going for a holiday bur after successfully establishing themselves on the land in Canada.

Starting from Edmonton, the party motored over a route comprising three thousand miles to Toronto, and will continue through parts of the United States then crossing again.

Would Use Old Law

Paris, France.—With a view to making France subsidiary for loafing and petty criminals, a bill has been introduced in the chamber which involves a law of 1885 to the extent of imposing the choice between expatriation and permanent confinement of hard labor for any person who, having already spent at least six months in prison, shall have been convicted a second time.

Far Scott Centenary

London, England.—An appeal to Scotsmen throughout the world to subscribe five thousand pounds sterling (nearly $25,000), towards a suitable and dignified way of commemorating the centenary on September 21, 1930, of Sir Walter Scott, the great novelist, has been issued by the Duke of Buccleuch, president of the centenary committee.

Early Wheat In Alberta

Edmonton, Alberta.—Many of the early sown wheat fields of central Alberta are standing with even growth of excellent color to the height of two and three inches. According to the monthly crop report of the Journal, fully 50 per cent. of the wheat is showing green and all is germinating evenly.

Britain Has Refused Demands Of Arabs

Delegation From Palestine Told Proposals Were Unacceptable

London, England — The British colonial office issued a statement declaring that the demands of the Palestine Arab delegation, which has been in London discussing the future of their fellow-countrymen, for constitutional changes were "wholly unacceptable."

At the same time the Arab delegation, which recently declared it had reached a deadlock in the negotiations announced it would leave for Palestine on May 21.

The colonial office statement said the government had taken note of the Arab demands but had told the delegation its proposals could not be accepted "since they render impossible for His Majesty's government to carry out their obligations under the mandate."

RECONSTRUCTION OF C.N.R. WILL BE POSTPONED

Ottawa, Ont.—Without a division of any very little debate the Senate gave three readings each to the bills restoring the natural resources of Manitoba, Saskatchewan and Alberta to these provinces. They previously had been passed through the House of Commons as government measures.

Hon. F. A. Belcourt, acting government leader, in supporting the bill, said that the province was dealt with generously and fairly. It had been the government's desire from the first to restore as soon as possible and he was impressed with the spirit that animated the proceedings leading to the agreement.

Hon. W. B. Willoughby, Conservative leader, and the natural resources bill, said the question had been a great one for years, but he believed it had been satisfactorily settled. He referred to the fact that Alberta and Saskatchewan had been given the right to appeal to the courts on constitutional issues. The Manitoba Act, he pointed out, had been passed on by the Privy Council, but neither the others had been interpreted judicially.

Hon. A. B. Gillis reviewed the past history of the natural resources question in the west. Withholding of the resources from the provinces was a proposal to limit the world monopoly of securities to the world's medical and scientific needs.

To Broadcast Story

Montreal—The complete story of the approach of the R-100 airship across the Canadian reconstruction of the Canadian National Railways this year, Hon. T. A. Crerar, Minister of Railways, told the parliamentary committee which examined the estimates of the National system here. Mr. Crerar announced his intention to introduce a bill dealing with the amalgamation of the various constituent companies, but no progress has been made previous to the Easter recess, it was doubtful if that bill would now be dealt with in view of the approaching dissolution of parliament.

"I frankly confess," said Mr. Crerar, "that unanimity may define as Minister of Railways in February. I haven't been able to get a clear idea of what is involved though I think that it is a tremendous task.

"I doubt if the amalgamation will now be proceeded with, but it should be done next session."

Sir Henry Thornton, president of the C.N.R. informed the committee that so far on the railway was concerned all the investigations had been made in connection with the financial reconstruction and the company's recommendations were ready. Mr. Crerar, however, had had no opportunity to enquire into what was an exceedingly complicated problem. The situation was now one of simply determining what the government would decide on. The executives of the C.N.R. had submitted their recommendations this year.

The problem of financial reconstruction had been under intensive study for the past six years and he did not suppose that any more complicated task had ever been undertaken on account of the large number of records, mortgages, securities of different terms and rates of interest. These had all been finally catalogued and straightened out. It was now at the pleasure of the government and the will of parliament. The company itself was prepared to go ahead with the matter

The re-financing scheme did not involve the discontinuance of existing issues.

NEW HIGH COMMISSIONER

Hon. Vincent Massey, envoy to Washington, who has been named to succeed the late P. C. Larkin, as high commissioner for Canada in London.

Papers Recount Action Of Scotland Yard

Protest Against Method Employed In Reference To Leakage Of Naval Secrets

London, England.—In connection with the probe into the leakage of news from government sources concerned with the arrest of Candhi in India, the Newspaper Owners' Association has caused to be presented vote against certain sections of the Official Secrets Act of 1920 under which the detectives secured their warrants to invade the home and question the newspapermen. The Association has adopted a resolution regretting the government action and calling it unjustifiable. Members of a deputation who collected his news by a legitimate method. The association expresses concern for the freedom of the press and demands amendment of the act in the public interest. A copy of the resolution was forwarded to Prime Minister Ramsay MacDonald

Will Hold Opium Conference

League Of Nations Council To Meet In December

Geneva, Switzerland. - Measures for straightening the forces fighting the illicit opium traffic by calling up help from the "victim" countries were taken by the council of the League of Nations.

The council tentatively set December 1 for holding an international opium conference at which the chief matter for consideration will be a proposal to limit the world manufacture of narcotics to the world's medical and scientific needs.

To Broadcast Story

Montreal—The complete story of the approach of the R-100 airship across the Canadian reconstruction of the Canadian National Railways this year, Hon. T. A. Crerar, Minister of Railways, told the parliamentary committee which examined the estimates of the National system here. Mr. Crerar announced his intention to introduce a bill dealing with the amalgamation of the various constituent companies, but no progress has been made previous to the Easter recess, it was doubtful if that bill would now be dealt with in view of the approaching dissolution of parliament.

"I frankly confess," said Mr. Crerar, "that unanimity may define as Minister of Railways in February. I haven't been able to get a clear idea of what is involved though I think that it is a tremendous task.

"I doubt if the amalgamation will now be proceeded with, but it should be done next session."

Sir Henry Thornton, president of the C.N.R. informed the committee that so far on the railway was concerned all the investigations had been made in connection with the financial reconstruction and the company's recommendations were ready. Mr. Crerar, however, had had no opportunity to enquire into what was an exceedingly complicated problem. The situation was now one of simply determining what the government would decide on. The executives of the C.N.R. had submitted their recommendations this year.

The problem of financial reconstruction had been under intensive study for the past six years and he did not suppose that any more complicated task had ever been undertaken on account of the large number of records, mortgages, securities of different terms and rates of interest. These had all been finally catalogued and straightened out. It was now at the pleasure of the government and the will of parliament. The company itself was prepared to go ahead with the matter

The re-financing scheme did not involve the discontinuance of existing issues.

Chinese Stage Battle

Wrestling In Scene Of Mist Between Rival Political Factions

Winnipeg, Man.—Axes and baseball bats were wielded in Winnipeg's Chinatown as two Oriental factions clashed in riotous street warfare. Three Chinese were so seriously injured that they were taken to hospital, while numerous others were being attended at their homes. Seven Orientals are under arrest.

Rioting broke out shortly after midnight with two-score members of opposing political factions milling in the fray which began when two Orientals engaged in combat from store and residences in the surrounding area, within a block or two of the city hall, poured Chinese armed with axes, clubs and baseball bats. Several were knocked unconscious in the melee.

Police arrived while the riot was in full swing and the battlers dispersed within a few moments, leaving injured men on the road and in the gutter Fleeing combatants were arrested and the more grievously hurt were hurried to hospital. Condition of the three wounded men was reported as showing improvement.

Survey Of Natural Resources In B.C.

Information Is Being Sought On Peace River Block

Victoria, B.C.—Under an agreement between the British Columbia government and the Canadian government, the Canadian National Railways and the Canadian Pacific Railway, announced by Premier S. F. Tolmie, a systematic natural resources survey of the Peace River block will be launched almost immediately and carried on all summer.

The survey organization under Major C. R. Crysdale which conducted the Pacific Great Eastern Railway survey of last summer, will handle the Peace River block investigations also.

The government and the two railways will share the cost of the work jointly as before.

Supplementing the first notes of protest from any official quarter, Rear Admiral Hilary P. Jones, long an outstanding figure among naval men, told the Senate foreign relations committee that he not only disagreed with many of the decisions of the London conference, but thought a different settlement would have been entirely possible.

At the same time Admiral William V. Pratt, commander of the battle fleet, was addressing the house naval committee that the treaty signed here, that he was satisfied to have every eight gun cruiser than the navy previously had asked, and that in any case the United States delegation at London got the best it could.

SENATE AGREES ON RESOURCES BILLS FOR WEST

Ottawa, Ont.—It is not the intention of the government to proceed with the financial reconstruction of the Canadian National Railways this year, Hon. T. A. Crerar, Minister of Railways, told the parliamentary committee which examined the estimates of the National system here. Mr. Crerar announced his intention to introduce a bill dealing with the amalgamation of the various constituent companies, but no progress has been made previous to the Easter recess, it was doubtful if that bill would now be dealt with in view of the approaching dissolution of parliament.

"I frankly confess," said Mr. Crerar, "that unanimity may define as Minister of Railways in February. I haven't been able to get a clear idea of what is involved though I think that it is a tremendous task.

"I doubt if the amalgamation will now be proceeded with, but it should be done next session."

Sir Henry Thornton, president of the C.N.R. informed the committee that so far on the railway was concerned all the investigations had been made in connection with the financial reconstruction and the company's recommendations were ready. Mr. Crerar, however, had had no opportunity to enquire into what was an exceedingly complicated problem. The situation was now one of simply determining what the government would decide on. The executives of the C.N.R. had submitted their recommendations this year.

The problem of financial reconstruction had been under intensive study for the past six years and he did not suppose that any more complicated task had ever been undertaken on account of the large number of records, mortgages, securities of different terms and rates of interest. These had all been finally catalogued and straightened out. It was now at the pleasure of the government and the will of parliament. The company itself was prepared to go ahead with the matter

The re-financing scheme did not involve the discontinuance of existing issues.

BRITISH PREMIER SATISFIED WITH NAVAL TREATY

London England Prime Minister Ramsay MacDonald told the House of Commons the primary reason for the London naval conference which is declared, was the United States' program of naval construction

"We were perfectly agreeable that the United States should build to parity said Mr MacDonald, "not what had and been stated was 'What was the program of parity.'

"Many thought it was unwise to pursue the Washington agreement any further," continued the prime minister "and they said Why should we worry about the force America is pairing upon the waters" While this view was most attractive it was very unwise

If the whole world occupied to America is the same happy relations that we did, and do, it would be a sound view, but unfortunately that was not the case Whether we loud notice of what America was doing or not other nations would and with the building of these other nations we are concerned

"Consequently we were forced to the conclusion that the foundation of real security was an international understanding between America and ourselves, such as we were able to effect at the London conference That piece of work has been done

"The spectacular effects would be greater had more ships if the London conference had not been from Washington only 4 three-power conference which would have been a high noon conference, pure and simple between the United States, Japan one ourselves

"But America could not obtain security by an agreement between the three powers only"

Washington, D.C. — Two gruybated admirals of the United States the navy have disagreed publicly in a half-century of distinguished service behind him, disagreed pointedly over the merits of the naval treaty in London

Sounding the first note of protest from any official quarter, Rear Admiral Hilary P. Jones, long an outstanding figure among naval men, told the Senate foreign relations committee that he not only disagreed with many of the decisions of the London conference, but thought a different settlement would have been entirely possible.

At the same time Admiral William V. Pratt, commander of the battle fleet, was addressing the house naval committee that the treaty signed here, that he was satisfied to have every eight gun cruiser than the navy previously had asked, and that in any case the United States delegation at London got the best it could.

New Submarine Launched

Is First Of Its Class in the Royal Navy

Chatham, England — The submarine "Rainbow," 1,475 tons, first of her class in the Royal navy, was launched. There are three other submarines of the class and 13 others in hand This total of 16 being designed to replace 30 submarines which will automatically become obsolete by the end of 1932

If the latter submarines are laid down last June 16, the British submarine strength will be cut from 50 to 30 at the end of 1932

The naming ceremony was performed by Admiral Sir Reginald of Vice-Admiral Addison, director of dockyards, and a religious ceremony, a bottle of Australian sparkling was broken over the stem bow of the vessel and she slid into her element

No Change In Surveys

Ottawa, Ont Return of the national resources of the western provinces, which is expected to bring an arrangement between the Dominion government and the provinces concerned regarding the continuation of aerial forest protection work in the west is having no immediate effect upon the air fleets of the government, the chief of the air service said yesterday for the protection and survey of wide areas all over the province.

Investigate Fellowship

Winnipeg, Man.—Dr. Murray Clephorn, Baldur, Man., has been selected for a fellowship in Public Health in the Connaught Laboratories of the University of Toronto. Word to that effect was received by Dr. T. A. Patrick, deputy minister of Public Health, from Dr Fitzgerald, director of the Connaught Laboratories and the school of Hygiene of the University of Toronto.

HER MAJESTY THE QUEEN AND HER GRANDDAUGHTER

Queen Mary and the members of the royal family have been once again brought strikingly into the spotlight of public esteem by the biography of her majesty by Charlotte Cavendish, recently published in London.
